NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in the case of Exports, 'Exports of Domestic Produce and Manufacture.'

αThe figures for Mexico include coin and bullion.

*Figures are for the years 1904, 1905 and 1906.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke,* The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
France.....	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
Great Britain.....	A. Poindron, 101, Rue Réaumur, Paris.
	P. B. Ball, Room 39 and 40, Central House Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
Japan.....	P. B. McNamara, Canada Chambers, 36 Spring Gardens, Manchester.
Mexico.....	W. A. McKinnon, Sun. Buildings, Clare Street, Bristol.

	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mail Building, Cardiff, Wales.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,

BIRMINGHAM, ENG., February 1, 1906.

AMERICAN BACON SOLD AS CANADIAN.

I have been interviewing a number of the largest Canadian bacon sellers in this district in connection with a claim made that American bacon was being sent in here cured in Great Britain and sold as Canadian. Also that at least one United States firm was imitating Canadian Wiltshire, and it is being put on this market as Canadian Wiltshire.

CANADIAN BACON SHOULD BE BRANDED 'CANADIAN.'

One of the largest firms in this district handling Canadian bacon was very decided in his remarks as to some of the bacon being sold in this country as Canadian; not so much that which was coming direct, and which had been cured there. His statement to me was that 'Canadian bacon is so good when cured by your regular houses, that we are not afraid to sell it now as Canadian bacon, and I should very strongly advise the Canadian curer for his own protection, or the Canadian government for the protection of the customer in Great Britain, branding every side of bacon leaving Canada—'Canadian Bacon.'

This firm showed me the goods as he stated. He showed me Canadian bacon as he had been in the habit of buying it for some time, firm, good in colour; in fact, as fine a bacon as could possibly be sent. He also showed me a flabby side that looked as if it had been oil-fed, no firmness whatever, but both qualities were sold to him as Canadian bacon.

P. B. BALL.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.*(Mr. D. H. Ross.)*

STOCK EXCHANGE BUILDING, MELBOURNE, January 13, 1906.

AUSTRALIAN MAILS DESTROYED BY FIRE.

On January 6 the Commonwealth postal authorities were advised that a large portion of the Australian mails for Canada and the United States—probably over 50 bags—had been destroyed by fire while in transit from San Francisco to eastern points. The mails destroyed left Sydney, N.S.W., on November 13 last, and carried a consider-

able amount of correspondence from this commercial agency to Canadian manufacturers and exporters. It is, of course, impossible as yet to determine if any letters from this office reached their destination safely, but copies of same are going forward by this mail.

FAILURE OF THE TASMANIAN APPLE YIELDS.

In September last it was anticipated that Tasmania would make a record this season in exporting apples to England. A little later when the whole of the fruit trees were in full blossom they were subjected to continued cold weather and very heavy rains, with the result that the Tasmanian apple crop this year will be one of the biggest failures ever experienced in the island state. Were it not for the increased acreage coming into bearing the failure would be more pronounced. As it is, the actual yield this season will certainly not be more than half the average production for the past two years.

PROBABLE 1906 EXPORTS OF TASMANIAN APPLES.

From reliable sources, I have ascertained that instead of anticipated shipments of over 700,000 cases of apples being exported from Hobart to England, during March and April next, it is not now expected that the exports will exceed 380,000 to 400,000 cases as a maximum. Outside of England the only other over-sea shipments of Tasmanian apples are made to South Africa, which takes about 5,000 to 6,000 cases per annum.

VICTORIAN AND SOUTH AUSTRALIAN APPLES.

The exports of apples from the states of Victoria and South Australia have never yet assumed anything like the formidable proportions of Tasmania. The same weather conditions have been experienced throughout these states and the fruit crop is at least a month late. It is now almost a certainty that the limited production of apples this season from Australia will not have the slightest influence in the lowering of prices in England.

OPPORTUNITY OF CANADIAN APPLE SHIPPERS.

Late Nova Scotian and other Canadian apples should obtain somewhat higher prices in England during April and May next, owing to the curtailment of the shipments usually placed upon the British market at that season of the year. When it is generally known in London that the imports from Tasmania will be about 50 per cent less than usual the immediate effect will be to harden prices.

EXPORTS OF AUSTRALIAN HORSES.

During the year 1904, the Commonwealth exported over 13,000 horses which were valued at £225,780. The chief markets were India, Mauritius and Java. The Indian market is the principal one as is evidenced by the fact that 8,000 Australian horses, valued at £141,682 were shipped, chiefly to Calcutta, in 1904. The demand for remounts required by the Indian army is a constant one, and the Commonwealth trade has, in recent years, been accentuated by the pronounced and continued success of Australian bred horses at the principal Indian race meetings. Breeders are now endeavouring to produce the class of cavalry horses favoured by the Japanese military authorities, although, so far, the exports to Japan have been very limited.

IMPROVING THE BREED OF AUSTRALIAN HORSES.

With a view of increasing the Indian trade, the State government of Victoria has made a monetary grant for improving the breed of horses. The money will be expended by importing a number of pure bred Welsh pony stallions and brood mares in order

to form the nucleus of a pedigree stud for this breed. It is proposed to lease some of these ponies to persons in various districts throughout the state, on the recommendation of agricultural societies, on condition that their services will be made available at a moderate fee. It has been decided for the present year to restrict the expenditure of the grant to Welsh ponies on account of the fact that there is urgent need of introducing new blood of this strain into Victoria.

CANADIAN TOBACCO IN AUSTRALIA.

One well known Canadian brand of cut tobacco has been well introduced and is to be found for sale in tobacconists' stores in various Australian centres. The manufacturers have been so much encouraged that they shortly hope to produce a high class plug tobacco to fill the exacting requirements of Australian consumers. A small shipment is now due, and if it is satisfactory a large trade can, with confidence, be relied upon.

AUSTRALIAN TOBACCO EXPORTED TO CANADA.

The manifest of the December mail steamer for Vancouver revealed the fact that a small shipment of Australian manufactured tobacco had been made to Canada by a Melbourne factory. If this tobacco was made of American grown leaf, it appears extraordinary how the home competition can be met when double freight charges, &c., are considered.

THE MELBOURNE ICE SKATING RINK.

In my report of October 2 last (Monthly Report, October, 1905, Page 681), I referred to the construction of an ice skating rink in Melbourne. The company interested is expending a large sum of money upon the building, which is rapidly nearing completion. The opening of the rink is looked for at the end of April next. The ice area, on the main floor, will be about 185 x 70 feet, underneath which will be the ordinary cold storage for perishable commodities, so that the company will derive revenue from two sources. All appointments of the rink will be of an up-to-date character. As the building is situated in a convenient location, the enterprise of the promoters should bring payable results, in a city of over a half a million population, where ice skating has hitherto been entirely unknown.

MARKET FOR CANADIAN SKATES.

In Monthly Report for September, 1905, Page 530, published on November 13 last (see Trade Inquiry, 1092), there appeared an inquiry, made on behalf of a Melbourne hardware firm, for catalogues and lowest wholesale prices f.o.b. New York for Canadian ice skates. In reply to their inquiry the firm received two indefinite letters, one catalogue, but no export discount sheet. In Monthly Report, October, 1905, Page 682, I also requested catalogues and wholesale price lists, without delay, for skates, and, so far, not one wholesale quotation has been received. This week the promoters of the Melbourne skating rink asked me to submit catalogues and price lists of all the Canadian skates as they desired to forward a large order, but the dilatoriness of the manufacturers is alone responsible for the likely loss of this order. The order has not gone forward, but without the necessary information it is hardly possible to influence business to Canadian suppliers.

MANUFACTURERS SHOULD TRUST COMMERCIAL AGENTS.

Canadian manufacturers should, in their own interests, place confidence in the energy and business acumen of the commercial agents of the Dominion. When—for special reasons indicated in the Weekly Reports—an urgent request for catalogues and price lists is received by manufacturers it is only a reasonable assumption that the required information should be promptly mailed (in good faith) to the commercial agent

desirous of obtaining it. There are sufficient impediments in the track of Canadian export business without adding more to them. If the Canadian makers of skates had promptly complied with my request, which was published on November 20 last (Monthly Report, October, 1905, Page 682), they would have had their catalogues and price lists submitted to the rink proprietors—without any personal preference upon my part—and business would likely have resulted.

WHY CANADIAN CATALOGUES ARE WANTED.

For the benefit of Canadian manufacturers who did not see the original report, I beg to direct their attention to the following paragraph, which appeared in Monthly Report, June, 1904, Page 1582, of August 1, 1904, in which I wrote as follows:—

‘The recent action of the Department of Trade and Commerce in inviting manufacturers to supply the various Canadian commercial agencies with catalogues, export price lists and discount sheets, is an eminently commendable departure, and really implies much more than is superficially expressed. The object, in the case of every commercial agent, is, obviously, to give him such a firm grasp of the manufacturing advance made by Canada as that he shall, without delay or difficulty, be in a position to advise any local merchant as to Canadian sources of supply and conditions of delivery. Canadian manufacturers or exporters must forthwith disabuse their minds of any suspicion of the idea that the commercial agents would show undue preference to one manufacturer over another. For the commercial agent’s influence, as a whole, is employed on behalf of all Canadian exporters, and can take no cognizance of individual or associated speculation. It is well worth some sacrifice of a commercial agent’s time and convenience to satisfy on the spot intending importers anxiously seeking information regarding Canadian goods, when the question of over 10,000 miles between Canadian manufacturing centres and Australia precludes intending buyers sending for price lists and obtaining quotations in time for a season’s or urgent requirements. The question of having quotations in sterling (£ s. d.) is not essential, as importers are accustomed to purchasing goods from United States price lists. Canadian firms already represented in Australia should inform the commercial agents of the names and addresses of their representatives, so when occasion arises the latter may be referred to.’

CATALOGUES LOST IN THE MAILS.

Catalogues addressed to the Canadian Commercial Agents in Australia are—in official courtesies—delivered without any custom duty being demanded, therefore, there is no obstacle to overcome in sending them. I have frequently been advised by Canadian correspondents that they have forwarded catalogues which, for some inexplicable reason, have never been received at Melbourne. Considering the small extra cost, and important interests at stake, I strongly recommended the catalogues being sent by registered packet mail to insure safe transit.

CANADIAN CANOES—ADVANTAGE OF CATALOGUES.

In my report of December 2 last (Monthly Report, November, Page 894), I referred to the market which is waiting to be developed in Australia for Canadian canoes. Through catalogues sent to this commercial agency, a further small order for a number of these pleasure crafts went forward to Canadian manufacturers by the last mail. The summer being now well advanced it has been thought advisable, by those interested, to postpone the formation of a canoe club in Melbourne until next spring, when the number of canoes on the river will be considerably augmented.

COMPETITION OF ITALIAN ASBESTOS GOODS.

Some Canadian manufacturers of asbestos goods have notified an advance in their quotations to Australian importers for the apparent reason that the orders received

were not of sufficient magnitude. It should not be overlooked that some allowance is necessary for initial business to enable importers to prove any make of goods new to this country. I have ascertained that orders for considerable quantities of asbestos goods have recently been sent from Melbourne to Italian manufacturers, whose prices place the Canadian product outside of competition.

WOOD DISTILLATION IN VICTORIA.

A Melbourne company purposes establishing a new industry in this state, by erecting a plant for the distillation of wood, in order to procure a number of by-products, particularly acetate of lime from which acetate of soda and other chemicals are obtained. A suitable wood is readily available, and negotiations are now proceeding with the government to secure a grant of Crown lands. The cost of the plant and buildings is estimated at about \$60,000. It is exceedingly difficult, from the import returns, to estimate what the trade to be developed is worth, but, as an adjunct to an existing extensive business, the promoters are in a position to take the necessary risk.

AVERAGE PRICE OF AUSTRALIAN BUTTER IN LONDON

The Victorian government dairy expert places the average price obtained for Australian butter in London in 1904 at £5-8-0 per cwt.—say 23½ cents—per lb. The saving in ocean freight, boxes and commission, during the latter half of 1905, represented 4s. (97 cents) per cwt., thus raising the average for the entire year to £5-10-0 per cwt. The exports of butter from Victoria alone during 1905 amounted to 36,478,218 lbs., valued at £1,791,350, which shows the importance of the dairying industry in this state. Latest cabled sales of choicest Australian butter in London were £5-14-0 to £5-18-0 per cwt.

MILKING MACHINES WANTED.

If some inventive genius could produce a milking machine of entirely satisfactory mechanism there is an enormous market available for exploitation in Australasia. The only retarding factor in the butter industry has been the trouble of insuring proper milking. Very many dairy farms capable of carrying 80 to 100 or more cows at present only have herds of 30 to 40—the limit, it may be said, that can be handled without making absolute slaves of the producer's family.

These farms, as a result, rely only partly on dairying, much of the land being used for other less remunerative, but less arduous, branches of agriculture. Paid labour has given generally poor results. Once surmount this labour question, and a vast expansion of the butter industry in Victoria will take place. The means to increase the herds are at hand, and in three years the number of cows milking could be doubled. Hundreds of farmers now grain growing only would enter into dairying if the labour trouble were removed. The milking machine is the solution of this difficulty.

AUSTRALASIAN WOOL EXPORTS FOR 6 MONTHS, 1905.

The Australian wool exports during the first six months of the season 1905-06 (to December 31) showed a gain of 144,322 bales as compared with shipments during the corresponding period of the previous year.

The following comparison of the exports is of interest:—

First half.	Australia. Bales.	New Zealand. Bales.
1903-1904.	609,371	113,374
1904-1905.	848,377	128,344
1905-1906.	992,699	120,729

AUSTRALIAN WHEAT YIELD, 1905-06.

The weather has been so favourable for harvesting that it is now considered that the Australian wheat yield for this season will be considerably larger than estimated two months ago. From official and private comparisons made it is thought that 63,000,000 bushels of wheat may be regarded as the minimum yield.

EXPORT QUOTATIONS FOR AUSTRALIAN WHEAT AND FLOUR.

Large sales of f.a.q. wheat were made in Melbourne yesterday—particularly for export to South Africa—upon a f.o.b. basis of 3s. 3d. (79 cents) per bushel. Flour for export is quoted at £7 2s. 6d. to £7 5s. 0d. (\$34.66 to \$35.27) per ton according to brand and size of parcel.

CANADIAN STOCKS AND DIES.

Through catalogues and price lists sent to this commercial agency, several initial orders are going forward by this mail for Canadian stocks and dies. The catalogues, &c., were placed in the hands of an energetic commission house, and thus an introduction of this new line of goods into this market is now assured. This item is another illustration of the advantages derived by Canadian manufacturers in sending catalogues and price lists to commercial agents.

CANADIAN GLACE AND CHROME KID.

Two days ago I inspected a sample shipment of glace and chrome kid leathers of Canadian tanning which had just arrived. This line is entirely new to Australia, the qualities and values will meet competition from other sources of supply. The manufacturers have most capable representation and large and constant orders will result if the quality is maintained. The Australian customs duty is 15 per cent *ad valorem*. The Commonwealth imports of leather in 1904 were valued at £300,831.

VICTORIAN COMMERCIAL AGENTS IN LONDON, JAPAN AND SOUTH AFRICA.

Under the supervision of the Agent-General for the State of Victoria in London is established a commercial agency branch in which samples of wools, cereals, canned meats, fruit and general produce are displayed. Recently the government of Victoria appointed—in the interest of exporters—one commercial agent for China, Japan, &c., and another for South Africa. Next to Great Britain in importance is the volume of Victorian exports to Africa, and thus further efforts are being made to develop it.

ADVANCE IN FREIGHT RATES FROM NEW YORK.

The advance in freights from New York to Australia appears to be making further progress. The exact position is not altogether clear, as probably a good deal depends on the arrangement of schedule rates by agreement between the different lines of steamers. The general effect is to increase the cost of importations—especially in the heavier classes of goods. In the future, it is thought probable that the establishment of higher rates of steamer freights from New York may tend to divert a certain amount of business back to sailing vessels, although the major portion of the trade will be continued by steamers. I have seen a recent cable from New York, in which steamer freights were quoted at £1 12s. 6d. (\$7.91) per ton of 40 cubic feet, and £1 1s. 3d. (\$5.16) per ton weight. Tonnage by sailers is quoted nominally at £1 (\$4.86) measurement and 17s. 6d. weight.

D. H. ROSS.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, February 3, 1906.
GRUBBEGD No. 4.

IMPORT AND EXPORT TRADE OF DENMARK.

The State Statistical Office of Denmark has recently issued the usual yearly tabulated statistics: Denmark's imports and exports of goods during 1904, from which the following is an extract:—

The value of the goods imported from abroad during 1904 for home consumption amounted to 124·3 million dollars. The value of home produced goods exported to foreign countries has during the same year amounted to 95·6 million dollars. The excess of imports over exports during 1904 amounted therefore to 28·7 million dollars.

The comparative figures for the years subsequent to 1896 are specified in the following table:—

Year.	Imports Value.	Exports Value.
1904.....	124·3 million dollars.	95·6 million dollars.
1903.....	118·3 “	93·9 “
1902.....	115·6 “	84·9 “
1901.....	105·8 “	77·5 “
1900.....	111·0 “	74·9 “
1899.....	106·6 “	72·0 “
1898.....	97·9 “	63·5 “
1897.....	86·9 “	64·9 “

SWEDISH INVENTIONS IN IRON AND STEEL.

Two very important inventions in connection with the iron and steel industries at present attract considerable attention. The inventors are two Swedish engineers, Mr. Grondal and Mr. Kjellén, who have found out a new method for producing iron from the ore. By the system of Mr. Grondal the ore is crushed to fine dust, and the iron is drawn out by the aid of strong magnets, whereafter it is moulded in brick forms. Mr. Kjellén takes for the same purpose electric power in use. ‘Metallurgiska Patent-Bolaget,’ who owns the patents, have now made contracts with French, German and Italian firms for the use of Kjellén's method for a production of 2·3 million tons of steel and iron per year. Similar agreements have been made for the Grondal method with several of the most important iron and steel companies of the world, among these Krupp, of Essen, Germany, the cannon manufacturer.

THE BIRKELAND FERTILIZER.

Referring to my report of January 4, in regard to the new fertilizing product (nitrate of calcium) manufactured from the nitrogen of the atmosphere, the price of this new product has been fixed at kroner 15·50 (\$4·13) per 100 kilogrammes (220½ lbs.) to the farmers, while Chile-saltpeter costs them kroner 20 (\$5·33) for the same weight. Experiments last summer have proved that the two fertilizers are very near of equal value to the plants.

CONDENSED MILK INDUSTRY OF NORWAY.

The production of condensed milk commenced in Norway about the year 1870. From 1871 to 1875 there was exported on an average 26,000 kilogrammes (57,000 pounds) per year. In 1904 the export had gone up to 11,181,000 kilogrammes (24,600,000 pounds).

P. B. MACNAMARA.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., February 9, 1906.

APPLES.

Apparently, from reports that I have received, a large quantity of badly graded fruit from Canada is placed on the market here at the present time. The following is a quotation from a letter from a large importing firm in this district:—

‘We are glad to render you any aid in our power to safeguard the fair name of Canada, which during this last season is being seriously compromised by what we may call “slack methods of grading and packing.”

‘Formerly, our customers took the fruit without question, their confidence (based on past experience of the honest grading and packing), having been secured, but since the introduction of unsatisfactory American methods of packing Canadian apples, the honest and dishonest packed goods are regarded with suspicion, much to the disadvantage of your country and the honest grower and packer.

‘To win back the confidence of the trade, will not be the work of a moment; how best that may be accomplished, you are far the better judge.

‘In any case, we are of opinion that the plan of grading and marking should be continued. It is simple and has worked well in the past. With keener oversight and fitting penalties against the nefarious ones, confidence will in time be restored and values increased.

SHOULD NOT DEAL THROUGH BROKERS.

‘Whilst addressing you, we venture to mention another point of importance, which has reference to the system of passing the fruit through the brokers, which in our experience has proved both costly and wasteful.

‘We make a point of dealing directly with the grower, if at all possible; Americans we can get through on commission, and why not the Canadian produce? Our references can be obtained at any time, and are satisfactory.

‘At any time we are prepared to arrange to take from 200 to 300 barrels, week^{ly}, throughout the season, and more when confidence is fully restored in the packing, in which case our American connection would be dropped willingly.’

CHEESE.

The following is a statement given me by a large north country importer of Canadian produce:—

‘Canadian cheese is the best on the market. Every one knows that. My own firm imports 90 per cent of all the cheese we sell from Canada; but why don’t Canadians make their cheese a little softer and more crumbly, so that when it is cut into it is about as near an approach to a lot of bread crumbs as possible?

‘This is the style of cheese that the Yorkshireman likes, and this is what he asks for, and when he gets it he will take no other.

‘I have no suggestions for improved packing, although perhaps if some of the dairymen across the water, were to try the idea of making smaller cheeses, averaging between 30 and 40 lbs., they would find an exceptional demand for these goods in England.

‘In fact I had an inquiry this morning for this very thing, from a retailer here, who only numbers one amongst the many who have made the same suggestion to me. A great many of them have not an immediate demand for the big cheese, as they cannot get through them quickly to stock regularly; thus both the Canadian exporter and ourselves lose trade.’

EGGS.

‘The demand for Canadian eggs is not what it should be, when we contrast it with the demand for other Canadian produce. I cannot give you any reason why, but somehow my customers are chary of buying them, perhaps the fault lies in the fact that they have never been pushed by the wholesale houses, like Russian and Irish eggs, and this makes the small retailers afraid of buying something out of the common, or perhaps the responsibility rests with the Canadians themselves, in not making these products known in this district. Whatever the reason is, the packing is not to blame, but Canadians should not ship too many pickled eggs; we get enough of these from the continent. Glycerined eggs are the class of goods which will always have the biggest demand.’

POPULARITY OF CANADIAN BUTTER.

‘The popularity of Canadian butter has increased so much, that with the exception of Danish, we sell more of it than any other, but one thing which should not be

encouraged, is the idea of shipping Canadian butter in oblong boxes, weighing about 1 cwt.

‘Consider what a contrast this makes upon a retailer’s shop counter, an oblong shaped block of Canadian butter placed next to a cask-shaped block of Danish. It may only be a detail, but nevertheless the appearance of it strikes people as being “inferior,” and when they get this notion it never goes well. I cannot understand why Canadian dairymen should use such an amount of salt in their butter. It is entirely too highly salted to suit the taste of the best buyers in our market.’

WHEAT.

Last year, Hull had the honour of being the second wheat-importing port in the United Kingdom, and the fourth in the world.

The imports to Liverpool, 1905	44,866,400 bushels	
“ Hull, 1905	35,831,536	“
“ London, 1905	30,536,300	“

MAPLE BLOCKS.

Keighly, a town in this district, has very many manufacturers of mangles and clothes wringers; some 3,000 of these machines being exported weekly from this town. This necessitates 6,000 wood rollers, which are chiefly made from maple. The usual sizes are from 22 inches to 26 inches by $\frac{3}{4}$ inch to $6\frac{1}{2}$ inches. Two manufacturing firms there are open for immediate quotation, for 12,000 blocks.

DEMAND IN LEEDS.

There is also a very large demand in Leeds for the same class of goods. The prevailing price is from 2s. to 2s. 2d. per roller in the rough. The maple blocks should be prepared for shipment, so as to necessitate the people here only to turn the rough edges off. The greater number of these firms will buy the block, either seasoned or unseasoned; in fact, a great number of them prefer to buy them unseasoned, and have them seasoned in their own yards.

HIDES AND LEATHER IN DEMAND.

There is, at the present time, an enormous shortage of leather, in order to meet the requirements of the boot and shoe manufacturers here, and necessarily there is a large demand for hides of all kinds, both dry and wet, also sheep-skins.

The total importation of hides into England during 1905 was in the neighbourhood of £1,700,000 sterling, and of this amount less than £18,000 came from Canada. Whilst during the fiscal year 1904-1905 there was an export to the United States of \$2,629,116. The prices offered here at the present time are exceptional, and I feel sure that the hide exporters in Canada would do well at the present juncture to get in touch with the leather men of England.

SCARCITY OF ALL DESCRIPTIONS OF LEATHER.

The following extract from *The Trade Journal* here particularizes the existing trouble over the shortage of leather:—

‘The great scarcity of all descriptions of leather suitable for boot and shoe manufacture has brought about an acute crisis in the trade, and very heavy losses have been suffered. Manufacturers who had booked large orders for delivery in March and April now find that it is impossible to secure adequate supplies of leather, and what they do secure can only be purchased at a great advance in prices. It is impossible to meet the contracts placed except at a very heavy loss, and the position has become so bad that large manufacturers declare that nothing like it has been experienced for 50 years.

Manufacturers are compelled to appeal to buyers to revise and to pay enhanced rates on the orders already placed. Where this is done manufacturers will be able to tide over their difficulties, but where buyers insist upon deliveries in accordance with the terms of their contracts, enormous losses will be suffered.

‘One firm employing over 500 workpeople have already had to call their creditors together, although at the end of the year their balance-sheet showed an excess of assets over liabilities of about £2,000 after a period of great depression. The firm have now found the situation so serious that they decline to go on further. The multiple shopkeepers are also affected, and a meeting of creditors of a concern trading in Lancashire was held in Leicester yesterday afternoon.

‘Leicester is by far the greatest leather consuming centre in the kingdom, and it is a noteworthy fact that nine-tenths of the leather used comes from America. The imports from Australia are nearly all bottom leather, and the French and German tanners have been completely put out of the field by the Americans. The leatherdressers in America produce nearly all the glace kid and box calf now so extensively used for uppers, and American red sides are also very heavily consumed. The great scarcity in skins in America thus practically dominates the English market.

‘From a great variety of other causes, including the greater demand for leathers for Japan, the world’s supply of hides has for the present been overtaken by the consumption. Evidence of this is furnished by boot and shoe manufacturers offering to buy 10 to 20 tons of certain kinds of leather at the prices quoted by sellers, and having their orders declined because the supplies were not procurable. Strenuous efforts will be made to mitigate the evils of the greatest emergency by wholesale houses maintaining smaller stocks of boots and shoes, and by limiting as far as practicable the reserve supplies at retail shops, while manufacturers will also of necessity be compelled to work on a hand-to-mouth method. Leather merchants have very small reserve stocks, and under existing conditions they are absolutely indifferent to business unless the extreme limit of the enhanced rates is paid.

‘As far as Leicester is concerned, boot and shoe manufacturers never entered on a spring and summer’s trade with such gloomy prospects. For the last half of 1905 they could not get the orders; now that they have got the orders they cannot secure the raw material.

‘In consequence of the shortage, Leeds boot manufacturers declare that the retailers will be compelled to advance the prices of boots at least 10 or 15 per cent. The makers contend they have already too long borne the greater share of the increased price of production.’

The boot and shoe trade in this district has changed very wonderfully during the last two years, before that time the English manufacturer stuck to the lines which had been followed in the manufacture of boots and shoes for many years, and consequently found that he was entirely behind the times, both in appearance and in style.

The large boot and shoe companies realizing this, and seeing that they were losing their trade to the Americans, sent over expert workmen to the United States, in order that they might be proficient and fully understand the American system of manufacture. They also imported the very best and up-to-date of American machinery. The result is, that you can now find as stylish boots and shoes manufactured in this district as you will find in either Canada or the United States. Still a large amount of the leather used, especially of the finer grades, is imported from the United States, and during the last year such export amounted to 2½ millions sterling in leather, and £500,000 in boots and shoes.

JNO. B. JACKSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, January 16, 1906.

TRADE NEW SOUTH WALES, 1905.

The full returns of this year for any of the Australian states of the trade of 1905 have not yet been made up, but those published of this state are practically correct. They show the trade of 1904-5 to have been :—

	1904.	1905
Imports.....	£13,133,857	£14,606,000
Exports.....	23,089,785	24,041,000

These figures realize the best anticipations made at the beginning of the year, and show that the trade of 1905 is better than the previous year by nearly a million and a half in the imports, by nearly a million of exports, and that the balance of trade is over nine and a half millions of pounds sterling. This happy condition of affairs has been brought about by the increase of over two million pounds sterling in the value of wool exported, but these increases have also been shared in by nearly all the pastoral products. The export of frozen mutton has more than doubled. Sheep skins and fur skins show a like improvement. The harvest of 1903-4 being much less than that of 1902-3 there was necessarily a decline in the value of the wheat and flour exported.

IMPORTS.

In imports the following figures show the trend of the trade:—

Articles.	1904.	1905.	—
	£	£	£
Ale and beer.....	134,312	127,765	Decrease, 6,547

Wines.....	27,597	32,457	" 4,860

PROSPECTS FOR 1906.

As a consequence of the healthy position of trade for 1905 and the fact that the harvest for 1905-6 is likely to be twenty and a half million bushels, giving an excess for export of four million bushels more than the amount exported last year, and the high prices for Australian products and meals, the present year opens with even brighter prospects than that of last. The rains have been largely favourable, so that there is abundant pasturage for the forty millions of sheep that the state now possesses. The improved state of affairs means an increased consumption with better prospects of introducing new goods. There is a small immigration into this state from outside of the Commonwealth, and more from other states, who are turning pastoral lands into farms. The examination of the imports make it clear also that home manufactures are also increasing, as the importation of soft goods is larger, but that of hats and caps smaller. The importation of boots and shoes from abroad has materially decreased, as has also that of leather, but the production of home-made boots and shoes and of local leather has greatly increased. The importation of machines, machinery and of metals have very greatly improved. Taking a view of all the industries, the year 1906 promises to be as prosperous as any in the history of the state for the last forty years.

PACIFIC CABLE.

The Commonwealth parliament has ratified the agreement between the Government of the Commonwealth and the Eastern Extension Company with the following important clauses introduced by the Senate and accepted by the House:—

‘This agreement shall be in substitution for the two agreements and the provisional arrangement mentioned in the fourth recital of this agreement. This agreement shall expire on the thirty-first day of December, nineteen hundred and fifteen.’

‘Provided, further, that the company shall within three months from the first day of January, nineteen hundred and six, execute the agreement as so amended.’

These amendments definitely fix the period for which it shall run, and the time open to the company for executing it. The original agreement was open to doubt as to the period in which it might be terminated, and made no provision whatever limiting the time in which the company might execute it. In the discussion members pointed out the difficulties under which the Pacific cable laboured as having to do its business through post office agents, and urged that steps should be taken to promote its interests by the Post Office Department, and the following resolution was passed:—

‘That the Government should do everything in its power to make the state-owned Pacific cable a financial success and an up-to-date business enterprise.’

Senator Staniforth Smith pointed out eleven privileges granted by the Eastern Extension Company which were not afforded by the Pacific cable.

Two rival wireless telegraph companies have representatives in Australia, proposing to open stations and conduct business; first, between Tasmania and Australia, and later between New Zealand and Australia. If they are successful the first will not affect the revenue of the Pacific cable, but will rather tend to improve it. The latter might affect the amount of business done over the Pacific cable between Australia and New Zealand.

SKINS AND HIDES.

The price of sheep skins has not altered since my previous report, but the supply has been limited and of inferior quality.

Hides.—The supply of hides is short of the demand. The Queensland Meat Works, which have furnished a quality much liked in Canada, are running periodically, and some dealers have stated that they do not care to supply quotations to Canadian inquirers at present. The last sales were as follows:—

Queensland butchers' hides, heavy weights (60 lbs. up) 6½d. to 7d. per lb.; medium weights (45 lbs. to 54 lbs.) 6d. to 6¾d.; light weights (36 lbs. to 42 lbs.), 5¾d. to 6½d.; dry hides, 6d. to 8d.; New South Wales butchers' hides, extra heavy weights (68 lbs. up), 6½d. and up; heavy weights (60 lbs. to 66 lbs.), 5¾d. to 6¾d.; bulls, 3¾d. to 4½d.; medium weights (44 lbs. to 58 lbs.) 5¾d. to 6½d.; light weights (35 lbs. to 42 lbs.), 5¾d. to 6½d.; inferior and faulty, 2d. to 4½d.; dry hides, 6d. to 8d.

In fur skins the only change noted is a decline of 5d. per doz. in opossum skins. Rabbit skins are quoted at, first from 8d. to 9d. per lb.; medium, 5d. to 7¾d., which is slightly below previous prices.

TANNED SHEEP SKINS.

I have inquiries for tanned sheep skins for Canada, but tanners, on account of the high prices for skins, decline to quote for any quantity for future delivery. Leather has consequently advanced during the month; but Canadian tanners are very much of the opinion of local tanners, that the conditions do not warrant their quoting at present for this market.

TIMBER.

Some of the British Columbia timber mills have re-opened their trade with Australia, and six cargoes are now under order for Sydney and Melbourne, besides all the available space on the steamships being utilized for this purpose. The mills in the past have been in the habit of selling their products to Australia through San Francisco brokers, but the mills now engaged in the trade have appointed local agents who will look after their business. This will reduce the number of hands through which the timber has to pass by one, and bring the mills more directly in contact with consumers. The agents will directly be interested in looking after the interests of the mills should any dispute as to quality arise. These disputes that at one period made the Sydney market an undesirable one, have during the last two or three years, become exceedingly few, and substantial damages have already been given. The new conditions, it is to be hoped, will lead to a steady improvement in the trade between British Columbia and Australia.

APPLES.

The settlement of the accounts for the condemned fruit brought out by the 'Mona' has unfortunately resulted in a heavy loss as anticipated in my last report. A quantity of the fruit that had been picked over and fumigated, notwithstanding the circumstances under which they were sold, brought an average price of 12s. 7½d. per bushel case. Deducting the charges for commission, wharfage, duty, all legitimate charges that would be incurred in shipping sound fruit to this market, and the freight from Vancouver, the fruit realized \$2 per bushel f.o.b. Vancouver. This is good evidence that there is a profitable market for fruit under the proper conditions, but shipments which violate these conditions must always result in serious loss.

POTATOES.

For three months, potatoes reached an exceedingly high price in Australia. Some came from British Columbia and arrived in excellent condition, but only small shipments could be had in proportion to the demand.

SELLING HIDES.

The hides of the meat works are preferred in Canada because the flaying can be depended upon as being well done, and tanners ask for these hides with the anticipation of obtaining them direct from the works. As a rule the meat works sell their

product by auction, and cannot therefore quote for shipments abroad. Occasionally the meat works kill for their customers, who dispose of the hides of their own cattle. The only method of securing these hides would be through an exporting house who purchases them at the auction sales.

NO DUTY ON CATALOGUES TO NEW ZEALAND.

Catalogues sent to New Zealand firms through the mail are not subject to duty, and the prepayment of duty is not needed in New Zealand as in Australia.

NAMES OF REPRESENTATIVES.

I have more than once asked that Canadian firms who have representatives in Australia and New Zealand should send me their address. It has happened that the agents have been changed without me knowing it for some time. Inquiries come to the office for Canadian goods asking if there is an agency in Australia. I gave, as an instance, a little time ago the name of a representative, but found afterwards that the Canadian manufacturer had removed the agency and given it another while I was absent from the city. The consequence was that the would-be purchaser, upon going to the late agent, did not meet a friend of the goods. If I had the addresses of representatives I might be able to be of assistance in securing business.

LONDON AGENCIES OF SYDNEY IMPORTING HOUSES.

I attach a list of the houses of Sydney so far secured who have agents abroad. It should be noted that this list does not include importing houses who are without such foreign representation. There are a number of large firms in different branches who would be included in the latter class whose names do not appear. Under the heading of 'general' are included firms who handle nearly all lines. In response to requests for the address of their foreign representatives, many of the firms write: 'we send these addresses as requested, and should be glad if some trade resulted therefrom, but which is not very likely to be done, as these representatives generally act upon instructions from us, and not often upon their own initiative.'

However, as a very large number of Canadian exporters are in London and New York, who never see Australia, they may be able to do some business through the agencies in the list. The list is as follows:—

SYDNEY IMPORTING HOUSES WITH THEIR FOREIGN AGENCIES.

WHOLESALE DRY GOODS.

J. S. LARKE.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

*(Mr. C. M. Kittson.)*RHODES BUILDING, CAPE TOWN, February 1, 1906.
P.O. Box 668.

CHEESE REQUIREMENTS.

During the twelve months ending December 31, 1904, South Africa imported from abroad varieties of cheese amounting to a total of over six and a half million pounds, valued at £173,707 (\$857,870) of which nearly seven-eighths originated in Holland, Canada's share amounting to only 193,955 lbs. of a value of £4,972 (\$24,612).

The demand is largely for the Dutch cheese known as 'Gouda,' which is a mild variety of little colour, running from twelve to thirteen pounds in weight with a bladder covering. Canadian manufacturers need only to adapt themselves to this market's requirements in order to very largely increase their cheese trade with South Africa. Everything is in favour of Canada as against Holland, namely: Ocean freights, Customs tariff, sentiment, and quality.

EGGS IMPORTS.

During the year 1904 South Africa imported eggs to the extent of 29,512,624, of a value of £104,666 (\$518,097), of which Canada only supplied 319,806, of a value of £1,361 (\$6,837), Great Britain being the largest supplier, shipping 22,980,581, of a value of £82,495 (\$408,351).

No satisfactory reason can be given for Canada's small share of this trade, which is probably due to lack of enterprise in pushing for business.

TENDERS FOR SUPPLY OF OIL.

The Cape government railways are calling for tenders for the supply of 138,000 American gallons of paraffin oil in five gallon tins, cased in wood, to be delivered in instalments during a period of about ten months.

TENDERS FOR LARD OIL.

The same company is also calling for tenders for the supply of 6,000 imperial gallons of lard oil to be packed in four gallon tins, wood cased; forms of the above tenders giving detailed information may be obtained on application to the superintendent commercial agencies, Department of Trade and Commerce, Ottawa.

CHS. M. KITTSON.

INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report there have been received at the Department of Trade and Commerce the following inquiries relating to Canadian trade. The names of the firms making these inquiries, with their addresses, can be obtained upon application to : 'SUPT. OF COMMERCIAL AGENCIES, THE DEPARTMENT OF TRADE AND COMMERCE, OTTAWA.'

Please Quote the Reference Number when Requesting Addresses.

253. A London, England, house, with branch office in Montreal, would be glad to act as agent for good Canadian exporter of produce or manufactured goods; can also handle these lines for South African markets having large connections there.

254. A firm in Bordeaux, France, reports an opening for **pine** and other Canadian timber, and would be pleased to represent shippers wishing to develop trade in that market.

255. A London company is in a position to purchase large quantities of **veneer** and would be pleased to hear from Canadian manufacturers in a position to handle the business.

256. A London firm which purchases large quantities of **acetate of lime** asks to be placed in communication with Canadian manufacturers.

257. A Swiss company manufacturing **chocolate** is prepared to appoint suitable Canadian resident agent to introduce the same.

258. A firm in the south of Ireland has asked to be placed in communication with leading shippers in Canada of **peas, barley** or other **cereals, canned goods** and makers of standard brands of **cheese** or similar goods that might to advantage be imported direct from Canada.

259. A Liverpool firm in a position to place considerable quantities of **small wooden handles** for buckets, tools, &c., desires to correspond with Canadian manufacturers of these articles.

260. A London agent is seeking the representation of a good Canadian exporter of **doors, joinery, &c.**

261. A Glasgow firm dealing in **oils, chemicals, fireclay, roofing materials, &c.**, is open to accept the agency for a Canadian manufacturer shipping goods likely to command a sale in Scotland.

262. A London firm has requested to be placed in touch with Canadian producers and shippers of **antimony**.

263. A firm doing trade with the Far East, with headquarters in London, desires to obtain quotations from lumbermen in British Columbia for large quantities of **white pine shooks** for packing purposes.

264. A large Cape Town importer of **picture mouldings** desires quotations c.i.f., Cape Town.

265. A large Yorkshire firm of bobbin manufacturers desire to get in communication with Canadian shippers of **birch, beech, basswood** and **ash**, in logs, squares or deals.

266. An extensive manufacturer of **photographic goods, cameras, studio accessories and photographic materials** of the highest grade, would like to hear from a Canadian firm willing to act as sale agent for Canada.

267. A Bradford wool merchant desires to get in communication with dealers in and manufacturers using **wool waste** in Canada.

268. A Yorkshire firm of timber merchants desires to get in communication with Canadian exporters of **Quebec spruce**, in regular shipments. Best references furnished.

269. A Bradford produce firm desires communication with Canadian manufacturers of **bacon, hams, butter and cheese**,

270. A Bradford timber merchant desires communication with Canadian shippers of **beech, birch, ash and maple squares**, in all sizes and in large quantities.

271. A Bradford wholesale produce merchant desires to get into direct communication with Canadian shippers of **bacon, hams, &c., cheese and butter**.

272. A Yorkshire firm of bobbin manufacturers desires to get immediately in direct communication with Canadian shippers of **birch, beech, basswood and ash**, or suitable woods for making bobbins. Size of completed bobbin: $3\frac{1}{2}$ inches by $\frac{5}{8}$ inch.

273. A Bradford wool merchant desires to get in direct communication with Canadian importers of **woollen tops**, packed in bags of 500 pounds each.

274. A Bradford firm of timber merchants desires to deal direct with Canadian exporters of regular shipments of **pine and Quebec spruce**.

275. A Yorkshire firm of timber merchants, having a large retail demand, and requiring regular shipments of all classes of **Canadian woods**, more especially pine, spruce, and maple, desire to get in communication with Canadian shippers.

276. A Yorkshire firm dealing in all kinds of **hides and sheepskins** desire to get in direct communication with shippers from Canada.

277. An Australian oil importing firm, with a very large trade connection throughout Australia and New Zealand, desires full particulars of **Canadian mineral lubricating oils, paraffine wax**, and other **petroleum products**. Samples and price lists upon the basis of f.o.b. New York, or c.i.f. principal Australian ports are requested. Payment of shipments can be arranged by a letter of credit which will accompany all orders

278. A Yorkshire colliery desires to get in touch with Canadian exporters of **pit props and sleepers**. The props to be from 2 feet to $4\frac{1}{2}$ feet long by $3\frac{1}{2}$ inches to $4\frac{1}{2}$ inches at top end, the sleepers 3 feet long, 5 inches by 2 inches.

279. A Leeds firm desires regular shipments of **maple roller blocks**, averaging 26 inches by $6\frac{1}{2}$ inches, seasoned or unseasoned, and desire to get in direct communication with Canadian timber men who can supply their demand.

280. A **ready-made clothing** house desires to extend their business to Canada, and desire communication with parties interested in Canada.

281. A large firm of wholesale clothiers, manufacturing all classes of mens', youths' and children's **clothing**, also military and officials' **uniforms**, desires to extend their trade to Canada, and ask for communications in regard thereto.

282. A Yorkshire engineering firm, manufacturing all descriptions of **steam wagons** suitable for mills, breweries, and all industries connected with the hauling of heavy goods, desire to extend their business to Canada, and ask for communications when catalogues, prices, &c., will be sent.

283. A Yorkshire engineering firm, whose particular specialty is the building of **gas holders**, also manufacturers of **structural steel work, storage tanks, girders, gas plants, &c.**, desire to get in direct communication with companies or corporations requiring these goods.

284. A Leeds engineering firm of general **ironmongers** desire to place their goods on the Canadian market and ask for direct communication in regard thereto.

285. A large Yorkshire house manufacturing all descriptions of **ready-made clothing** desire to get in touch in Canada with houses interested in importing these goods.

286. A Yorkshire engineering firm, manufacturing all descriptions of **weaving, warping and winding machinery**, used exclusively in the woollen and worsted trade, desire to hear from parties interested in such machinery in Canada.

287. A Yorkshire firm desire to hear from Canadian houses dealing in **worsted waste**, which they desire to ship to Canada.

288. A large Yorkshire firm dealing in **worsted waste and mohair noils**, and having facilities for meeting a demand, desire to get in direct communication with Canadian buyers.

289. A Yorkshire engineering firm, manufacturing **clothes wringers** and **carting implements** of all descriptions, desire to get in direct communication with Canadian buyers.

290. A firm in Cardiff desires the addresses of Canadian manufacturers of **broom handles** and of **washing boards** wishing to develop trade in the United Kingdom.

291. A London company of **tea blenders** wishes to get into touch with wholesale grocers in Canada who would be prepared to do business in **teas**.

292. A French importing house possessing warehouses on the west and south coasts of France would be pleased to hear from Canadian manufacturers of **doors**, **sashes** and **mouldings** and is also interested in **coal** and **slates**.

293. Inquiry has been made by a north of England firm for Canadian exporters of **Canadian oak**, cut lengths: 12 in. x $3\frac{3}{4}$ x $\frac{1}{4}$; 12 x 2 x $\frac{1}{4}$; 12 x $2\frac{1}{4}$ x $\frac{1}{4}$, and $13\frac{3}{4}$ x $1\frac{1}{8}$ x $\frac{1}{4}$.

294. A London produce merchant is seeking the representation of good Canadian houses exporting **cheese**, **butter** and **canned goods**.

295. A London firm is desirous of obtaining the agency of any first class **Canadian engineering firms** shipping goods suitable for the English market.

296. A London importer of **canned** and **bottled goods** of every description has requested to be placed in communication with a reliable firm of packers in Canada.

297. A South African commission agent desires to represent on commission a Canadian manufacturer of **paper bags**, **wrapping paper** and **newspaper** (white and coloured).

298. A large Cape Town firm of importers desire quotations from Canadian manufacturers of **hides** for carriage trimming.

299. A South African importing firm desires quotations from Canadian manufacturers of **dairy machinery**.

300. The agencies department of a well known British engineering monthly paper desires addresses of wholesale and retail stores in Canada dealing in **cutlery**.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports, Exports of Domestic Produce and Manufacture.

a The figures for Mexico include coin and bullion.

* Figures are for the years 1904, 1905 and 1906.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Board of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly report since published, and comprise all additions thereto or changes therein. so far as the department has authentic advice.

NEWFOUNDLAND.

An Act for Granting to His Majesty Certain Duties on Goods, Wares and Merchandize, imported into this Colony and its Dependencies.

Cap. 9, 5 Ed. VII. Passed 15th June, 1905.)

Be it enacted by the Governor, [the Legislative Council and House of Assembly, in Legislative Session convened, as follows:—

1. This Act may be cited as "The Revenue Act, 1905."
2. In this Act unless the context otherwise requires—
 - (a.) The initials N.E.S., represent and have the meaning of the words "not elsewhere specified."
 - (b.) The initials N.O.P. represent and have the meaning of the words "not otherwise provided."
 - (c.) The expression "gall," or "gallon" means an Imperial gallon.
 - (d.) The expression "ton" means two thousand two hundred and forty pounds avoirdupois, except where otherwise defined.
 - (e.) The letters "cwt." means one hundred and twelve pounds avoirdupois.
 - (f.) The letters "qtl." means one hundred and twelve pounds avoirdupois.
 - (g.) The letter "M." means one thousand.
 - (h.) The expression "proof" or "proof spirits," when applied to wines or spirits of any kind, means spirits of a strength equal to that of pure ethyl alcohol compounded with distilled water in such proportions that the resultant mixture shall, at a temperature of sixty degrees Fahrenheit, have a specific gravity of 0.9198 as compared with that of distilled water at the same temperature.
3. Subject to the provisions of this Act and to the requirements of "The Customs' Acts, 1898 to 1905," there shall be levied, collected and paid upon all goods enumerated or referred to as not enumerated in Schedule A to this Act, the several rates of duties of customs set forth and described in the said schedule and set opposite to each item respectively or charged thereon as not enumerated, when such goods are imported into this colony or taken out of warehouse for consumption therein.
4. Subject to the same provisions and to the further conditions contained in Schedule B to this Act all goods enumerated in the said Schedule B may be imported into this colony or may be taken out of warehouse for consumption in this colony without the payment of any duties thereon.
5. The importation into this colony of any goods enumerated, described or referred to in Schedule C to this Act, is prohibited; and any such goods imported shall thereby become forfeited to the Crown and shall be destroyed; and any person importing such prohibited goods, or causing them or permitting them to be imported, shall for each offence incur a penalty of two hundred dollars.
6. Subject to the provisions of this Act and to the requirements of "The Customs' Act, 1898 to 1905," there shall be levied, collected and paid upon all goods enumerated in Schedule D to this Act the several rates of excise duties set forth and described in the said schedule and set opposite to each item respectively.
7. There shall be allowed to any regular printer a drawback to the amount of any duties that may have been paid on any paper actually printed upon in the colony, and of fifty per centum of any duties that may have been paid on any paper bags or sacks, labels of all kinds, shipping, price or other tags, and tickets of all kinds actually printed upon in this colony, upon the production of affidavits satisfactory to the Minister of Finance and Customs, setting forth the amount of duties which have been paid thereon, and that the said paper bags, sacks, labels, tags or tickets have been actually and *bonâ fide* printed upon in this colony.
8. There shall be allowed a drawback upon biscuits manufactured in this colony from flour imported on which duty has been paid at the Customs, when such biscuits shall be exported from this colony at the rate of seventeen cents per hundred weight of such biscuit exported as aforesaid: Provided that such drawbacks shall not be allowed on any quantity of biscuit so exported at any one time less than ten bags.

9. Upon all ale, porter, bavarian or botanic beer, manufactured in this colony, and upon which the duty hereinbefore imposed shall have been paid, and which may be exported from this colony, there shall be paid to the exporter thereof the sum of 5 cents per gallon by way of drawback, upon conformity with the requisition of the Governor in Council.

10. There shall be a drawback allowed on all native berries, and herring and other edible fish, excepting lobsters and trout packed in cans, per 96 lbs. exported; if packed in one pound cans, 20 cents per 96 lbs.; if packed in two pound cans, 15 cents per 96 lbs.; if packed in larger cans, 10 cents per 96 lbs.

11. There shall be a drawback allowed on all native edible fish, when packed in quarters or halves (sardine cans), of 35 cents per 100 lbs. of fish exported.

12. It shall be lawful for the Governor in Council to remit the whole or any portion of the duties imposed by this Act upon port or other wines, currants and sultana raisins, or other articles imported from the country of production into this colony, when it shall appear to him that the duty on codfish, the product of the colony, imported into such country, has been or will be reciprocally reduced.

13. There shall be a drawback, equal to the amount of duty paid, allowed on packages for the export of cod-liver oil, under rules and regulations to be made by the Governor in Council.

14. There shall be a drawback upon unbleached calico, used in the manufacture of oiled clothes in this colony by manufacturers thereof, equal to one-half of the duty paid on such unbleached calico, under rules and regulations to be made by the Governor in Council.

15. The duty hereinbefore provided to be levied upon fish is subject to the following proviso, namely: Provided that the Governor may, by proclamation published in the *Royal Gazette*, remit, as he may deem equitable, the whole or any part of the duty imposed on fish imported into this colony from countries making such changes or reduction in their tariff with respect to fish, the product of fish, or other articles exported from this colony to such countries.

16. In addition to the duties hereinbefore provided to be raised, levied, collected and paid on goods, wares and merchandize imported into this colony, there shall be raised, levied, collected and paid on the goods, wares and merchandize hereinafter in this section mentioned, imported into this colony from countries the fishermen of which have the privilege of taking codfish upon all parts of the coast of Newfoundland and its dependencies, and in which country duties are or hereafter shall be levied upon fish, or the produce of the fisheries, exported from this colony or its dependencies to such countries, the following rates, viz.:—

Flour.	brls.	\$ 0 75
Pork.	"	0 75
Butter.	100 lbs.	0 75
Tobacco.	"	5 00
Kerosene oil.	galls.	0 05
Corn meal.	brls.	0 25
Hay.	tons.	5 00
Oats.	bush.	0 10
Potatoes.	"	0 25
Turnips.	"	0 25
Cabbage.	doz. heads	0 40
Unenumerated vegetables.	ad val.	30%

Provided always that the Governor in Council may, at any time when it shall be made to appear to him to be for the interest of the colony, by proclamation to be published in the *Royal Gazette*, suspend the operation of this clause for a limited period, the duration of such period to be stated in the said proclamation, in respect of all or any of the above mentioned articles.

17. In case of any country now imposing, or which may hereafter impose, an import duty on herrings exported from this colony and imported into such country in vessels belonging to this colony, when such herrings may be imported into such country in vessels belonging to the same free of duty, the Governor in Council may, by proclamation, impose an export duty equal to the amount of duty so imposed by such country aforesaid on herring exported from this colony in vessels belonging to such country where such import duty is imposed.

18. It shall be lawful for the Governor in Council to direct the appropriation of the duties collected upon coal in the port of St. John's to the use of the St. John's municipal council, and in the case of Harbour Grace, Carbonear, and Placentia at which places duties are at present collected on coal imported for domestic and other purposes, it shall be lawful for the Governor in Council to appropriate from the duties collected on coal at such places under this Act, for the use of the said towns of Harbour Grace, Carbonear and Placentia, such an amount as will in the opinion of the Governor in Council be equal to the whole of the duties collected at the said place on coal imported and used for domestic purposes; the said amounts shall be paid to such persons as shall be determined by the Governor in Council for the use of said towns respectively.

19. At the time of entering neat cattle, subject to an ad valorem duty by this Act, the importer or known agent thereof, shall, at the time of such entry, pay a sum as duty to be calculated upon the valuation of forty dollars for each of such cattle: Provided always, that within fourteen days after the landing of such cattle the said importer or his authorized agent shall, if in the meantime the same shall have been realized by public auction or private sale, produce the original account sales thereof, and answer all such questions respecting the same as the Minister of Finance and Customs, assistant collector, or other proper officer, may propose, on oath (if required), which oath the said officers are hereby authorized to administer; and if, upon such examination it shall appear to either of the said officers that the amount of value exceeds that for which the said cattle were first entered, the importer or known agent shall then pay by post entry the amount of duty that may exceed the original duty paid on the same; or if the value should be less, the surplus duty received shall be returned by certificate of over entry to the said importer or known agent; and if such importer or known agent shall refuse to produce the account sales at the time aforesaid, or produce any other than the true account, or alter the same, or refuse to answer upon oath such questions as aforesaid, or to answer them truly, or to pay the additional duty (if any) due as aforesaid, such importer or known agent shall forfeit in any case aforesaid the sum of four hundred dollars: and should the said cattle not have been disposed of within the time aforesaid,

or appraised as hereinafter provided, the duty already paid upon them shall be detained, and deemed to be true duty: Provided, also, that one day's notice in writing of the time of the intended sale at auction, as aforesaid, be given to the Minister of Finance and Customs, assistant collector or other proper officer: Provided, further, that when the said cattle so imported are not intended for immediate sale, the duty payable thereon shall be ascertained at the time of landing by appraisement at their value in the place where imported, one appraiser to be appointed by the Minister of Finance and Customs assistant collector, or other proper officer, as aforesaid, and one by the importer or his authorized agent; and, should the said parties disagree, they shall appoint a third appraiser, the appraisement of any two of whom shall be final and binding; and in the event of said importer or agent neglecting or refusing to appoint an appraiser at the time aforesaid, it shall be lawful for the Minister of Finance and Customs, assistant collector, or other proper officer, to appoint an appraiser to act for the said importer, by whose appraisement, with the other or others aforesaid, the said importer or agent shall be bound, and shall also be subject to the same regulations and penalties as hereinbefore provided; and the said importer or known agent shall, at the time of entry aforesaid, deposit with the Minister of Finance and Customs, assistant collector, or other proper officer aforesaid, the sum of six dollars to meet the expenses of appraisement aforesaid, any part of which said sum unexpended shall be returned to the said importer or known agent.

20. The duty imposed upon neat cattle by this Act shall be levied, collected and paid upon the proceeds of sale appearing upon the production of the original account sales, when such cattle shall have been sold, or upon the appraised value as hereinbefore provided, after deducting the amount of freight of any such cattle in either case.

21. Packages shall be subject to the following provision:

(a.) All bottles, flasks, jars, demijohns, carboys, casks, hogsheads, pipes, barrels, and all other vessels or packages manufactured of tin, iron, lead, zinc, glass, or any other material capable of holding liquids, and all packages in which goods are commonly placed for home consumption, including cases not otherwise provided for, in which bottled spirits, wines or malt, wines or malt liquors, or other liquids are contained, and every package being the first receptacle or covering inclosing goods for the purpose of sale, shall in all cases, not otherwise provided for, in which they contain goods subject to an ad valorem duty or a specific and ad valorem duty, be charged with the same rate of ad valorem duty as is to be levied and collected on the goods they contain, except when the value of the packages is included in the value of such goods.

(b.) All such packages as aforesaid containing goods subject to a specific duty only and not otherwise provided for, shall be charged with a duty of twenty per cent ad valorem, except when the value of the package is included in the value of the goods.

(c.) Packages not hereinbefore specified and not herein specially charged with or declared liable to duty, such as cases, barrels, kegs, brin or burlap outer coverings (not being bags) containing wares or merchandise known as dry goods, groceries, hardware, leatherware, earthenware, glassware, and such like outside packages in which goods are packed for exportation, according to the general usage and custom of trade, shall be free of duty.

(d.) All such special packages or coverings as are of any use, or apparently designed for use other than in the importation of the goods they contain (not otherwise provided), excepting bags in which sugar, oats, flour, and similar articles are imported, shall be subject to the same rate of duty as would thereon be levied if imported empty or separate from their contents.

(e.) Packages (inside or outside) containing free goods, shall be exempt from duty when the packages are of such a nature that their destruction is necessary in order to release the goods.

(f.) When it is evident to the collector or other proper officer of customs that a sum in excess of the value of the package or packages is deducted from any invoice, he shall appraise the said package or packages and his valuation shall be taken as the true value of such package or packages.

22. All sums of money payable under this Act as duties, penalties or forfeitures, shall be deemed, and are hereby declared to be in dollars and cents, Newfoundland currency, and shall be received, taken and paid in such currency; and all such duties shall be paid and received according to Imperial weights and measures by law established in this colony; and in all such cases where such duties are imposed, according to any specific quantity or value, the same shall apply in like proportion to any greater or less quantity or value.

23. The several duties imposed in schedule A of this Act shall be paid by the importers of such articles respectively, and shall be collected and secured by means of and under the regulations and penalties, and in the manner provided by any Act or Acts of the General Assembly of this colony for collecting the revenue of this colony and its dependencies.

24. In the case of all wines, spirits or alcoholic liquors, subject to duty according to their relative strength of proof, such strength shall be ascertained either by means of Sykes' hydrometer or of the specific gravity bottle, as the Minister of Finance and Customs directs; and in case such relative strength cannot be correctly ascertained by the direct use of the hydrometer or gravity bottle, it shall be ascertained by the distillation of a sample, and the subsequent test in like manner of the distillate.

25. All medicinal preparations, whether chemical or other, usually imported with the name of the manufacturer, shall have the true name of such manufacturer and the place where they are prepared, and the word "alcoholic" or "non-alcoholic" permanently and legibly affixed to each parcel by stamp, label or otherwise; and all medicinal preparations imported without such names and word so affixed may be forfeited.

26. Any person who, without lawful excuse, the proof of which shall be on the person accused, sends or brings into this colony, or who, being in this colony, has in his possession any bill heading or other paper appearing to be a heading or blank, capable of being filled up and used as an invoice, and bearing any certificate purporting to show, or which may be used to show, that the invoice which may be made from such bill heading or blank, is correct or authentic, is guilty of an indictable offence and liable to a penalty of five hundred dollars, and to imprisonment for a term not exceeding twelve months, in the discretion of the court, and the goods entered under any invoice made from any such bill heading or blank shall be forfeited.

27. With respect to goods imported for manufacturing purposes that are admissible for any specific purposes at a lower rate of duty than would otherwise be chargeable, or exempt from duty, the importer claiming such exemption from duty, or proportionate exemption from duty, shall make and subscribe

to the following affidavit or affirmation before the collector of customs at the port of entry, or before a notary public or a commissioner for taking affidavits:

"I (name of importer), the undersigned, importer of the (names of the goods or articles) mentioned in this entry, do solemnly (swear or affirm) that such (names of the goods or articles) are imported by me for the manufacture of (names of the goods to be manufactured) in my own factory, situate at (name of place) and that no portion of the same will be used for any purpose or disposed of until so manufactured."

28. Whenever the Governor in Council has reason to believe that with regard to any article of commerce there exists any trust, combination, association, or agreement of any kind among manufacturers of such articles or dealers therein, to unduly enhance the price of such article, or in any other way to unduly promote the advantage of the manufacturers or dealers at the expense of the consumers, the Governor in Council may commission or empower any judge of the Supreme Court to inquire in a summary way into and report to the Governor in Council whether such trust, combination, association or agreement exists.

(2) The judge may compel the attendance of witnesses and examine them under oath, and require the production of books and papers, and shall have such other necessary powers as are conferred upon him by the Governor in Council for the purposes of such inquiry;

(3) If the judge reports that such trust, combination, association or agreement exists, and if it appears to the Governor in Council that such disadvantage to the consumers is facilitated by the duties of customs imposed on a like article when imported, then the Governor in Council shall place such article on the free list, or so reduce the duty on it as to give to the public the benefit of reasonable competition in such articles.

29. Whenever it shall be made to appear to the Governor in Council that it is desirable for the purpose of promoting the importation of potatoes for seed, to abrogate or reduce the duty upon potatoes for such purpose, it shall be lawful for the Governor in Council by Order published in the *Royal Gazette* to abrogate or reduce such duty.

30. Upon all coal supplied to ships of war a rebate of the duty paid shall be allowed to the supplier upon the production to the assistant collector of the necessary evidence.

31. The duties on coal imported into any port or place in this colony other than St. John's, Harbour Grace, Carbonear and Placentia, shall be remitted and such coal allowed free entry upon the production to the collector or other proper officer by the importer of a satisfactory affidavit setting forth that such coal is intended exclusively for domestic use; and on such importer entering a sufficient bond with sureties that such coal or any part thereof shall not be sold or used for other than domestic purposes.

32. Upon the survey, by an authorized surveyor, of lumber imported into this Colony, for ascertaining the quantity therein upon which duty is to be collected, the surveyor shall furnish to the custom house a certificate setting forth that he has surveyed a cargo of lumber imported in a certain ship, stating name and master, and where from, and giving particulars of such survey, the number of feet and the kind and description of the board, plank (dressed or undressed), timber, laths or shingles as may constitute such cargo; such certificate of survey must be delivered to the proper officer of Customs twenty-four hours after the landing of the cargo, under a penalty of twenty dollars, to be collected in a summary manner upon complaint before a justice of the peace. For every certificate of survey furnished by an authorized surveyor he shall be entitled to receive the sum of fifty cents.

33. On such articles of machinery, implements or materials as are necessary to the initiation and installation of any manufacture or industry in this colony, or in connection therewith and used therein, there shall be levied and collected such less duties than the rate prescribed as the Governor in Council may from time to time fix by Order in Council: Provided that such Order may prescribe such conditions and regulations concerning the said importations as he may deem wise.

34. Upon oleomargarine, butterine, or similar substitutes for butter, and upon tobacco, imported into this colony, being reported at the custom house and before being entered for consumption, the packages in which such articles is contained shall be stamped or marked by a customs' officer with the name of the article or with some distinguishing mark.

35. The importation of any such article into consumption before the package containing it is marked as aforesaid is hereby prohibited, and any such goods so imported shall become forfeited to the Crown, and may be seized by a customs' officer and sold, after stamping or marking, one-half the proceeds being paid to the informer and seizing officer, one moiety to each, the other half being paid to the consolidated revenue.

36. It shall be unlawful to manufacture oleomargarine, butterine, or a similar substitute for butter, or to manufacture tobacco, cigars and cigarettes, except under the license of the Minister of Finance and Customs, who may grant such license, upon application, without charge to the applicant.

37. Each factory of oleomargarine, butterine and similar substitutes for butter, or of tobacco, cigars and cigarettes, shall be, for the purposes hereafter stated, a bonded warehouse: the products manufactured therein being, for the purpose hereinafter set forth, under the control of the Minister of Finance and Customs, and such officers as he may appoint, from the time of its production in the factory until the packages containing it have been duly stamped or marked and the excise duty paid thereon.

38. It shall be unlawful for any person to take from such factory, or from the parts or part under the control of the officer aforesaid, any product of the factory not contained in packages marked or stamped by the excise officer with the name of the article or with some other stamp or mark whereby the product of the factory may be distinguished, except by permission of the Minister of Finance and Customs.

39. The excise duty levied and collected upon oleomargarine, butterine, or similar compounds, and upon tobacco, cigars, and cigarettes, shall be paid in advance from time to time to the Minister of Finance and Customs, or such persons as he may appoint, before a permit shall be granted for the entry of such products into consumption; the excise duty so collected being from time to time paid into the consolidated revenue.

40. For any violation of the foregoing provisions relating to excise, complaint may be made before a stipendiary magistrate or two justices of the peace, and the offender, upon conviction, shall be liable to a penalty not exceeding one hundred dollars, or, in default of the payment thereof, to imprisonment

for a period not exceeding six months. If the person convicted be the holder of a license, or if it be proven that he was a party to the offence, his license shall be forfeited, and he shall thenceforth be incapable of procuring a license.

41. All articles and ingredients, except butter, imported into bond for the use and to be used in the manufacture of tobacco, cigars, cigarettes, butterine, oleomargarine, or similar compounds, shall be admitted free of duty under regulations to be made by the Governor in Council.

42. The Revenue Act, 1901, and the Acts 2 Ed. VII., cap. 26, 3 Ed. VII., cap. 15, 4 Ed. VII., cap. 18, in amendment thereof, are hereby repealed, and shall be deemed to have been repealed on this sixth day of June, one thousand nine hundred and five: Provided always, that all bonds given and payments made under the said Acts or any of them are hereby confirmed and declared valid.

43. This Act shall be held to have come into operation on the sixth day of June, one thousand nine hundred and five, at the hour of 9.30 a.m.

SCHEDULE A.

SCHEDULE B.

TABLE OF EXEMPTIONS.

- 158 Admiralty charts.
- 159 Agricultural implements and machinery, N.E.S., and hay-binders, bone crushers, hay and feed
cutters, air motors, cream separators and incubators.
- 160 Animals, imported by agricultural societies, or by private persons, under the approval of the
Governor in Council, for the improvement of stock.
- 161 Apparel, wearing and other personal and household effects, not merchandise, of British subjects
dying abroad, but domiciled in Newfoundland; books, pictures, family plate or furniture
personal effects and heirlooms left by bequest.
- 162 Articles for the use of the governor.
- 163 Articles, when imported by and for the use of the army and navy, also articles consigned direct
to officers and men on board vessels of His Majesty's navy for their own personal use or
consumption.
- 164 Articles imported by or for the use of the government or any of the departments thereof.
- 165 Articles imported for the use of the municipal council.
- 166 Articles for the official use of consuls.
- 167 Articles imported for religious purposes and used in the worship of the denomination requiring
the same, and bells, musical instruments, stained glass windows, statuary, paintings, carpets,
chandeliers, lamps, clocks, and fancy hardwood for interior finishing, when imported solely
for use in churches and chapels.
- 168 Articles imported by the Anglo Development Company, Ltd., viz: All construction materials
and machinery for pulp and paper mills, both for the original installation and further exten-
sion of same, but not in substitution for old.

- 169 Artificial limbs.
- 170 Bait.
- 171 Bags, barrels, boxes, casks, and other vessels exported filled with Newfoundland products, or exported empty and returned filled with foreign products; and articles the growth, produce and manufacture of Newfoundland, when returned after having been exported; provided that proof of the identity of such articles and goods shall be made under regulations to be prescribed by the Governor in Council, and that such articles and goods are returned within one year from the time of exportation, without having been advanced in value or improved in condition by any process of manufacture or other means: provided further that this item shall not apply to any article or goods upon which an allowance or drawback has been made, the re-impotment of which is hereby prohibited, except upon payment of duties equal to the drawback allowed; nor shall this item apply to any article of goods which has paid an excise duty.
- 172 Bark, extract of bark, cutch, bi-chromate of potash and logwood.
- 173 Bicycles, anglers' outfits, trout gear, firearms and ammunition, tents and implements of tourists, when in the custody of tourists, and under conditions made by the Minister of Finance and Customs to secure the export of such articles, or the payment of the regular rate of duty on such articles when otherwise imported, if the articles are sold or left in the colony.
- 174 Boiler and ships' plates, when of the thickness of one quarter of an inch or over that thickness.
- 175 Books, printed and not to be written or drawn upon, and supplements for periodicals, specially imported for the *bona fide* use of incorporated institutes; official reports, newspapers and quarterly, monthly and semi-monthly magazines; weekly library papers, unbound, and Christmas annuals; blackboards, specimens, medals and wall diagrams, illustrative of natural history, imported for colleges, schools and public libraries; kindergarten requisites and catalogues and price lists of persons, firms or companies domiciled elsewhere, and not personally doing business here.
- 176 Chair cane, or reeds of withrod, when imported in an unmanufactured state.
- 177 Clothing and medicine, donations of, for charitable purposes, and photographs sent by friends and not intended for sale.
- 178 Coin and bullion.
- 179 Copper, bitumen, naphtha and iron oxide, to be used by manufacturers in the manufacture of copper paint.
- 180 Corn for the manufacture of brooms and whisks.
- 181 Cotton yarn, raw cotton and coke.
- 182 Cotton-seed oil, olive oil, boracic acid, acetic acid, preservaline, when imported by manufacturers to be used in the preservation of fish or fish glue.
- 183 Engravers' plates of steel, polished for engraving thereupon; photo engraving machinery, viz.: Router, bevelling and squaring machines, screenholders, cross-line screens, chemicals for use in engraving, wood for blocking, engraving tools and process plates.
- 184 Equipments, accoutrements and musical instruments for boys' brigade and Salvation Army, and ammunition and arms for volunteer corps, under the approval of the Minister of Finance and Customs.
- 185 Fish, of British catch and cure, and oil, the produce of such fish (not to include preparations of cod liver oil), eggs of fish or game birds, when imported for propagation.
- 186 Flour, wheaten, and the package in which it is imported.
- 187 Globes, geographical, topographical and astronomical maps and charts for the use of schools; pictorial illustrations of insects or similar studies, when imported for the use of colleges, schools and library associations; manuscripts and insurance maps.
- 188 Hemp, hemp yarn, coir yarn, sisal, manilla, jute, flax and tow.
- 189 Hides, or pieces of hides, not tanned, curried or dressed.
- 190 Hoop iron or hoop steel, splayed, punched or nosed, and cut in lengths not to exceed sixty-eight inches, to be used in making herring barrels.
- 191 Indian corn.
- 192 Junk, old iron, old copper and old composition metal.
- 193 Kerosene oil, and the package in which it is imported.
- 194 Lines and twines used in connection with the fisheries, not including sporting tackle.
- 195 Machinery, of all kinds, to be used in the actual breaking of coal or ore bodies underground or in an open pit, viz.: rock drills, coal cutters; pumping engines of all kinds, to be used in transferring water from the underground, or open pit workings, to the surface; hoisting engines, or other machinery to be used as a motive power to lift ores or coal from underground, or from an open pit to the surface; crushers, or other machinery to be used in the actual breaking of ores, so as to facilitate refining or transportation; special machinery of all kinds, to be used for the washing, concentration, reduction or the refining of any ore or coal, or for the manufacture of brick; prospecting drills of all kinds, to be used for proving the extent or existence underground of coal, oil or ore bodies: cranes and derricks, when used for the actual handling of coal or ore from the workings to the surface; compressors, to be used for the operation of any of the above machines; fire clay and fire brick, to be used in the construction of any ore reduction or smelting plant; dynamite, detonators, blasting powder, fuses of all kinds, blasting batteries, battery wire and drill steel; wrought iron or other pipes, to be used in transmitting steam, compressed air or water through the underground or open pit workings, and from the point of accumulation to the point of exit; hoisting and hauling cables, to be used in the lifting and transporting of coal or ore from the working face to the point of shipment; machinery or other equipment, to be used in conveying coal or ore within the mine, or from the workings to the surface: Provided that, should any of the foregoing mentioned articles in this section be used for any other purposes than that for which they are here set forth as being duty free, they shall be dealt with as smuggled goods, and be subject to all the provisions in such cases provided under the Customs' Acts, 1898 to 1905. The words "machinery" in this item are not to include or relate to steam boilers and parts thereof.

- Machinery to be used in the manufacture, within this colony, of twines, lines, nets, seines, cordage, or other fishing gear.
- Motor engines, other than steam, when imported to be used in vessels owned in this colony and employed solely in missionary work within the colony.
- 196 Manures and fertilizers of all kinds, and sulphuric acid, when imported to be used in the manufacture of manures.
- 197 Material for sheathing the bottoms of vessels, such as zinc, copper and composition metal, together with nails and paper or felt, which may be used for or under such sheathing when used for sheathing vessels, under regulations to be made by the Governor in Council; and lignum vitæ.
- 198 Molasses, produced in the West India Islands, in the process of the manufacture of sugar from the juice of the sugar cane, and the package in which it is imported.
- 199 Music, written.
- 200 Oil cake, oil cake meal, cotton seed cake, cotton seed meal, pease meal, bran and other preparations for cattle and chicken feed.
- 201 Ores, to be used as flux.
- 202 Parchment or wax paper, when imported specially for wrapping boneless fish or for lining tins used in the lobster packing industry in this colony.
- 203 Pig iron, nail strips of iron, steel, zinc or brass, to be used in the manufacture of cut nails in this colony.
- 204 Plants, trees and shrubs, also seeds for agricultural purposes, N.E.S., and florists' seeds.
- 205 Printing paper, printing presses, printing types, printers' ink and printers' office furniture, when imported by *bona fide* printers for use in their business.
- 206 Rice, uncleaned or refuse rice.
- 207 Samples of no commercial value; sand and fire-clay; sausage skins or casings; salt in bulk, when imported for use in the fisheries.
- 208 Scrap iron and scrap steel (old), and fit only to be re-manufactured, being part of or recovered from any vessel wrecked in waters subject to the jurisdiction of Newfoundland.
- 209 Steel shafting, when imported for use in steam vessels.
- 210 Supplies, stores and donations for the Moravian missionaries on Labrador and for the Deep Sea mission, under such rules and regulations as may be made by the Governor in Council.
- 211 Settlers' effects, viz.: Wearing apparel, household furniture, books, implements and tools of trade, occupation or employment; guns, musical instruments, domestic sewing machines typewriters, live stock, bicycles, carts and other vehicles, and agricultural implements in use by the settlers for at least six months before his removal to this colony, not to include machinery or articles imported for use in any manufacturing establishment, or for sale; provided that any dutiable articles entered as settlers' effects may not be so entered unless brought with the settler on his first arrival, and shall not be sold or otherwise disposed of without payment of duty, until after twelve months actual use in the colony; and travellers' baggage, under regulations prescribed by the Governor in Council.
- 212 Scientific instruments and apparatus, when imported for use in colleges, schools and scientific or library societies; and specimens illustrative of natural history; medals and such other articles as may be imported by schools or associations to be distributed as prizes when such other articles are approved by the Minister of Finance and Customs.
- 213 Stereotypes, electrotypes and celluloids for almanacs, calendars, illustrated pamphlets, newspapers, advertisements or engravings, and all other like work for commercial, trade or other purposes, and matrices or copper shells for the same.
- 214 Surgical and dental instruments (not being furniture), and surgical needles; clinical thermometers, catgut and silk sutures; galvanic battery and electrodes, when imported by doctors for use in their profession.
- 215 Unmanufactured wool.
- 216 Wire, of brass, zinc or steel, screwed or twisted or flattened or corrugated, when imported by manufacturers of boots and shoes, for use in connection with nailing machines for the manufacture of boots and shoes, to be used for such purposes only in their own factories.
- 217 Wheat, whole, not ground or crushed.
- 218 Works of art, viz.: Paintings in oil or water colours, by artists of well known merit, or copies of the old masters by such artists; and paintings in oil or water colours, the production of Newfoundland artists, under regulations prescribed by the Governor in Council, and engravings, when produced by the Art Union Society of London.

SCHEDULE C.

PROHIBITED GOODS.

- 219 Books, printed paper, drawings, paintings, prints, photographs or representations of any kind of a treasonable or seditious, or of an immoral or indecent character.
- 220 Coin, base or counterfeit.
- 221 Goods, manufactured or produced wholly or in part by prison labour, or which have been made within or in connection with any prison, gaol or penitentiary, shall not be imported into this colony under a penalty of two hundred dollars; and if imported, such goods and the package in which they are contained shall be forfeited.
- 222 Reprints of Newfoundland copyright works, and prints of British copyright works which have been copyrighted in Newfoundland also.
- 223 Tea, adulterated with spurious leaf or with exhausted leaves, or containing so great an admixture of chemical or other deleterious substance as to make it unfit for use.
- 224 Salt, known as fishing salt, which has been used in vessels or elsewhere in the curing or making of fish prior to its importation into this colony.

SCHEDULE D.

EXCISE.

The following duties shall be raised, levied and collected on the following articles distilled, brewed or manufactured in this colony, viz.:

225	Brandy, not exceeding the strength of proof by Sykes' hydrometer, and so in proportion for any greater strength than the strength of proof.	gall.	\$	2	35

PROCLAMATION OF THE GOVERNOR OF NEWFOUNDLAND, DATED OCTOBER 3, 1905, GRANTING DUTY-FREE ADMISSION OF CURRANTS AND SULTANA RAISINS IMPORTED FROM GREECE.

Whereas it is provided in section twelve of "The Revenue Act, 1905," that: "It shall be lawful for the Governor in Council to remit the whole or any portion of the duties imposed by this Act upon port or other wines, currants and sultana raisins or other articles imported from the country of production into this colony, when it shall appear to him that the duty on codfish, the product of the colony, imported into such country, has been or will be reciprocally reduced";

And whereas the Kingdom of Greece has agreed to reduce the duty on codfish imported from this colony into the said Kingdom;

I do, therefore, by this my proclamation, declare that from and after the 1st day of October instant, currants and sultana raisins, when imported from the Kingdom of Greece, shall be admitted into this colony free of duty, and that the aforesaid articles shall be included in Schedule B of the aforesaid Revenue Act under the table of exemptions, and that when such currants and sultana raisins are imported into this colony they shall be given free entry upon the production to the Customs Department, by the importer of the same, of a certificate under the hand and seal of competent authorities, showing that such currants and sultana raisins are the product of the Kingdom of Greece.

REGULATIONS WITH RESPECT TO THE CERTIFICATES OF ORIGIN TO BE USED IN CONNECTION WITH THE IMPORTATION OF CURRANTS AND SULTANA RAISINS, THE PRODUCTS OF THE KINGDOM OF GREECE.

Certificates of origin.

Invoices of currants and sultana raisins imported from Greece and intended for free entry must have written or printed thereon one of the following certificates duly certified by competent authorities.

Where it is a direct importation from Greece.

The currants (or sultana raisins) described in this invoice have been grown in, and are the product of the Kingdom of Greece, and are exported in their original package to Newfoundland from the port of _____, Greece, this _____ day of _____.

_____,
Customs Officer.

When imported indirectly from Greece.

The currants (or sultana raisins) described in this invoice have been grown in, and are the product of the Kingdom of Greece, and were imported from the port of _____, in Greece, as per entry No. _____, and are now shipped in bond, in the original packages in which they are imported, to the port of _____, per SS. _____, day of _____.

_____,
Collector.

SARAWAK.

Equivalent of certain foreign weights and measures employed in this tariff:

Catty — $1\frac{1}{2}$ lbs. avoirdupois.
 Pikul — $133\frac{1}{2}$ lbs. avoirdupois.
 Coyan — 30 Pikul.

BERMUDA.

THE SUPPLY AND APPROPRIATION ACT, 1905.

(No. 9 of 26th June, 1905.)

This Act, which is operative from July 1, 1905, to June 30, 1906, both inclusive, is of the same tenor as The Supply and Appropriation Act, 1904, save that the following paragraphs are either modified or added:

In Table of Specific Duties.

	£	s.	d.
Bananas, in the months of July, August, September, October, November and December, 1905, and in the months of May and June, 1906.....bunch.	0	2	6
Bulbs of the <i>Willum longiflorum</i>thousand	10	0	0
Eggs, in the months of July, August and September, 1905, and April, May and June, 1906.....dozen.	0	0	3
Potatoes, during the months of January, February, March, April, May, June, July and August.....barrel or bag not exceeding 180 lbs.	0	4	0
Wood alcohol, Wood naphtha, or methyl alcohol....gallon.	0	0	3

In Table of Exemptions.

Bananas, from the first day of January, 1906, to the thirtieth day of April, 1906, both inclusive.

Amended sect. (5) of sect. 5.

(3) On every cask or other package landed in these islands containing alcohol, arrack, brandy, cordials, gin, peppermint water, rum, shrub, or whiskey in bulk to the extent of not less than ten gallons, there shall be levied and paid by the importer or consignee, into the public treasury, in addition to any duty payable on the contents thereof, a landing tax of three pence, which shall not be subject to refund as import duty.

BRITISH INDIA.

I.—CONVENTION BETWEEN THE UNITED KINGDOM AND JAPAN RESPECTING COMMERCIAL RELATIONS BETWEEN JAPAN AND INDIA.

(Signed at Tokio, August 29, 1904.—Ratifications exchanged at Tokio, March 15, 1905.)

Art. 1.—Any article the produce or manufacture of the dominions and possessions of His Majesty the Emperor of Japan shall enjoy, upon importation into India, the lowest customs duties applicable to similar products of any other foreign origin.

Art. 2.—Reciprocally any article, the produce or manufacture of India shall enjoy, upon importation into the dominions and possessions of His Majesty the Emperor of Japan, the lowest customs duties applicable to similar products of any other foreign origin.

Art. 3.—The privileges and engagements of the present Convention shall extend to native States of India which by treaty with His Britannic Majesty or otherwise may be entitled to be placed with regard to the stipulations of the Convention on the same footing as British India.

His Britannic Majesty's Government shall communicate from time to time to the Imperial Government of Japan a list of these States.

Art. 4.—The present Convention shall be ratified and the ratifications shall be exchanged at Tokio as soon as possible. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of six months from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

In witness whereof the above mentioned Plenipotentiaries have signed the present Convention and have affixed thereto their seals.

Done in duplicate at Tokio, in the English and Japanese languages, this 29th day of August, of year one thousand nine hundred and four, corresponding to the 29th day of 8th month of the 37th year of Meiji

(Resolution—By the Government of India, Department of Commerce and Industry, No.5528-59-6, dated the 3rd October, 1905.—Customs Circular No. VII of 1905.)

(d) Cigars exceeding 100 in number, whether in open or unopened boxes, and other tobacco exceeding 1 lb. in weight.

In exercise of the power conferred by section 7 (1) of the Cotton Duties Act, 1896 (II of 1896), and in supersession of the Notification in this Department, No. 8030 S.R., dated the 20th December, 1904, the Governor General in Council is pleased to fix, for the descriptions of cotton goods hereunder specified, tariff values as follows, with effect from the 1st January, 1906:

AMENDED SCHEDULE IV. OF THE INDIAN TARIFF ACT.

Notification—By the Government of India, Department of Commerce and Industry, Nos. 7641-78, dated the 23rd December, 1905.—Customs Circular No. 1 of 1906.

In exercise of the powers conferred by sections 22 and 23 of the Sea Customs Act, 1878 (VIII. of 1878), in modification of the tariff values fixed by the Indian Tariff Act, 1894 (VIII. of 1894), as amended by the Indian Tariff Act (1894), Amendment Act, 1896 (III. of 1896), and as further altered from time to time by notifications of the Governor General in Council, the Governor General in Council is pleased to fix, with effect from the 1st January, 1906, for the articles specified in column 2 of the schedule hereto annexed, the tariff values stated in column 4 of the said schedule.

Provided that nothing in this notification shall affect any additional duty imposed under the powers conferred by sections 8A and 8B of the Indian Tariff Act, 1894 (VIII. of 1894), as amended by the Indian Tariff Act Amendment Act, 1899 (XIV. of 1899), the Indian Tariff (Amendment) Act, 1902 (VIII. of 1902), the Indian Tariff (Amendment) Act, 1903 (XII. of 1903), and the Indian Tariff (Amendment) Act, 1904, (XI. of 1904).

NEW ZEALAND.

1.—ORDER No. 774, DATED JUNE 21, 1904, OF THE COMMISSIONER OF TRADE AND CUSTOMS, AMENDING THE FORM OF INVOICE CERTIFICATES.

(The New Zealand Gazette of June 23, 1904.)

In exercise of the powers conferred upon me by "The Preferential and Reciprocal Trade Act, 1903," and of all other powers and authorities enabling me in this behalf, I, Charles Houghton Mills, Commissioner of Trade and Customs, do hereby revoke the Order No. 733 made by me, dated the 16th day of December, 1903, and gazetted on the 17th day of December, 1903, and in lieu thereof do hereby prescribe that the certificate referred to in section 8 of the above-mentioned Act shall be in such one of the forms numbered 1, 2, 3 and 4 in the schedule hereto as is applicable: Provided that until the 31st day of March, 1905, certificates in the form prescribed by the Order hereby revoked may be accepted

SCHEDULE.

No. 1.—FORM OF CERTIFICATE PRESCRIBED TO BE WRITTEN OR PRINTED ON INVOICES OF ALL ARTICLES, EXCEPT TEA, FOR ENTRY UNDER THE PREFERENTIAL TARIFF OF NEW ZEALAND, WHEN MADE AND SIGNED BY AN INDIVIDUAL EXPORTER PERSONALLY.

I, [Full name of exporter], the exporter of the articles included in this invoice, have the means of knowing, and do hereby certify, that the said invoice, being from myself to [Name of party or parties to whom articles invoiced], and amounting to [Insert in words at length total value of invoice], is true and

correct; that all the articles included in the said invoice are bona fide the produce or manufacture of one or more of the following countries, viz. [*Names of countries, being in every case part of the British Dominions*]; and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice, to the extent in each article of not less than one-fourth of the value of every such article in its present condition, ready for export to New Zealand.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

NO. 2.—FORM OF CERTIFICATE PRESCRIBED TO BE WRITTEN OR PRINTED ON INVOICES OF ALL ARTICLES, EXCEPT TEA, FOR ENTRY UNDER THE PREFERENTIAL TARIFF OF NEW ZEALAND, WHEN MADE AND SIGNED BY A PERSON OTHER THAN AN INDIVIDUAL EXPORTER.

I, [*Full name of person signing certificate*], hereby certify that I am [*Insert the words "partner", "manager", "chief clerk", or "principal official", giving rank, as the case may be*], of [*Name and address of exporter or exporters*], the exporter(s) of the articles included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said exporter(s).

I have the means of knowing, and I do hereby certify, that this invoice from the said [*Name of exporter or exporters*], to [*Name of party or parties to whom articles invoiced*] amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the articles included in the said invoice are bona fide the produce or manufacture of one or more of the following countries, viz. [*Names of countries, being in every case part of the British Dominions*]; and that a substantial portion of the labour of one or more of such countries has entered into the production of every manufactured article included in the said invoice to the extent in each article of not less than one-fourth of the value of every such article in its present condition ready for export to New Zealand.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

NO. 3.—FORM OF CERTIFICATE PRESCRIBED TO BE WRITTEN OR PRINTED ON INVOICES OF TEA, FOR ENTRY UNDER THE PREFERENTIAL TARIFF OF NEW ZEALAND, WHEN MADE AND SIGNED BY AN INDIVIDUAL EXPORTER PERSONALLY.

I, [*Full name of exporter*], the exporter of the tea included in this invoice, have the means of knowing, and do hereby certify, that the said invoice, being from myself to [*Name of party or parties to whom tea invoiced*], and amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the tea included in this invoice has been grown in one or more of the following parts of the British Dominions, viz. [*Names of parts of British Dominions where tea has been grown*], and that no portion of such tea is contained in packets of one pound or less than one pound in weight.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

NO. 4.—FORM OF CERTIFICATE PRESCRIBED TO BE WRITTEN OR PRINTED ON INVOICES OF TEA, FOR ENTRY UNDER THE PREFERENTIAL TARIFF OF NEW ZEALAND, WHEN MADE AND SIGNED BY A PERSON OTHER THAN AN INDIVIDUAL EXPORTER.

I, [*Full name of person signing certificate*], hereby certify that I am [*Insert the words "partner", "manager", "chief clerk", or "principal official" giving the rank, as the case may be*] of [*Name and address of exporter or exporters*], the exporter(s) of the tea included in this invoice, and that I am duly authorized to make and sign this certificate on behalf of the said exporter (s).

I have the means of knowing, and I do hereby certify, that this invoice from the said [*Name of exporters or exporter*] to [*Name of party or parties to whom tea invoiced*], amounting to [*Insert in words at length total value of invoice*], is true and correct; that all the tea included in this invoice has been grown in one or more of the following parts of the British Dominions, viz. [*Names of parts of British Dominions where the tea has been grown*], and that no portion of such tea is contained in packets of one pound or less than one pound in weight.

(Signed)

Dated at , this day of , 190 .

NOTE.—Exporters are carefully to observe the above instructions in italics when making their certificates on invoices.

II.—GOVERNOR'S ORDER No. 171, OF JANUARY 21, 1905, DETERMINING THE IMPORT DUTY LEVIABLE ON BUSH'S CREAM OF TARTAR SUBSTITUTE.

Under this Order, there shall be levied on and after the date thereof on Bush's Cream of Tartar Substitute an import duty of one penny per lb.

III.—ORDER IN COUNCIL DATED AUGUST 2, 1905, RELATING TO THE DUTY ON BLACK TWIST TOBACCO IMPORTED INTO THE COOK AND OTHER ISLANDS.

(*The New Zealand Gazette* of August 3, 1905.)

In exercise of the powers conferred upon him by "The Cook and other Islands Government Act Amendment Act, 1902," and "The Cook and other Islands Government Act Amendment Act, 1903," and of all other powers and authorities enabling him in this behalf, His Excellency the Governor of the Colony of New Zealand, acting by and with the advice and consent of the Executive Council of the said colony, doth hereby modify the New Zealand Customs tariff in its application to goods imported into the Cook and other Islands aforesaid by declaring and directing as follows:

1. On the first day of October, one thousand nine hundred and five, the Order in Council of the tenth day of December, one thousand nine hundred and three (reducing to one shilling the pound the duty on certain tobacco imported into the said Islands), shall be and be deemed to be revoked.

2. The duty on black-twist tobacco imported into the said Islands on and after the said first day of October, one thousand nine hundred and five, shall be one shilling the pound (in lieu of three shillings and sixpence the pound as fixed by "The Customs and Excise Duties Act, 1888") where the Collector is satisfied that the genuine invoice value at the time of importation does not exceed one shilling the pound.

IV.—PROHIBITED IMPORTS.

Under various Orders in Council, the importation into New Zealand of the following articles has been prohibited:

Flock. (Order in Council of October 28, 1903.)

Optanine, an article used in brewing in the place of hops. (Order in Council of June 24, 1905.)

Tincture of lemon made according to the standard laid down in any recognized pharmacopœia. (Order in Council of September 6, 1905.)

Tincture of sweet-orange peel made according to the standard laid down in any recognized pharmacopœia. (Order in Council of September 25, 1905.)

SOUTH AFRICAN CUSTOMS UNION.

I.—SOUTHERN RHODESIA GOVERNMENT NOTICE No. 130, OF JUNE 8, 1905, REMOVING THE SUSPENSION OF CUSTOMS DUTIES ON CERTAIN GOODS IN SAID TERRITORY.

(*The British South Africa Company Government Gazette* of June 9, 1905.)

It is hereby notified for public information that the provisions of Government Notice No. 201 of the 8th August, 1903, suspending until further notice the whole of the Customs duties imposed by Schedule A of the "Customs Ordinance, 1903," upon all goods set out in Schedule B of the said Ordinance, will cease to operate on the 30th June, 1905, after which date the said duties will be levied in respect of the said goods imported into the Territory.

Provided that the duty imposed by the said Schedule A upon "fresh, chilled and frozen meat and animals for slaughter" shall remain suspended in accordance with Article 13 of the Customs Union Convention, 1903 (*).

II.—PROCLAMATION No. 65, OF JULY 12, 1905, OF THE GOVERNOR OF NATAL RE-IMPOSING THE CUSTOMS DUTIES ON CERTAIN GOODS.

(*"The Natal Government Gazette"* of July 12, 1905.)

The Customs duty imposed by the Customs Union and Customs Duties Act, 1903, upon fresh, chilled and frozen meat, and on animals imported for slaughter, shall be imposed and levied on and after the 13th day of July, 1905.

III.—CUSTOMS (CAPE TOWN) NOTICE No. 992, OF NOVEMBER 13, 1905, RESPECTING THE RE-IMPOSITION OF DUTY ON FRESH, CHILLED AND FROZEN MEATS, IMPORTED INTO THE ORANGE RIVER COLONY.

(*"The Cape of Good Hope Government Gazette,"* of November 14, 1905.)

The Government of the Orange River Colony will impose the duty on imported fresh, chilled and frozen meats on and after the 15th instant.

It is hereby notified that such meats may be removed either in Bond to that Colony or else the duty may be paid to the Government of this Colony prior to removal.

(*) The effect of the above Government Notice will be to impose the South African Customs Union rates of duty on the following goods imported into the territory of Southern Rhodesia, viz.: Corn, blasting compounds, butter and butter substitutes, candles, cheese, chicory (and substitutes for chicory or coffee), coffee, condensed milk or cream, fish, dried fruits, galvanized corrugated iron, oils (not essential or perfumed), onions, pickles, rice, sugar, tea, vegetables (preserved), and unmanufactured wood (including planed, tongued, or grooved, plain boards unshaped).

Consignors are therefore informed that no fresh, chilled or frozen imported meats may be removed to the Orange River Colony unless the duty has first been paid or arrangements made with the Customs Department of the Orange River Colony to receive the same in Bond, and all meats removed contrary to the provisions of this Notice will be liable to forfeiture on arrival in the Orange River Colony.

When such meats are removed, duty paid, the usual Notice and Advice forms must be used and produced to the Collector of Customs at the port whence the removal is made, who will stamp the same with the number and date of the Customs duty paid entry; and when removed in Bond, the regulations regarding the removal of goods in Bond must be complied with.

IV.—THE "CUSTOMS PROCLAMATION (BAROTZILAND), 1905," No. 17, DATED NOVEMBER 20, 1905, RELATING TO THE ENTRY OF BAROTZILAND-NORTH-WESTERN RHODESIA INTO THE SOUTH AFRICAN CUSTOMS UNION.

(*Official Gazette of the High Commissioner for South Africa* No. 217, of November 24, 1905.)

This proclamation gives effect to the entry of Barotziland-North-Western Rhodesia into the South African Customs Union from the 1st December, 1905.

From said date, the "Customs Duties Proclamation (Barotziland), 1904 (*)" is repealed and the Customs Union Tariff of 1903 (†) applies to Barotziland.

V.—HIGH COMMISSIONER'S NOTICE No. 110, OF NOVEMBER 20, 1905, SUSPENDING THE APPLICATION OF DUTIES ON CERTAIN GOODS IN BARONZILATD.

(*Official Gazette of the High Commissioner for South Africa* No. 217, of November 24, 1905.)

Under and by virtue of Section 12 of the Customs Proclamation (Barotziland) 1905 (‡), it is hereby notified that His Excellency the High Commissioner has been pleased:

(a) to suspend the duty imposed on fresh, chilled and frozen meat, and on animals for slaughter;

(b) to suspend for a period of two years from the 1st December, 1905, the duties on:

Corn and grain as described in parts (a), (b), and (c) of item 15 of the Tariff; blasting compounds; butter, butterine, margarine, ghee, and other substitutes for butter; candles; cheese; chicory and substitutes for coffee or chicory; coffee; condensed, desiccated or preserved milk or cream; fish; fruits (dried); iron, galvanized corrugated; meats; oils, not essential or perfumed; onions; pickles; rice; sugar; tea; vegetables, pressed or otherwise preserved; wood, unmanufactured, including planed, tongued or grooved, plain boards unshaped.

(*) See No. 171.

(†) See No. 42 (4th ed.).

(‡) See Ch. IV. above.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
France.....	D. H. Ross, P.O. Box 140, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
Great Britain.....	A. Poindron, 101, Rue Réaumur, Paris.
	P. B. Ball, Room 39 and 40, Central House Birmingham.
	J. E. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
Japan.....	P. B. McNamara, Canada Chambers, 36 Spring Gardens, Manchester.
Mexico.....	W. A. McKinnon, Sun Buildings, Clare Street, Bristol.
Norway.....	Alex. MacLean, No. 14 Bund, Room B., Yokohama.
	A. W. Donly, Apartado 2029, Mexico, D.F., Mexico.
South Africa.....	C. E. Sontum, Grubbege, No. 4, Christiana, Norway, agent for Denmark, also.
United States*.....	C. M. Kittson, Rhodes Building, Cape Town, Cape Colony.
	E. D. Arnaud, Pullman Buildings, Michigan Ave., Chicago, Ill.
West Indies.....	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.
	Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

Canadian Immigration Agents.

Belgium.....	D. Tréau De Cœli, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	W. T. R. Preston, 11 and 12 Charing Cross, London, W.C., England.
	G. H. Mitchell, Newton Chambers, 43 Cannon Street, Birmingham, England.
	Alfred Jury, Old Castle Buildings, Preeson's Row, Liverpool, Eng.
	Bruce Walker, 52 St. Enoch Square, Glasgow, Scotland.
	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mail Building, Cardiff, Wales.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar Tripp.)

PORT OF SPAIN,
TRINIDAD, February 17, 1906.

THE OIL FIELDS OF TRINIDAD.

The importance of the oil fields of Trinidad as a future source of prosperity is now recognized, and is receiving the attention of capitalists. The government are also fully alive to the advantages of the new industry and are giving it much encouragement and support.

CANADIAN EXHIBITIONS.

The Colonial Secretary forwarded to the Chamber of Commerce correspondence with the Imperial Commissioner of Agriculture for the West Indies on the subject of the exhibitions to be held this year at Toronto and Halifax, and suggesting the advantage of Trinidad participating.

The chamber expressed itself fully in sympathy with the proposal, but whilst willing, as heretofore, to co-operate as far as possible, thought the matter more one for the consideration of the Agricultural Society, to which body it has now been referred.

EDGAR TRIPP.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., February 15, 1906.

CANADIAN BACON.

The action of the government in prohibiting the importation of American hogs into Canada, has met with general approval by the provision trade handling Canadian bacon on this side. Notwithstanding the care taken by the Canadian curers, to differentiate the American line from the genuine Canadian bacon produced from the well fed and shapely Canadian pea-fed hog, yet in the distribution of cured meats on the English market this distinction is not always maintained, and the retail trade on this side frequently buy the spurious Canadian article, not knowing that it is only Yankee bacon packed as if it were Canadian, thereby assuming a virtue it does not possess. Canadian bacon is so much appreciated for its excellent qualities and stands so high in the opinion of the English consumer, it would be a thousand pities if its reputation should be marred by substituting inferior hogs, which the American swine indisputably are.

PRICES REALIZED.

The prices realized for Canadian bacon so far this year, are certainly not commensurate with the high cost prices of Canadian hogs. This unfortunate unprofitable condition of things is not confined to Canadian curers, but is typical of the curing trade generally. Irish and Danish curers are alike sustaining heavy losses. There is every indication at the time of writing of a change in the situation, the values of all kinds of cured meats are clearly appreciating.

BRITISH BOARD OF TRADE RETURNS.

The Board of Trade returns, issued recently, show that the imports for January were £53,475,830, and the exports were £30,774,811. This shows an increase of £5,709,370, in imports, and £5,785,034 in exports, as compared with January, 1905.

On both the import and export sides of the account the trade of the United States with England is considerably larger than with any other country. During the past year the United States took from England goods to the value of \$176,000,000, as compared with \$118,000,000 from Germany, \$90,000,000 from France, \$100,000,000 from Brazil, \$86,000,000 from Cuba, and \$62,000,000 from Canada. America's exports to this country were valued at \$523,000,000, as against \$194,000,000 to Germany, \$141,000,000 to Canada, \$76,000,000 to France, and \$52,000,000 to Japan.

Of finished manufactures, which form a larger share of American exports than any other class, the most important are cotton goods, woollen goods, and manufactured iron and steel. In the case of the former, America last year took from this country \$6,000,000 worth of goods. The raw article came from America's cotton fields, kept the weaving sheds of Lancashire busy, and eventually found its way back to America.

MUNICIPAL EXTRAVAGANCE.

It is claimed that municipal extravagance is largely accountable for the high cost of living in the cities of England. Municipal indebtedness grows at an alarming pace, and in the opinion of many it has already assumed the proportions of a grave national danger. Attention has been recently called to the fact, that in ten years the outstanding loans of England and Wales, have risen by no less a sum than £155,000,000, and now amount to £370,000,000, a sum more than double the annual assessable value.

INCREASE OF INTEREST.

The increase in capital expenditure is not the only disquieting feature, as there is an increase in interest of $\frac{1}{2}$ per cent, and if this must eventually obtain over the whole amount of the outstanding municipal loans, the annual interest will be increased by nearly £2,000,000 per annum.

Municipal expenditure is increasing disproportionately to the natural increase of population, and the available sources of revenue, and the rate of interest is increasing, while on the other hand increased municipal expenditure is absolutely necessary in the carrying out of schemes of betterment.

P. B. MACNAMARA.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,

BIRMINGHAM, ENG., February 21, 1906.

BRITISH BOARD OF TRADE RETURNS.

The Board of Trade returns for the year ending December 31, 1905, have just been published, and it might interest Canadians to see by the annexed statements just the proportion Canada has taken in exporting certain articles for which Canada is so well fitted to compete.

WHEAT.

Wheat is necessarily one of Canada's greatest industries, but it will be seen that last year the Dominion came considerably low in the scale, Russia being first, the Argentine Republic second, taking the place of the British East Indies for 1904. Canada improves her shipments as against 1904, but Australia still leads her.

OATS.

In oats Russia still leads, the United States coming second, and Canada third; but the United States takes second place on the list as against 1904.

PEAS.

In peas, the British East Indies leads, Russia coming second, and Canada third, but very much smaller in proportion to the amount of trade done.

BARLEY.

In barley, Russia leads, and as will be seen, Canada is not given a classification, but is mentioned among 'Other Countries.' With Canada's great grain-raising capacity, Canadians ought to do better in the matter of barley than they are doing. The most magnificent samples have been sent to Great Britain, and have been put before the brewers, but when it comes to business and the brewers are anxious to buy, no quantities can be got. There is an enormous business to be done.

WHEAT MEAL AND FLOUR.

In wheat meal and flour the United States leads, but drops considerably from her former position of 1903 and 1904, so far as quantity is concerned. The only countries which seem to have improved are France and Germany.

I have given, in separate columns, the values as well as the quantities. The cwt. will, of course, be taken as 112 lbs.

In my next report I shall send forward other articles in which we are doing a certain amount of business, but in which a greater amount should be done.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No 14, BUND, ROOM B., YOKOHAMA, February 16, 1906.

THE COTTON SPINNING INDUSTRY.

The cotton spinning industry now occupies the foremost rank in all branches of manufacture in Japan. The late war has in no way affected its development; its future being most hopeful. According to the latest returns there are forty-nine spinning mills in existence throughout the country, and the number of spindles in operation aggregate 1,330,234. The factory hands employed number 71,445 and their average wages 27.09 sen, or 14 cents, per day.

PRODUCTION OF IRON.

The output of iron in this country is steadily increasing. According to official returns the following results are shown :—

1900..	24,998 tons.
1901..	31,412 “
1902..	34,222 “
1903..	36,515 “
1904..	112,328 “
1905..	190,375 “

Other important mineral productions for the past year are as follows :—

Copper..	35,693 tons.
Coal..	11,581,755 “
Kerosene oil..	42,945,600 gallons.

TRADE DEPRESSION.

The cotton and silk markets are inert; the former affected by the large importations of last year, something over fifty millions of dollars, a considerable part of which has been carried over and which now serves to block the market against the usual briskness of importation during the earlier months of the year. The quotations, too, for the new supply offering, are higher than the market anticipated. This, however, is regarded as merely postponing the cotton market activity for a time later on in the year.

JAPAN'S GREAT STAPLE.

In silk the quotations from Europe are not favorable to active movement in the trade here. There is a downward tendency which export dealers are not inclined to meet. The outlook for the present is therefore that of temporary stagnation, and doubtless bears heavily upon the holders of stocks; but the present is an interval between seasons, and things may be expected to right themselves before the gathering of the next crop of cocoons.

Coming on top of this situation is the measure proposed by the government, and now being discussed by the trade, intended to provide for the imposition of fees at the

Silk Conditioning House. This is an establishment at this port for the inspection and grading of raw silk before export. Heretofore the cost of maintenance of this establishment was defrayed by the government, but the proposed measure is intended to relieve the public of this charge and to place it upon the trade.

The Association of Raw and Waste Silk Merchants of Yokohama responded to the terms of the Bill with strong objections. An explanatory defence followed from the Minister of Agriculture and Commerce, to which the President of the Association rejoined, expressing dissatisfaction because of the absence of assurances of the withdrawal or modification of the objectionable clauses; and urged that the result would be to place upon the producer the additional expenses proposed, with the added restriction upon trade, which would be in effect an export duty, to the immediate detriment of the 'country's first and foremost industry.' The silk associations in the United States and France are being moved in unison with the Yokohama Association.

The silk firms of Yokohama exported to America 36,596, and to Europe 13,595 bales of silk, from July 1, 1905, to January 31, 1906; a total of 50,191. At the average value of \$500 per bale, the total value would be over \$25,000,000.

THE RICE FAMINE.

Public and private munificence is directing its best efforts towards the famine stricken districts. The first official reports stated that about 700,000 persons would be in a suffering condition; but this estimate is now increased to a million, more or less. Relief contributions are coming, and further anticipated, chiefly from the following sources:—From well-to-do and wealthy Japanese persons, families, and corporations. From foreign residents in Japan and their connections, and from foreign countries. From government and prefectural appropriations and public works.

In the first return of the 'Foreign Committee of Relief' just issued, it is stated that 'thousands of Japanese have made contributions in sums ranging from the 50,000 yen of the Emperor down through the 10,000 yen of the Japan Railway Company, to the yen and even sen of individual philanthropists. The authorities, Imperial and Provincial, especially the former are carrying on millions of yen worth of public works, that every day give employment to thousands of poor people. All funds are being administered in full consultation with the authorities of the three provinces chiefly afflicted.'

Public works initiated for charitable reasons, are regarded as being the least objectionable and most effective means of relieving want, inasmuch as assistance received in that way is felt to be the least humiliating. The officials charged with the distribution are elected by the people themselves. They are bound up with the peasantry they represent, have very complete information of the details of actual distress, and there is no question as to the best use being made of contributions in whatever form. As to actual distress, there is no doubt of it whatever. As described by the second official report, which is in great part an appeal, the conditions are appalling. A leading foreign newspaper says that the 'nature and extent of the distress call for the most prompt and continued aid.'

CANADIAN TRADE.

Mr. Imoto, representing Iwai Shoten (Iwai Company) of Osaka, goes to Canada by the *Empress* of this date. He will visit manufacturers and others in the lines of pulp, paper, and fertilizers. His firm is greatly in sympathy with Canadian trade, and if quantities are found sufficient and prices favourable Mr. Imoto will be greatly disposed to enlarge trade relations between his company and Canada.

RE-ASSESSMENT OF BUILDING LOTS.

A revenue measure appears in the form of a Bill for the re-assessment of building lots, which it is proposed to assess at ten times the rent, the tax upon which to be fixed at 2.5 per cent of the assessed value. The assessment to be conducted by a committee

to be elected by the land-owners, subject to revision by the revenue office. The land-owners will have the right of appeal against unfair assessment. This is an example of direct taxation, and is beside the municipal tax.

THE BOYCOTT.

The importation of flour at Hong-Kong according to current returns for 1905 has fallen off compared with 1904 by over 50 per cent. The figures for the two years respectively are 54,508 and 115,921 tons. In the absence of any given cause for this decrease, it is unavoidable to attribute it to the Chinese boycott of United States trade; for although Hong-Kong is a British possession it is the port for Canton and a large region of China. This would be an opportunity to push Canadian flour; but until Alberta produces as is anticipated, Canadian flour must continue to bear lightly on the market of the Orient.

The *Trade Register*, Seattle, January 20, confesses to the damaging effect of the boycott in the following terms :—

‘The flour mills of the northwest United States are practically idle as the result of the boycott on American goods in China, and it is safe to say that not over one dozen flour mills are now running in both Washington and Oregon. The anti-Chinese bigots are doing all they possibly can to belittle this boycott, but the cold facts remain that our flour mills, that are among the most important industries of the State, have been compelled to shut down owing to the heavy and steady decline in orders from southern China, which has always been good for at least one-quarter of our wheat flour. China has had an awakening; she is at last realizing the injustice of the discrimination against her people, and resenting it by using our own weapon, namely, the highly civilized American boycott. It is about time for Congress to set aside the howls of the demagogue and partisan politician, and lay the foundation for a reciprocity with China that will reciprocate.’

RIBBON MANUFACTURE.

This industry is reported to be making rapid progress with the Japanese. The production at the Nishijin Weaving Factory during 1904 amounted in value to \$111,500, rising to \$400,000 last year. In view of this manufacture being especially suited to the dextrous handiwork of the Nishijin factory operatives, and that it can be placed on the market at a comparatively low price, this branch of the weaving industry has a bright future, although the demand at present is limited to home consumption.

GROWTH OF JAPANESE INDUSTRIES AND REVENUE.

With regard to the match factories throughout the Empire, which have now become a great industry, there is no doubt of the intention of the government to encourage, if not create, what is described as a ‘union of all the match factories.’ It does not yet appear how the distinction between a union and a monopoly is to be observed, since the intention of creating a government monopoly is distinctly disavowed.

It is interesting, however, to note the development which has taken place in some of the principal modern industries of Japan. The Customs return of exports for a term of years gives the following figures :—

	Yen.	Yen.
Figured matting.	1891, 656,122.	1905, 5,086,987
Matches.	“ 1,843,636.	“ 10,360,752
Habutaye.	“ 1,445,636.	“ 28,057,980
Silk hankerchiefs.	“ 2,811,820.	“ 4,893,611
Cotton yarns.	“ 7,872.	“ 33,246,462
Cotton tissues (including towels)	“ 375,407.	“ 13,100,171
Porcelain and pottery.	“ 1,577,190.	“ 5,324,344
Straw-plaits.	“ 378,349.	“ 3,827,108
Totals	“ *9,096,035	“ 103,897,425

This is regarded as a remarkable development, and makes the ground of great expectations for the future. It is current in the press that were this ratio of increase to continue with regard to these eight staples, the total of these alone would exceed a thousand million yen by 1919; but this is to be regarded as making too free with the capabilities of the rate of progression, a less volume of increase would be very satisfactory. There is not included in these statistics such things as lacquer wares, art metal works, ivories, umbrellas, lanterns, &c., &c., which industries are making significant progress.

In 1891, Japan's revenue from customs duties was 4,728,471 yen; in 1905, it had grown to 34,293,519 yen. The former total was levied on the whole trade, exports and imports alike, though not in quite the same proportion. The latter was levied on imports alone. In order then to compare the burdens that were imposed on the trade in each case the imports only will be considered.

	Imports. Yen.	Duties. Yen.	Percentage of duty.
1891.. . . .	62,927,268	2,401,238	3.80
1905.. . . .	488,538,017	34,298,519	11.66

In next year's budget the government has estimated the yield from customs duties at only 30,787,165 yen, the hypothesis being that the import trade during 1905 was abnormally swelled by war materials. The budget for last year estimated this source of revenue at only 23,697,346 yen, so that the treasury obtained some ten millions more than had been expected.

ALEX. MACLEAN.

MELBOURNE.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING, MELBOURNE, February 3, 1906.

RECENT AUSTRALIAN CUSTOMS RULING, *re* F.O.B. VALUES.

On August 1, 1905—exactly six months ago—the Commonwealth Customs enforced a ruling whereby the free on board values of Canadian goods, shipped by Vancouver for Australia, were increased—for dutiable purposes—by the cost of freight from factory point to port of shipment. This ruling caused considerable Canadian cargo to be diverted to the San Francisco steamers, as in this case the values of the goods were only increased by the addition of the cost of railway freight to the nearest (U.S.) border station en route to San Francisco.

DISCRIMINATION AGAINST THE VANCOUVER STEAMERS.

Immediately the Australian Customs ruling as to f.o.b. Vancouver values was decided upon, strong and continued representations were made to the Customs Department by this commercial agency to remove the disabilities under which Canadian shippers were placed. It is satisfactory that the discrimination against the Canadian-Australian mail steamers—subsidized by both the Dominion and the Commonwealth governments—has now ceased to exist.

AMENDED AUSTRALIAN CUSTOMS DECISION NOW IN FORCE.

On January 31, 1906, the Commonwealth Department of Trade and Customs submitted an amended decision as to the free on board values of Canadian goods shipped at Vancouver for Australia, the import of which I immediately cabled to the Department of Trade and Commerce, Ottawa. The decision was conveyed in the following letter from the Comptroller General :—

‘DEPARTMENT OF TRADE AND CUSTOMS ;

‘MELBOURNE, January 31, 1906.

‘I have the honour, by direction, to inform you that the Minister has decided that goods from the eastern states of Canada imported to Australia via Vancouver shall be treated for duty purposes as if shipped from New York, i.e., duty on freight charges will be reckoned only on charges from place of manufacture to nearest border station en route to New York.’

INTERPRETATION OF AUSTRALIAN CUSTOMS DECISION.

It will be observed in the foregoing letter from the Australian Customs Department that ‘goods from the eastern states of Canada’ are specially named. The interpretation of the decision is that goods shipped via Vancouver from the principal manufacturing centres in Canada are implied, thus embracing shipments from Ontario, Quebec and the maritime provinces.

HOW THE CUSTOMS DECISION AFFECTS WESTERN CANADA.

To remove any misapprehension which may be aroused as to how the Australian customs decision will affect Manitoba and other western provinces, it may be stated that goods or products likely to be shipped from such centres—such as cereals—are subject to an Australian specific duty and not ad valorem duties. British Columbia shipments are obviously quoted either f.o.b. Vancouver or Victoria, so that the new ruling will, in the main, be inoperative so far as western Canada is concerned.

FREIGHT TO UNITED STATES BORDER TO BE STATED ON INVOICE.

In my cable to the Department of Trade and Commerce, Ottawa, I stated that ‘proportion of freight charges to the nearest United States border station must be specified upon the invoices’ of goods shipped via Vancouver to Australia. Under the previous customs ruling, I was continually being referred to by importers, requesting my endorsement upon invoices of Canadian goods, shipped via San Francisco or New York, of the distance from factory point to the border and the proportion of the dutiable freight charges. This entailed a very considerable amount of work, besides at times it was impossible to calculate same with accuracy. The Australian customs authorities and importers will have their work expedited by Canadian shippers stating distinctly upon invoices the cost of transportation of the goods as if they were consigned to the nearest border station for shipment at New York.

DECLARATION ON INVOICES OF GOODS SHIPPED VIA VANCOUVER.

As frequently pointed out in reports from this commercial agency, the Commonwealth customs regulations are rigidly enforced so far as over-sea invoices are concerned. Canadian exporters will facilitate their own interests by very carefully following the suggestions contained in Monthly Report for September, 1905, Page 516, by the Department of Trade and Commerce, which, however, are now necessarily altered in making shipments for Australia via Vancouver. The following example is an illustration of a declaration (in addition to others in Monthly Report for September, 1905, Page 516) which should appear at the foot of all invoices of goods shipped via Vancouver :—

‘The actual cost of railway freight from Guelph (place of manufacture) to the nearest border railway station, Niagara—the distance being 132 miles—on the above goods is \$ if making shipments via New York. ,

‘Certified correct,

‘JOHN SMITH & Co.’

Extreme care should be taken in giving the correct figures, as importers will be fined if invoices are proved to be in error. The suggested declaration is absolutely necessary in order that importers of Canadian goods may benefit by the amended Australian customs decision.

D. H. ROSS.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., February 28, 1906.

BRITISH IMPORTS OF FRUITS AND VEGETABLES.

The following table gives the quantities or values of various fruits and vegetables imported into Great Britain during the years 1903, 1904 and 1905:—

	1903.	1904.	1904.
Potatoes, cwt.....	9,150,203	9,993,965	3,664,294
Tomatoes ".....	1,071,927	1,134,721	1,137,193
Onions, bushels.....	8,619,919	8,292,136	7,585,951
Vegetables unenumerated, £.....	396,784	457,491	419,752
Apples, cwt.....	4,569,746	3,771,781	3,494,650
Apricots and peaches, cwt.....	9,578	13,465	23,321
Cherries, cwt.....	110,192	260,724	186,682
Currants, cwt.....	76,419	116,888	82,438
Gooseberries, cwt.....	34,312	36,215	17,159
Grapes, cwt.....	684,084	853,572	700,049
Pears, cwt.....	271,518	535,614	417,654
Plums.....	594,626	493,707	480,291
Strawberries, cwt.....	32,644	34,524	29,399
Fruit unenumerated, cwt.....	688,873	654,765	502,096

THE APPLE TRADE.

Canadians will note that there has been a steady decline in the quantity of apples received since the year 1903. This is in accordance with crop conditions in Canada. It would be very satisfactory indeed if one were able to report that the quality of fruit received this year from Canada was as superior as the relatively high ruling prices would warrant; unfortunately, there have been a number of very serious complaints to the effect that the No. 1 (or XXX) brand has not been kept up to the standard required by law.

CAUSES FOR COMPLAINT.

I have also had complaints of ‘over-facing,’ and some of the smallest and meanest apples I ever saw have been sent to this office as a fair sample of what was found be-

neath an ordinary 'No. 2' face. I am aware that the packers of some of these lots have been prosecuted and heavily fined for similar misdoings which were discovered by the inspectors in Canada, but unfortunately the evil effects of business methods of this kind on the reputation of Canadian fruit are not counteracted by any prosecutions, or by the imposition of any penalty. The trade here see the fraud, and most of them never dream that any punishment has been meted out to the wrong-doers. They simply conclude not infrequently that Canadian shippers are untrustworthy.

THE PEAR TRADE.

It will be observed that though the year 1905 shows a falling off as compared with 1904, the quantity of pears was largely in excess of that of 1903. This is a branch of trade in which Canadians have every reason to expect profitable returns if they embark upon it in a thorough-going manner. Among the pears which I have seen on sale in Bristol and vicinity were many boxes of Bartletts from New York state; now what New York state can successfully do the Niagara district and other parts of Canada can do at least equally well. The methods of packing show nothing in the way of advance upon those adopted by the best Canadian shippers. What I desire to emphasize is that the present is the time to establish a demand here for some of the finest varieties of Canadian pears. It will not do to wait until other sources of supply have been so developed as to command the entire market.

CARELESS PACKING.

I have seen at importing warehouses in Bristol evidences of careless packing of Canadian furniture. The serious damage which has resulted in part at least from defective packing would in some cases more than equal any possible profit. There have also been some complaints that in numbering various cases and making out the invoices, the two sets of numbers have not been made to correspond, with the result that if a certain article was wanted it could not be found in the case designated by the invoice. Much time is frequently lost owing to these irregularities.

WARPED FURNITURE.

Owing to some fault in seasoning or other process of manufacture, certain pieces of furniture have been landed here in a decidedly warped condition. In one case the drawer, presumably made to fit, had a play of $\frac{3}{4}$ of an inch between what should have been the retaining sides of the pieces of furniture. In another case the writing bed of a desk had become distinctly wavy, and in still another case I found the veneer backing detached for more than half its length. These difficulties are of course very serious when viewed by possible buyers, who naturally hesitate to give large orders, or indeed any orders whatever for goods, unless subject to inspection on arrival.

DATING CHEESE.

There continues to be a strong impression of opinion to the effect that Canadian cheese will not hold as good a place in the market which it might win, unless and until every cheese is dated to show the month in which it is made.

W. A. MacKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, February 12, 1906.

P. O. Box 668.

IMPORTS OF RUBBER GOODS.

In reply to a recent inquiry *re* this market as a field for the sale of rubber goods, I beg to advise that during the year 1904, South Africa imported such articles to the value of \$177,021, officially detailed as follows :—

Colony.	Article.	Value.	Countries of Origin.	Duty.
		£		
Natal	Hose (fire and suction)	8,012	75 p.c. U. Kingdom.... 19 p.c. Germany. . . .	2½ p.c. ad valorem.
"	India rubber manufactures.....	8,145	6 p.c. U.S. America .. 60 p.c. U. Kingdom.... 20 p.c. U.S. America .. 13 p.c. Germany. . . .	10 p.c. ad valorem.
Cape Colony..	India rubber manufactures, n.o.d.	10,679	7 p.c. various..... 70 p.c. U. Kingdom.... 20 p.c. U.S. America .. 10 p.c. various.....	10 p.c. ad valorem.
"	India rubber (raw).....	97	96 p.c. U. Kingdom....	2½ p.c. ad valorem.
"	Engine packing, n.o.d.....	9,491	55 p.c. U. Kingdom.... 45 p.c. U.S. America ..	2½ p.c. ad valorem.
	Total....	36,425=	\$177,021	

CUSTOMS DUTIES.

In the case of the ad valorem duty of 2½ per cent which the South African Customs Union imposes upon all imports of fire hose, engine packing and raw india rubber, such duty is entirely waived when such articles are the manufacture of Great Britain or Canada. On the other hand the duty of 10 per cent ad valorem existing on india rubber goods n.o.d. is reduced by one-fourth when such articles are the manufacture of Great Britain or Canada.

GARDEN HOSE.

Large quantities of this article are sold, all of which is imported, and the varieties most in demand are the plain rubber and armoured (wired) types, one-half and three-quarter inch, three-ply in fifty foot rolls. The principal suppliers are the United States, England and Germany.

ENGINE PACKING.

Large imports of engine packing take place, the principal consumers being the various South African Railways, viz. :—

The Cape Government Railways, Cape Town.
 The Central South African Railways, Johannesburg.
 The Natal Government Railways, Durban, Natal.
 The Rhodesian Railways, Salisbury, Rhodesia.

FIRE HOSE.

The demands of this market as regards fire hose are largely looked after by English manufacturers, the Germans coming next, with the United States a very poor third. Requirements are usually indented for as needed, and as far as I have been able to ascertain no stocks are carried by any of the large importing houses.

RUBBER BELTING.

The demand for rubber belting is very small, and what there is, is confined to Johannesburg and district.

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 2029,

MEXICO CITY, MEX., March 1, 1906.

FARMING MACHINERY.

There is an ever-increasing demand here for farming machinery of all kinds. Up to the present time Canadian manufacturers have never made any serious effort to secure any portion of this trade, and the consequence is that it all goes to the United States, which is yearly increasing its percentage of the whole volume of Mexico's foreign trade. Canadian manufacturers seem willing to open up trade here only upon a spot cash basis against bill of lading, and to be unwilling to do the least bit of missionary work. If they are really desirous of extending their trade to this market I should suggest that some large firm, or several smaller ones combined, making different classes of implements, should send a representative here to make a thorough investigation of the field. This agency will only be too pleased to assist such representative in any way in its power.

SHOW ROOM SUGGESTED.

The writer would suggest the establishment of a ware room carrying a full line of samples, same to be in charge of a competent salesman. The business could be greatly increased, with correspondingly larger profits if a central agency were established in Mexico city and local agents appointed at the more important outside points similar to the method employed in Canada. The majority of sales could be made for cash and in case any should wish credit there would practically be no risk in granting it, as the class of people wishing such an article are the most solvent and best pay of any in Mexico and as good, if not better, than the same class at home.

SAW-MILL MACHINERY.

The lumber business, due to ever increasing railway facilities, is being largely developed with a consequent demand for mill machinery which could undoubtedly be supplied better in the Canadian market than in any other. At present I know of no Canadian firm getting any share of this business.

DRILLING MACHINES.

There is also considerable business being done here in boring machinery. Petroleum is being looked for in several parts of the country and artesian well boring is also instrumental in increasing the demand for drilling apparatus. At present the Star drill seems to practically monopolize the business, but I see no reason why some enterprising Canadian firm should not make a bid for a share of it.

CREAM SEPARATORS.

Although modern dairying has not reached any high degree of development in Mexico still there is an ever-increasing number of dairies being established in different

parts of the country, and as the demand for creamery butter and cheese increases old methods are being superseded and modern machinery put in. For this reason it would be well for manufacturers of cream separators to devote some of their attention to this growing trade.

PIANOS.

There are annually many hundreds of pianos sold throughout Mexico. These are of many different makes, both American and German, principally the latter. Here, as in other lines, the Germans demonstrate their ability to capture a market once they make up their minds to do so. Duties here being specific the demand is for a piano with a light case and the Germans secure the bulk of the trade by catering to the demand. As a rule American instruments would be taken in preference were it not for the heavy case and the consequent increased cost. Should Canadian manufacturers of pianos study the requirements and give the instrument the market asks for I do not see why they should not secure a good return for effort expended.

MEXICAN CIGARS.

I would urge that Canadian tobacconists experiment with Mexican cigars. The demand for these in England especially, is fast increasing and I believe a large demand can be created for them in Canada. Mexican cigars can, I believe, more than compete with Havanas in price for the same quality. Most Havana cigars are flavoured while the Mexican is made of pure tobacco. Once a person has acquired a taste for the Mexican weed he is never again satisfied with the Cuban article. I should be glad to put Canadian dealers in communication with Mexican manufacturers, and would urge the advisability of their placing trial orders.

MONETARY REFORM.

While the new monetary law, introducing the gold standard, only came into force on the first of May last, the country is fast being practically established on a gold basis. Some twenty-five millions of pesos in gold have since been put in circulation, and the banks pay it out now to anyone asking for it. This has been greatly facilitated by the late high price of silver. The adoption of a stable currency is also making itself felt in the introduction of foreign capital.

A. W. DONLY.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, March 3, 1906.

THE 6 PER CENT SURTAX.

The 6 per cent surtax on all customs duties which was levied in March last in order to met an expected deficit for the fiscal year 1905-06 has been repealed, there being no necessity for its continuance as the fiscal year to March 31 is calculated to close with a surplus of £15,000.

TARIFF REVISION.

The government has made it to be understood that the present tariff law, which expires on June 1 next, will be re-enacted for a further term of five years. Alterations, if any, will be slight.

G. EUSTACE BURKE.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, March 2, 1906.

GRUBBEGD, No. 4.

TRADE OF SWEDEN IN 1905.

From an article in 'Swedish Export' about the economic circumstances in Sweden, I quote the following translation:—

'The improvement in all branches of trade and industry has been plainly visible, and promises a continued increase. The trade balance for 1905 will likely be more advantageous than earlier years, as the country had a good harvest, and as a consequence a smaller quantity of breadstuffs and other food articles had to be imported. On the other hand there has been some rise as far as a large number of export articles is concerned, the price having gone up on the three leading articles, wood, wood-pulp and iron, and this increase in the price is not only of a temporary nature, but the tendency has been rising throughout the year.

THE IRON INDUSTRY.

'In the iron industry the factories have been fully taken up with contracts, several of them even for 1906. The export of all kinds of iron and steel has been increasing.

THE MACHINERY INDUSTRY.

'The export of machinery has not showed any change during 1905. It principally has comprised dairy and creamery machinery and the forced competition from the several new erected factories has thus not been able to bring the export up.

THE WOODEN MARKET.

'The wooden market must for 1905 be characterized as unfavourable. At the commencing of the season the stocks of planks were very large and the prices weak. This again acted depressing on the other wooden market. For 1906, however, prospects are better, the stocks with foreign importers and in the London docks being small, and the same is the case with the exporters in Sweden. Also from America there is hardly any competition and in Russia the stocks are also said to be small.

THE WOOD PULP INDUSTRY.

'The exceptional favourable conditions in the wood pulp industry have induced considerable new capital to be placed in this branch. At present there are about ten factories under building or projecting, with a gathered capacity, 80,000 tons per year. What enormous progress this industry has made in Sweden appears from the following, that in 1901 there was manufactured 24,000 tons, while in 1905 the production reached 270,000 tons.

THE PAPER INDUSTRY.

'The paper industry must be said to have had a favourable year. The factories have been fully engaged, and the prices have for same qualities been more advantageous than in 1904. This especially refers to sulphite cellulose paper and strong qualities of paper for packing purposes, as in this line there exists an agreement among the manufacturers. In wrapping and bag papers of sulphite and in news paper there is still a very keen competition.

THE DAIRY INDUSTRY.

'The export of dairy products has shown a continued decrease. Of butter there was exported in 1905 in all 18,400,000 kilogrammes or 40,480,000 lb. to a value of 32,000,000 kroner (\$8,500,000), and it is expected that this article will continue to go downward as an export article. In 1903 there was exported 20,000,000 kilogrammes (44,000,000 lb.) and in 1904, 19,500,000 kilogrammes (42,900,000 lb.)

THE MATCH INDUSTRY.

The export of matches is continually increasing in spite of all difficulties. In 1905 there was exported 18,673,000 kilogrammes (41,000,000 lb.) against 17,025,000 kilogrammes (37,500,000 mill pounds) in 1904.

EMIGRATION.

There emigrated in 1905, 17,341 Swedes against 15,238 in 1904, 29,944 in 1902 and 17,960 in 1901.

C. E. SONTUM.

GENERAL COMMERCIAL INFORMATION

IMPORTS OF PRINCIPAL FOODSTUFFS INTO GREAT BRITAIN.

QUANTITIES of Butter, Cheese, Bacon, Hams, Fish and Eggs, Imported into Great Britain during the *months* of February and the *two months* ended February 28, 1904, 1905 and 1906. (*From British Returns.*)

INQUIRIES RELATING TO CANADIAN TRADE.

Since the publication of the last monthly report there have been received at the Department of Trade and Commerce the following inquiries relating to Canadian trade. The names of the firms making these inquiries, with their addresses, can be obtained upon application to : 'SUPT. OF COMMERCIAL AGENCIES, THE DEPARTMENT OF TRADE AND COMMERCE, OTTAWA.'

Persons desiring any of these Addresses will please Quote the Reference Number.

301. A South African commission house desires to represent on commission a Canadian exporter of **cheese**.

302. A South African firm with branches in the principal business centres desires representation on commission of Canadian manufacturers of **unsweetened sterilized milk**.

303. A South African commission agent desires to represent a Canadian manufacturer of **sole leather**.

304. A London metal firm desires to be placed in touch with Canadian producers and shippers of **antimony**.

305. A London firm desires the names of Canadian manufacturers of **pick, shovel and hammer handles** who can supply goods suitable for the South African market.

306. A London firm wishes to secure the agency of a Canadian shipper of **bacon, eggs and butter**.

307. A north country manufacturer of **fancy leather** such as **sealskins, walrus, dolphin** and also **levant cape goat** would like to obtain a share of Canadian trade.

308. A Bradford wholesale merchant desires to get in direct communication with buyers in Canada of **wool tops, noils and woollen waste**.

309. A large window-blind manufacturer desires to get in direct communication with exporters from Canada of **window rollers**, with and without tops, average size: 48 inches by 1½ inches; would also like to get quotations for **pine** suitable for venetian blinds, 2½ inches by ¾ inches and of various lengths.

310. A Yorkshire timber firm desires to get in direct communication with shippers of **Quebec pine, deals and boards**, also **maple blocks** for flooring, doors, &c.

311. A large firm of corn merchants asks for communication with Canadian shippers of **hay** in large quantities and regular shipments.

312. A Bradford firm of fruit merchants desire to get in communication for the coming season with Canadian exporters of **apples**, to be shipped direct, demand unlimited.

313. A large Bradford firm desires direct communication with exporters of Canadian **apples and pears**, for the coming season. Best and medium qualities in large quantities.

314. A Bradford fruit merchant desires to get in direct communication with Canadian exporters for the coming season of **xxx and xx apples**; is prepared to take large and regular shipments.

315. A Bradford firm desires to get in direct communication with Canadian exporters of **bacon, hams, cheese, butter and canned goods and meat**.

316. A Bradford firm of woollen merchants desire to export to Canada, **English, Scotch and Irish fleece wools**, also **wool tops**, and would be pleased to hear from those interested.

317. A Hull firm of timber merchants desire to arrange for shipments of **Quebec spruce, oak, birch and pine**.

318. A large firm of Hull timber merchants desire to import from Canada, direct, large quantities of **Quebec spruce, pine, birch and elm.**

319. A Leeds engineering firm in a position to export any quantity of **basic slag phosphate**, desire to open direct correspondence with Canadian firms for export of this article to Canada.

320. **Soda ash or refined alkali.**—A London chemical firm has asked to be referred to Canadian manufacturers of soda ash or refined alkali.

321. **Iron Products.**—A well known iron company is desirous of getting into touch with shipowners, engineers and others interested in the materials they produce, with a view to an extension of business in Canada.

322. **Saddlery and dry goods.**—An English manufacturer is seeking the services of an agent in Montreal who is conversant with the saddlery and dry goods trades.

323. **Hosiery manufacturers.**—An important firm of hosiery manufacturers in Scotland requires a Canadian agent calling upon the best retail houses.

324. **Indian and Venetian reds, &c.**—A West of England firm manufacturing Indian and Venetian reds, purple browns, ochres, umbers, siennas, &c., is looking out for agents in Canada who can represent them in that line.

325. **Molybdenite.**—Inquiry is made for the addresses of Canadians who are actually producing molybdenite and in a position to quote for supplies.

326. **Razors and watches.**—A London firm is prepared to appoint suitable Canadian resident agent to handle their razors and watches.

327. **Cotton waste.**—A London company manufacturing cotton waste asks to be placed in communication with Canadian importers.

328. **Coal importers and ship brokers.**—A Sunderland firm desires the addresses of coal importers and ship brokers in Montreal and Quebec.

329. **Agricultural implements.**—A South African commission agent desires to represent a Canadian manufacturer of agricultural implements.

330. **Fencing material.**—A South African commission agent with first-class connection throughout Cape Colony, Natal, Orange River Colony and the Transvaal, desires to represent on commission a Canadian manufacturer of fencing material.

331. **Church furniture.**—A South African firm of indent merchants desire catalogues and lowest quotations and discounts from Canadian manufacturers of church furniture.

332. **Binder twine.**—A large Cape Town importer desires quotations for binder twine for agricultural purposes.

333. **Butter.**—A Manchester produce firm at present buying through brokers, desires to buy direct, and invites correspondence from Canadian exporters of butter, quoting prices c.i.f. Manchester.

334. **Horse carriages.**—Lancashire firms engaged in the vehicle trade will be glad to obtain prices and catalogues from Canadian manufacturers of horse carriages.

335. **Chair trimming and carpet binding.**—A Manchester manufacturer of chair trimming and carpet binding wishes to send samples and quote prices to Canadian dealers in same.

336. **Chair legs and spindles.**—A Lancashire manufacturer asks for prices and specifications of oak and walnut chair legs and spindles from Canadian manufacturers.

337. **Pine doors.**—A Lancashire firm desires quotations for pine doors, free from knots, c.i.f. Manchester, from Canadian manufacturers.

338. **Whole salmon.**—A Manchester firm wishes to correspond with Canadian shippers of whole salmon.

339. **Flour in sacks.**—A Manchester firm wishes to obtain prices from Canadian flour exporters of X, XX and XXX flour in sacks quoted c.i.f. Manchester.

340. **Baled hay.**—A Manchester firm wishes to obtain prices of baled hay c.i.f. Manchester from Canadian exporters of same.

341. **Morocco leather.**—A Manchester firm wishes to obtain prices of Morocco leather c.i.f. Manchester from Canadian manufacturers of same.

342. Street and railway lamps.—A Lancashire firm manufacturing street and railway lamps, will gladly furnish prices and catalogues to Canadian importers of same.

343. Crude phosphate.—Lancashire firms manufacturing fertilizers will welcome correspondence from Canadian exporters of crude phosphate.

344. Spruce boards.—A Lancashire firm of manufacturers asks for prices and specifications of St. John and Quebec spruce boards, from Canadian shippers of same.

345. Typewriter ribbon.—A Manchester stationery firm would act as agent in Lancashire and Cheshire for Canadian manufacturers of typewriter ribbon.

346. Wood pulp.—A Manchester firm wishes to correspond with Canadian exporters of wood pulp.

347. Canned lobsters.—A German firm would like to represent a Canadian firm able to export large quantities of canned lobsters upon commission. The firm in Germany has connections in Rhineland, Westphalia, South Germany and Alsace-Lorraine.

348. Manufactures.—A London, England, firm of long standing having large business connections in South Africa, would be glad to represent any Canadian manufacturers or other exporters anxious to do business in South Africa.

349. Buggies; Boots and Shoes.—A London, England, firm of long standing with large business connections in South Africa, and who are in a position to act as general agents, have an inquiry from South Africa for Canadian buggies and Canadian boots and shoes.

350. Hay.—A large Bradford grain and provision firm, doing a large retail business in hay and oats, desire to get into communication with Canadian exporters of hay direct in 100 ton lots, and would be pleased to give quotations thereon.

351. Flax Seed.—A Hull firm of grain merchants desire to be put in communication with Canadian shippers of flax seed in large quantities.

352. Spruce and Pine.—A Hull firm of timber merchants desire to get in communication with Canadian exporters of spruce and pine.

353. Flax Seed, Linseed, &c.—An east coast firm desire communication with Canadian exporters of flax seed to Hull direct, also importers of linseed and cotton-seed oil to Canada, large and regular demands for flax seed.

354. Swede Turnip Seed.—A north country seed merchant desires to get in touch with wholesale seed men in Canada requiring a large shipment of excellent Swede turnip seed.

355. Pianos.—A large manufacturer of pianos of all grades and sizes, desires to get in direct communication with importers of these goods to Canada. Would also appoint an agent for the Dominion, or erect a branch factory in Canada.

MINERAL PRODUCTION OF CANADA, 1905,

The following information, taken from the 'Summary of the Mineral Production of Canada' for the Calendar Year 1905, as issued by the Geological Survey, contains matter of interest to Canadians.

(Subject to Revision.)

Product.	Quantity. (a)	Value. (a)
METALLIC.		\$
Copper (b)..... Lbs.	47,597,502	7,420,451
Gold, Yukon.....	88,327,200	
" all other.....	6,159,633	
		14,486,833
Iron ore (exports, estimated)..... Tons.	116,779	125,119
*Pig iron from Canadian ore..... "	70,554	1,047,860
Lead (c)..... Lbs.	55,961,000	2,634,084
Nickel (d)..... "	18,876,315	7,550,526
Silver (e)..... Oz.	5,974,875	3,605,957
Cobalt.....		100,000
Other metallic products including zinc.....		180,090
Total metallic.....		37,150,830
NON-METALLIC.		
Asbestos..... Short tons.	50,670	1,486,359
Asbestic..... "	17,594	16,900
Chromite..... "	8,575	93,301
Coal..... "	8,775,933	17,658,615
Corundum..... "	1,644	149,153
Felspar..... "	11,700	23,400
Graphite..... "	541	17,032
Grindstones..... "	5,172	57,200
Gypsum..... "	435,789	581,543
Limestone for flux in iron furnaces..... "	341,614	258,759
Manganese ore (exports)..... "	22	1,720
Mica.....		168,043
Mineral pigments--		
Barytes..... Short tons.	3,360	7,500
Ochres..... "	5,105	34,675
Mineral water.....		100,000
Natural gas (g).....		314,249
Petroleum (h)..... Brls.	634,095	849,687
Phosphate..... Tons.	1,500	8,425
Pyrites.....	32,744	123,574
Salt..... "	45,370	310,858
Talc..... "	500	1,800
Tripolite..... "	200	3,600
Total non-metallic (except structural materials, &c.).....		22,266,393

(a.) Quantity or value of product marketed. The ton used is that of 2,000 lbs.

(b.) Copper contents of ore, matte, &c., at 15.590 cents per lb.

(c.) Lead contents of ore, &c., at 4.707 cents per lb.

(d.) Nickel contents of ore, matte, &c., at 40 cents per lb.

(e.) Silver contents of ore at 60.352 cents per oz.

(f.) Oven Coke, all the production of Nova Scotia, British Columbia and the North-west Territories.

(g.) Gross return from sale of gas.

(h.) Deduced from the amount paid in bounties and valued at \$1.34 per barrel.

*The total production of pig iron in Canada in 1905 from Canadian and imported ores amounted to 527,932 short tons, valued at \$6,492,972, of which it is estimated 70,554 tons, valued at \$1,047,860, should be attributed to Canadian ore, and 457,378 short tons, valued at \$5,445,112, to the ore imported.

TARIFF CHANGES.

BRITISH INDIA.

ACT No. 1 OF 1906, ASSENTED TO ON 26TH JANUARY, 1906, FURTHER TO AMEND THE INDIAN TARIFF ACT, 1894.

(The Gazette of India of January 27, 1906).

Whereas it is expedient to further amend the Indian Tariff Act, 1894; It is hereby enacted as follows:

1. (a) This Act may be called the Indian Tariff (Amendment) Act, 1906; and,
(b) It shall come into force on the 26th day of February, 1906.
2. In No. 1 of Schedule III of the Indian Tariff Act, 1894, as amended by the Indian Tariff Act (1894) Amendment Act, 1896;
(a) "Rs. 10" shall be substituted for "Rs. 6" in the fourth column as the rate of duty to be levied and collected per Imperial Gallon or six quart bottles of "Liqueurs", and
(b) for the following, namely:

No.	Names of Articles.	Per	Rate of Duty.
*	*	*	*
	Spirit when so used in a proportion of twenty per cent and upwards.	Imperial Gallon or six quart bottles of the strength of London proof.	Rs. A. 6 0 and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.
	Spirit, perfumed, in wood or in bottles.	Imperial Gallon or six quart bottles.	8 0
	Spirit, other sorts.	Imperial Gallon or six quart bottles of the strength of London proof.	6 0 and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.

there shall be substituted the following, namely:

No.	Name of Articles.	Per	Rate of Duty.
*	*	*	*
	Spirit when so used in a proportion of twenty per cent and upwards.	Imperial Gallon or six quart bottles of the strength of London proof.	Rs. A. 7 0 and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.
	Spirit, perfumed, in wood or in bottles.	Imperial Gallon or six quart bottles.	11 0
	Spirits, other sorts.	Imperial Gallon or six quart bottles of the strength of London proof.	7 0 and the duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.

SOUTH AFRICAN CUSTOMS UNION.

I.—PROTOCOL—DATED JULY 5, 1905—TO THE CUSTOMS UNION CONVENTION OF 1903, IN REFERENCE TO THE ADDITIONAL DUTY ON SPIRITS.

The Government of the Colony of the Cape of Good Hope having applied for permission to impose an additional duty of six shillings per gallon on spirits imported for consumption in that Colony, His Excellency the Governor of the Cape of Good Hope, His Excellency the Governor of Natal, His Excellency the Governor of the Orange River Colony and the Transvaal, and His Honour the Administrator of Southern Rhodesia (in terms of Article XXV. of the Customs Union Convention) mutually, on behalf of their respective Governments, do hereby signify their joint assent to the above amendment to the said Convention.

The additional duty shall not apply to perfumed or methylated spirits, or to spirits manufactured in any Colony or Territory in the Customs Union from the growth or produce of such Colony or Territory.

The Government of the Colony of the Cape of Good Hope shall be solely responsible for the collection of such additional duty.

II.—TRANSVAAL GOVERNMENT NOTICE No. 766 OF 1905, IMPOSING SPECIAL DUTIES ON ARGENTINE SUGAR.

(*Transvaal Government Gazette* of 1st September, 1905.)

The rules relating to the importation into the Transvaal of Sugar from the Argentine Republic are identical with those framed for Cape Colony.

III.—ORDINANCE No. 4, ASSENTED TO 9TH SEPTEMBER, 1905, RELATING TO THE MANUFACTURE, STORAGE, SALE, IMPORTATION AND EXPORTATION OF EXPLOSIVES IN THE COLONY OF THE TRANSVAAL.

(*Transvaal Government Gazette* of September 15, 1905).

Under Section 9 of this Ordinance, which came into operation on the 1st January, 1906, "No person shall import into or export from the Colony or cause to be imported therein or exported therefrom any explosive unless he shall have obtained a permit issued under the authority of an inspector."

IV.—ORDINANCE No. 36, ASSENTED TO 2ND OCTOBER, 1905, REGULATING THE IMPORTATION OF OPIUM INTO THE COLONY OF THE TRANSVAAL.

(*Transvaal Government Gazette* of October 6, 1905).

This Ordinance provides that "it shall not be lawful for any person, except a registered medical practitioner, dentist, or chemist and druggist, to import into this Colony any gum, opium, extract of opium, poppies, or preparation of poppies, and no such excepted person shall import any such substance without a permit stating the quantity to be imported signed by the Colonial Secretary in such form and containing such conditions as shall be prescribed by the Lieutenant-Governor by Regulation."

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, Stock Exchange, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
France.....	A. Poindron, 101, Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
Japan.....	W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.
Mexico.....	Alex. MacLean, No. 14 Bund, Room B., Yokohama.
Newfoundland..	A. W. Dorly, Apartado 2029, Mexico, D.F., Mexico.
Norway.....	E. D. Arnaud, St. John's.
South Africa.....	C. E. Sontum, Grubbegd, No. 4, Christiana, Norway, agent for Denmark, also.
West Indies.....	C. M. Kittson, Rhodes Building, Cape Town, Cape Colony.
	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.
	Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

Canadian Immigration Agents.

Belgium.....	D. Tréau De Coell, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	W. T. R. Preston, 11 and 12 Charing Cross, London, S.W., England.
	G. H. Mitchell, Newton Chambers, 43 Cannon Street, Birmingham, England.
	Alfred Jury, Old Castle Buildings, Preeson's Row, Liverpool, Eng.
	Bruce Walker, 52 St. Enoch Square, Glasgow, Scotland.
	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mall Building, Cardiff, Wales.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., March 6, 1906.

FAKED BUTTER.

For some considerable time there has been a discussion among the provision importers and grocers of Great Britain as to what measures are to be taken for the suppression of an illegitimate business known as the 'faked butter' business. It is estimated that over 200 tons of this class of butter are being daily produced at a profit of about £12 a ton. That this practice has become both extensive and serious is obvious from the reports of the Federation of Grocers' Associations whose last quarterly meeting was held a few days ago. Resolutions from numerous local Grocers' Associations were considered, and the Federation embodied the whole in one resolution urging upon the new government the necessity for the passing of a Butter Bill.

In reading the discussions and correspondence in connection with this subject the part that Canada plays is considerable. From the small amount of moisture in Canadian butter, it appears that she is one of the countries who suffers from this 'faking.' Canadian butter is quoted as giving from 7 per cent to 11 per cent of moisture, thus lending itself particularly to this manipulation.

THE INDISPENSABLE CHEMICAL.

The methods adopted to add to the weight and bulk, cheapen the cost, and at the same time produce an article which conforms with the Food and Drugs Act, as at present interpreted, are numerous and ingenious. The butter used for 'faking' is chiefly obtained from the colonies and Siberia, because these particular brands contain the smallest percentage of water. To this base, the manipulator adds solidified milk and 'treated' milk. Sweet separated milk, which can be obtained at about 1d. per gallon of about 10½ lb. is solidified by the action of a small quantity of hydrochloric acid in separating the caseine from the whey. The acid is neutralized by carbonate of soda, which converts the caseine into a jelly-like substance, which, when found by the analyst in butter, is indicated as curd and salt, both of which are usually present in certain small proportions in best pure butter. The cost of milk solidified in this way is said to be about 1d. per pound. Separated skim milk is also used for the 'treating' process, in which the milk is infected with a pure culture of lactic ferment, the result being a fluid with a slightly acid taste, not unlike buttermilk just after churning. Milk so treated imparts to the butter a very delicate flavour, and the cost is stated to be about 11d. per gallon, or one-tenth of a 1d. per lb. In the product of what is known as 'milk-blended' butter, the proportion of solidified milk is about 10 per cent, and that of treated milk from about ten per cent to thirty per cent of the entire bulk, according to the quality of the mixture. When the whole is thoroughly combined, by means of kneading machine, it is placed in a refrigerated chamber for a short period, and the article is then finished and ready for packing or making into country rolls, pats, &c.

ANOTHER FORM OF FRAUD.

A case has been recently brought to light in Birmingham where a firm had contracted with one of the hospitals to supply them with a certain quantity of Danish butter at a price. The price advanced very much, and this firm actually went to a shipper and packer of margarine, and had a Danish cask filled with margarine. The hospital authorities had the cask analysed and found it to be margarine. The barrel was traced to the factory in Denmark, and there they got the name of the firm to whom it was shipped in Great Britain, and thus discovered who had re-filled the cask with the adulterated article. A very heavy fine was imposed on the firm, and only their previous reputation saved them from imprisonment.

BRANDING OF CASKS.

The above case is an example of the value of marking the casks. One authority here tells me that one reason why Canadian butter has not had so good a chance on the British market is because it is so difficult to get it as it really comes from the dairy; that not very large quantities had hitherto been shipped, and this had been nearly all used up for the purpose of 'faking.' The Danish shippers go into the matter very much more scientifically. Every dairy has its own particular brand stamped on the side of the cask and also on the top, and as will be gathered from the above instance of fraud, the cask can be traced both to the maker of the butter, and to the importer in Great Britain.

With Canada, the larger proportion of the butter has been shipped in square boxes of 100 lbs. each. These are covered with cotton and some mark placed on it, but it is the mark of the exporter, not of the dairy, and there is no way of tracing what particular dairy certain butter comes from. For the export trade and more particularly to Great Britain regularity of shipments, even quality in salting and colour are really the greatest factors, and although it might give considerable more trouble at first, Canadian shippers would find greater advantage accrue to themselves if they were mindful of these points.

Of course it is questionable if even the careful marking of the packages would do away with the using of Canadian butter for this purpose; but it would prevent the placing back of adulterated butter in the casks, the word 'Canada' bringing it within the Trades Mark Act.

MORE MOISTURE REQUIRED.

Another view of it taken here is that the Canadian packer should see that his butter contains more moisture, as this would prevent Canadian butter from lending itself so much as at present to the manipulator.

P. B. BALL.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, February 18, 1906.

FIJI.

The trade of this colony of Great Britain does not make rapid progress. The exports slowly increase but the imports for 1904 were less than those of 1903 and still less than those of 1902. The trade for the past three years is as follows:—

	Imports.	Exports.
1902..	£526,846	£535,170
1903..	489,095	554,706
1904..	439,995	589,990

Nearly the whole of this trade is British. The bulk of the imports, £330,252 comes from New South Wales, while the bulk of the exports, £422,780 goes to New Zealand. The Canadian trade is steadily if slowly increasing. The imports for 1904 were £12,212,14.5 while the exports were £24,130,8.6. No details are given of the imports from Canada. The exports consist of cocoanut, copra, green fruit, maize, peanuts, sugar, vanilla and one or two items of very small amounts.

ARTICLES CANADA COULD SUPPLY.

The following are items which Canada ought to be able to supply, with the amounts imported in 1904:—

Bacon and hams	£ 1,928	Woodenware	£ 834
Beer, in bottles	3,222	Beans	32
Beer, in wood	774	Bicycles	181
Bolts and nuts	1,148	Biscuits, fancy	1,273
Books	2,500	Biscuits, plain	8,725
Breadstuffs	24,925	Boots and shoes	4,748
Carriages	321	Bran and pollard	2,356
Cheese	432	Cartridges	804
Doors and sashes	1,590	Confectionery	1,198
Drugs	5,276	Drapery	76,067
Fruits and vegetables, dried and pre- served	1,922	Fish	6,253
Gutta-percha and India rubber goods . .	563	Hardware	34,726
Machinery	17,671	Furniture	3,034
Machinery, agricultural	4,738	Jewellery	2,305
Nails	1,936	Leatherware	3,209
Paints, mixed	627	Musical instruments—	
Paints, dry	1,891	Organs	216
Peas and pease meals	144	Pianos	1,174
Sewing machines	1,173	Other	333
Timber, case	657	Paper, wrapping and printing	1,330
dressed	6,557	Stationery	3,833
rough	8,654	Tobacco, manufactured	4,936
Dry and green fruit	3,556	Umbrellas and parasols	1,040

I regret that both in coming and going, owing to the hour in which the steamer called at Suva, I was unable to see but one or two of the business men of the place. They promised to communicate with Canadian firms with a view to buying from them. One or two Vancouver houses are pushing business, but I think, that considerably more should be done. Canada is now getting a considerable share of the sugar consumed on the Pacific coast from these islands and there should be an export of articles quite equal in value to the sugar and other lines imported.

Last year the islands suffered from drought, which reduced the sugar output it is estimated by 11,000 tons, and also from a hurricane which devastated the banana plantations. While these will diminish its immediate exports its commercial condition is sound. I append a list of some leading importers,

THE FUTURE OF THE ISLANDS.

In a paragraph it is not possible to deal with this question. The islands have an estimated area of 4,953,920 acres. The estimated area cultivated is only 68,040 acres. How much cultivatable land there is in these islands is unknown, but though they are mountainous the soil even in the mountains is fertile and there must be great areas that can be brought under tillage. The development of the colony has been slow, largely through the great care which is taken of the natives by the British Government. The Fijians have been christianized but as yet have not taken to steady labour and lands once cultivated have gone back to a state of nature.

POPULATION.

The native population, in spite of the care taken of them, is dying out. In 1891 they were returned at 105,800, in 1901 they were returned at 94,397, and at the end of December, 1904, the estimate was 90,063. The total population of the islands is very slowly increasing. In 1891 the total population was returned at 121,180, and in 1904 it was estimated to be 121,773. The natives have been replaced largely with East Indians who numbered in 1904, 22,785. These together with a few Polynesians, do the work upon the plantations and in about fifteen years have led to the area of cultivated land being doubled.

PRODUCTION.

The productions of the islands are articles which Canada requires: vanilla, cocoanuts, with fibre and copra, other green tropical fruits of excellent quality, ginger, hides and pelts in small quantities, Indian corn, peanuts, crude rubber, are all consumed in Canada and the demand is equal to all that the islands at present produce. It is not likely that the cultivation or trade will rapidly increase, but should the native lands be dealt with there will be a large production and an important trade of which Canada ought to do a very large share. Canada would be the natural market for the islands, for while Australia is much nearer, yet Australia produces many of the articles which the islands do.

AUSTRALIAN TRADE, 1905.

Preliminary returns have been issued of the trade of 1905. The figures are as follows:—

IMPORTS.			
	1904	1905	Increase.
Gold.	£ 1,183,471	£ 1,496,736	£ 313,265
All other articles....	35,837,371	36,905,067	1,067,696
	<hr/> £37,020,842	<hr/> £38,401,803	<hr/> £1,380,961

EXPORTS.

	1904.	1905.
Gold..	£16,895,640	£10,965,612
All other articles..	40,593,576	45,784,735
	<hr/> £57,489,216	<hr/> £56,750,347

This shows an increase in imports of £801,739 and a decrease in exports of £738,869. As these figures are subject to revision and correction, it is needless to discuss the matter until the correct figures are obtainable. They show, however, the wonderful recuperative powers of Australia and the extraordinary surplus of exports over imports—that of 1905 being in goods greater than the remarkable surplus of 1904. The fact that nearly six million pounds sterling worth of gold was exported in 1905 less than in 1904, indicates that gold, which is an ordinary export of the country, was not needed to pay for goods brought abroad or the national or personal indebtedness to London.

FISH.

The Canadian papers have stated that Mr. Cowie, the Scotch expert, has reported upon the fish of British Columbia. He is alleged to have said that the herrings when caught at the proper season and properly treated, are equal to the best herrings of either side of the Atlantic. If this be so, it would be well to have samples of the fish so caught and treated sent here at the earliest possible moment. The herring of British Columbia suffers in this market on account of its size, colour, quality and preparation. It is inferior in size to those from Great Britain; it is of a red colour that induces people here to believe that it is only a large specimen of the red herring—when kippered the colour is especially dark; the quality sometimes is good, sometimes it has been very poor. It is of the utmost importance that only good fish should be sent to the market in order that the prejudice against it shall be overcome. The unevenness in quality is due perhaps in part to the improper season at which they are caught and in part to the imperfect treatment.

Recently a sample lot of twenty kegs of salted herrings arrived here which perhaps were treated under Mr. Cowie's recommendation. With the exception of three kegs they were in very good condition. These three kegs had leaked a portion of the brine but from the condition of the fish it is presumed that the leakage must have occurred very recently, and due to bad handling at this port. If this indicates an improvement in the character of the barrels or kegs from British Columbia, it is a very important point, as such a considerable percentage of the fish has hitherto been spoilt through the inferior packages having lost the brine on the way out.

CHARACTER OF FISH IMPORTED.

It is not easy to get at the details of the character of the fish imported into Australia and New Zealand, but into Australia is imported £330,908, of which Canada sends only £13,326, and into New Zealand £57,452, of which £15,624 comes from Canada. With the enormous fisheries which Canada has on the east and west coasts, and in which can be found most of the fish imported into this country, it is clear that a very great improvement can be made in the Canadian export trade of fish.

LOBSTERS.

At one time there was a considerable importation of lobsters into Australia from the Atlantic coast of Canada and the United States, but owing to the advanced prices

and the inferior quality sent to this market, the trade declined until it is almost nominal. Here and there a firm sends an order for lobsters, but the firm handling the most states that its importations are within fifty cases per annum. South Africa has been sending lobsters to this market which have not given general satisfaction. They apparently have decayed quickly, and at their best the quality and colour are inferior to those of Canada.

CANADIAN BRAND WANTED.

If a Canadian brand was put upon this market, the quality of which could be depended upon, some increase in the trade would result, but there is no probability that it would be a large one at the prices which must be paid for them.

QUOTATIONS.

The latest quotations in New York for the lobsters bought for Australia are \$3.60 to \$4 per dozen pound cans, and \$2.10 to \$2.25 for half-pound cans. There is a size which is sold to a larger extent than even the pound or half-pound cans. It is put up in 12-ounce tins, and is specially sold for picnic parties.

AUSTRALIAN LEATHER.

I have had more than one request for samples and prices of chrome tanned sheep skins for Canada. The prices of raw sheep skins are so high at the present moment that many tanners have gone temporarily out of business, and none of them from whom I have been able to hear will quote. One or two firms advise that chrome tanning of sheep skins is but little done, and that the tanners cannot compete in prices with the article produced in Canada or the United States.

PAPER.

The Australasian paper market has been dealt with in previous reports in detail. It is sufficient here to state that the consumption of printing paper in Australia and New Zealand is about one hundred thousand tons per annum. Advantaged by a preferential tariff, Canadian paper is making some headway in New Zealand, but is not making similar progress in Australia. The character of the trade is changing. The large newspaper offices formerly took the risks of delivery and in order to meet the exigencies of transmission, they carried heavy stocks. Now the large paper firms of Great Britain and the United States are guaranteeing deliveries to the extent of carrying a reserve stock, if circumstances appear to demand it, in Australia. It is, therefore, difficult to get open contracts of the old character, and Canadian mills who quote only the price at the mill door and will take no responsibility for deliveries, can hardly expect to secure orders.

It is worth the consideration of Canadian paper mills, or a number of them, whether they cannot be advantaged by having one selling agency. In this way, if, through any circumstance, a mill was not able to furnish its quota, the others could be drawn upon and regularity of supplies maintained. This would meet one of the demands of this market.

NEW ZEALAND.

An early return of the trade of New Zealand last year shows the following figures:—

IMPORTS.

1903..	£12,788,675
1904..	13,288,917
1905..	12,826,691

EXPORTS.

1903..	£15,010,378
1904..	14,748,348
1905..	15,655,947

This is rather better than was anticipated at the beginning of 1905. The decrease in importation of merchandise amounting to £418,214 was anticipated, but the increase in the exports is larger than was hoped for and is due to the high prices for wool—nearly the whole gain being in wool and sheep-skins. Less quantities were shipped but the prices were so much better that it gave a return of over three-quarters of a million sterling on these two items alone. Though there was a reduction in the volume of imports, the duty collected was slightly greater in 1905 than in 1904. There was a considerable reduction in the duty upon spirits but an advance upon the duty of tobacco and cigarettes. There was not much difference in the duties collected upon general merchandise. The trade of the islands is represented to be fair and the financial position good.

PREFERENTIAL TARIFF.

Sir Joseph Ward, Postmaster General of New Zealand passed through Sydney on his way to England and in an interview with the press stated that it was the desire of New Zealand to enter into a reciprocal agreement with Australia. In a subsequent interview, Sir William Lyne, Minister of Trade and Customs, stated that the question had not been considered by the Australian government and he thought that it was improbable that it would be conceded.

A SUCCESSFUL TENDER.

The New Zealand government has awarded a contract to a Canadian firm for one hundred thousand feet of wooden water-pipe. It was secured because the firm sent over an expert who understood his business. If an ordinary agent without such expert knowledge had been the representative it is altogether unlikely that he could have secured an order for a line of goods so novel and requiring so much special information to be given about it.

J. S. LARKE.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, February 19, 1906.

CANADIAN MOTOR CARS FOR AUSTRALIA.

Advices have been received that shipments of Canadian motor cars are now on the water for various Australian ports. Owing to climatic conditions, there is a constant and increasing demand for reliable motor cars which can be sold at fair prices in Australia. The Canadian cars will enjoy excellent representation and, as the manufacturers are aware of the local conditions to be contended against, there is every prospect of successful business being accomplished.

ORDER PLACED FOR CANADIAN ICE SKATES.

Recently, the proprietors of the Melbourne ice skating rink placed an initial order for 1,500 pairs of skates. The bulk of this order went to United States makers who submitted samples and special quotations. Through the efforts of this commercial agency a fair trial order was sent for one brand of Canadian skates, despite the fact that wholesale prices were not available, so that a comparison could be made of the various qualities and values. Canadian makers are now in possession of full details as to the particular class of skates required by Australian rinks and a determined effort should be made to secure future business in this line.

ORDER PLACED FOR OREGON PINE.

As merely one illustration of how British Columbia mills are losing their hold of the Australasian trade, the specification of a cargo, of over 1,000,000 feet of Oregon pine, placed a few weeks ago with the Puget Sound mill, was recently submitted to me. The British Columbia prices were stated to be nearly 10 per cent higher than the rates which secured the order, which, to some extent, may be accounted for by higher rates of freight. In Monthly Report, October, 1905, Page 697, I dwelt at length upon the Australian market for British Columbia lumber, and the conditions to-day appeared unaltered.

LARGE ORDERS FOR WIRE NETTING.

The government of one of the Australian states is now calling for tenders to supply wire netting for rabbit fencing to the value of \$100,000. It has decided to submit the business to public competition. The quotations of relative values are as follows:—

Price.

	£	s.	d.	
42 x 1 $\frac{1}{4}$ x 17	40	0	0	per mile.
36 x 1 $\frac{1}{4}$ x 17	36	5	0	" "
42 x 1 $\frac{1}{2}$ x 18	31	6	3	" "
36 x 1 $\frac{1}{4}$ x 18	26	16	3	" "
42 x 1 $\frac{1}{2}$ x 17	33	5	0	" "
36 x 1 $\frac{1}{8}$ x 17	28	10	0	" "
42 x 1 $\frac{1}{2}$ x 18	25	15	0	" "
36 x 1 $\frac{1}{2}$ x 18	22	0	0	" "

These prices must not in any way be considered as quotations for supplies, but merely as a guide to indicate the difference in value of the various grades, 42 x 1 $\frac{1}{4}$ x 17 stands at the head of the list, but it is claimed to be the cheapest in the end. South Australia adopts 36 x 1 $\frac{1}{2}$ x 18. Naturally this demand in one direction for wire netting must tend to influence the market. Wire netting of the above sizes is duty free and should not be confused with wire fencing which the customs have decided as being dutiable at 20 per cent ad valorem.

These details should be of interest to Canadian manufacturers as an illustration of the immense requirements of this country. There are several wire netting factories in Australia, one having a very extensive and modern plant, but local makers have to import the raw material.

AUSTRALIAN FROZEN MUTTON AND LAMBS FOR VANCOUVER.

Several thousand carcasses of frozen mutton and lambs were recently sold by an Australian meat exporter for shipment to Vancouver and some points east of the Rockies. The development of this trade has been retarded owing to the limited cold storage space available on the Canadian-Australian steamers. With continued good seasons, exporters of frozen meats are closely studying the possibilities of the western Canadian market, especially during the winter months.

AUSTRALIAN CANNED MEATS.

After several years of comparative inactivity, many of the Australian preserved meat workers have resumed extensive operations on account of improved climatic conditions. Hitherto, c.i.f., Vancouver quotations have been too high to attract business from that point, although some moderate shipments were made in 1904 and 1905. This year prices will be lower, and thus an opportunity is made available of increasing the export business to British Columbia.

CANADIAN SCREEN DOORS.

Despite persistent efforts which have been made to introduce Canadian screen doors throughout this territory the result has been disappointing. The quality of the 'made in Canada' goods is much superior to what this market has been accustomed to receive from the United States, hence the volume of trade is limited owing to relatively higher prices.

Manufacturers might with advantage turn their attention to a cheaper line of goods, besides securing the lowest inland transportation and marine freights on these bulky lines.

CANADIAN TRADE NOTES.

The agents for a line of Hamilton shoe polish report a rapid increase of business, as in Melbourne and suburbs alone the goods are being stocked by over 70 retail stores.

Orders for Canadian corundum wheels, roll top desks, refrigerators and machinery—of various kinds—have recently gone forward to manufacturers. Some metal working and tinsmith's machinery has been ordered from a Hamilton company. Canadian samples of aluminum goods are now being tested in Melbourne, and, if proved of satisfactory quality, very considerable orders will result. Specifications of a large number of ploughs, to be built to Australian standards, have gone forward to a Canadian company. The Melbourne market is bare of stocks of Canadian jar cheese, and supplies are anxiously looked for. The Australian travelling representatives of quite a number of Canadian manufacturers have, during the last few weeks, called at this commercial agency.

D. H. ROSS.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, March 1, 1906.

P.O. Box 668.

SOUTH AFRICAN CUSTOMS RETURNS.

The returns of the South African Customs Union for the six months ending December, 1905, have just been published, and show total imports of a value of £17,691,962, and exports £18,313,738.

CANADIAN TRADE WITH SOUTH AFRICA.

During the six months ending December 31, 1905, Canada exported to South Africa, £251,786 (\$1,233,752) worth of produce and manufactures, but it should be remembered that considerable merchandise of Canadian origin reaches the South African market via Great Britain and United States ports, for which Canada is not credited in the above figures. South African direct exports to Canada were practically nil.

DETAILS OF SOUTH AFRICAN IMPORTS.

The following figures show in detail those South African imports for the six months ending December 31, 1905, which Canada is able to supply, and the country or countries which at present supply the bulk of the demand:—

ARTICLE.	QUANTITY.	VALUE.	COUNTRY OF ORIGIN. (principal).

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., March 14, 1906.

CHILLED AND FROZEN MEAT.

The local prejudice against frozen or chilled beef and mutton was very strong in Yorkshire, and two or three years ago it was almost impossible to sell this class of goods in Leeds. During this last summer this prejudice has been overcome, and Leeds is now being seriously exploited by the large importers of frozen and chilled meat. The big meat syndicates, English, American and colonial, have already established 54 retail shops in Leeds, a large proportion of them having been opened during the last 4 or 5 months. In addition, there are at least 50 private tradesmen who now likewise sell nothing but chilled and frozen meat. In other words, one out of every half dozen meat shops in Leeds, has now nothing but imported meat to offer the public, whilst a good many of the remaining 500 meat dealers sell both home and imported meat.

This industry commenced in England about 1885, and the difference in price proved rather tempting to a good many of the customers at the outset, but the meat was delivered in a very unsatisfactory condition, and it was not until some ten years had elapsed, and the colonial steamers had become equipped with effective cold storage rooms, that the butchers in this country began to realize that frozen meat was not going to remain a mere cheap curiosity, but was likely to become a most important food stuff.

After London, frozen meat was quite successfully introduced into Manchester, Birmingham, and still later into Glasgow, where at present more imported meat is consumed per head than in any other provincial centre.

GROWTH OF THE FROZEN MEAT INDUSTRY.

The growth of this industry has been wonderful, and is only now in its infancy. The latest statistics issued concerning the growth of the importation of chilled and frozen meat is a revelation to every student of food supplies in this country. Last year there were 438,780 tons of beef, mutton and lamb imported into the United Kingdom, being an increase of about 75,000 tons as compared with 1904. There were big increases in Argentine frozen beef, in Australian and Argentine mutton, and in Australian lamb. The Argentine meat companies, which are financed almost entirely with British capital, succeeded in wresting a considerable proportion of the chilled beef trade from the United States. Whilst 8,372 tons less of North American chilled beef arrived in this country last year than in 1904, there was an increase of 25,328 tons of imported chilled beef from the Argentine Republic. It is doubtful whether there will be any prospective increase in the consumption, either in South Africa or in any European or other foreign country, which will be of sufficient value to affect the course of values in the United Kingdom.

THE MARKET IN GREAT BRITAIN.

Great Britain still absorbs 85 per cent of the world's total output in chilled and frozen meat. The shipments of chilled or frozen meat to Germany will now be impossible, as apparently the government is predominated by the agrarian party, who far from listening to the popular clamour for cheaper meat, have framed new laws, which came into force on March 1, raising the import duties by nearly 50 per cent. Hitherto, the rate on imported meat has been about 10s. per cwt., now it is 17s. 6d. on meat from the most favoured nations (including Great Britain and her colonies, except Canada and New Zealand) and the tariff, as against the United States, Canada and New Zealand, is 25s. per cwt. on meat imported from these countries.

BEEF AND MUTTON PRICES LOWER.

The effect of the increase in this industry has been to lower the price of beef and mutton very considerably in the big industrial centres, and in England it is nothing unusual to buy chilled beef and mutton in Leeds at from 4½d. and 5d. per lb., and lamb at 7d. per lb, whilst the price for English beef is from 10d. to 1s. 2d. per lb. No one can seriously argue for a moment that the chilled and frozen meat is at all equal to good old English beef, and fresh and tasty home-fed mutton; but a large section of the public cannot afford to pay the price for English meat, and with them it is a question of having imported meat, or none at all. The fall in price caused by the importation of chilled or frozen meat will no doubt have a good effect on the vast armies of operatives in the big industrial centres here, as a larger consumption of meat per head would very much improve the strength and stamina of this class.

CANADA SHOULD COMPETE.

It seems that if Canada is going to benefit by this trade, that she must at once seriously enter into the competition, otherwise, in a few years the trade will be entirely monopolized by the British companies trading with the Argentine. Especially is this phase of the case worth serious consideration at the present, in view of the strenuous opposition to the removal of the embargo on Canadian cattle, and from present appearances it would appear that the Act in the future will remain as it is at present. The classes are more powerful in the United Kingdom than the masses.

BACON.

I am indebted to a leading Sheffield produce house for the following item of information:—

‘In the Midlands, particularly in Sheffield and Rotherham, the population have a great fancy for pea-fed bacon and hams, for which we have the largest demand. Pea-fed bacon has a much sweeter flavour than the ordinary, and although the prices are higher, the appreciation it is held in here, more than compensates for any difference in price. We have cultivated a taste for this kind of goods for many years, and we must have pea-fed bacon for our customers, and some American packers have catered especially for this trade in South Yorkshire. Tell the Canadian packers to give us good first-class pea-fed bacon well cured, and American bacon will only be heard of as second-class in Sheffield.’

TOMATOES.

There is a good demand for Canadian canned tomatoes. Fresh tomatoes are now quite extensively used in England. These are imported principally from the continent and the Canary Islands. They are much smaller and lack the flavour of the Canadian fruit; they are packed in oblong boxes, each tomato rolled in tissue paper;

the boxes have a layer or covering of paper at the top and bottom. Each box generally contains 14 or 15 pounds of fruit for shipment purposes, four boxes are always nailed together with thin laths.

I should suppose that tomatoes could be shipped here from Canada in the autumn, and arrive in good condition. If so, they would bring by all odds the highest price in the market here, and would easily sell at \$4 per bushel.

J. B. JACKSON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, ENG., March 15, 1906.

COLONIAL BUTTER.

It is stated that the Australian governments are determined to take every step possible to secure that their agricultural products shall be put upon the markets of England in the same condition as when shipped. In butter especially, much of which finds a market in Lancashire, adulteration has taken place and the colonial governments have instructed their London representatives to take proceedings against any one possessing for sale a case bearing their marks and brands, which contains an article different from the one described.

• LABELLING OF IMPORTED GOODS.

Sir Howard Vincent has introduced a Bill to amend a section of the Merchandise Marks Act, 1887, and the enacting clause reads as follows: 'All goods of foreign manufacture which by reason of any mark, name, description or words appearing thereon, might be fraudulently sold as being of British or Irish manufacture or production, or which, unless the contrary were clearly indicated thereon, might reasonably be assumed to be of British or Irish manufacture or production, are hereby prohibited to be imported into the United Kingdom, unless such goods shall bear in some conspicuous place the word "Foreign" or the word "Imported," if made in a foreign country, or the word "Colonial" if made in a British colony or possession overseas.'

BRITISH TRADE INCREASE.

The Board of Trade returns show that the imports for last month amounted to £17,528,835 as against £42,844,937 in February last year being an increase of £4,683,898.

The exports for the month were £28,781,123 as compared with £25,269,063, an increase of £3,512,060 over February, 1905, and of this increase, £3,071,382 is accounted for in articles wholly or mainly manufactured.

P. B. MACNAMARA.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, March 6, 1906.

CANNED SALMON.

Canned salmon was imported and in demand during the war with Russia, but since the declaration of peace there is practically none imported, for the reason of unsuitable price for this market, and strong competition by the domestic canneries, although the quality of the imported canned goods is higher. Canned fish of any kind is not very commonly used in Japan, unless by the people of the interior who find it more convenient than transporting the fresh fish.

Since the close of the war, the price of canned fish has fallen as low as 8.50 yen per case of 48 one-pound tins for the 'Red Cohoe' (which is considered here to be better quality than 'Sockeye'); and yet the domestic production outbids it. The prominent dealers here say that no more canned salmon will be imported at any price for the present, because of over-importation for army and navy supply consequent upon the sudden closing of the war.

The several other kinds of canned fish, such as sardines, inkfish, oysters, clams, &c., are priced between 5.50 yen and 8.00 yen per case (48 one-pound tins). There is, however, no system of regulating the market prices.

FISHERY DEVELOPMENT.

The Japan Marine Production Company, is to be organized by capitalists of whom the well known Tokyo financial figure, Baron Shibusawa, is the head, with capital, 3,000,000 yen. The object of the company is to carry on fish canning and relative works on a large scale, with a view to export as well as domestic trade. Heretofore this line of enterprise has been in the hands of individual operators, but the promoters of this company regard Japan as the most desirable field for marine production in the world, and see a safe investment for their capital. It is probable too that this movement may have been stimulated somewhat by the results of the special investigations, by the Department of Agriculture and Commerce, into the fishery environments of Saghalien.

INDUSTRIAL EXHIBITION.

'The Manchurian Exhibition' will be opened at Mukden from May 1 to July 30, under supervision of the several Chambers of Commerce of Tokyo, Kyoto, Osaka, Yokohama, Kobe and Nagoya. The exhibition will have relation to industrial productions, such as those of agriculture and marine, and the mechanical and manufacturing industries, also educational illustrations. This movement may be taken for evidence of the practical interest which the Japanese are showing in the progress of the region of which the outcome of the war has placed them in substantial control.

The estimated total expense is 80,050 yen and income 70,050 yen. The deficiency, 10,000 yen is to be met by assistance from the government.

JAPAN NOT A MARKET FOR BACON.

In proportion to its population this country does not offer much of a bacon market. That product is on sale, however, and conspicuously displayed on the counters and in the windows of the leading Japanese as well as foreign provision dealers. The brands thus offered are from Kansas City, Chicago and England. There may be some Danish. Reference here is to bacon and hams cured and in canvas. There is some in tins, as there is of almost every tinned product, but in that form it is scarcely of importance. Imported bacon is retailed here at 65 sen (32½ cents); and ham at 60 yen (30 cents) per pound. The 'Canadian Grocer' on the subject of bacon production, says that the Canadian bacon hog under general conditions costs five dollars per hundred pounds on an average. The question then is suggested: Is the margin sufficient to put the Canadian article here in competition?

In 1903 and 1904 the importation of ham and bacon was as follows:—

1903..	150,756 lbs., value,	\$26,912
1904..	112,829 lbs., value,	\$18,887

To this invoice value add a cent per pound for duty, and the cost to the importer will appear to be about 18 cents, to which must be added the cost of transportation. The cause of the falling off in 1904 compared with 1903 is said to be Japanese production, which has made its appearance within the last two or three years. In the matter of these products of pork the Japanese are imitating, as they cleverly do in so many lines of production and manufacture. They appreciate the advancing taste for pork in its various forms, and would not be attracted by the industry unless increasing consumption promised them a fair prospect of returns.

During the nine years beginning with 1906, the highest importation was 186,868 pounds, at the invoiced value of \$29,700; and the average value for the nine years, with the duty added, without transportation, would be about 17½ cents.

JAPAN'S PORK INDUSTRY.

The centre of the pork curing industry in Japan is at Kamakura, near Yokohama. There are five so-called factories, two of which are extensive. These five concerns supply the greater part of the home demand. Well known provision dealers say that the native product in ham and bacon is of a very fair quality, and that more than ten pounds of native to one of foreign are sold. The demand is a growing one amongst the Japanese; and foreign residents buy the native article because of its cheapness, and being fairly good. It goes too amongst ship supplies for merchant and navy vessels. It is almost incredible that this bacon and ham should be sold for half the price of the imported article; but that is the case according to prices asked.

By the time Alberta and British Columbia are in a position to export bacon there will doubtless be some inducement to exploit the Japanese market.

SALTED SALMON.

The demand for salted salmon is almost unceasing in this country, and the trade is extending into Korea and Manchuria. Messrs. Hokkaido Shokwai (Hokkaido Company), of Tokyo, established thirty-eight years ago with the object of dealing especially with the productions of Hokkaido or Northern Japan, are now most extensive dealers in all kinds of dried, salted and smoked fish and such other marine productions. Their business last year in salted salmon alone, reached the bulk of 5,000 tons, which, however, was to some extent on war supply account. Twenty-five per cent of this was bought of the commission merchants in Yokohama. This would be from Canada and the States mostly. Thirty per cent came from Hokkaido or Northern Japan, and the remainder was the production of Alaska and the Russian Coast.

The firms in this line of business are unanimous in giving the assurance that dog salmon (not dog-fish) as an article of food for the people of Japan has 'come to stay.' Being acceptable from the standpoint of taste or palatableness, it has the merit of comparative cheapness; it is therefore assured to continue to have the most important place in the imports of fish. The 'Cohoe' comes next, then the 'Silver,' and next the 'Pink,'—that is, of the salmon family. There is a kind described as the 'Old Sock-eye,' which is imported, the price of which is about twenty or thirty per cent less than dog salmon. This, of course, must not be confused with prime sockeye.

The season of dog salmon importation usually covers the last three of four months of the calendar year. And, since the catch is variable, contracts to supply cannot safely be made until the extent of the catch is known. The incidents of demand and supply then become somewhat lively for the latter quarter of the year. It is desirable for all to be stocked with salt salmon in time for the New Year holiday trade. Casual examples of the lack of sufficient stock to assure the filling of contracts cause doubt here and there of the safety of relying upon Canadian sources for a timely supply.

JAPANESE INDUSTRIES.

An estimate of manufacturing industries in this country may be made from the change that has taken place in the classes of goods for export during the last ten years. During 1904 the value of manufactured goods exported, amounted to \$35,700,000; that of commodities manufactured in part to \$72,350,000; and that of raw products to \$19,750,000. Compared with the conditions ten years ago, the value of raw products shows an increase of 92 per cent, while the increase in the value of manufactured goods is 216 per cent and of articles partially manufactured 172 per cent.

During the period of such remarkable growth in industry, the management of factories, with a few exceptions, seems to have made but little advancement. The total number of factories in operation last year was 8,274, of which 3,741 were using motor power. Compared with the preceding year, the number of factories using motor power showed an increase of 38 per cent.

Factories using steam power numbered 2,205; those using water power, 1,004; those using both, 107; electric power, 86; those using gas, 123; those using oil engines, 165. It is noted that the factories using both steam and water power are on the decrease. The large number of factories using water power is explained by the fact that ordinary water mills, used for cleaning rice, are included in the statistics. Their number is, however, also decreasing, as electric motors with water as the source of power are gradually coming into use.

The total number of operatives employed in the factories throughout the country was 483,839 at the end of 1904. Of this number, 182,404 were males and 302,435 females. Of the male operatives, 173,820 were above 14 years of age, and 8,584 under 14 years; and of the female operatives, 269,051 were above 14 years. The majority of the females are employed in spinning and weaving, which are among the principal Japanese industries.

PECULIARITIES OF ORIENTAL MARKET.

Manufacturers who may be looking forward to improved tariff conditions between Canada and Japan should make a note of it, that special preparation in respect of quality, package and packing of goods is required for this market. The agents of trading firms are especially urgent upon this point when reporting to their principals whether in Europe, the United States, Germany or elsewhere. They may rely upon it, that what people here are accustomed to handling and using must be considered. At the bottom of this requirement is the fact that 'the Orientals are people of strong prejudices, and it is useless to furnish them with something which we may think is better than what those people are using.' Importers here will give instructions as to what will be acceptable to themselves and to their clients, and these instructions must be carefully observed.

ALEX. MACLEAN.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., March 31, 1906.

IMPORTS OF AGRICULTURAL PRODUCE.

The following figures show the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended March 17, 1906, together with the quantities imported in the corresponding week of the previous year:—

Animals living—

	Week ended March 17, 1906.	Corresponding week, 1905.
Oxen, bulls, cows and calves, No...	11,391	11,869
Sheep and lambs, No...	2,820	5,938
Horses, No...	608	325
Dairy produce and substitutes—		
Butter, cwt...	78,423	59,067
Margarine, cwt...	22,221	20,194
Cheese, cwt...	35,589	31,804
Eggs, great hundreds...	335,482	271,125
Wheat, cwt...	1,562,100	2,174,200
Wheat-meal and flour, cwt...	255,100	212,400
Barley, cwt...	279,100	345,000
Oats, cwt...	448,400	188,300
Pease, cwt...	41,220	53,720
Beans, cwt...	2,970	51,290
Maize or Indian corn, cwt...	1,249,500	811,800
Apples, cwt...	27,709	57,790
Bananas, bunches...	85,084	46,187

Plums, cwt...	94
Onions, bushels...	110,912	60,169
Potatoes, cwt...	12,413	14,474

LATE SEASON PEAR TRADE.

It will interest Canadian pear exporters to know that the market just now is divided between South Africa and California.

SOUTH AFRICAN PEARS.

The contribution from South Africa consists chiefly of 'William' (Bartlett) pears, which come 20 in a box, carefully wrapped in paper and well cushioned on all sides with fine excelsior. The pears run three to a pound and a quarter, and the box is sold to the retail trade at from 5s. to 6s. The retailers obtain 6d. for each pear, if in good condition; slightly damaged fruit sells at 3d. each.

CALIFORNIAN PEARS.

These consist, so far as I have seen, of 'Easter Beurré,' which arrive in good firm condition, packed 28 to 30 in a box; they cost the wholesaler 3d. to 4d. each. This is a variety which can be grown in Canada, and which I believe it would be well to produce for the late winter British market. It will be observed that the case of 30 pears brings something over \$1.75 as a minimum, and higher prices are sometimes obtained, according to size and quality. Of course such a trade as this is necessarily limited, since only the wealthier classes, or invalids, would pay as much as 12 cents for a single pear. Still with high class goods only, I think Canadians could profitably compete for a share in this trade.

CANADIAN CATTLE EMBARGO.

As is well known, many sections in Great Britain are interested in securing the removal of this embargo. Bristol and Cardiff have been actively urging that Canadian cattle be allowed to enter, and be 'finished' on British grass. A resolution recently passed by a committee of the Cardiff Council recommends the General Purpose Committee to support the Bill to be introduced in the Imperial Parliament next week. It would appear that all the interests involved are now fully alive to the fact that the question is to be finally tested by considerations of justice, utility, and expediency.

W. A. MacKINNON.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES BUILDING, CAPE TOWN, March 12, 1906.

P. O. Box 668.

PINE DOORS.

A large Durban, Natal, firm importing builders materials recently informed the Cape Town representative of a Canadian firm that they had decided to discontinue importing Canadian pine doors in favour of the U.S.A. article which had been proved to be superior in quality at the price. A Cape Town firm stated recently that they at one time disposed of 10,000 Canadian pine doors annually but that the demand had ceased entirely on account of poor quality.

BROOMS.

A leading Canadian manufacturer of brooms, who is anxious to obtain a foothold on this market recently forwarded samples and quotations which were too good in quality, and consequently too high in price. What South Africa requires in the broom line is an inferior article known by the U.S.A. manufacturers as a No. 6, costing at the moment \$1.75 per dozen f.o.b., Montreal or West St. John, N.B. A short time ago this quality was quoted at \$1.50 per dozen, f.o.b., New York, but prices lately advanced.

GOLDEN SYRUP.

The attention of Canadian sugar refiners is called to the requirements of the South African market for golden syrup.

During the year 1904, South Africa imported a total of 3,423,418 pounds, valued at £33,791, the bulk of which was manufactured in Great Britain. Manufacturers in England are at present quoting 22s. 6d. (\$5.47) per 112 lbs., f.o.b., London, less 7½ per cent. The demand is for two pound tins running 56 to a case.

Inasmuch as the Canadian manufacturer has an advantage of nearly \$3 per ton in ocean freights over the present suppliers, and also receives the same preferential tariff treatment, the opportunity afforded should be taken advantage of.

GLUCOSE.

South African jam manufacturers require annually about one and one-half million pounds of glucose.

C. M. KITTSON.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., March 31, 1906.

EGGS.

Canadian eggs are in demand here at the present time, yet, in order to create a bigger demand for this product, it is necessary that Canadians should study and obtain a fuller insight into the methods of packing more particularly in favour here. For this reason I give the result of an interview with an extensive importer and seller of eggs in this district:—

‘As a start off, it may be said that Canadian pickled eggs have seen their day in England. The eggs most in request now, must be glycerined.

‘The packing also is a great thing. The size, for instance, of an ordinary every-day box of Russian eggs, measures about six feet long, and something like 22 inches wide, each box containing 1,440 eggs, which English importers classify into what is called 12 great hundreds, each great hundred meaning 120 eggs, and weighing, on an average, fifteen pounds.

PACKING AND SALE OF EGGS.

‘At auction, the seller never refers to his eggs as so much per box, but so much per hundred. As is the case with fruit, the packing of eggs is everything. The box itself should be of good stout Canadian wood, and the sides should not be one complete board, but preferably two pieces of wood, with a width of about ½-inch between them. This may be considered a detail, but it is of vital importance to the freshness

of the eggs on arrival, as it admits the air, thus keeping the eggs at a certain even temperature. The box itself should be divisioned down the centre (cross ways) by two boards, each board being about two inches apart. Thus we find the box apportioned, in, say three feet at first, then comes the first partitioning board, a space of two inches, then comes the second board, and after this, the remaining three feet of the box. This central apartment means a big thing, as when the eggs get into the hands of the small wholesaler, it is quite easy to saw the box in half within the width of these two centre boards, thus separating the box absolutely, without having to nail on a side, with a consequent risk of breaking the contents. In many cases the retailing man can only afford to take half a box when trade is bad, and this idea would specially meet his requirements.

‘Next comes the padding. Russian peasants, first of all, lay a thick layer of wood pulp shavings at the bottom of each of the two divisions, and on the top of this they place what may be called the first shelf of eggs, every egg being in the same direction, and each division of the box containing 10 rows of 18 eggs, making a total number of 180 in a shelf in each division.

‘A further layer of shavings is again placed on top of this and so on, until we have four shelves of eggs, when the whole of the 1,440 eggs are fastened down by two boards, with about two inches width between them, as mentioned before, for reasons of temperature.

‘English importers have always been prejudiced against buying small-sized boxes of eggs, their chief reason for this being, that in course of transshipment, it only requires one single man to lift them, resulting in many cases, in breakages in the contents, as it is not to be expected that one man can carry a box of eggs with the same degree of sureness and safety, as two men can; in fact, this very reason acts detrimentally to Irish eggs on the British market at the present time.’

J. B. JACKSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, March 19, 1906.

NEW ZEALAND.

Owing to my absence in Canada the details of the trade of New Zealand for 1904 and Canada's share in it was not reported. As affording a means of reference I now do so.

The total trade for the three years was:—

	Imports.	Exports.
1902..	£11,326,723	£13,644,977
1903..	12,788,679	15,010,378
1904..	13,291,694	14,744,348

Per head of the population the trade was:—

	Imports.	Exports.
1902..	£11 3 11	£17 2 1
1903..	15 11 10	18 6 0
1904..	15 14 7	17 9 1

The imports showed an increase and the exports a decrease as compared with 1903. This was anticipated.

The Canadian share of the trade was:—

	Imports from Canada.	Exports to Canada.
1902..	£ 52,374	£ 7,366
1903..	68,329	2,421
1904..	113,485	15,961

DETAILS OF THE CANADIAN TRADE.

The following are the items of the imports from Canada for 1902-3-4:—

	1902.	1903.	1904.

Haberdashery.....	6
Miscellaneous goods.....	3

EXPORTS.

The exports from New Zealand to Canada show a very considerable increase, though as yet the volume is not very large. There are only four items of New Zealand produce shipped in any quantities. They were :—

Butter	£ 1,244
Kauri gum	879
Flax	10,345
Wool	1,676

Other items :—

Boots and shoes	586
Furs	621
Seeds	213

were not of New Zealand produce.

PREFERENTIAL TARIFF.

The preferential tariff came into operation in 1904, but the very trifling amount of £616 of the imports from Canada derived advantage therefrom. These items were:

Bicycles and materials	£267
Boots and shoes	79
Carriages	6
Fish	114
Hardware and hollow-ware	14
Lamps and lanterns	2
Printing paper	128
Plated ware	2
Pumps	4

The total value of goods from all countries affected by the preferential tariff amounted to £487,867. The Canadian trade was, therefore, very little affected by that tariff, but was much more so in the year 1905. There can be no doubt that some lines were very much influenced by the anticipated tariff, notably printing paper and tinned fish, which developed to some considerable extent.

There were two or three lines in which there have been notable increases. In the case of boots and shoes the increase has been a very steady one since the introduction of the line five or six years ago. Another is preserved salmon, of which Canada now has practically a monopoly. A third is that of printing paper, which will also be affected by the tariff and must produce increasing results. Another is the increase in the trade of carts and wagons, carriages, furniture, paper hangings, and particularly that of grass and clover seeds, of which Canada should still do a larger business and probably will secure it. It will also be noticed that a very large number of lines have been introduced in small quantities as samples, and in a few cases may develop into a trade of some extent. As the returns of the trade of 1905 may be to hand in a couple of months it is not necessary to dwell upon the trade until the latest figures are under consideration.

FROZEN PORK.

Last year a shipment of fresh pork frozen was sent from Queensland to Glasgow, Scotland, as an experiment. The pigs were sold at 5½d. per pound, and the sellers, Messrs. R. and W. Davidson, of Glasgow, have sent a report which may be of interest to Canadian farmers. It is practically impossible to ship chilled pigs from Australia, but not from Canada. The report is as follows:—

'The frozen pigs ex "Waimate" have arrived and we are glad to tell you that we consider them absolutely perfect in every respect. It was a genuine surprise to us to find that pigs could come such a distance and arrive here in such fine shape. We feel very enthusiastic about the whole business, and urge you to strongly recommend steady, regular shipments. The quality is really fine. The pigs are of a specially good breed and very suitable for the British markets. We brought the little shipment up to Glasgow, but we find that the sizes of this particular parcel were just rather light for this port, as the trade here chiefly use them for cutting up and mincing purposes. We would advise your friends to send us along about 100 per week in all. We could do with say 30 to 50 averaging from 140 lb. to 180 lb. These we could dispose of up here in the north, and we are sure we would always get top prices for them. The lighter weights, running from say 70 lb. to about 140 lb., are more suitable for the south, and we would dispose of them in and around London, and also the other English markets. Some of our buyers at first objected to them being so hardly frozen. The result is that when thawed out the meat becomes very soft and does not stand well up to the knife when being cut out in small portions in the retail shops. If it were possible to send them along in good condition only chilled sufficiently to keep them right, we think there would be a great big trade for this class of meat. You might have this matter thoroughly discussed, and perhaps it would be, in any case, worth your while to risk sending us, say, four or five pigs treated in the manner described, that is, only chilled, not frozen hard, and we could then see after they arrived here whether or not the experiment would be safe to extend.'

SHINGLES.

With the readvent of cargoes of lumber into this market from British Columbia, there should be an opening also for British Columbia red cedar shingles. The trade is not large. In 1904 the importation was 1,079,715, valued at £846, of which Canada exported 51,000, valued at £36, and the balance came from the United States. The United States shipments were red wood, and hence well known in the market. The British Columbia shingle is not known and consequently it would take some trouble to introduce them, but once introduced it should secure the market. It would be necessary for British Columbia makers to send a quantity of shingles here to be placed in the hands of a first-class firm, who should be allowed to act upon their own judgment in introducing them. Such a firm can be secured.

BARLEY AND MALT.

There is an increased production of light or lager beer in Australia, the tendency being to make the light instead of the heavier brew. There consequently is an inquiry for barley and for malt suitable to the production of these beverages. Ontario barley was especially adapted to this end. It is possible that the production has very largely declined, and it is possible the quality also, but still there ought to be some quantities obtainable. It is, of course, unknown in this market and would require to be tested here before any considerable order could be given. The importations are as follows:—

1904.

Barley.. . . .	123,454 cntl.	valued at £39,012
Over 100,000 cntl. came from the United States, the balance from New Zealand.		
Pearl or otherwise prepared barley..	634,361 lb.	valued at £ 2,941
Malt.. . . .	75,800 cntl.	" 57,571

Nearly the whole of the malt was from the United Kingdom.

The barley imported from the United States has been Chevallier barley, but if the six-rowed barley of Canada is better for making lighter beers, the brewers are anxious to try it. Pearl barley was introduced from Ontario, but the importation

stopped some years ago owing to the inferior quality, the grains being small, varying in size and frequently of a dark colour. Correspondence has been opened which is likely to lead to experiments being made with Canadian barley from the east, and if the North-west provinces produce a heavy-body barley it can be sold here to a limited extent.

LIVE STOCK.

The establishment of the line of steamers running from Vancouver to New Zealand and then to Australia may afford an opening for thoroughbred Canadian stock. The calm passages characteristic of the Pacific from the month of May to October should enable animals to be carried much safer than they can be brought around the long Atlantic passage. If the Canadian Live Stock Association would make an effort and thus the possibilities of the Canadian market to furnish high grade horses, cattle, pigs and sheep become known, there would be, I believe, a steady demand for these animals. In the past there has been one or two propositions to attempt the trade but the mail line of steamers had no facilities for carrying stock other than sheep, of which they carried some number of Merinos from Vermont. In New Zealand there should be a market for high grade sheep of the mutton breeds. I am afraid that the trade will have to be begun by Canadian exporters, as Australians are not likely to seek the market until the stock of Canada are better known here.

TRADE OF NEW SOUTH WALES.

The trade of New South Wales for the first two months of the year 1905-6 was:—

	1905.	1906.
Imports..	£4,569,648	£4,358,519
Exports..	4,023,268	5,740,554

This shows a gain of nearly a million and three-quarters in exports and a decrease in imports of over two hundred thousand pounds. The decline in imports is wholly of the produce of the Australian States, there having been an increase of three hundred thousand pounds from abroad. Even with this modification the figures show a striking state of prosperity, and this is likely to continue and, to a large extent, be true of all Australia. The rains of last month and the early part of this have been widespread and very liberal. Places that have had insufficient rain for years are now in flood and there are very few sections of Australia that have not had enough for the present.

RATES OF FREIGHT.

The rates of freight from New York to Australia have advanced during the last six months very materially, while the rates via Vancouver have been unusually low. Now that the duty on interior freight has been removed, the Canadian exporters can use the Vancouver route much more freely than they have been doing, so long as the existing rate via New York and via Vancouver prevail. These rates are not constant, and it is of the utmost importance for Canadian shippers to ascertain when changes are made.

PRICES.

Wool is firm and the next auction sales are likely to advance 5 to 10 per cent in harmony with the advance in the London market. Sheep skins are still scarce and higher, so much so that some local tanners have advocated an export duty in order that they can secure skins for their own use. Hides are also dearer. Fur skins are nominal or if anything a shade lower. Rabbit skins show an advance of 1½d. per lb.

J. S. LARKE.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, March 19, 1906.

PURCHASE OF OLD TAILINGS IN AUSTRALIA.

While the old tailings dumps of the Australian gold mines have been purchased by cyanide operators, there still remains very large old dump heaps from the zinc-lead-silver mines; these ores having been treated for the lead and silver the residues carrying 6 per cent lead, 6.3 ozs. silver per ton, and 20 per cent zinc. Australian metallurgists now claim to have successfully tackled the problem of treating zinciferous tailings of which many millions of tons have accumulated, hitherto practically worthless, but now representing a value of millions of pounds sterling.

CONCENTRATION TREATMENT OF ORES.

Canadian mining men, particularly those interested in the investigations being made upon zinc deposits in British Columbia, should carefully ascertain the relative values of the various processes now in operation in Australia in the treatment of zinc residues which have been left after treating the lead-zinc ores from the mines. The general process of taking out the lead, which is all the mines—at Broken Hill—have previously been taking out of the ore, is one of concentration by means of jigs and various types of concentrators, such as 'Frue Vanner,' the 'Wilfey Table' and other concentrators of this description.

Until recently no satisfactory process had been brought forward for extracting the zinc from the ore, and this zinc-bearing residue has been put to one side for a number of years until now there is probably 5,000,000 tons of material carrying on an average about 20 per cent zinc and 6 per cent lead. There are also at Broken Hill immense quantities of residues carrying a lower percentage of zinc which will probably be treated later on.

PURCHASE AND TREATMENT OF ORES.

A company was formed a few months ago in Melbourne—with a capital of £350,000—for the purpose of purchasing large quantities of tailings from the different mines and treating them by what is known as the 'Potter process.' This company has purchased and secured the option on about 4,000,000 tons of tailings, estimated to produce 269,000 tons of lead, 20,638,000 ozs. of silver and 738,000 tons of zinc. The preliminary plant has just been completed and is giving excellent results on a treatment of about 50 tons of tailings per day, but a plant is now being designed in Melbourne capable of treating 2,000 tons of material per day, and later it is intended to increase the daily capacity to 4,000 tons.

THE 'POTTER' PROCESS.

After some years of experimenting the inventor of the process—Mr. Potter—discovered a cheap and effective method of extracting the zinc from the huge dumps of Broken Hill tailings by the use of sulphuric acid in a dilute form, the effect of

which—when added hot to the tailings—is to float the zinc to the surface, when it can easily be run off. It is a strange thing about this process that the heavier portion of the tailings, viz., the metallic, rises to the surface, being ballooned up by the gaseous bubbles formed by the action of the acid, leaving the lighter substance, the gangue, at the bottom.

THE PRACTICAL OPERATION OF THE 'POTTER' PROCESS.

The procedure adopted in the working of the 'Potter' process is that the material from the dump is thrown continuously, by means of a belt conveyer, into a spitzkasten. At the bottom of the spitzkasten is introduced a pipe by means of which boiling sulphuric acid of about $\frac{1}{2}$ per cent strength is pumped in—the ore being thrown on top of this liquid with a fall of about a foot. There is a certain amount of carbonate in the material which is attacked by the acid and forms carbonic acid gas. This gas rising from the solution leaves the gangue, but forms on all metallic particles a coating which raises the metallic particles to the surface of the liquid and they are allowed to flow over the edge of the spitzkasten. The gangue falls to the bottom and is drawn off by the ordinary spigot. The particles of gas seem to be detached from the mineral by striking the bottom of the launder, leaving the mineral to be carried by the solution to the settling pits. The solution is then decanted and sent back to the boiling vats, after being cleared and brought back to the proper strength. The concentrates are sent direct to the smelters. The process is thus continuous and the concentrate obtained, so far, averages about 45 per cent of zinc and 5 per cent or 6 per cent of lead, but it is possible that further experience will perfect the method of working, so that the concentrate will be obtained of perhaps 60 per cent of zinc.

THE 'CATTERMOLE' PROCESS.

Another process—known as the 'Cattermole'—is also being used at Broken Hill in the extraction of zinc from tailings. This process is worked on much the same lines as the Potter process, with the exception that a certain amount of mineral oil is used with the sulphuric acid solution of about the same strength— $\frac{1}{2}$ per cent. The material to be treated—the oil and the acid solution—are passed through six centrifugal mixtures by which the oil, acid and material are thoroughly mixed. Then passed into a spitzkasten. The cold acid having cleaned the mineral particles, the oil—which has an affinity for mineral—floats it to the surface, and it is collected as before. The percentage of extraction in this process is said to be about the same as that obtained by 'Potter' process.

THE 'DELPRAT SALT CAKE' PROCESS.

The third process in use at Broken Hill obtaining zinc from tailings is the 'Delprat' salt cake process, which followed the Potter process, and is almost identical with the latter except that a small amount of salt is added to the acid solution. The proprietors of the Potter process, however, are now engaged in a legal action against the Delprat people for infringement of patent rights.

ACID USED AND IMPROVED MACHINERY.

In connection with the treatment of the tailings it may be stated that the sulphuric acid used is made by the local Carmichael-Bradford Company, owing to its cheapness and efficiency. A concentrator, made by the Gillies Company, has been designed to provide an improved mechanical means of producing zinc concentrates by the use of the Potter process.

AUSTRALIAN TRADE CONDITIONS.

Australian imports and exports continue to expand and there is every indication of a splendid season in all the states. The rainfall since the beginning of the year has been very general—several states exceeding the record for many years, and drought conditions no longer continue in any inhabited portion of the Commonwealth. Cattle and sheep are rapidly increasing and the exportation of beef and mutton and canned meats is being resumed with energy. The outlook is in every way satisfactory as the purchasing power of the people has never been greater than it is at the present time.

CANADIAN TRADE NOTES.

Orders for Canadian chairs and desks are being cabled to-day by a Melbourne company of indentors. Quite a number of indents are going forward by this mail for screen doors and blinds made by a firm at Paris, Ontario. These goods are superior to those obtained from other sources, and the agents are endeavouring to raise the standard above the quality hitherto controlling the market. The comparative tests to which Canadian aluminum cooking utensils were submitted having proved satisfactory, a considerable indent has been forwarded from Melbourne which, if satisfactorily filled, means the precursor of much larger business. Repeat and increased orders for sanitary woodware and corundum goods are being sent to Canadian manufacturers. Sales of Canadian sewing machines are reported by the local agents. The direct representative of several Canadian manufacturers of corsets, underclothing and ladies' neckwear recently visited Melbourne with very encouraging results. Samples of quite a number of lines of Canadian goods, new to Australia, are now due to the consignment of the Melbourne office of the Imperial Export Company of Toronto. The volume of the correspondence and trade inquiries received at this office continues to steadily increase, which is satisfactory as evidence of the interest taken in the improved trade conditions in Australia.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, April 5, 1906.

SWEDISH METHOD OF HANDLING FRUIT.

The pomological association of Sweden has taken up an energetic work to arrange the distribution of fruit within the country in the most satisfactory manner. The aim of the association has been to get a fruit distribution office started, which could act as a medium between the producer and the consumer, but before this can be started, it has been tried to bring the seller and the buyer in direct touch with each other in a practical way. Last summer circulars were sent out to all the members and other large fruit-growers inquiring how much each had to sell of the different kinds of fruit and the price asked. Blanks to be filled out were also inclosed. The filled out blanks when returned to the association were gathered on a list, printed and spread in several thousands throughout the country. The sellers then had to await the orders direct from the buyers. Much fruit has in this way been sold to mutual satisfaction.

The association has since decided to start a fruit office. This shall work in several ways, partly as mentioned above by bringing the producer and consumer together, and partly receive fruit for direct sale or receive it for storage and dispose of it at the most favourable moment in both cases on a commission basis. The office shall direct its attention toward the foreign markets and work for the export of fruit. It will publish in the papers during the season stocks on hand, demand and arrange prices on fruit. The association has further resolved, that all fruit shall be sold by weight.

MODERN DANISH AGRICULTURAL SCHOOL.

A modern agricultural school has recently been built at Ringsted, Denmark. It is a private school, but the Danish government has granted a loan of Kr. 60,000—\$16,000, and private persons interested in the matter have partly lent money to the school at a low rate of interest and partly donated smaller or larger amounts. As the school now stands it costs Kr: 180,000—\$48,000; but this summer two more large buildings are to be erected, after which the total cost will be about Kr: 250,000—\$66,700. The Danish government further grants a yearly amount of Kr: 6,000—\$1,600 direct for teachers' wages, and besides Kr: 30,000—\$8,000 a year for free scholarships to such young men that have not the means to pay for themselves. The school was last year visited by about 200 regular pupils and by about 300 who only took part in certain courses.

C. E. SONTUM.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,

MANCHESTER, ENG., April 14, 1906.

COAL UNDER WATER.

Important experiments are being carried out by the naval authorities at Portsmouth dockyard to ascertain to what extent the steaming properties of the Welsh coal used in the British navy are improved by storage in the sea.

Eighteen months ago iron crates, each containing two tons of coal, were sunk in the big basin, and at the same time a similar quantity of coal was carefully stored in the open air at the coaling point, and sheltered from the weather beneath tarpaulins.

At intervals of six months, two ton samples from each storage have been taken out and carefully burned, and the results by the experiments have shown conclusively that by submarine storage of coal its calorific value steadily increases, while by storage in the open air a decided decrease is shown.

CANADIAN SHIPMENTS TO MANCHESTER.

I give herewith the total quantities of traffic from the ports of Halifax, N.S., and St. John, N.B., for the months of January, February and March, 1906, entering the Manchester Ship Canal.

BRITISH TRADE RETURNS.

The Board of Trade returns show that the imports for last month amounted to £53,270,587 as against £48,983,312 for March, 1905, being an increase of £4,287,275.

The exports for the month were £31,651,162 as compared with £28,070,823, an increase of £3,580,339 over March, 1905.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(Mr. C. M. Kittson.)

RHODES BUILDING, CAPE TOWN, March 23, 1906.

P. O. Box 668.

MARKET FOR FERTILIZERS.

South Africa annually imports fertilizers to the value of about \$200,000, and the use of this article is considerably on the increase as farmers are fast becoming more up to date in their methods. A recent tender called for the supply of 350 tons of superphosphates, 250 tons of bone meal and several tons of muriate of potash.

BOX SHOOKS.

Having recently been requested to furnish the specifications of South African imports of box shooks, I beg to advise the requirements as follows:—

Box for dynamite to be $27\frac{1}{4}$ -in. x $9\frac{1}{8}$ -in. x $6\frac{1}{4}$ -in. inside measure.

Sides, bottoms and tops to be full $\frac{1}{2}$ -in. thick.

Ends to be $\frac{3}{4}$ -in. thick.

Clear seasoned stuff free from checks and defects, surfaced one side. Wood to be white and strong, not easily split by driving nails in it, such as white pine, spruce or cottonwood. Shooks to be put up neatly in tight compact bundles of 25 pieces each. The bundles are to be secured so that pieces cannot get adrift. It is suggested that ends of the bundles be tied by passing a stout wire around them. In any case the packing should be such that the cubic measurement of the shooks for 1,000 boxes will not exceed nine cubic tons (40 cubic feet each). The net measurement is about $8\frac{1}{4}$ tons. Special care should be taken that the tops and bottoms are not too narrow. If they are a little wide they can be trimmed. If they are made too narrow or become so by shrinkage they are useless. It is preferred that tops and bottoms be in one piece, but this is not absolutely essential. If they are tongued and grooved they should be glued together. The wood should be light on account of freight on finished dynamite.

ECONOMICAL PACKING FOR EXPORT.

To economize freight space as much as possible, shooks should be packed on the following principle:—

25 boxes—

50 pieces	$29\frac{1}{4} \times 10\frac{5}{8} \times \frac{1}{2}$	$50 \times 155.39 = 7769.5$	cubic inches.
50 pieces	$29\frac{1}{4} \times 6\frac{3}{4} \times \frac{1}{2}$	$50 \times 98.72 = 4936.0$	"
50 pieces	$9\frac{5}{8} \times 6\frac{1}{4} \times \frac{3}{4}$	$50 \times 48.73 = 2436.5$	"

15142

1728) 15142 (8:7627

or say 9 cubic feet (to allow for packing) per 25 boxes or 9 cubic tons per 1,000 boxes.

WINE CASES.

The following are the specifications required by users of wine cases:—

Wine case, outside	18 $\frac{3}{4}$ "	x	16 $\frac{1}{2}$ "	x	7 $\frac{1}{2}$ "
Wine case, inside	17 $\frac{1}{2}$ "	x	15 $\frac{1}{2}$ "	x	6 $\frac{1}{2}$ "
Two pieces, ends	15 $\frac{1}{2}$ "	x	6 $\frac{1}{2}$ "	x	$\frac{5}{8}$ "
Two pieces, sides	18 $\frac{3}{4}$ "	x	6 $\frac{1}{2}$ "	x	$\frac{1}{2}$ "
Two pieces, bottom	18 $\frac{3}{4}$ "	x	8 $\frac{1}{4}$ "	x	$\frac{1}{2}$ "
Two pieces, tops	18 $\frac{3}{4}$ "	x	8 $\frac{1}{4}$ "	x	$\frac{1}{2}$ "

LARGE RAISIN BOXES.

The following are the specifications required by users of raisin boxes (50 pounds):

Raisin box (50 pounds) outside	20"	x	9"	x	9 $\frac{1}{2}$ "
Raisin box (50 pounds) inside	18 $\frac{3}{4}$ "	x	8 $\frac{1}{2}$ "	x	8 $\frac{1}{2}$ "
Two pieces, ends	8"	x	8 $\frac{1}{2}$ "	x	$\frac{5}{8}$ "
Two pieces, sides	20"	x	8 $\frac{1}{2}$ "	x	$\frac{1}{2}$ "
Two pieces, bottom and tops	20"	x	9"	x	$\frac{1}{2}$ "

SMALL RAISIN BOXES.

The following are the specifications required by users of raisin boxes (25 pounds):

Raisin box (25 pounds) outside	20"	x	9"	x	5 $\frac{1}{2}$ "
Raisin box (25 pounds) inside	18 $\frac{3}{4}$ "	x	8 $\frac{1}{2}$ "	x	4 $\frac{1}{2}$ "
Two pieces, ends	8"	x	4 $\frac{1}{2}$ "	x	$\frac{3}{8}$ "
Two pieces, sides	20"	x	4 $\frac{1}{2}$ "	x	$\frac{1}{2}$ "
Two pieces, bottom and top	20"	x	9"	x	$\frac{1}{2}$ "

PEACH BOXES.

The following are the specifications required by users of peach boxes:—

Peach box, outside measurements	18"	x	12"	x	4"
Two pieces, ends	11 $\frac{1}{2}$ "	x	3 $\frac{1}{2}$ "	x	1 $\frac{1}{8}$ "
Two pieces, sides	18"	x	3 $\frac{1}{2}$ "	x	$\frac{1}{4}$ "
4 pieces, top and bottom	18"	x	5 $\frac{1}{2}$ "	x	$\frac{1}{4}$ "

Peach box (small)—

Outside measurements	18"	x	12"	x	3 $\frac{1}{8}$ "
Two pieces, ends	11 $\frac{3}{8}$ "	x	3 $\frac{1}{8}$ "	x	1 $\frac{3}{8}$ "
Two pieces, sides	18"	x	2 $\frac{1}{8}$ "	x	1 $\frac{3}{8}$ "
Four pieces, bottoms and tops	18"	x	5 $\frac{3}{8}$ "	x	1 $\frac{3}{8}$ "

GRAPE BOXES.

The following are the specifications required by users of grape boxes:—

Grape boxes (large) outside measurements	24"	x	18"	x	6 $\frac{1}{8}$ "
Two pieces, ends	17 $\frac{3}{8}$ "	x	5 $\frac{1}{2}$ "	x	1 $\frac{1}{8}$ "
Two pieces, sides	24"	x	5 $\frac{1}{2}$ "	x	1 $\frac{1}{8}$ "
Six pieces, bottoms and tops	24"	x	5 $\frac{1}{2}$ "	x	1 $\frac{1}{8}$ "
Grape boxes (small) outside measurements	18"	x	12"	x	6"
Two pieces, ends	11 $\frac{1}{2}$ "	x	5 $\frac{1}{2}$ "	x	1 $\frac{1}{8}$ "
Two pieces, sides	18"	x	5 $\frac{1}{2}$ "	x	$\frac{1}{4}$ "
Four pieces, tops and bottoms	18"	x	5 $\frac{1}{2}$ "	x	$\frac{1}{4}$ "

APRICOT BOXES.

The following are the specifications required by users of apricot boxes:—

Apricot box, outside measurements.	18" x 12" x 3½"
Two pieces, ends.	11½" x 2½" x 1½"
Two pieces, sides.	18" x 2½" x ¼"
Two pieces, bottoms.	18" x 6" x ¼"
Four pieces, tops.	18" x 6" x ¼"

PLUM BOXES.

The following are the specifications required by users of plum boxes:—

Plum box, outside measurements.	18" x 11½" x 3"
Two pieces, ends.	11½" x 2½" x 5⁄8"
Two pieces, sides.	18" x 2½" x 1½"
Four pieces, bottoms and tops.	18" x 5½" x ¼"

PRESENT SUPPLIERS.

The bulk of present importations of box shooks originate in Sweden, and are made of white pine.

FREIGHT RATES.

Freights from Frederickstadt and Gothenburg, Sweden, to Cape Town are quoted at 52s. 6d. per standard of 165 cubic feet, per sailor and 60s. to 80s. per steamer.

DUTY ON FLOUR.

The colony of Natal has imposed a duty of 2s. per 100 pounds on flour, which article had been heretofore admitted to that colony free of duty under article XIII. of the South African Customs Union Convention.

C. M. KITTSON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, April 6, 1906.

TARIFF CHANGES.

On October 1 next, the new tariff just enacted by the Japanese parliament will become effective. The principal changes of interest to Canada are as follows:—

	New Tariff.	Old Tariff.
Leather—		
Sole.....	Yen 13.30 per 100 kin.	Yen 13.42 per 100 kin.
Enamelled and sheepskin.....	" 22.40 "	" 18.36 "
All others.....	20% ad valorem.....	20% ad valorem.
Comestibles—		
Flour (wheaten).....	" 1.45 per 100 kin.	" 1.40 per 100 kin.
Wheat.....	" .57 "	" .54 "
Ham and bacon	" 14.00 "	" 13.60 "
Butter.....	" 27.00 "	" 21.00 "
Condensed milk	" 10.00 "	" 10.00 "
	(tin included).....	" 0.69 per doz. 1 lb. tins.
Meat, poultry, &c. (canned).....	" 9.75 per 100 kin.	30% ad valorem..
Fish (canned).....	" 4.30 "	30% "
Fish (salted).....	" 2.00 "	" 1.42 per 100 kin.
Pulp—		
Wood.....	5% ad valorem or " 0.34 per 100 kin.	" 0.34 "

	New Tariff.	Old Tariff.
Paper—		
Newspaper, weight not exceeding 45 pounds per ream and measuring not less than 1,086 sq. inches per sheet.....	Yen 1.00 per 100 kin.	Weighing not more than 25 pounds per ream and measuring not less than 1,086 sq. inches per sheet, Yen 0.80 per 100 kin.
All other.....	Yen 1.95 per 100 kin.	
Lumber—		
Boards.....	1 in. x 100 sq. ft., 60 sen.....	5 % ad valorem.
All other lumber and timber....	Yen 4.56 per 100 cu. ft.	5 % ad valorem.
Fertilizers—		
All kinds.....	Free.....	Free.
Bicycles.....	40 per cent ad valorem.....	35 % ad valorem.
Bicycle tires.....	Yen 95.60 per 100 kin.	35 % ad valorem.
Cotton duck	Yen 1.56 per 10 sq. yds.	Yen 0.97 per 10 sq. yds and 10 % Consumption Tax.

NOTE:—1 Yen = 50 cents Canadian currency.
pounds avoirdupois (approx).

1 Sen = $\frac{1}{2}$ cent Canadian currency.

100 kin = 133

JAPAN AS A FISH MARKET.

Inquiries from the Pacific coast of Canada are prompted by the idea that there should be a market for such fish as soft cured kippers, soft cured bloaters, dressed frozen salmon, and dressed frozen halibut. It is said that these goods find market in China, of which evidence is afforded; and it 'does not appear why there should not be a market in Japan.'

The answer may be in substance what I have reported with regard to many things which people think should find a market here. These goods and such as these from Canada, are not being offered here. The market is abundantly supplied, partly by the Japanese fisheries, and partly by business connections with foreign countries. There is therefore no need felt to go to Canada; but interested parties here would be glad to consider Canadian offers, by which it is implied that Canadian agency and samples should be here present.

CHINA AS A FISH MARKET.

With regard to China, the leading Chinese ports are larger, and have a much larger foreign population than those of Japan, and therefore a corresponding larger consumption of foreign foods. Then large as the population of Japan is, that of China is ten times greater. So that the native consumption of foreign foods may be taken to be much larger in China. Japan being wholly insular, is more of a maritime country than any of her continental neighbours. Next to rice, fish is the food of the masses. Not only are there vast fishery facilities, but there is, ever present the incentive to make the most of them.

FISH CANNING IN JAPAN.

In the way of fish canning, Japan has aspirations on her own account, and has been indulging them with results as follows:—

1902, exported	Value yen	285,700
1903 " 	"	348,500
1904 " 	"	633,700
1905 " 	"	1,099,700

There is of course some home consumption that is not apparent here. The species included in these canning operations are cod, tai, shell-fish, &c. These exports are to Corea and China, and to Hong-Kong, the Philippines, Hawaii, Canada, Australia and southern islands.

CHIP AND STRAW BRAIDS.

There is a large demand for this class of goods for the European and American markets. It is said to be greater than Japan can at present supply. The production of these goods is not through the medium of factories in the ordinary sense of that term. The industry is of really domestic character. Families and households in certain country localities do this work when out-door employment is slack, in the winter or other seasons. It is regarded as work not suited to production by machinery, because of the innumerable variations of pattern for comparatively small lots, and the changing patterns every succeeding season. For the same reason stocks are not accumulated, excepting as called for by each season's orders. The European and American markets, say, this year formulate the patterns for next year's fashionable demand, send them out here to their correspondents, the exporters, who in turn have the orders placed in the country under agreement to have the goods furnished in time for export.

But notwithstanding this general way of dealing between the exporter here and the importer in foreign countries, merchants, say in Canada, can correspond with exporting firms here, inquiring for the latest patterns and ordering their supply on the usual commercial terms, and their orders will be filled.

TRADE IS CONTROLLED.

The trade in this country is controlled by an association. This body controls the operatives, and fixes the selling price; first, the price to the exporter here; and second, to the importer in foreign countries. So that the trade may be said to be pretty well in hand. The chances of bargaining for better prices are therefore removed. The scale of prices varies according to the width, &c., of the braid. But there are no 'two prices.' The following exporting firms or any of them should be communicated with by firms in Canada desiring to import directly.

FOREIGN EXPORTERS IN YOKOHAMA.

Winckler & Co., American Trading Co., Carlowitz & Co., A. Owston; Jardine, Matheson & Co., Becker & Co., Runge & Thomas, Simon Evers & Co., C. Dodwell & Co., Smith, Baker & Co., G. Strauss & Co., Sale & Frazer, Pollak Bros., M. Raspe, Faber & Voigt, Cornes & Co., Berrick Bros., Strome & Co., Jewett & Bent, Schopflocher Bros. & Co.

JAPANESE FIRMS IN YOKOHAMA.

Nosawa Gumi, 57 Yamashita Cho.
 Fukumatsu Okudsu, 12 Itchome Aioicho.
 Kamitaki Shoten, Ltd., 6 Nichome Yamabukicho.
 Heizaburo Yamaguchi, 52 Sanchome Aioicho.
 Inouya, K., Aioicho Itchome.
 Shimada, D., Aioicho Itchome.
 Yonekara, H., 19 Tokiwa Nichome.

TOKYO.

Hikotaro Noro, 7 Nichome Matsuzakacho, Honjoku.
 Yasunosuke Matsuoka, Yanagiwarakashi, Kandaku.

This subject was previously referred to in my report published in No. 51, January 16th, 1905.

WHEN TO ORDER.

As to the trade in respect of seasons, the harvest comes towards the end of May. After threshing, the straw is sorted and bleached by sulphur process. Then, onward until Christmas the plaiting is done. At the same time and afterwards the goods are going forward to the exporting houses for packing and shipping according to orders in hand. Orders for Great Britain, Canada and the United States, required for the spring fashions, would be filled during the early winter months, say November, December and January.

ALEX. MACLEAN.

IMPORTS OF HARDWARE, IMPLEMENTS AND MACHINERY INTO
BRITISH SOUTH AFRICA.

MARKET FOR AGRICULTURAL MACHINERY AND FARM IMPLEMENTS IN RHODESIA.

A private letter just received from a gentleman in Rhodesia, states, 'That there is no reason why the bulk of agricultural machinery and farm implements used there should not be supplied from Canada, instead of as at present from the United States.'

'Canada,' the writer states, 'can supply just as good instruments and moreover has the customs preference in her favour. The only thing that is needed to capture this trade is more advertising and the sending of agents to demonstrate the use of appliances, &c.'

No. 1.—STATEMENT showing Imports of Hardware and Cutlery, Implements and Machinery into Southern Rhodesia during the Six Months ended
December 31, 1905.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports 'Exports of Domestic Produce and Manufacture.'

a The figures for Mexico include coin and bullion.

* Figures are for the years 1903, 1904 and 1905.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental annual report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

BRITISH INDIA.

TARIFF SCHEDULES.

Reprint of schedules II, III. IV. and V. of the Indian Tariff Act, VIII. of 1894 (as modified up to the 23rd December, 1905, by various Tariff Amendment Acts and notifications of the Governor General in Council), showing the rates of customs duties levied on goods imported into, and exported from, British India.

SCHEDULE II.—IMPORT TARIFF.

Arms, Ammunition and Military Stores.

Including also any articles, other than those included in Numbers 1 to 12 of this schedule which are 'arms' within the meaning of the Indian Arms Act, and any articles which the Governor General in Council may, by notification in the *Gazette of India*, declare to be 'ammunition' or 'military stores' for the purposes of this Act.

No.	Names of Articles.	Rate of Duty.	
		R.	a.
1.	Firearms other than pistols, including gas and air guns and rifles.	each	50 0
2.	Barrels for the same, whether single or double	"	30 0
3.	Pistols.	"	15 0

5.	Springs used for firearms, including gas and air guns and rifles.	"	8 0
6.	Gun-stocks, sights, blocks, and rollers.	"	5 0
7.	Revolver-breeches, for each cartridge they will carry	"	2 8
8.	Extractors, nippers, heel-plates, pins, screws, tangs, bolts, thumb-pieces, triggers, trigger-guards, hammers, pistons, plates, and all other parts of a firearm (including a gas and air gun or rifle) not herein otherwise provided for, and all tools used for cleaning or putting together or loading the same.	each	1 8
9.	Machines for making, loading, or closing cartridges.	"	10 0

No.	Names of Articles.	Rate of Duty. R. a.
10.	Machines for capping cartridges... each	2 8
	<i>Exception I.</i> —Articles falling under the 5th, 6th, 8th, 9th or 10th head of the foregoing list, when they appertain to a firearm falling under the 1st or 3rd head, and are fitted into the same case with such firearm.....	Free.
	<i>Exception II.</i> —The following are also free, namely:	
	(a) Arms forming part of the regular equipment of an officer entitled to wear diplomatic, military, naval or police uniform;	
	(b) A sword, a revolver, or a pair of pistols, when accompanying an officer of His Majesty's regular forces, or a commissioned officer of a volunteer corps, or certified by the commandant of the corps to which such officer belongs, or, in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving, to be imported by the officer for the purposes of his equipment;	
	(c) Swords and revolvers which are certified by an Inspector General of Police to be part of the ordinary equipment of members of the police force under his charge;	
	(d) Swords forming part of the equipment of native commissioned officers of His Majesty's army;	
	(e) Swords for presentation as army or volunteer prizes;	
	(f) Arms, ammunition, and military stores imported with the sanction of the government of India for the use of any portion of the military forces of a native state in India which may be maintained and organized for imperial service;	
	(g) Morris tubes and patent ammunition when imported by officers commanding British and native regiments or volunteer corps, for the instruction of their men.	
	<i>Proviso 1.</i> —No duty in excess of 10 per cent <i>ad valorem</i> shall be levied upon any of the articles numbered one to ten in the foregoing list when they are imported in reasonable quantity, for his own private use, by any person lawfully entitled to possess the same.	
	<i>Proviso 2.</i> —When any articles which have been otherwise imported, and upon which duty has been levied or is leviable under numbers one to ten, are purchased retail from the importer by a person lawfully entitled as aforesaid, in reasonable quantity for his own private use, the importer may apply to the customs collector for a refund or remission (as the case may be) of so much of the duty thereon as is in excess of 10 per cent <i>ad valorem</i> ; and if such collector is satisfied as to the identity of the articles and that such importer is in other respects entitled to such refund or remission, he shall grant the same accordingly.	
11.	Gunpowder, all sorts.....	<i>ad valorem</i> 10 per cent.
12.	All other sorts of arms, ammunition, and military stores.	“ “

SCHEDULE III*.—IMPORT TARIFF.

Liquors, Opium, Salt and Salted Fish.

2.	OPIMUM (d) not covered by a government pass. ser. of 80 tolas(c)	24 0
3.	SALT (e). Indian maund of 82 $\frac{1}{2}$ pound avoirdupois weight	The rate at which excise duty is for the time be- ing leviable on salt man- ufactured in the place where the import takes place (f).

* As amended by the Indian tariff (amendment) Act, I. of 1906.

(a) Spirit imported from any port in British India, and protected by the certificate of an officer empowered in that behalf, is chargeable with only the amount, if any, by which the duty leviable thereon exceeds the duty shewn by such certificate to have been already paid. (Act VIII. of 1894, sec. 7.)

(b) The duty to be increased or reduced in proportion as the strength of the spirit exceeds or is less than London proof.

(c) The tola equals 180 grains.

(d) Opium imported from any port in British India, and protected by the certificate of an officer empowered in that behalf, is chargeable with only the amount, if any, by which the duty leviable thereon exceeds the duty shown by such certificate to have been already paid. (Act VIII. of 1894, Section 7.)

(e) Salt imported from any port in British India, and protected by the certificate of an officer empowered in that behalf, is chargeable with only the amount, if any, by which the duty leviable thereon exceeds the duty shown by such certificate to have been already paid. (Act VIII. of 1894, Section 7.)

(f) By Notification No. 1727, dated 22nd March, 1905, the duty was fixed at one rupee in the case of Burma and one rupee and eight annas in the case of Bengal, Madras, Bombay and Sind. In the case of Aden the duty is one rupee for each 140 lb. avoirdupois.

No.	Names of Articles.	Rate of Duty.	
		R.	a.
4.	SALTED FISH, wet or dry.Indian maund of 82½ pound avoirdupois weight	Such rate or rates of duty, not exceed- twelve an- nas, as the Governor- General in Council may, by notifica- tion in the <i>Gazette of</i> <i>India</i> , from time to time prescribe (a).

SCHEDULE V*.—EXPORT TARIFF.

No.	Names of Articles.	Rate of Duty. <i>R. a.</i>
1.	Rice, husked or unhusked, including rice flour, but not including rice bran and rice-dust, which are freeIndian maund of 82½ lb. avoirdupois weight.	0 3

(a) Duties under Section 8 A of Act VIII. of 1894, as amended by Acts XIV. of 1899 and XII. of 1903.

(b) Duties under Section 8 B of Act VIII. of 1894, as amended by Act VIII. of 1902 and continued in force by Acts XII. of 1903 and XI. of 1904.

(*) Schedule V. was substituted for the former schedule by the Indian Tariff Act (1894) Amendment Act, III. of 1896.

Note.—Under Act IX. of 1903 a customs duty at the rate of a quarter of a pie per pound has been levied from the 1st April, 1903, on all tea produced in India and exported from any customs port to any port beyond the limits of British India or to Aden. The proceeds of this cess are paid to the Tea Cess Committee appointed under Section 4 of the Act. On the recommendation of this Committee the maximum rate of a quarter of a pie per pound may be reduced.

RULES FOR THE IDENTIFICATION OF SUGAR CHARGEABLE WITH AN ADDITIONAL OR SPECIAL DUTY, AS AMENDED UP TO FEBRUARY 21, 1906.

1. For the purposes of these rules, unless there is anything repugnant in the subject or context, 'Customs port,' 'chief customs authority,' 'customs collector,' 'owner' and 'public warehouse' have the meanings respectively assigned to them in the Sea Customs Act, 1878 (VIII. of 1878).

2. Where any sugar is imported into any customs port, the owner shall declare to the customs collector in what country such sugar was produced, and shall furnish him with such information as may be necessary to enable him correctly to assess the additional or special duty (if any) chargeable under subsection (I) of section 8A or B8, respectively, of the Indian Tariff Act, 1894, (VIII of 1894.)

3. (1) Where the information required by rule 2 is not furnished, the customs collector shall deposit and detain the sugar in such part of the custom houses premises as he may deem suitable.

(2) The owner of any sugar deposited and detained under sub-rule (I) may, at any time, clear such sugar on payment of the additional or special duty leviable thereon, and of the other charges payable to the customs collector, whether for wharfage fees or otherwise, in respect of the same.

(3) For the purposes of sub-rule (2) and for the purpose of calculating the surplus payable to the owner under section 88 of the Sea Customs Act, 1878, the additional or special duty leviable upon any sugar deposited and detained under sub-rule (I) shall, if the information necessary for the correct assessment of the additional or special duty leviable thereon has not been furnished, be assessed at such rate not exceeding the highest rate of additional or special duty leviable upon any class of sugar as the Governor General in Council may, by general or special order, fix in this behalf.

4. The customs collector may accept the information required by these rules in any form which he may consider sufficient; and he shall accept it if given in the form and manner hereinafter prescribed.

5. Where sugar is imported into any customs port from a bonded warehouse in the United Kingdom, or, being refined sugar, has been imported on payment of duty into the United Kingdom and exported thence without drawback to any customs port, the owner shall furnish the customs collector with a certificate in Form A. (*Certificate of Origin for Sugar not manufactured in the United Kingdom, to be issued by a Collector of Customs in the United Kingdom.*)

6. Where refined sugar, having passed through a refinery in the United Kingdom, is imported from the United Kingdom into any customs port, the owner shall furnish the customs collector with certificate in Form B. (*Certificate of Origin for Sugar manufactured in the United Kingdom, to be issued by a Collector of Customs in the United Kingdom.*)

7. (1) In the case of any sugar :

(a) *cancelled*

(b) Which, though nominally imported into the United Kingdom, has merely passed through a port in the United Kingdom in transit to be re-exported thence to any customs port in the same or another bottom; or

(c) which has been imported into any customs port from any country other than the United Kingdom;

the owner shall furnish the customs collector with one of the following documents, namely:

(i) where the sugar was produced in the country from which it was exported either to the United Kingdom or direct to India, a certificate by the exporter in Form G (*annexed*);

(ii) where the sugar was produced in a country other than that from which it was exported either to the United Kingdom or direct to India, a certificate by the shipper in Form H (*annexed*).

(2) Where any sugar referred to in sub-rule (1) has been exported from a port in any country other than the United Kingdom or any British possession to the United Kingdom or to any customs port, the certificate shall be attested by the British consular officer at the port in such country.

(3) Where, in any case referred to in sub-rule (2), the British consular officer so desires, the certificate shall have been approved and communicated to him by a local Chamber of Commerce.

(4) Where, in any case referred to in sub-rule (2), the sugar is alleged to be the produce of a country which is a party to the Brussels Sugar Convention of 1902, a certificate granted by a duly authorized customs officer of that country as to the origin of the sugar shall be accepted as sufficient proof of its origin ⁽¹⁾.

FORM G.

Declaration by the Exporter or Shipper at a Foreign Port as to the Origin of Sugar produced in the country from which it was exported either to the United Kingdom, or direct to India.

[Rule 7, sub-head (i).]

I, A.B.,

declare that the consignment of cwt. of ^{beet}—sugar, of
degrees of polarization, in bags, marked and addressed as follows:
and shipped on 190, per steamer consigned
to Messrs & Co. of (a)
was produced in (b)

Signature of the Exporter or Shipper.

Certified that I believe the above declaration to be true.

Signature of Consul at Foreign Port of exportation.

FORM H.

Declaration by the Exporter or Shipper at a Foreign Port as to the Origin of Sugar produced elsewhere than in the country of export.

[Rule 7, sub-head (ii).]

I, A.B.,

declare that the consignment of cwt. of ^{beet}—sugar of
degrees of polarization, in bags marked and addressed as
follows:
and shipped on 190, per steamer, consigned
to Messrs & Co. of (a)
was produced in (b) and exported thence in

⁽¹⁾ Clause 4, added by Notification—By the Government of India, Department of Commerce and Industry, No. 1351-7, dated the 21st February, 1906. (Customs Circular II. of 1906.)

FORM G.

(a) Insert name of port in the United Kingdom or in India.

(b) Insert name of country of export.

FORM H.

(a) Insert name of port in the United Kingdom or in India.

(b) Insert country of production.

bond on the for transit through (c)
to (d) for shipment to India.

I produce and annex to this declaration the bills of lading and other relevant documents attested by the customs and other officials at (e)
and at (f)

Signature of the Exporter or Shipper.

Certified that I have examined the documents mentioned and believe the foregoing declaration to be true.

Signature of Consul at Foreign Port of exportation.

SOUTH AFRICAN CUSTOMS UNION.

The Customs Union Convention, provisionally agreed to by the representatives of the South African colonies, at a conference held at Pietermaritzburg, in March, 1906.

His Excellency the Governor of the Colony of the Cape of Good Hope, his Excellency the Governor of the Colony of Natal, his Excellency the Governor of the Orange River Colony and the Transvaal, and his Honour the Administrator of Southern Rhodesia, mutually, on behalf of their respective governments, admitting that each colony and territory is entitled to the customs duties collected on goods imported for consumption therein through any of the said colonies or territory, and that it is desirable that there should be a general customs union between all the colonies and territories of South Africa, have agreed on behalf of their respective governments upon the following articles:—

ARTICLE I.

The Customs Union Convention entered into in the year 1903 shall be superseded by this present convention, provided however:—

- (a) That the supersession of the said convention shall not affect the validity of the schedules thereto, whereby Basutoland, the Bechuanaland Protectorate, Swaziland and Barotzeland (Northwestern Rhodesia) were admitted to the customs union, which schedules as altered by the said convention are to be regarded as embodied herein and which are for reference set forth as schedules A, B, C and D hereto, this convention and its corresponding articles being deemed to be in the said schedules referred to in place of the superseded convention and its articles of similar import.
- (b) That whenever in either of the said schedules mutual agreement or joint assent is required, the agreement or assent of the governments of the Cape Colony, Natal, and Orange River Colony, the Transvaal, and Southern Rhodesia shall be deemed to be necessary.
- (c) That the convention of 1903, entered into as aforesaid, together with the schedules thereto, shall, as between all the parties thereto, continue to be of binding force and effect until a date not later than the 30th June, 1906.
- (d) That all the accounts or other matters outstanding between any parties to the said convention shall, notwithstanding its supersession by this present convention, be settled and determined under the aforesaid convention, together with the schedules thereto.

(c) Insert name of country.

(d) Insert port of shipment.

(e) Insert name of place whence the sugar was exported in transit.

(f) Insert port of shipment.

- (e) That this convention shall on a date to be mutually agreed upon be laid before the legislatures of the colonies and territory being parties thereto for ratification and approval. In the event of the legislature of any such colony or territory failing to ratify this convention, it shall be open to the other parties thereto to maintain the convention in full force and effect as between themselves, notwithstanding the retirement of such party as aforesaid.

ARTICLE II.

The following and none other shall, subject to the provisions of any subsequent article of this convention, be the customs duties upon goods imported into any place within the union, and the government of each colony or territory within the union shall levy and collect within its jurisdiction the said duties upon all goods so imported from outside the limits of the union.

CUSTOMS UNION TARIFF.

55. Perfumery, cosmetics, dyes, powders and other preparations for toilet use, not elsewhere enumerated.

56. Shawls and shawling, and lion cloths, whether in the piece or not.

NOTE.—Three per cent *ad valorem* will be rebated under article 3 of the convention.

CLASS IV.—3 PER CENT AD VALOREM.

57. Ambulance materials, imported by recognized associations, corps or hospitals, lawfully established for instruction or drill in first aid to the wounded.

58. Ammonium; anhydrous, carbonate, chloride (sal-ammoniac) and nitrate, in bulk.

59. Asbestos packing and boiler compositions.

60. Assay apparatus and assay mabor.

61. Bands and belting of all kinds for driving machinery, boiler tubes, bolting cloth and mill silk.

62. Barytes and pumice, in bulk.

63. Battery cloth and baize, gauze, matting, sieving and screening, for use in connection with machinery and apparatus, including brattice cloth but not including cocoanut matting.

64. Bolts, nuts, rivets, screws, nails and washers, and brass and iron tips and caps for boots and shoes.

65. Bookbinders' requisites, consisting of boards, cloths, leather, marble paper, skin, thread, tape, vellum, webbing, wire, gold and silver leaf, parchment, imitation leather, binders' paper, and cardboard and linen board.

66. Bottles and jars of common glass or earthenware, and bottles ordinarily used for aerated waters, empty.

67. Brass and copper, and composition metal, in bars, ingots, plates and sheets, plain including perforated, but otherwise unmanufactured.

68. Calcium; carbonate, caustic, chloride, chlorate, bi-sulphite, in bulk.

69. Carbonic acid gas.

70. Cement, liquid, for tube mills.

71. Chains for hauling.

72. Chimneys, metal (smoke stacks).

73. Collodion cotton and glycerine and kieselguhr, in bulk for manufacturing purposes.

74. Confectioners' requisites, namely, glucose, moulding starch, gelatine, and unsweetened desiccated cocoanut, in bulk.

75. Corks and bungs, and corkwood unmanufactured.

76. Cranes, elevators and shears.

77. Crucibles, cupels, cupelling furnaces, graphite, ingot moulds, retorts and furnaces for roasting minerals.

78. Cyanide of potassium and of sodium, sulphocyanide of potassium, sodium and calcium.

79. Disinfectants, in bulk, provided they are of a standard approved by the various governments of the union.

80. Emery, in bulk, emery cloth and paper, emery wheels.

81. Felt, rubberoid, uralite, and similar substances for building purposes.

82. Fire clay and terra alba.

83. Fire escapes and fire extinguishing appliances and apparatus.

84. Fruits, fresh or green, including cocoanuts.

85. Glue, in bulk.

86. Gypsum (sulphate of lime or plaster of Paris), in bulk.

87. Hair-cloth and springs for furniture.

88. Hops.

89. Hose, conveying.

90. Hubs, rims, spokes, felloes, shafts, tent bows and poles, cut or fashioned, not finished, except when for wagons and carts commonly used for the conveyance of goods.

91. India rubber, unmanufactured.

92. Iron and steel:—

(a) Rough and rolled but otherwise unmanufactured.

(b) Plain, perforated, galvanized and corrugated sheets.

(c) Angle, bar, channel, hoop, rod, plate, H.T., and similar iron or steel, not perforated or put together or worked up in any way for structural or other purposes, not elsewhere enumerated.

93. Jacks, screw and hydraulic.

94. Launches, tugs and lighters, provided that when condemned or landed to be broken up, duty shall be paid at the customs on the hull and all fittings, according to the tariff that may then be in force.

95. Lead: bar, pipe, sheet, foil and acetate of.

96. Leather: patent, enamelled, roan and morocco, and pig skin in the piece, and valve hide.

97. Lifts: power, including the gates.

98. Machinery:—

(a) Machinery apparatus, appliances and implements (not including material vehicles, mechanics' tools, domestic machines, or harness) for agricultural, mining, bookbinding, printing, and other industrial purposes.

(b) Machinery apparatus, appliances and implements and electrical material used in connection therewith, for the generation, storage, transmission, distribution of, and lighting by, gas or electric power, but not including electroliers, hand lamps or fancy fittings.

99. Magnesium sulphate, in bulk.

100. Metal of all sorts in bars, blocks, ingots, and pigs for founding, not elsewhere described.

101. Metal shaft sets and rails, buckets, skips, trucks and tubs, wheeled or otherwise, for hauling on rails or wires.

102. Packing and lagging for engines, machinery, piping and buildings.

103. Paper, all plain paper in its original mill ream, wrapper or reels, not less in size than 16 inches by 15 inches, not including feint or ruled papers, or blotting, brown, cartridge, drawing, manifold, packing, or tissue papers.

104. Pipes, piping and tubes of all kinds for gas, steam, drainage, sewerage, irrigation, water supply or pumping, including meters, cocks and taps, but not including grids, manhole covers and fittings, surface boxes, down-piping and guttering.

105. Potassium and sodium: carbonate, bi-carbonate, caustic and silicate, chloride, chloride, bi-chromate, permanganate, red and yellow prussiate of, in bulk.
 106. Presses: wool, hay, straw and forage.
 107. Printing, lithographic and ruling inks, roller composition and stamping colours and printer's bronze.
 108. Railway construction or equipment requisites, as follows:—rails, sleepers, fastenings for rails or sleepers, girders, iron bridge work, culvert tops, locomotives, tenders, ballast trucks, goods, wagons, carriages, trolleys, engine water-tanks, turn tables, permanent or fixed signals, weighbridges and railway lamps.
 109. Resin, in bulk.
 110. Saddle-trees.
 111. School furniture and requisites: being all articles certified by the Superintendent General of Education, or any official appointed for that purpose in any colony or territory in the union to be for use in any school.
 112. Sheep-dip, sheep-dipping powders, materials suitable only for dip and dipping tanks.
 113. Slates for roofing.
 114. Sprayers and sprinklers and other apparatus for destroying pests or diseases in stock, plants, or trees.
 115. Springs, axles, steps, and other metal parts not ordinarily made in the union, for carts, carriages, coaches and wagons.
 116. Staves, not worked further than roughly fashioned.
 117. Substances for destroying pests or diseases in stock, plants or trees, sulphate of copper, arsenic and arsenious acid, arseniate of soda: in bulk.
 118. Tanks and vats, suitable and intended for mining purposes, and substructures for the same.
 119. Telegraphs and telephones: materials and instruments for use in construction and working of telegraph and telephone lines.
 120. Thread: boot and shoemaker's, sadler's and sailmaker's, seaming twine, binding twine, and harvest yarn.
 121. Tin and zinc: bar, plate or sheet: plain or perforated, but otherwise unmanufactured.
 122. Traction engines, power lorries and trailers for the same, stone crushers, steam rollers and street sweeping machines.
 123. Tramway construction and equipment requisites as follows:—rails, sleepers, fastenings for rails or sleepers, iron gates, girders, iron bridge-work, culvert tops, cars, trolleys, water-tanks, and turn tables.
 124. Vegetables, fresh or green, but not including garlic, potatoes, or onions.
 125. Water boring and pumping apparatus, and pumps, not including beer pumps.
 126. Wire and wire-netting for fencing: droppers, gates, hurdles, posts, standards, strainers, staples, stiles, winders, and other materials or fastenings of metal ordinarily used for agricultural or railway fencing; and baling wire.
 127. Wire for making mattresses.
 128. Wire rope.
 129. Wood:—
 - (a) Unmanufactured.
 - (b) Ceiling and flooring boards: planed, tongued and grooved.
- NOTE.—The whole of the duties upon this class will be rebated under article III. of the convention.

CLASS V.—FREE.

130. All raw produce of South Africa, and animals bred in South Africa imported into the union overland.

131. All animals bred, and articles grown, produced or manufactured within the union, except:—spirits, beer or blasting compounds, distilled or manufactured within the union, in case of the imposition of a duty or the prohibition of manufacture for sale.

(*Vide* Article 16 of the convention.)

132. Animals, living, not elsewhere enumerated.

133. Appointments and uniforms for the military, naval, volunteer or other (imperial or colonial) forces of His Majesty.

134. Atlases, charts, globes and maps.

135. Bags (not including paper bags) for flour, grain, manure, local manufactures, produce, sugar, wool, coal and mineral, and bagging and sacking in the piece.

136. Band instruments and stands, the *bona fide* property of any military, naval or volunteer corps, and not the property of individuals.

137. Bones, feathers, grass, ivory, hair, hoofs, horns, moss, shells, skins, teeth, wool and other parts of animals, birds, fishes or reptiles not being manufactured, polished or further prepared than dried or cleaned, but in their raw and unmanufactured state.

138. Books and music, printed, including newspapers and periodicals, not being foreign unauthorized prints of any British or South African copyright work, the importation of which is prohibited, not being advertising matter elsewhere enumerated.

139. Borax, bromine, litharge, manganese dioxide and quicksilver: in bulk.

140. Bottles and jars of common glass or earthenware, imported full of any article liable to a rated duty only.

141. Bullion (in the bar or sheet), coin, specie, bank notes and other paper currency.

142. Carriages, carts, wagons and other wheeled vehicles, the manufacture of South Africa, imported into the union overland.

143. Church decorations, altars, bells, fonts, lecterns, pulpits, organs, plate or vestments, and illuminated windows, imported by or for presentation to any religious body.

144. Coir, candle wick, cotton, flax, fibre, flock, hemp and jute: raw, waste or unmanufactured.

145. Consular uniforms and appointments, and printed official consular stationery.

146. Cork dust, paper shavings, sawdust, husks and other waste substances, intended and suitable for use only as packing material.

147. Cups, medals and other trophies imported for presentation as prizes at examinations, exhibitions, shows or other public competitions, for excellence in art, bravery, good conduct, humanity, industry, invention, manufactures, learning, science, skill or sport, or for honourable or meritorious public services, or rifle shooting by imperial or colonial forces or recognized rifle associations, not being for the purpose of advertisement; provided that such articles shall, on importation or delivery free from the Customs, bear engraved or otherwise indelibly marked on them the occasion or purpose for which presented.

148. Diagrams, designs, drawings, models and plans.

149. Diamonds and other gems, or precious stones, in their rough state.

150. Dye nuts, gambia, myrobalans, sumach, valonia, and dye-stuffs for leather; and alum.

151. Engravings, lithographs and photographs, not including enlargements or reproductions of photographs, and not being labels or advertisements elsewhere enumerated.

152. Fish fry and ova.

153. Fish: fresh, dried, cured or salted of South African taking and raw oil from fish of South African taking.

154. Guano and other substances, animal, mineral or vegetable, artificial or natural, suitable for use as fertilizers or manures.

155. Ice.

156. Life boats, belts and buoys, and other life saving apparatus imported by any recognized society.
157. Marble in the rough or sawn.
158. Nitrates except nitrate of ammonium, for manufacturing purposes or for fertilizers—in bulk.
159. Oils, palm, palm kernel, cotton seed—in bulk.
160. Paintings, pictures, picture books and etchings, not being advertisements or labels elsewhere enumerated.
161. Platinum, chloride of.
162. Public stores, imported or taken out of bond by, and *bona fide* for the sole and exclusive use of, the government of His Britannic Majesty, and of any government belonging to the union, provided that a certificate be delivered to the Customs authorities given under the hand of an officer approved by the principal officer of customs, setting forth that any duty levied on such public stores would be borne directly by the government; and provided further that no portion of such stores used or unused shall be sold or otherwise disposed of so as to come into the possession of or into consumption by any persons not legally entitled to import the same free of duty, without the consent of the principal officer of customs and the payment of the duties to him by the officer so selling or disposing of such public stores at the rate leviable at the date of sale.
163. Rattans, cane and bamboo—unmanufactured.
164. Sculpture, being original works of art.
165. Seeds, bulbs, plants and tubers, for planting or sowing only, not including edible kinds or fodder.
166. Specimens illustrative of natural history and exhibits for public museums or scientific purposes, and antiquities for the same purposes.
167. Stone linings and pebbles for tube mills.
168. Sulphur—in bulk.
169. Sulphurous anhydride.
170. Tallow.
171. Tobacco, the produce of South Africa, imported into the union overland.
172. Vaccine virus, toxin and serum.
173. Wax, viz., paraffin and stearine, and stearine grease, ordinarily used in the manufacture of candles or explosives.
174. Wood meal and wood pulp.

CLASS VI.—GENERAL AD VALOREM RATE—15 PER CENT.

175. All goods, wares, and merchandise not elsewhere charged with duty, and not enumerated in the free list, and not prohibited to be imported into the union, shall be charged with a duty of 15 per cent *ad valorem*.

NOTE.—Three per cent *ad valorem* will be rebated under Article III. of the convention.

ARTICLE III.

A rebate of customs duties shall be granted on any goods and articles, the growth, produce or manufacture of the United Kingdom, imported therefrom into the union for consumption therein to the extent following:—

(a) In the case of goods and articles charged with customs duty under class I., the amount shown in the column indicating such rebate.

(b) In the case of goods and articles charged under classes II., III., IV. and VI. 3 per cent *ad valorem* on such goods and articles.

Provided that the manufactured goods and articles in respect of which such rebate as aforesaid shall be granted shall be *bona fide* the manufactures of the United Kingdom, and that in the event of any question arising as to whether any goods or articles are entitled to any such rebate as aforesaid, the decision of the minister or other executive officer in whom the control of the Customs Department immediately concerned is vested, shall be final.

ARTICLE IV.

A rebate similar to that for which provision is made in the last preceding article shall be granted in like manner and under like provisions to goods and articles the growth, produce or manufacture of any British colony, protectorate or possession, granting equivalent reciprocal privileges to the colonies and territories belonging to the union, provided that no such rebate shall be granted in the case of any particular colony, protectorate or possession until on and after a date to be mutually agreed upon and publicly notified by the parties to this convention.

ARTICLE V.

Every contracting party to the convention shall, subject to the provisions of the articles of this convention, collect the customs duties payable upon all goods imported within its borders from outside the limits of the union for removal from the collecting colony or territory into any other part of the union, and recover for and pay over to the government of the colony or territory into which the goods are so removed for consumption, the duties so collected by it on such goods subject to a deduction of five per cent of the duty collected.

ARTICLE VI.

The importation of all goods upon which the customs duties must be paid over by any one party to any other party to the union, shall be subject to such regulations as may be mutually agreed upon.

ARTICLE VII.

Every colony and territory belonging to the union shall be at liberty to pass through any part thereof, under such regulations as may be agreed upon, goods intended for consumption outside the union duty free, or at such rate as the interests of the forwarding colony or territory may demand.

ARTICLE VIII.

All accounts as between the parties to the union shall be made up to the end of each month, and all such accounts shall be settled within one month thereafter; subject to any subsequent adjustment which may be found necessary.

ARTICLE IX.

The introduction of prison and penitentiary made goods into the union is prohibited, so also is the introduction of opium, except for medicinal purposes, under such regulations as may be mutually agreed upon.

The importation of any other article may be by law prohibited in any of the said colonies or territory.

Articles, the importation whereof is prohibited in any of the said colonies, or in the said territory shall be allowed to pass through the prohibiting colony or territory to any other colony or territory within the union not so prohibiting, subject to payment of the customs duty (if any) imposed under this convention.

ARTICLE X.

Notwithstanding anything to the contrary contained in this convention, but subject to the provisions of article 9, every colony or territory belonging to the union shall permit goods imported thereinto from any place beyond the limits of the union to be removed under bond without payment of duty, subject however to the customs laws in force in such first mentioned colony or territory with regard to the removal of goods in bond, and subject to such regulations with regard thereto as may be mutually agreed upon.

ARTICLE XI.

Except in cases of duty paid in excess or in error no rebate or refund of any sum in respect of duty paid or bounty or gratuity in respect of any dutiable article shall be allowed or granted by any of the contracting parties to the convention except upon grounds contained in the articles of this convention, or by mutual agreement.

ARTICLE XII.

It shall be open to any party to this convention to suspend in whole or part the collection of the customs duty imposed under class I., of the foregoing tariff upon fresh, chilled and frozen meat, and on animals for slaughter for consumption within its own jurisdiction and to remove such suspension.

ARTICLE XIII.

It shall be permitted to the territory of Southern Rhodesia to grant, upon all goods and articles, the growth, produce and manufacture of any part of His Majesty's dominions or of any British protectorate a rebate of the customs duties payable under the foregoing tariff, equal in amount to the difference between the said duties payable, as aforesaid, and the highest duties which it is permissible to the said territory to impose under clause 47 of the Southern Rhodesia Order in Council, 1898.

ARTICLE XIV.

The territory of Southern Rhodesia may provide for the suspension in whole or part of the duties on the goods and articles comprised in schedule E.

ARTICLE XV.

Any colony or territory granting a rebate or making provision for the suspension of duty on any articles under this convention shall levy and recover and be responsible for the levying and recovering of the amount of the duty rebated or suspended on the removal of such articles for consumption into any other part of the union.

ARTICLE XVI.

(a) Any colony or territory belonging to the union may at any time levy a customs duty upon ale or beer, and blasting compounds, the produce or manufacture of any other such colony or territory, not exceeding any duty of excise which may be levied by the importing colony or territory on the produce or manufacture of articles of the like description within its own borders, provided that such articles from whatsoever part of the union they may be imported shall be liable to uniform duties.

(b) Where a duty of excise is levied on any article in any colony or territory belonging to the union, such article may be removed under bond under terms of article X. to any other colony or territory in the union.

(c) A duty of excise not exceeding 9s. per imperial proof gallon with an allowance for underproof down to 7s. 6d. per gallon shall be charged by the various parties to this convention on spirits manufactured from the produce of the vine within their respective jurisdictions, and each party shall impose on such spirit manufactured within the union on importation thereof into its territory a duty of customs not exceeding the amount of such duty of excise. In regard to the manufacture of spirit other than the produce of the vine, each party shall retain full liberty to permit such manufacture with or without a duty of excise or to prohibit the same, provided that when manufacture is allowed subject to a duty of excise, the importation of similar spirits from other parts of the union shall be permitted subject to a customs duty not exceeding the said duty of excise, and provided further that where such manufacture is prohibited by any of the parties hereto, such spirits when manufactured elsewhere within the union may be subjected on importation to a duty equal to that levied on spirits not manufactured within the union.

(d) It shall be open to any of the parties to this convention on giving six months' notice to all the other parties thereto to make any alteration in the duties of excise or of customs referred to in this article or to prohibit the manufacture of any spirits within its borders, but any such alteration or prohibition shall not be held to affect the validity of the other provisions of this convention not directly affected thereby.

(e) The importation into any part of the union of spirits manufactured elsewhere in the union shall be subject to such regulations as may be agreed on between the respective governments.

ARTICLE XVII.

Methylated spirit manufactured within the union shall be admitted into any colony or territory belonging to the union on equal terms with methylated spirit produced from any article in the importing colony.

ARTICLE XVIII.

Any colony or territory belonging to the union may, under suitable regulations, rebate the whole or part of the duty on methylated spirits, or alcohol imported solely for manufacturing or scientific purposes or for fuel within its borders, and on soap and other substances imported for and exclusively used in connection with the industry of wool washing.

ARTICLE XIX.

Any colony or territory belonging to the union may allow either by free importation or rebate an abatement of the duties on articles imported by and for the use of members of His Majesty's regular forces, and also in respect of wines and spirits for the use of the governor, lieutenant governor, administrator or resident commissioner of any such colony or territory.

ARTICLE XX.

For the purposes of estimating the amount of customs duty whenever levied on goods *ad valorem*, and of the declaration and oaths which may be at any time required by any law or regulations in relation to the question of such duty, the current value of such goods shall be taken to be the true current value in the open market for similar goods at the place of purchase bought in the ordinary manner from the manufacturer or supplier in normal quantities, including the cost of packing and packages, but not including agent's commission if it does not exceed five per cent; provided that in no case shall the true current value as above defined be less than the cost of the goods to the importer at the place of purchase.

ARTICLE XXI.

Wherever in any of the articles of this convention mutual agreement or assent is referred to, the agreement or assent of the governments of the Cape Colony, Natal, the Orange River colony, the Transvaal, and Southern Rhodesia shall alone be deemed and taken to be intended; and wherever the decision of a majority is referred to, it shall be deemed to mean a majority of the governments of such colonies and territory.

ARTICLE XXII.

Nothing herein contained shall be deemed or taken to prohibit the Transvaal from allowing the importation free of duty into that colony of any goods and articles, excepting spirits, the growth, produce or manufacture of the Portuguese province of Mozambique or of British Central Africa, provided that this article shall only apply to those products and manufactures, the elements or chief constituent parts of which are the products of the soil of the countries in question.

ARTICLE XXIII.

The provisions of this convention shall continue in force from the date of the coming into operation of this convention and thereafter: provided, however, that it shall be open for any party to this convention to give twelve months' notice to all the other contracting parties of its wish to amend the terms of this convention, or to retire therefrom, such notice to be given prior to the 30th June of any one year and to expire on the 30th June of the next succeeding year.

ARTICLE XXIV.

Upon receipt of the notice as provided in article 23 of the desire of any party to this convention to amend the terms thereof, the high commissioner shall summon a conference of the contracting parties to consider proposed amendments to this convention, such conference to meet not more than four months prior to the expiration of the notice as provided.

ARTICLE XXV.

It shall be competent at any time during the existence of the union for any other colony, territory, or state of south or Central Africa having a civilized government to apply to be included as a party thereto, and upon all the parties to this convention signifying their joint assent to such admission and mutually agreeing to the terms and date of such admission, such colony, territory or state shall be admitted, provided that it pass the requisite legislation to give effect to the terms of such admission.

ARTICLE XXVI.

No amendment or addition to this convention shall be made without the unanimous consent of the contracting parties hereto, but any difference of opinion with reference only to the true construction of any item of the foregoing tariff shall be determined by the decision of the majority of the governments of such contracting parties, provided that no government shall be deemed to be hereby bound to accept a construction of any item of the said tariff which is in conflict with any judicial decision binding upon such government.

ARTICLE XXVII.

When union manufactures of tobacco or preparations of tobacco containing an appreciable quantity of imported materials, or flour, wheaten meal, or pollard manu-

factured from other than South African wheat, are removed from one state in the union to another for consumption in the latter, credit shall be given by the forwarding state to the receiving state of 95 per cent of the duty originally collected on such materials, the proportion of such materials contained in such manufactures to be determined from time to time by agreement between the principal officers of customs of the various parties to the union on each article respectively.

SCHEDULE A.

ADMISSION OF BASUTOLAND INTO THE UNION.

PROTOCOL to the Customs Union Convention entered into between His Excellency the Governor of the colony of the Cape of Good Hope and His Honour the President of the Orange Free State, on behalf of their respective governments, and given under their hands and the public seals of the said colony and state on the 5th day of April, 1889, and the 28th day of March, 1889, respectively, and to the further Protocol and supplement thereto, the said protocol being signed and sealed as aforesaid by His Excellency the Governor of the said colony, and His Honour the President of the said state, on the 4th day of June, 1890, and the 19th day of June, 1890, and assented to by His Excellency the Governor of British Bechuanaland on the 4th day of June, 1890, and the said supplement being signed by His Excellency the Governor of the said colony and His Excellency the Governor of British Bechuanaland, on the 22nd day of September, 1890, and by His Honour the President of the Orange Free State, on the 11th day of September, 1890.

His Excellency the Governor of the Cape of Good Hope, and His Honour the President of the Orange Free State, mutually on behalf of their respective governments, having regard to the application made by or on behalf of the government of Basutoland, to be included as a party to the subsisting Customs Union between the said colony and state, and having regard to the articles of the subsisting Customs Union Convention entered into in the year 1889, between His Excellency the Governor of the colony of the Cape of Good Hope, and His Honour the President of the Orange Free State, on behalf of their respective governments, do hereby signify their joint assent, in terms of article X. of the said convention, to the admission of Basutoland as a party to the said Customs Union subject to the terms and conditions following, that is to say:—

1. The admission of Basutoland to the said Customs Union shall take effect and operate on and after the 1st July, 1891, provided that the government of Basutoland shall before that date have passed the legislation requisite to give effect to the terms and conditions of this Protocol, relative to its admission as a party to the said Customs Union.

2. His Excellency the High Commissioner shall, at the foot or end of this Protocol, signify on behalf of Her Majesty's government his assent to this Protocol and to the terms and conditions herein contained relative to the admission of Basutoland as a party to the said Customs Union.

3. So soon as Basutoland shall be admitted as a party to the said Customs Union, the government thereof shall become, be, and continue bound by the provisions of the aforesaid Customs Union Convention and of this Protocol thereto, and the terms of the said convention shall, *mutatis mutandis*, be read and construed as though Basutoland were a fourth party thereto, the government thereof having all the rights and being bound by all the obligations with regard to the respective governments of the colony of the Cape of Good Hope, the Orange Free State, and the territory of British Bechuanaland, to which the said governments are mutually entitled, and by which they are mutually bound under the said convention with regard to each other:

Provided always that—

- (a) With regard to articles III., IV., VII., X. and XI. of the said convention, the mutual agreement or joint assent of the two governments of the colony of the Cape of Good Hope, and of the Orange Free State, shall be required and shall be sufficient to carry out the several purposes of the said articles from time to time.
- (b) The government of Basutoland shall be deemed to have agreed and consented to any proposal, matter or thing approved or resolved on in terms of any of the said articles by the mutual agreement or joint assent of the aforesaid two governments.
- (c) No amendment of the provisions of the said convention shall be made under article XI. thereof, before consultation with the government of Basutoland.
- (d) No agreement, rule or regulation made by the mutual agreement or joint assent in terms of paragraph (a) of this proviso of the two governments therein referred to shall at any time be deemed or taken to be applicable to and binding upon Basutoland or the government thereof unless such agreement, rule or regulation shall be also applicable to and binding upon the Orange Free State, and the government thereof, or unless the government of Basutoland shall directly express to the said two governments its assent to such agreement, rule or regulation.

4. The Protocol to the said Customs Union Convention, entered into between the Governor of the colony of the Cape of Good Hope and the President of the Orange Free State, on behalf of their respective governments, and given under their hands and the public seals of the said colony and state, on the 30th day of April, 1889. and the 24th day of April, 1889, respectively, shall be deemed for the purposes of this Protocol to form portion of the said Customs Union Convention.

Given under my hand and the public seal of the colony of the Cape of Good Hope, at Cape Town, this tenth day of January, one thousand eight hundred and ninety-one.

HENRY B. LOCH,
Governor.

Given under my hand and the public seal of the Orange Free State, at Bloemfontein, this twenty-eight day of February, one thousand eight hundred and ninety-one.

F. W. REITZ,
State President.

On behalf of Her Majesty's government of Basutoland, I hereby signify my assent to the above Protocol and to the terms and conditions therein contained, relative to the admission of Basutoland as a party to the Customs Union, subsisting between the colony of the Cape of Good Hope and the Orange Free State.

Given under my hand and the public seal of Basutoland, at Cape Town, this tenth day of January, one thousand eight hundred and ninety-one.

HENRY B. LOCH,
High Commissioner.

SCHEDULE B.

ADMISSION TO THE CUSTOMS UNION OF THE BECHUANALAND PROTECTORATE, WHICH IS UNDER THE DIRECT ADMINISTRATIVE CONTROL OF THE HIGH COMMISSIONER.

PROTOCOL to the Customs Union Convention entered into between His Excellency the Governor of the colony of the Cape of Good Hope and His Honour the President of the Orange Free State, on behalf of their respective governments, and given under their hands and the public seals of the said colony and state, on the 5th day of April, 1889, and the 28th day of March, 1889, respectively, and to the further protocols and supplement thereto, being Protocol signed and sealed as aforesaid by His Excellency the Governor of the said colony and His Honour the President of the said state, on the 4th day of June, 1890, and the 19th day of June, 1890, and assented to by His Excellency the Governor of British Bechuanaland, on the 4th day of June, 1890, the supplement signed by His Excellency the Governor of the said colony and His Excellency the Governor of British Bechuanaland, on the 22nd day of September, 1890, and by His Honour the President of the Orange Free State, on the 11th day of September, 1890, and the protocol signed and sealed as aforesaid by His Excellency the Governor of the said colony, on the 10th day of January, 1891, and by His Honour the President of the said state on the 28th day of February, 1891, and assented to by His Excellency the Governor of Basutoland, on the 10th day of January, 1891.

His Excellency the Governor of the colony of the Cape of Good Hope and His Honour the President of the Orange Free State, mutually on behalf of their respective governments, having regard to the application made by, or on behalf of the government of the Bechuanaland protectorate for the inclusion of such portion of the British protectorate as is under the direct administrative control of the High Commissioner, as a party to the subsisting Customs Union between the said colony and state, and having regard to the articles of the subsisting Customs Union Convention entered into in the year 1889 between His Excellency the Governor of the colony of the Cape of Good Hope and His Honour the President of the Orange Free State, on behalf of their respective governments, do hereby signify their joint assent in terms of article X. of the said convention, to the admission of such portion of the said protectorate as is under the direct administrative control of the High Commissioner as a party to the said Customs Union, subject to the terms and conditions following, that is to say:—

(1) The admission of the said portion of the Bechuanaland protectorate to the said Customs Union, shall take effect and operate on and after the 1st July, 1892, provided that the government of the said protectorate shall, before that date, have passed the legislation requisite to give effect to the terms and conditions of this protocol, relative to the admission of the said portion thereof as a party to the said Customs Union.

(2) His Excellency the High Commissioner shall, at the foot or end of this Protocol, signify on behalf of Her Majesty's government, his assent to this Protocol and to the terms and conditions herein contained relative to the admission of the said portion of the Bechuanaland protectorate as a party of the said Customs Union.

(3) So soon as the said portion of the Bechuanaland protectorate shall be admitted as a party to the said Customs Union, the government thereof shall become, be, and continue bound by the provisions of the aforesaid Customs Union Convention, and of this Protocol thereto, and the terms of the said convention shall, *mutatis mutandis*, be read and construed as though the said portion of the said protectorate were a fifth party thereto, the government thereof having all the rights and being bound by all the obligations with regard to the respective governments of the colony of the Cape of Good Hope, the Orange Free State, the territory of British Bechu-

analand and the territory of Basutoland to which the said governments are mutually entitled and by which they are mutually bound under the said convention with regard to each other:—

Provided always that—

- (a) With regard to articles III., IV., VII., X. and XI. of the said convention, the mutual agreement or joint assent of the two governments of the colony of the Cape of Good Hope, and of the Orange Free State, shall be required and shall be sufficient to carry out the several purposes of the said articles from time to time.
- (b) The government of the said portion of the said protectorate shall be deemed to have agreed and consented to any proposal, matter or thing approved or resolved on in terms of any of the said articles by the mutual agreement or joint assent of the aforesaid two governments.
- (c) No amendment of the provisions of the said convention shall be made under article XI., thereof, before consultation with the government of the said portion of the said protectorate.
- (d) No agreement, rule or regulation made by the mutual agreement or joint assent in terms of paragraph (a) of this proviso of the two governments therein referred to, shall at any time be deemed or taken to be applicable to and binding upon the said portion of the said protectorate or the government thereof, unless such agreement, rule or regulation shall be also applicable to and binding upon the Orange Free State and the government thereof, or unless the government of the said portion of the said protectorate shall directly express to the said two governments its assent to such agreement, rule or regulation.

(4) The Protocol to the said Customs Union Convention, entered into between the Governor of the colony of the Cape of Good Hope and the President of the Orange Free State on behalf of their respective governments, and given under their hands and the public seals of the said colony and state on the 30th day of April, 1889, and the 24th day of April, 1889, respectively, shall be deemed for the purposes of this Protocol to form portion of the said Customs Union Convention.

Given under my hand and the public seal of the Colony of the Cape of Good Hope, at Cape Town, this 30th day of December, 1891.

HENRY B. LOCH,
Governor.

Given under my hand and the public seal of the Orange Free State, at Blémfontein, this 1st day of February, 1892.

F. W. REITZ,
State President.

On behalf of Her Majesty's government of the Bechuanaland Protectorate, I hereby signify my assent to the above Protocol and to the terms and conditions therein contained, relative to the admission of the said portion of the said protectorate as a party to the Customs Union, subsisting between the colony of the Cape of Good Hope and the Orange Free State.

Given under my hand and the public seal of the Bechuanaland Protectorate, at Cape Town, this 30th day of December, 1891.

HENRY B. LOCH,
Commissioner.

SCHEDULE C.

ADMISSION OF SWAZILAND INTO THE SOUTH AFRICAN CUSTOMS UNION.

PROTOCOL to the Customs Union Convention entered into at Bloemfontein in the year 1903.

His Excellency the Governor of the colony of the Cape of Good Hope, His Excellency the Governor of the colony of Natal, His Excellency the Governor of the Orange River colony and the Transvaal, and His Honour the Administrator of Southern Rhodesia mutually, on behalf of their respective governments, having regard to the application made on behalf of the territory of Swaziland to be included as a party to the South African Customs Union Convention, do hereby signify their joint assent in terms of article XXIV. of the said convention to the admission of Swaziland to the South African Customs Union, and agree that the date of such admission shall be the eleventh day of October, one thousand nine hundred and four, provided that before that date the requisite legislation to give effect to the terms of admission shall have been passed.

Given under my hand and the public seal of the colony of the Cape of Good Hope, at Cape Town, this second day of October, one thousand nine hundred and four.

E. S. BROOK, MAJOR-GENERAL,
Administrator for the Governor.

Given under my hand and the public seal of the colony of Natal, at Pietermaritzburg, this twenty-sixth day of September, one thousand nine hundred and four.

HENRY McCALLUM,
Governor.

Given under my hand and the public seal of the Orange River Colony, at Johannesburg, this twenty-fourth day of September, one thousand nine hundred and four.

MILNER,
Governor.

Given under my hand and the public seal of the Transvaal, at Johannesburg, this twenty-fourth day of September, one thousand nine hundred and four.

MILNER,
Governor.

Given under my hand and the public seal of the territory of Southern Rhodesia, at Salisbury, this eleventh day of October, one thousand nine hundred and four.

W. H. MILTON,
Administrator.

On behalf of the territory of Swaziland, I hereby signify my assent to the above Protocol.

Given under my hand and the public seal of Swaziland, at Johannesburg, this twenty-fourth day of September, one thousand nine hundred and four.

MILNER,
Governor.

SCHEDULE D.

ADMISSION OF NORTH-WESTERN RHODESIA.

Protocol to the Customs Union Convention entered into between the governments of the colonies of the Cape of Good Hope, Natal, the Orange River Colony, the Transvaal, and the territory of Southern Rhodesia, which came into operation on August 15, 1903.

His Excellency the Governor of the colony of the Cape of Good Hope, His Excellency the Governor of the colony of Natal, His Excellency the Governor of the Orange River Colony and the Transvaal, and His Honour the Administrator of Southern Rhodesia, do, under article XXIV. of the convention, on behalf of their respective governments, hereby give their joint assent to the admission of the territory of Northwestern Rhodesia as a party to the union, under the following conditions and mutually agree that:

- (a) The territory of Northwestern Rhodesia shall occupy the same position in the union as do the territories of Basutoland and the Bechuanaland Protectorate.
- (b) The provisions of article XIV. of the convention shall apply to the territory of Northwestern Rhodesia, and for this purpose the reference in the said article to clause 47 of the Southern Rhodesia order in council, 1898, shall be deemed to be a reference to clause 15 of the Barotziland-Northwestern Rhodesia order in council, 1899.
- (c) The provisions of article XV. shall apply to the territory of Northwestern Rhodesia in the same manner as to the territory of Southern Rhodesia, provided that no bounties shall be payable by the said territory until the expiration of two years from the coming into force of this Protocol.
- (d) This Protocol shall come into operation from the first day of December, 1905, provided that by that date the requisite legislation shall have been enacted to give effect to the terms of the admission of the said territory to the union.
- (e) The Administrator of Northwestern Rhodesia shall hereon signify his assent to the admission of the said territory as a party to the South African Customs Union under foregoing conditions.

Given under my hand and the public seal of the colony of the Cape of Good Hope at Cape Town this twenty-third day of November, one thousand nine hundred and five.

WALTER HELY-HUTCHINSON,
Governor.

Given under my hand and the public seal of the colony of Natal, at Pietermaritzburg, this sixteenth day of November, one thousand nine hundred and five.

HENRY McCALLUM,
Governor.

Given under my hand and the public seal of the Orange River Colony, at Johannesburg, this eleventh day of December, one thousand nine hundred and five.

SELBORNE,
Governor.

Given under my hand and the public seal of the colony of the Transvaal, at Johannesburg, this eleventh day of December, one thousand nine hundred and five.

SELBORNE,
Governor.

Given under my hand and the public seal of the territory of Southern Rhodesia, at Salisbury, this twenty-ninth day of November, one thousand nine hundred and five.

THOMAS C. SCANLEN,
Acting Administrator.

I hereby assent to the admission of Barotziland-Northwestern Rhodesia as a party to the South African Customs Union under the foregoing conditions.

R. T. CORYNDON,
Administrator.

February 15, 1906.

SCHEDULE E.

SOUTHERN RHODESIA.—(SPECIAL SUSPENSIONS.)

Candles.

Condensed, desiccated, or preserved milk or cream (not skimmed or separated).

Fish.

Meats:—

(a) Preserved.

(b) Salted or cured.

Oils, not essential or perfumed.

TARIFF CHANGES

BRITISH GUIANA.

TARIFF CHANGES.

Ordinance No. 22, Assented to August 31, 1905, to Amend the Customs Duties Ordinance, 1905.

1. This ordinance may be cited as the Customs Duties Amendment Ordinance, 1905, and this Ordinance and the Customs Duties Ordinance, 1905, hereinafter called the Principal Ordinance, shall be read and construed together as one ordinance.

2. From and after the commencement of this ordinance the duty upon tobacco specified in the first schedule to the Principal Ordinance shall not be charged, but in lieu thereof, duty at the rates following shall be raised, levied and collected for the public use of the colony:

Tobacco in leaf:

	Rate of Duty.
If in packages containing not less than 400 pounds:	
Losing 25 per centum of its weight when dried at a temperature of 212 degrees Fahrenheitper lb.	\$ 0 50
Losing less than 25 per centum of its weight when dried at the temperature aforesaid.per lb.	0 50
and additional for every 2 per centum of its weight less lost when so driedper lb.	0 05
If in packages containing less than 400 pounds:	
Losing 25 per centum of its weight when dried at a temperature of 212 degrees Fahrenheitper lb.	0 60
Losing less than 25 per centum of its weight when dried at the temperature aforesaid.per lb.	0 60
and additional for every 2 per centum of its weight less lost when so dried.per lb.	0 05
Tobacco, Manufactured (cigars, cigarettes and snuff excepted)	
per lb.	1 00

The above duties are to be paid on the weight being certified, either by a sworn weigher and gauger, or otherwise to the satisfaction of the Comptroller of Customs.

GAMBIA.

ORDINANCE TO AMEND THE CUSTOMS TARIFF ORDINANCE, 1905.

(No. 1, assented to March 1, 1906).

1. This ordinance may be cited for all purposes as 'The Customs Tariff Ordinance, 1906,' and shall be read and construed along with the Customs Tariff Ordinance, 1905, (hereinafter to be referred to as the Principal Ordinance), the Customs

Tariff (amendment) Ordinance, 1905, and the Customs Tariff (further amendment) Ordinance, 1905.

2. Schedule A to the principal ordinance is hereby amended by increasing the duty on Kolas from twopence to threepence a pound, and the duty on unmanufactured tobacco from threepence to fourpence a pound.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, Stock Exchange, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 18 Szechuen Road, Shanghai.
France.....	A. Poindron, 101, Rue Réaumur, Paris.
Great Britain.....	P. B. Ball, Room 39 and 40, Central House Birmingham.
	J. B. Jackson, cor. of E. Parade and Greek Street, Leeds, agent for Leeds and Hull.
	P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
	W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.
Japan.....	Alex. MacLean, No. 14 Bund, Room B., Yokohama.
Mexico.....	A. W. Dorly, Apartado 2029, Mexico, D.F., Mexico.
Newfoundland.....	E. D. Arnaud, Gazette Building, Water St., St. John's.
Norway.....	C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Denmark, also.
South Africa.....	C. M. Kittson, Rhodes Building, Cape Town, Cape Colony.
West Indies.....	G. Eustace Burke, Kingston, Jamaica.
	R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
	S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
	Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

Canadian High Commissioner's Office.

Great Britain.....	W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England. Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.
--------------------	--

Canadian Immigration Agents.

Belgium.....	D. Tréau De Coell, 29 Rue de Souci, Antwerp.
France.....	Paul Wiallard, 10 Rue de Rome, Paris.
Great Britain.....	W. T. R. Preston, 11 and 12 Charing Cross, London, S.W., England.
	G. H. Mitchell, Newton Chambers, 43 Cannon Street, Birmingham, England.
	Alfred Jury, Old Castle Buildings, Preeson's Row, Liverpool, Eng.
	Bruce Walker, 52 St. Enoch Square, Glasgow, Scotland.
	John Webster, 14 Westmoreland Street, Dublin, Ireland.
	Edward O'Kelly, 13 Queen's Square, Belfast, Ireland.
	H. M. Murray, Western Mail Building, Cardiff, Wales.

JAMAICA.

REPORT OF 'COMMERCIAL AGENT.

(Mr. G. Eustace Burke.)

KINGSTON, JAMAICA, April 19, 1906.

TARIFF REVISION.

The legislative council has now definitely decided that the present tariff shall remain undisturbed for a further period of five years. It may also be added, that His Excellency the Governor has undertaken, that in the event of the finances of the colony warranting the move, he will take steps during the interval of the five years to see that the duties on the necessaries of life be readjusted.

BANANA SPRING CROP.

Enhanced prices are being obtained for bananas coming to market intended for the United States, many of which will no doubt find their way on the Canadian market via Boston and New York, the ten days voyage of both the Pickford and Black and the Canada-Jamaica service being a decided drawback against encouraging direct shipments.

COMPLAINTS AGAINST CANADIAN BUTTER.

Complaints reached me that a brand of Canadian butter received in kegs and tins on this market, and which was bidding fair to take its stand amongst all comers as a standard table article has considerably deteriorated in grade. This fact is much to be regretted. The cause is attributed to the circumstance of the very high prices recently ruling throughout the Dominion for fine creamery goods. This is, however, no excuse, as it would have been far wiser, and commercially economic, for the shippers to have kept up the usual standard grade adding the additional rise. Such a course would have been more satisfactory both to importers and consumers. These remarks refer more especially to a Nova Scotia brand. A creamery butter from Montreal put up in jars calls for no complaint, the standard being retained. The only fault found, however, is, that as a matter of fact the glass jars in question do not contain the full quantity represented, viz., one pound.

I would also mention that a very determined effort is being made to introduce another line of Canadian butter from Montreal, but the sample shipment to hand has proved somewhat too salt for this market, and if the butter was more of a canary colour it would answer better. With these slight defects rectified, and a disposition to meet the requirements of the trade as to method of pack and description of package called for, the output ought to be satisfactory.

CANADIAN CHEESE IN FAVOUR.

The Canadian article is certainly in favour as against United States manufacture, retailers taking particular pains to impress that they can supply 'Canadian cheese,' and it is not too much to say that such representation is not always in line with fact. This circumstance, however, emphasizes my remarks that the Canadian article has grown much in favour. I cannot, however, too strongly impress the importance of supplying quality as uniform as possible, and complying with request as to sizes of cheese required, packing always in single strong boxes.

HAMS AND BACON.

My remarks *re* the above in a previous report have caused some inquiry as regards the competition of the United States in the respective lines of manufacture. I can only say that, while it is possible (from circumstances well known to the trade) that United States packers may be in a position to place a somewhat cheaper article on the market by say a couple of cents per pound, yet with the superior method of curing and the superiority of the Canadian 'raw material' there is little doubt that if a serious effort be made, the like result will accrue as in the English market, viz.:—the Canadian article will easily command the advanced price.

Saleable hams are from seven to twelve pounds, and breakfast bacon in slips of from three to six pounds. There is also a lively demand for picnic hams, and also Wiltshire cut mild cured bacon. In all cases the respective articles should be neatly placed in canvas, and it would be advisable to adopt a special trade mark.

G. EUSTACE BURKE.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. M. Kittson.*)

RHODES' BUILDING, CAPE TOWN, April 11, 1906.

P. O. Box 668.

SOUTH AFRICAN CUSTOMS CONVENTION.

The South African Customs Union convention met recently in Pietermaritzburg, Natal, to discuss tariff matters and reached an agreement a fortnight after opening, although nothing has as yet officially been made public regarding the changes in the tariff decided on. It is understood that such proposed changes are more favourable to Canadian trade with South Africa as regards preferential duties, than hitherto.

SOUTH AFRICAN EXPORTS.

During the six months ending December 31, 1905, South African exports reached a total value of £18,313,738, of which the following were the principal items:—Gold (raw) £11,230,791; diamonds, £3,481,651; ostrich feathers, £577,219; mohair, £400,840; sheep skins, £177,825; goat skins, £100,598; wool (in the grease) £938,352; (scoured) £123,574; (washed) £5,622; wine £6,131; fruit (fresh) £1,301; (dried) £2,495.

COD LIVER OIL.

Strong efforts are being made to introduce Newfoundland cod liver oil on this market, but as the customs preference granted to Canada does not extend to Newfoundland products the latter has no customs advantage over the product of Norway. It is estimated that fully 10,000 gallons of cod liver oil are imported in bulk into South Africa annually, principally of Norwegian origin.

CATALOGUES AND PRICE LISTS REQUIRED.

Canadian manufacturers are requested to keep this office better supplied with catalogues, and especially price lists and discounts.

The commercial agent can frequently prevent orders going to the manufacturers of other countries when such information is in his possession at the time the order is being placed, but not otherwise.

CHAS. M. KITTSON.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., April 30, 1906.

POPULARITY OF CANADIAN APPLES.

In the course of recent correspondence, I have had, from a number of prominent fruit dealers, opinions regarding the relative merits of Canadian and American apples, viewed from a commercial standpoint. With one exception these firms have agreed on the following points:—

1. 'Canadians' sell more readily and at higher prices than 'Americans.'
2. One reason for this is the larger sized barrel in which 'Canadians' are packed.
3. A much more important reason is that 'Canadians' are better packed and graded, and that the grade marks are more reliable than those used by American competitors.
4. This result again is unanimously attributed to the influence of government inspection, carried out under the Fruit Marks Act, or, as some importers put it, the superiority of 'Canadians' is due to the 'Government Brands.'

A COMPLAINT EXCEPTIONAL.

It is well, and only fair to the Canadian trade, that these facts should be known, for, as a rule, it is complaints and discoveries of fraud that obtain publicity. While there can be little doubt that the trade here would appreciate a more extensive and more thorough system of inspection than is possible with the present limited staff, we should not lose sight of the fact that Canadian shippers and packers have already made great strides towards securing the confidence of the trade in Great Britain.

EXTENSIONS OF THE FRUIT MARKS ACT.

So far as I can judge from local opinion the suggestion made at the recent Fruit Convention at Ottawa, to the effect that the 'No. 2' grade should be defined, and the standard of that grade enforced by inspection, will meet with unanimous approval in this district. It has been one of the chief complaints hitherto that while the 'No. 1' or 'XXX' grade is dependable, the purchaser never knows what grade, or absence of grade, he may find in a barrel marked 'No. 2' or 'XX.'

A STANDARD BARREL.

The further recommendation by the convention to the effect that a uniform barrel be made compulsory for the entire export trade of Canada is also welcomed here. This will put the product of the maritime provinces on a level with that from other parts of Canada, so far as the package is concerned.

THE BOX TRADE.

I shall be glad to receive particulars from any growers who propose shipping choice apples in boxes during the coming season. Only a limited trade, confined to the best varieties, and the best samples of them, carefully packed, can be hoped

for in the early stages of the development of this trade, so far at least as the south of England is concerned. There is, however, a high class trade which could use such goods as these at paying prices. Importers would require that shipments should be absolutely reliable from time to time, and that the fruit should be in every respect first class, and true to name and grade as marked.

TRADE OF BARRY DOCK.

The Canadian trade is interested in all developments in connection with the Bristol channel, and I therefore have pleasure in submitting the following figures, which eloquently attest the progress of the Port of Barry since the year 1889, when I believe the first dock was opened there:—

Year.	Imports.	Exports.	Total Trade.
	Tons.	Tons.	Tons.
1889.....	14,745	1,091,657	1,106,402
1890.....	63,675	3,201,621	3,265,296
1891.....	87,533	3,968,041	4,055,574
1892.....	80,764	4,201,865	4,283,629
1893.....	145,406	4,217,171	4,362,577
1894.....	167,697	4,899,317	5,067,014
1895.....	206,872	5,059,676	5,266,548
1896.....	210,446	5,285,002	5,495,448
1897.....	248,349	5,859,255	6,017,604
1898.....	178,161	4,373,238	4,551,399
1899.....	252,053	7,237,264	7,489,317
1900.....	255,279	7,231,717	7,486,996
1901.....	234,252	7,851,165	8,085,417
1902.....	258,491	8,681,614	8,940,105
1903.....	389,596	8,855,180	9,244,776
1904.....	423,827	9,125,431	9,549,258

COAL TRADE.

It may not be generally known that the exports of coal and coke alone from Barry docks in the year 1904, amounted to 9,114,678 tons, which exceeds the coal and coke exports of any other port of the Bristol channel.

INDEPENDENT OF TIDES.

One of the chief advantages of Barry as a port of discharge is that steamer can dock at any state of the tide. The importance of this independence of tide needs no emphasizing, as all interested in shipping will appreciate it.

PASSENGER TRAFFIC.

Barry has excellent facilities for passenger traffic, via Cardiff, with London (three and three-quarters hours), Birmingham (four and a quarter hours), Manchester (five and a half hours), Nottingham (five and three-quarters), Liverpool (five and three-quarters hours), and York (seven and three-quarters hours).

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., April 26, 1906.

CALCIUM CARBIDE.

There is a splendid market in Birmingham and district for shipments of calcium carbide. I am continually receiving inquiries from large users, and although I have been in communication with several Canadian manufacturers of this chemical, so far, nothing definite has resulted. The Canadian shippers are either too busy with their home market, or they are indifferent to the fine openings here for this article. As there is such a great demand in the whole of this country for calcium carbide, I venture to suggest that, even if it necessitates an extension of their plants, Canadian manufacturers should devote more attention to exporting to Great Britain.

GREAT BRITAIN'S IMPORTS.

The Trade and Navigation report issued by the Board of Trade does not state specifically the amount of calcium carbide imported, but the imports of 'Unenumer-

ated chemicals, including carbide of calcium and sulphate of nickel' are, for a period of three years, as follows:—

1903	1904	1905
£1,805,566	£1,582,533	£1,943,008

CALCIUM CARBIDE MANUFACTURED IN NORWAY.

An authentic report states that calcium carbide is manufactured in Norway at Hafslund, Borregaard, Notodden, and Meraker, and that the exports from those centres rose from 5,258 tons in 1904 to nearly 9,000 tons in 1905.

MANUFACTURE IN GREAT BRITAIN.

Some years ago attempts were made in Great Britain to manufacture calcium carbide. A right to manufacture was obtained from the inventor, but although the company was supported by a large capital, their efforts were unsuccessful.

P. B. BALL.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, April 20, 1906.

CIGARETTE PAPER.

The raw material for what is known as 'rice paper,' the kind used for the wrapping of tobacco in cigarette form, and which heretofore has been altogether imported, the native press states has been discovered by a Japanese expert in Formosa, and is about to be largely cultivated. With the view to its manufacture, a company has been formed in Osaka with a capital of \$175,000, with provision for early increase to \$250,000, under the name of the Oriental Paper Manufacturing Co., having as the basis of its operation the supply of the Government Tobacco Department, heretofore an importer of this article. Of course the company will have the export trade in view also; and Canadian cigarette manufacturers may inquire of this commercial agency, should it appear to them that further information might be an advantage.

TURPENTINE.

Inquiry called for by Canadian correspondence, discovers that this article is so scantily manufactured in Japan that no statistics are kept of it. It is not so commonly used here as in Europe and America. The Japanese native houses are not painted either inside or outside; plain finish of natural wood being the universal practice. The houses of foreigners, built of course in foreign style with some far Eastern peculiarities of design and finish, are liberally painted; but these make a comparatively small aggregate. For other industrial and for miscellaneous uses turpentine is required to the same extent perhaps as in other countries. The importation

is mainly from the United States, England and Germany, as the following quotations show:—

Oil or Spirit of Turpentine.

	Quantiy.	Value in yen.
1903..	38,935 galls.	49,515
1904..	25,540 "	42,164
1905..	27,648 "	35,628

Country.	Quantity.	Value in yen.
England..	12,235 galls.	15,512
United States of America..	15,405 "	20,097
Germany..	8 "	18

Note.—(1 yen=50 cents.)

A foreign firm, extensively engaged in trade throughout the Far East, say that most of the turpentine used here comes from New York; but if the Canadian producer could supply the right quality at about 75 cents (gold) per American gallon c.i.f. Japan ports, some market might be found. It would be necessary, however, to send samples in advance. The packing best suited for this market is cases containing two five-gallon tins.

TAR AND TURPENTINE.

Information wanted at the Pacific Coast, B.C., as to the market for these products enables me to report for the general trade that a leading foreign mercantile firm say they cannot find that there is any business to be done in tar. Native dealers say that the high price has caused the consumer to have recourse to a substitute in coal tar. From Sweden the following item of import appears:—

Quantity.	Value.
1,633 lbs..	\$49.26

Native dealers say that coal tar for its cheapness is used in every way possible instead of wood tar. But several wish to correspond with the producers, although they could not offer expectation of a large trade. It may be remarked that, for reasons of greater cheapness, benzine or some by-product of coal oil takes the place of turpentine greatly in the matter of paint thinning.

CRITICISM OF CANADIAN BICYCLES.

A Japanese firm, at a distance, who have shown great interest in Canadian trade, have recently given evidence of that interest by reporting, entirely of their own motion, some results of the trade negotiations which they have been enabled to initiate through correspondence with this office.

They criticise the bicycles of a leading Canadian manufacturing company in these terms:—

‘We have received sample shipments of their bicycles (stating the types or brands) but their wheels have greatly disappointed our buyers, on account of their being out of style. Their machine, though durably made, is too heavy in weight and has a rather clumsy appearance. At present marked preference is given to English machines which weigh very light and have delicate and attractive appearance. We have to advise the factory to make for us some wheels much lighter in weight, up-to-date in style, or very low in price. Fine English machines are now being sold in Japan, c.i.f. Japan ports, from yen 30 to 40, with free wheel.’

This is distinctly a disappointment, for I had cause to expect that these wheels could be safely put forward as up-to-date at any rate, although I had misgivings as to the price in view of the low figures to which keen competition has brought the bicycle in this market. The bicycle has unquestionably in it much of a fascination

for the young Japanese, which he shows by reckless coasting or scorching and otherwise displaying of agility along the smooth roadways whenever he can make the raise of a wheel. But speaking generally of him, he cannot afford an expensive vehicle.

CLASSES OF WHEELS REQUIRED.

I think there are two classes of wheels required for this market; first, an up-to-date article, fit to meet the strongest competition. And, second, a plain article, low enough in price to compete with the Japanese made wheel, and so durable that the young Japanese will feel safe going at top speed, or turning a somersault.

The Canadian manufacturer, in bicycles as in other things, cannot be too strongly impressed with the fact that it is useless to look to Japan thinking that out-of-date stock must be good enough for that far away and primitively fashioned country. Just reverse that proposition, and get a fair show.

JAPANESE RAILWAYS.

Prominent railway men interested in the Japanese railway companies held a two-days celebration at Nagoya upon the event of the railways of the Empire reaching the length of 5,000 miles. These railways, in so far as they are not already government property, are now subject to 'nationalization' by the Act of Parliament passed at the late session. There will be gradual absorption by the government, some companies having been already notified of expropriation proceedings.

RESUMING STEAMSHIP SERVICE.

The first vessel of the Japan Steamship Company, to resume the Australian service after the war, has made the round trip, returning with cargo the chief items of which are 5,000,000 yen in gold bullion for the Yokohama Specie Bank, and 1,500 tons chiefly wool, which commodity enters free of duty. Through the Oriental Steamship Company the Japanese postal authorities have opened a direct service to Chili and Peru, a service that heretofore was by way of the United States for ordinary mail matter, and by way of England, France and Italy for parcels, accelerating the service by about one-half.

THE NEW TEA CROP.

The tea interest, from the planter to the exporter, is cheered by the prospect of an abundant crop of good quality. The first export shipment of the season, a small one, goes to Canada and the States by the *Empress of India* to-morrow (27th April), about 3,000 catties or perhaps 3,500 lbs. The first for last year was one day later, and amounted to only some 400 catties. The season this year comes somewhat earlier, and the weather has been much more favourable for the growth and quality of the leaf. The raw leaf is coming in freely, and in good condition, from the coast and interior points. The 'Jiji' (Times) says of Shizuoka Prefecture that the tea season has opened well, the plantations are in excellent condition, and it is generally expected that good picking will result. Current reports from Totomi Province say that the yield for market will be 10 to 20 per cent higher than last year. Of another important tea growing province (Suruga) the comparative estimate is 20 to 30 per cent higher than last year. Against the improved quantity and quality, however, is to be placed the higher cost of production. Wood and charcoal for tea 'firing', and other necessities to production, are very materially higher than a year ago. But to this drawback there is compensation in the plentifulness of labour consequent upon the return of the soldiery from the war. The tea merchants at the Ports are in a less cheerful frame of mind than the tea planters; which, if with good cause, may react upon the country outlook. The ground of their discouragement is that there are large stocks of old tea partly in their godowns and partly in the foreign market; and, until there has been in some measure a clearing out, they cannot handle the new tea.

The tea trade is however subject, like the silk trade, to the devices of speculators. It is well organized, has plenty money behind it, and is quite equal to the expedient of 'bulling' or 'bearing' the market according to opportunity. There is no reason to doubt that when the volume of the new crop, of superior quality, presses its way upon the market, the old and inferior stock hung up since last year will have to go for what it will fetch. Like old stocks generally, it must make way for the new, the more certainly when the quality of the new is inviting.

FLOUR MARKET.

The latest 'Trade Review' references to flour state in substance that local trade was slow, an accumulation of stock pressed upon holders and forced them to look for market. Relief was obtained by sales to Vladivostock and China to such an extent as to support the market against an anticipated fall down.

AUSTRALIAN BUTTER UNDERBIDS CANADIAN.

The butter quotations from the Alberta Creameries are favourably received. I have information of some orders going forward. Australian butter, however, underbids the Canadian by a cent and a half to two cents per lb., and although not quite equal in quality makes formidable competition.

ALEX. MACLEAN.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA-
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, April 12, 1906.

IMPROVED CASE FOR EXPORTING FRUIT.

In Monthly Report for November, page 895, I gave some particulars relative to an improved safety case for exporting fruit, which had been patented by a Melbourne firm of fruit exporters. As a result of that paragraph I have received inquiries from Canada desiring more complete details and, for general information to those interested, I am sending same herewith. The selling price here is \$30.41 per hundred cases, either in one size or of assorted sizes. These cases should be available at less rates in the Dominion as the wood and paper divisions can be obtained from Canadian manufacturers. The partitions or compartments for each fruit are made of cardboard, while perforated sheets of cardboard divide one layer of fruit from the other. The cases are also perforated in order to insure thorough ventilation. The principle is exactly similar to that upon which the egg compartment cases, so well known in Canada, are made.

THE ASSORTMENT OF FRUIT CASES.

While some of the Australian export fruit cases are longer than others, in the reverse way others are deeper, yet the cubic measurement of each case is approximately (some a trifle over, others a trifle under) one cubic foot, thus 40 assorted cases are recognized by shippers as equalling one ton measurement, the freight basis upon which shipments are made. Herewith are the particulars of the cases, size of divisions, number of fruit, contents and inside measurement:—

No. of Case.	Size of Fruit.	No. of Fruit in Case.	Inside Measurement of Cases.
	In.		
0.	1 $\frac{3}{8}$	432	16 $\frac{3}{8}$ x 13 $\frac{3}{8}$ x 6
1.	1 $\frac{1}{2}$	320	16 $\frac{3}{8}$ x 13 $\frac{3}{8}$ x 6
2.	1 $\frac{1}{4}$	240	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 5 $\frac{1}{4}$
2A. Oblong fruit	1 $\frac{1}{4}$	210	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 5 $\frac{1}{4}$
2B. Round "	2	210	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 5 $\frac{1}{4}$
3. " or oblong fruit.	2 $\frac{1}{4}$	176	22 $\frac{1}{4}$ x 15 $\frac{3}{8}$ x 3 $\frac{3}{4}$
3A. " " "	2 $\frac{1}{4}$	140	22 $\frac{1}{4}$ x 15 $\frac{3}{8}$ x 3 $\frac{3}{4}$
4. " " "	2 $\frac{1}{4}$	108	21 $\frac{1}{4}$ x 16 $\frac{3}{8}$ x 4 $\frac{3}{8}$
5. " " "	2 $\frac{1}{4}$	90	22 $\frac{1}{4}$ x 12 $\frac{1}{4}$ x 4 $\frac{3}{8}$
6. " " "	2 $\frac{1}{4}$	80	21 $\frac{1}{4}$ x 13 x 4 $\frac{3}{8}$
7. " " "	2 $\frac{1}{4}$	70	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 5 $\frac{1}{4}$
8. " " "	3	56	21 $\frac{1}{4}$ x 12 $\frac{1}{4}$ x 5 $\frac{3}{8}$
9. " " "	3 $\frac{1}{4}$	48	19 $\frac{1}{4}$ x 13 x 5 $\frac{3}{8}$
10.	Long Pears.	72	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 5 $\frac{1}{4}$
11. Round.	2 $\frac{1}{4}$	64	21 $\frac{1}{4}$ x 11 $\frac{1}{4}$ x 6
12. " or long.	2 $\frac{1}{4}$	56	19 $\frac{1}{4}$ x 11 $\frac{1}{4}$ x 6 $\frac{1}{4}$
12A. " " "	3 $\frac{1}{2}$	48	19 $\frac{1}{4}$ x 11 $\frac{1}{4}$ x 6 $\frac{1}{4}$
12B. Large.	4	40	19 $\frac{1}{4}$ x 13 $\frac{3}{8}$ x 6 $\frac{1}{4}$
13. Special case for grapes.			19 $\frac{1}{4}$ x 11 $\frac{1}{4}$ x 6 $\frac{1}{4}$
14. Special case for green vegetables.			23 x 11 x 5 $\frac{1}{4}$

Lumber $\frac{1}{4}$ in. ends add for outside measurement.

Lumber $\frac{1}{2}$ in. sides add for outside measurement.

CONTENTS OF FRUIT CASES.

It will be seen, upon reference to the list given, that case No. 0 has compartments of the size of 1 $\frac{3}{8}$ -in. and a capacity for say 432 plums. On the other hand, case No. 8, has compartments capable of taking round or oblong fruit—3-in. long—and its capacity is for say 56 pears.

PROSPECTS OF IMPROVED FRUIT CASES IN CANADA.

The cost of improved fruit cases, similar to those now finding favour in Australia, would probably be too great to permit of their general use in exporting Canadian apples in large quantities to Europe. At the same time they could be used in packing delicate fruit like pears and plums, and also in shipping choice qualities of various fruits, intended for shipment to London and other comparatively distant markets.

D. H. ROSS.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, May 2, 1906.

GRUBBEGD, No. 4,

NORWEGIAN WATERFALLS AND FOREST PROPERTY.

A strong agitation has been raised to bring the State to take steps to prevent foreigners from acquiring waterfalls, mines and forest property in Norway. The

most ardent champions of this movement even go so far as saying, that it is better to let ore deposits remain undeveloped and waterfalls unused for fifty years, awaiting the creation of sufficient Norwegian capital for their development, than to let foreign capital do it now. On the proposal of the Norwegian Government an Act has been passed in secret meetings of both sections of the Storting (Parliament) temporarily forbidding the sale to foreigners or Norwegian limited companies without a Royal concession of Norwegian waterfalls.

A Royal proposal for finally settling this subject will shortly be laid on the table of the Storting. Meanwhile the leading newspapers are discussing the advisability of such an Act.

WOOD PULP.

For prompt parcels of chemical rather higher prices have been obtained. The new mills which are building in this country and in Sweden have made attempts at selling, but so far only with indifferent success.

The spot market for mechanical is still depressed and inactive. If the reports had been correct, which were received during the autumn as to sales of this year's make, and if the year had opened with 70 per cent of the production already sold, it is difficult to understand how the mildness of the winter with the consequent moderate increase in the production of the first quarter could have sufficed to bring about such a slump in prices as has actually occurred.

THE WOOD TRADE.

In cargoes of flooring there is little business going on, but the shipments of parcels by the regular liners of small weekly or fortnightly lots are constantly growing from one year to another. This way of supplying their requirements is obviously of considerable advantage to the buyers, but the exporters do not obtain a corresponding increase in price, although these small assorted lots are more expensive to fill than cargo shipments of regular lines.

EXPORT OF AGRICULTURAL PRODUCTS FROM DENMARK.

According to reports lately issued there was exported from Denmark during the month of January, 1906:—

157,875 casks of butter, weighing about.	17,366,250 lbs.
18,268 cases of butter, partly fresh and partly in tins.	
57,478 bales of bacon, weighing about.	13,909,670 "
2,677 barrels of mess pork, weighing about.	883,410 "
1,411 barrels of salted beef, weighing about.	465,630 "
22,893 cases eggs.	32,965,920 pieces.
Fresh meat:—	
Beef.	4,037,000 lbs.
Pork.	221,760 "
Fresh and cured swine products:—	
Lard, tallow, skins, &c., about.	5,069,900 "
Cream.	1,350,140 "
Milk.	918,720 "
Cattle.	number. 15,179
Horses.	" 4,104

The value altogether amounts to kr. 32,300,000 (about £1,774,725) which for a country of about 3,000,000 inhabitants must be said to be a very satisfactory result.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., May 7, 1906.

HAY.

Canadian hay is in special demand in the north of England, and particularly, in and around Hull and Newcastle at the present time. There is an especial scarcity of British hay, owing to the failure of last season's crop, and as April of this year has been very dry and cold, with a great deal of frost at night, the prospect for the coming hay crop is very poor indeed.

Within the last two weeks I have had many inquiries for Canadian hay from large dealers who are always willing to take from 150 to 300 tons at a shipment. As there was no Canadian hay in the market, Dutch hay had to be substituted. Instances like this, all go to prove that there are opportunities for working up a substantial trade in Canadian hay.

PRICES OF HAY.

The current price for best Canadian, is from 70s. to 72s. per ton. The following Newcastle firms would be interested in receiving quotations :—Isaac Carruthers, Black Boy Yard, Groat Market, Newcastle-on-Tyne ; Gregory Bros., Stephaney Lane, Newcastle-on-Tyne; Alexander & Wood, Close, Newcastle-on-Tyne; The United Yeast Company, Corporation Road, Newcastle-on-Tyne.

MINING TIMBER.

It is a regrettable fact that the big collieries in the Newcastle district, and also the Yorkshire collieries, are almost wholly dependent upon the Baltic ports for their supplies of colliery pit props and mining timber. Within a certain radius of the Tyne, there are over 150 collieries, and also a great number of timber merchants interested in supplying them with mining timber, and a substantial trade could be built up, if the prices for Canadian timber were at all equal to the price asked for Baltic.

PRICES.

Prices for Canadian mining timber, if shipped to the Tyne would have to be quoted c.i.f. Newcastle, and landed, either at the North or South Shields. Pit props from the Baltic, and measuring $2\frac{1}{2}$ inches at the top, being $\frac{1}{2}$ per 72 lineal feet, 3 inches at the top, 2s., and for every $\frac{1}{2}$ inch thereafter up to 4 inches, sixpence is added to this price. Pit props measuring $4\frac{1}{2}$ inches at the top, 4s. 3d., and 1s. increase in the price for every half inch increase in the size thereafter. All these figures are quoted for the 72 lineal feet, and in order to compete, Canadian prices would have to be brought down to something approaching these.

CANNED GOODS.

Canada's prospects in this trade are exceedingly bright, and especially have canned apples from Southern Ontario found great favour in England, particularly

amongst the retail shop-men, and specially apples put up in one gallon tins. Canned tomatoes, canned fish and evaporated fruit are also in good demand.

CHEESE.

An old experienced importer of Canadian cheese in the north of England, is very decidedly of the opinion that our trade in Canadian cheese could be very much improved if the following three suggestions as to packing were rigidly carried out.

1. The day, month and year in which the cheese is made, should be branded on the cheese itself.

2. The day, month and year in which the cheese is made, should be stamped on the package.

3. The weight of the cheese, should, in addition to appearing on the package, be branded on the actual cheese itself.

In an interview a few days ago, he explained to me his views as follows:—

‘It is important that the date on which the cheese is made, should be branded on the cheese itself, in addition to the package containing the same, as it is a common occurrence for British importers to palm off on the unsuspecting retailer, July and August made cheeses, as substitutes for the better and higher-priced June and September makes. In fact, I have had May-fodder cheese palmed off on me for June’s.

‘In this way, I have not only lost money, but ran the risk of injuring my trade to a very large extent. If the weight were branded on the cheese, as well as on the package it would not be possible, sometimes, to find the figure 3 changed to the figure 8, which sometimes happens, giving an advantage of from 3 lbs. to 5 lbs. in favour of the seller.’

HOG PRODUCTS.

I am indebted to a prominent importer in Newcastle-on-Tyne for the following with regard to the class of hog products in most demand in his district:—

‘From Stockton right up to Newcastle, there is only one style of hog cut for which there is a brisk demand, and that is the “square shoulder,” and were Canadian hog packers to cater for the big industrial masses in and around Newcastle in this, their favourite cut, there would always be a sure and profitable market for their goods. To give it a trade expression, Newcastle is a “cheap place” and its people require “cheap things,” thus they buy the “square shoulder” seeing that it is the “cheapest” part of the beast, and also the leanest.

‘It is common knowledge that 60 per cent of the hog meats which are sold in and around Newcastle is the “square shoulder,” and importers here are always ready buyers of this cut, knowing that they have a sure market for it.

‘Outside of this, we have, of course, to cater for the better classes in other styles of cuts, but if Canadian packers intend to seriously compete with the Chicago houses, it is incumbent upon them to change their present system of exporting their hog meat in only one style “the Wiltshire cut”; and to imitate other packers in sending hog products across here in the various ways used.’

ANOTHER SUGGESTION.

The following suggestion was also made to me by a large and experienced dealer in the same town:—

‘Canadian firms do not pack the different cuts compactly enough in the boxes, before shipment, thus the air is admitted, which acts detrimental to the quality. This is a drawback, the effects of which dealers have experienced on many occasions.

‘The goods should be packed under hydraulic pressure. I would suggest an improvement in the cutting up of the shoulders. Canadian packers leave too much surplus matter of the neck attached to the shoulder; in other words, the shoulder is not sufficiently “cut” or finished off, to be fully appreciated by English importers.’

EGGS.

A prominent North country egg merchant, who has been engaged as an importer of eggs for close on forty years, gives his opinion on the Canadian egg trade as follows:—

‘If, before shipment, you expose boxes containing Canadian eggs, to say a heat of anything about 80 degrees, then I certainly believe that when they arrive in this country they are stale. There is no doubt whatever, that in this will be found the reason why importers on this side are afraid to take any quantity of Canadian eggs, because when they do so, they run the risk of finding very little offers for them.

‘A matter of seven years ago, we paid special attention to the Canadian egg trade, and at the commencement, were of the opinion that it had great promise, but every now and then, a whole shipment arrived from a particular district in a stale condition. Perhaps, however, immediately before this, and immediately afterwards, shipments would arrive in the “tip-top” condition, and we ultimately came to the conclusion that the fault lay entirely with the Canadian exporter and the shipping company, in allowing the eggs to lie about the docks, railway-sidings, warehouses, &c., for two or three days pending transshipment, in which time they were exposed to the great heat of the Canadian summer. Others exporters and shippers, of course, took greater care of their goods, with a result that they arrived here in a fit condition, and fetched very good prices.

‘Exporters in Canada know very well how old an egg is when they are packing them for shipment, and they are only spoiling their chances in sending goods across to this country which will hardly keep in condition until they arrive here.

‘Eggs in this state should be used, and at once, in Canada, and for Canadian consumption. This is our experience on the Newcastle market. The complaint is not made against the whole of the Canadian egg exporters, but against a certain section of them who do not study the details as to shipping their products.’

COMMERCIAL AGENTS.

The Commercial Intelligence Committee of the Board of Trade intimate that they have had under consideration the early despatch of a commercial mission to Canada, on similar lines to those recently despatched to Australia, New Zealand, and other countries, and they are requesting the different Chambers of Commerce to nominate suitable parties for such mission.

JNO. B. JACKSON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., May 15, 1906.

BARLEY.

The importation of barley into Great Britain for 1905 shows a diminution compared with the preceding year, but yet is of such large proportions as to invite the attention of the Canadian exporter and to stimulate the Canadian farmer whose land is fitted for its cultivation, to bestow some care upon and improve the grade of this cereal to the highest malting quality, and thus realize the high price that such an article

commands in the market here. I give herewith from the trade and navigation returns the quantities imported for the year ending December 31, 1905:—

	Cwts.	Bushels.	Value.
			£
Russia.....	9,850,100	22,983,566	2,576,711
Roumania.....	2,270,700	5,298,300	621,529
Turkey.....	3,454,600	8,060,733	1,054,835
United States.....	2,555,500	5,962,833	754,600
Other countries.....	3,296,000	7,690,666	1,010,125
	21,426,900	49,996,098	6,017,200

The above quantities embrace both malting and stock-feeding barley and the latter forms a very large proportion, its chief sources being Russia and Roumania.

MARKET FOR CANADA.

I have made calculation as to the average price realized per bushel by countries as follows:—

Russia.....	54½ cents.
Roumania.....	56¼ "
Turkey.....	63¾ "
United States.....	61 "
Other countries.....	63½ "

IMPORTS.

The following figures show the importations and value of barley for the first three months of 1906, also the quantity and value imported during the same months of 1904 and 1905:—

	1904.		1905.		1906.	
	Cwts.	Bushels.	Cwts.	Bushels.	Cwts.	Bushels.
January.....	2,541,400	5,929,933	1,856,800	3,332,533	1,200,300	2,800,700
Value.....		£709,441		£492,702		£351,542
February.....	2,610,900	3,092,106	1,292,800	3,016,533	1,697,700	3,961,300
Value.....		£737,992		£367,935		£499,568
March.....	2,661,400	6,209,933	1,816,800	4,239,200	1,241,500	2,896,833
Value.....		£743,427		£511,316		£366,126

PRICES PREVAILING.

From the most reliable source I have obtained the prices prevailing at this time for malting and feeding barley c.i.f. Manchester.

California malting barley, 24s. 3d. or \$5.89 for 448 lbs.=63c. per bushel.

American feeding barley, 18s. or \$4.37 for 400 lbs.=52¾c. per bushel.

The most prominent grain brokers here will welcome samples and prices of Canadian barley, all the large consumers buy through them, as they are the only recognized media for effecting sales.

WOODENWARE FINISH.

The manager of the furnishing department of a large importing house here, recently called my attention to the imperfections in finish, or perhaps more correctly the neglect of finish in the matter of woodenware from a Canadian shipper. The defects would to a casual observer be almost unnoticeable, but readily seen when pointed out. Comparisons were made by him between the perfect finish of such lines of goods from a country largely competing for this class of trade with Great Britain, and that shipped from Canada. I have avoided as much as possible as directed calling attention through the department to any small or captious complaints of the dealers here, as I am convinced grumbling is deemed a paramount possession by the managers of large houses and others.

A step-ladder was shown me, the ends of the steps were as rough as when they came from the saw, and as the planing of them would cost but little and add greatly to the appearance, the manager was at a loss to know why the neglect was permitted, and more so as the shipper was a new firm seeking trade in England. Similar want of finish was pointed out in other lines of woodenware, and advice might be tendered to Canadian shippers of wooden articles to English houses, to see that the foremen of factories exercise care and watchfulness in the finishing of articles for export, as a perfect system of inspection of each article taken into stock, prevails here.

BRITISH IMPORTS AND EXPORTS INCREASE.

The Board of Trade returns for April show that the imports for the month amounted to £47,054,231, an increase of £3,771,405 as compared with April last year. The exports for the month amounted to £27,032,306, an increase of £2,893,833.

P. B. MacNAMARA.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., May 6, 1906.

CANADIAN BACON.

A favourable increase of Great Britain's imports of Canadian bacon still continues, and there is every indication that the demand is likely to grow more and more. Commenting on the expanding nature and wide development of the Canadian bacon trade, *The Grocer* in its annual review remarked: 'Most remarkable of all the imports into the United Kingdom during the year 1905 have been those of bacon from Canada, showing the greatest increase of any from other parts of the world, and this has had a restraining influence on the London market in keeping it from unduly rising, at first through the stationary, but subsequently more contracted, supplies from the United States and Denmark.'

THREE YEARS' IMPORTS.

The official figures of the importations of bacon for 1905, together with the totals for the two former years, are as follows:—

From	1905.	1904.	1903.	Increase over 1904.	Decrease from 1904.
Denmark..... Cwt.	1,471,687	1,723,884	1,496,101	252,197
United States..... "	2,755,233	2,806,108	2,893,507	50,875
Canada..... "	1,191,390	829,883	665,249	361,507
Other Countries..... "	80,650	92,436	102,131	11,786
Totals.....	5,498,960	5,452,311	5,156,988	361,507	314,858

This shows a net increase of 46,649 cwt. in the past year's imports of bacon, more than made up of Canadian selections alone. That this was not merely a temporary or fitful expansion in the consignments hither of Canadian bacon is clearly proved by the fact that Great Britain's imports for the first three months of this year were on the same enlarged scale, as shown by the following official statistics:—

From	1906.	1905.	1904.	Increase over 1905.	Decrease from 1905.
Denmark..... Cwt.	343,075	368,983	389,249	25,908
United States..... "	908,192	885,124	870,318	23,068
Canada..... "	255,621	161,301	140,347	94,320
Other Countries..... "	12,512	19,575	16,917	7,063
Totals.....	1,519,400	1,434,983	1,416,831	117,388	32,971

Here again Canadian bacon stands out prominently with an increase of 94,320 cwt. above the supply of last year to date, and so helps to secure a net gain of 84,417 cwt. on the aggregate arrivals during the first quarter of 1905. These are significant figures, and strongly indicate that the production, distribution and consumption of Canadian bacon are progressing at a faster rate than those of any other cure.

As the journal above quoted remarks: 'True, as an exclusive trade the Canadian bacon trade still falls a long way behind that of the United States, but considering its comparative youthfulness, it affords evidence of astonishing vigour and vitality, and must henceforth be reckoned with as an important factor in determining the probable course of the bacon trade.'

P. B. BALL.

NEW ZEALAND INTERNATIONAL EXHIBITION.

ARRANGEMENTS MADE BY CANADIAN GOVERNMENT TO ENCOURAGE EXHIBITS FROM CANADA.

An international exhibition is to be held at Hagley Park, Christchurch, Canterbury, New Zealand, from November, 1906, to the month of March, 1907, inclusive, in which the nations of the world have been invited to participate. The object of the exhibition is educational, and it is intended to demonstrate the resources and possibilities of New Zealand as one of the world's food producing factors, its mineral resources, &c.

CANADIAN GOVERNMENT BUILDING.

The Canadian government will erect a special building which will be devoted exclusively to the accommodation of exhibits illustrating the natural and manufactural products of Canada. The space available for Canadian exhibitors will be 10,000 square feet, and will be allowed to Canadian manufacturers free of charge, provided the nature of the exhibit offered is of a kind in which a trade with New Zealand can be initiated or increased. The Canadian government also offers to pay the cost of transportation from points in Canada to Christchurch, New Zealand. They will also be installed and maintained during the term of the exhibition at the expense of the Canadian government. It is intended that all exhibits should be disposed of by sale or otherwise in New Zealand after the close of the exhibition. The goods which are to be returned to Canada will be carried at the expense of the owner.

TRANSPORTATION OF EXHIBITS.

..

Arrangements have been made with the Bucknall Steamship Company, operating a direct line of steamships between Vancouver and Lyttleton, New Zealand, to carry the exhibits, which will be routed from different points in Canada to Vancouver in order to leave the Pacific coast about the first week in August.

Applications for space and correspondence relative to the exhibition should be addressed at once to 'Exhibition Branch, Department of Agriculture, Ottawa.'

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports, 'Exports of Domestic Produce and Manufacture.'

^a The figures for Mexico include coin and bullion.

* Figures are for the years 1903, 1904 and 1905.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

MONTSERRAT.

I.—An Ordinance to grant duties of Customs upon certain imported goods.

(No. 9, assented to 29th June, 1905.)

Be it ordained by the Governor and Legislative Council of Montserrat as follows:

1. This Ordinance may be cited as 'The Customs Tariff Ordinance, 1905.'
2. This Ordinance shall come into operation on such day as the Governor shall appoint in that behalf by proclamation.
3. In this Ordinance except where and so far as the subject matter or the context otherwise requires.

The term 'goods' includes wares, merchandise, animals, articles and things.

The term 'duty' means duty of customs; and

The term 'reputed quart' means one-sixth of an Imperial gallon.

4. (1) From and after the coming into operation of this Ordinance the sums specified in Schedule A hereto shall be paid into the treasury for the use of this presidency as duties of customs upon goods of the respective classes, kinds and descriptions mentioned in that schedule when imported into this presidency; and proportionate sums shall be so paid upon the importation into this presidency of any greater or less quantities of such goods as those mentioned in that schedule.

(2) In cases where goods, other than tobacco, cigarettes and cigars, deposited in any warehouse and on which specific duties are payable shall have so deteriorated in value as to render such goods unsaleable for the amount of the duties on the same it shall be lawful for the treasurer to have the same valued, at the expense of the importer, and there shall be charged, levied and paid on such goods, wares or merchandise an ad valorem duty according to the rate of such duty at such time chargeable and payable.

5. Subject to the provisions of this Ordinance, the following goods shall be admitted free of duty into this presidency, that is to say:—

(a) Goods, of the classes, kinds and descriptions specified in Schedule B.

(b) All samples, not of saleable value, of manufactured and other goods, and all articles intended for exhibition only, and not for sale, which the treasurer, in his discretion and subject to any rules made as hereinafter mentioned, shall allow to be imported into this presidency free of duty.

Any person who shall sell or dispose of for value any sample or article admitted free of duty under this subsection shall be liable, on summary conviction, to a penalty not exceeding one hundred pounds.

(c) Goods being the growth, produce or manufacture of, or raised in any of the Islands comprising the colony of the Leeward Islands, and goods upon which duty shall have already been paid in any presidency of the said colony, except Dominica, shall be admitted free of duty into this presidency; provided that the person importing the same shall produce to the treasurer at the time of the importation thereof, a certificate, signed by the treasurer of the island or presidency from which the same are imported, stating that the same are exempt from duty; nothing under this section contained shall be deemed to exempt any rum within the meaning of any excise law or rum duty law for the time being in force in this presidency from any liability to excise duty; and provided moreover that where the amount of duty already paid in any presidency shall be less than the amount which, but for this section, would be payable, the provisions of this section shall not extend to the difference between such amounts.

6. Before any goods which are by this Ordinance exempt from duty conditionally on their being used for a certain purpose are admitted or supplied the importer or the person to whom they are supplied shall furnish the treasurer with a certificate in the form contained in Schedule C specifying the particular purpose for which such goods have been imported.

7. Any person who, without the written permission of the treasurer first had and obtained, sells or otherwise disposes of, or uses, any goods in respect of which a certificate is required by the last preceding section, for any purpose other than that specified in the said certificate, shall on summary conviction thereof be liable to a penalty not exceeding £100 and the goods so sold, disposed of or used, shall be forfeited.

8. It shall be lawful for the governor to make rules for the guidance of the treasurer in the exercise of the powers given to him by subsection (b) of section 5 hereof.

9. Where any imported goods upon which duty has been paid into this presidency are exported from this presidency to any other presidency, except Dominica, the treasurer of this presidency may credit the treasurer of such other presidency in his books with payment of so much of the duty paid upon such goods in the presidency of Montserrat as shall be equal to the amount of duty which would have been payable upon such goods in such other presidency if the same had been first imported into such other presidency, or with any less amount.

10. Where any question arises whether any imported goods come within any of the classes, kinds and descriptions indicated in schedule B as entitled to be admitted free under this Ordinance, it shall be a condition precedent to a right of action on the part of the importer that such question shall have been referred to the Treasurer and Governor in Council and have been decided by the Governor in Council adversely to the importer.

11. The Ordinances set out in Schedule D hereto are hereby repealed.

F. H. WATKINS,
President.

Passed the Legislative Council the 6th June, 1905.

HENRY DYETT,
Clerk.

Dated at Dominica the Twenty-ninth day of June, 1905, in the Fifth year of His Majesty's Reign.

Duly published and proclaimed the 30th June, 1905.

F. H. WATKINS,
Provost Marshal.

SCHEDULE B.—*Exemptions.*

Articles for repair—articles or goods which are exported for repair or alteration and subsequently re-imported provided that notice of the intention to export such articles or goods was given to the treasurer at the time of exportation.

Animals, sucking.

Baggage, personal, of passengers, containing articles of ordinary use.
Blasting powder imported for use in the making or repairing of roads.
Bullion.

Books printed, pamphlets, newspapers, periodicals and other printed matter of a similar description.

Charts and maps.

Chemicals for agricultural purposes.

Consular articles—articles imported for the official use of the Consulate of any foreign country or place, provided a similar privilege in respect of similar articles is accorded by the Laws and Customs of such foreign country or place to His Majesty's Consulate therein.

Eggs.

Fertilizers and manures.

Fish, fresh or on ice.

Fruits and vegetables not being preserved except potatoes other than sweet potatoes.

Furniture and household effects for owners use the property of persons coming to reside for the first time in the Presidency which are imported by them for their personal use and which have been in their use for not less than one year previously to the importation thereof provided that such furniture and household effects be imported within one year after the owner has come to reside in the Presidency.

Gold in bars, plate or wire.

Goods imported in exchange for similar previously imported goods which have been exported from this Presidency within three weeks of their importation and on which duty had been paid; provided that notice of the intention to export such goods was given to the Treasurer at the time of exportation.

Ice.

Insecticides, viz.: Paris Green, and such other insecticides or fungicides as the Governor in Council may from time to time determine.

Music.

Multiple effect machinery for manufacturing sugar and plant and parts thereof and any materials required to erect, enlarge or improve a factory wherein a multiple effect is or is to be installed; provided that such materials are to form an integral part of such factory.

Naval stores for the use of the Admiralty.

Oil to be used as fuel in oil engines.

Packages, viz.: Boxes, barrels, crates and inner packages of all kinds, also packages and coverings (except butts, puncheons, hogsheads, tierces and trunks) in which goods are actually imported, if usual and proper for the purpose, and every empty package imported into this Presidency and which shall be proved to the satisfaction of the Treasurer to have been exported from this Presidency with molasses therein, or which shall be proved to the satisfaction of the Treasurer to have been received at or brought from any port or place without this Presidency in exchange for a package exported from this Presidency with molasses.

Pictures and engravings.

Plants, shrubs, and seeds for planting.

Poultry.

Public worship and education, articles especially imported for viz.: musical instruments of all kinds, lamps, bells, wine, and all other furniture and articles to be used in the celebration of Divine Worship, and all goods imported for the use or repair of Churches, Chapels, and duly certified school-houses.

Railway and tramway rolling stock and materials for permanent way.

Salt.

Shipbuilding materials and accessories of all kinds, when imported for the construction, equipment or repair of a specific vessel or boat, except rope and cordage of all kinds including wire rope.

Specimens illustrative of natural history.

Steam engines, steam pipes, boilers, boiler tubes, firebars, and ploughs. Machinery whether stationary or portable for agriculture, irrigation or mining, or machinery for the manufacture of sugar, or rum or the ginning or baling of cotton or the crushing of cotton seed or the manufacture of cotton seed oil.

All necessary parts for the repair of any of the above articles of machinery or for the communication of motive power thereto.

Provided that none of the above articles or machinery shall be free of duty when imported for sale.

Stores of every description when imported or supplied for the use of His Majesty's land or sea forces in cases where no special duty allowance is granted, military uniforms, accoutrements and equipments imported by members of the Defence Force or Reserve Force for their own use, all goods or stores imported by the Board of Health for the public use of the Board, all things imported by or supplied for the use of the Governor, and all goods or stores imported by the Government for the public uses of the Presidency. If any goods on which duty has been paid at the time of importation be subsequently supplied to or for the use of the Governor, or to or for the use of His Majesty's land or sea forces in cases where no special duty allowance is granted, the amount of duty paid upon the goods so supplied shall be repaid out of the Treasury on the warrant of the Governor.

Surgical instruments and appliances imported for his use by a Medical Practitioner in actual practice and not exceeding £100 in value, or by a licensed veterinary practitioner not exceeding £20 in value and for his own use.

Telegraph wire, telegraphic, telephonic and electrical apparatus and all appliances of all kinds for communication or illumination thereby.

Tombstones, tablets and railings for graves.

Turtle.

Workmen's tools and professional apparatus when brought by a passenger for his own use.

SCHEDULE C.

I (Name and designation of importer) do hereby certify that the articles enumerated in the entry hereto annexed have been imported (or supplied) and will be used exclusively for (specify particular purpose) and that I will not sell or otherwise dispose of or use the same for any other purpose whatever without the consent of the Treasurer.

Date.

II.—An Ordinance to impose an Export Duty upon certain articles the growth, produce and manufacture of this Presidency upon the exportation thereof.

(No. 5, assented to 17th March, 1905.)

Be it ordained by the Governor and Legislative Council of Montserrat as follows:

1. This Ordinance may be cited as 'The Export Duty Ordinance, 1905.'
2. From and after the coming into operation of this Ordinance there shall be paid into the Public Treasury of this Presidency, by the exporter or owner thereof, upon the exportation of the articles the growth, produce and manufacture of this Presidency, set forth in the Schedule to this Ordinance the duties specified in such Schedule; and at the same rate for any greater or less quantity of such articles.
3. The persons named as the shippers in the Outward Manifests required by the 'Tariff Collection Ordinance, 1893,' to be delivered to the Treasurer by the masters of vessels other than registered steamships, previous to clearance from this Presidency, or by the duly accredited agents of registered steamships, are hereby declared to be the exporters or owners of the goods alleged in such Outward Manifest to have been shipped by them, and shall be liable for the payment of any duty payable on the exportation of such goods, in the absence of proof that any other persons were the shippers of such goods.
4. All goods upon which any duty is payable on the exportation thereof which shall be shipped for exportation without due entry thereof in the Outward Manifest of the ship in which they shall have been shipped for exportation, shall be liable to forfeiture and may be seized as forfeited and the master of such ship or the registered agent of such steamship shall be liable to a penalty not exceeding one hundred pounds.
5. If any exporter or owner who shall export any of the articles by this Ordinance rendered liable to export duty shall refuse or neglect to pay the duty thereon on the exportation thereof such exporter or owner shall be liable to a penalty not exceeding twenty-five pounds in addition to the amount of such export duty.
6. If the master of any vessel receives on board thereof any articles for exportation and the exporter or owner of such articles fails to lodge with the Treasurer the specification thereof as required by the 'Tariff Collection Ordinance, 1893,' and to pay the export duty payable thereon, such master (or the registered agent of such steam vessel) shall forthwith upon the demand of the Treasurer lodge such specification and pay such export duty as aforesaid, and such master or agent as the case may be may recover from the exporter or owner of the articles the amount of the export duty so paid for the payment of which the exporter is in default. If any such master or agent fails to comply with the requirements of this section such master or agent shall be liable to a penalty not exceeding twenty-five pounds.
7. In order to ascertain the amount of duties payable on the exportation of any articles it shall be lawful for the Treasurer or other Treasury Officer to require the articles and packages in which the same are contained to be opened, weighed, measured or gauged as the case may be in the presence of a Treasury Officer at the expense of the exporter or owner before the same are shipped, and if the exporter or owner shall refuse or neglect to cause the articles to be opened, weighed, measured or gauged, as aforesaid, the duty shall be assessed by the Treasurer and the amount of duty so assessed shall be the duty payable by the exporter or owner.
8. All ships, boats or canoes made use of in putting off any goods liable to forfeiture (or which may become so liable after shipment) under this Ordinance shall be forfeited and all persons concerned in shipping putting off or landing of any such goods shall be liable to a penalty not exceeding fifty pounds.
9. All goods, ships, boats or canoes liable to forfeiture under this Ordinance shall and may be seized by the Treasurer or any Treasury Officer or any person acting under the direction of the Treasurer or by any Police Constable.

10. All things seized as forfeited under this Ordinance shall be dealt with in the same manner as if they had been seized as forfeited under the provisions of the 'Tariff Collection Ordinance, 1893.'

11. All penalties under this Ordinance shall be recoverable before a District Magistrate under the provisions of the 'Magistrates' Code of Procedure Act, 1891,' and any Act Amending the same and procedure for the recovery of any such penalty may be commenced at any time within two years after the commission of the offence by reason whereof such penalty has been incurred.

12. This Ordinance shall come into operation on such day as the Governor shall appoint in that behalf by proclamation.

F. H. WATKINS,
President.

Passed the Legislative Council the 7th March, 1905.

HENRY DYETT,
Clerk.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

JAPAN.

REPORT OF COMMERCIAL AGENT.)

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, May 11, 1906.

PHOSPHATIC MANURES.

Of not a few agricultural products the Japanese farmer raises two or more crops in the year. Root and leaf vegetables especially, fresh from the soil, are in the stalls the year around. Two enabling causes operate with this result: the mildness of the climate and the application of concreted fertilizer.

Inquiry from Canada as to the market for phosphate may be answered by the assurance that there is a wide open market here for that fertilizing mineral. The doubt will be as to the practicability of the Canadian article coming here at a price that will give it a place.

JAPAN MUST IMPORT WHOLE SUPPLY.

The aggregate of information obtainable from parties interested is to the effect that the most required of all fertilizers used in Japan is phosphate. This country does not produce rock phosphate, and must therefore look to importation wholly for supply. The demand for, or the value of the various other fertilizers in use, depends upon the units of phosphatic per centage which analysis shows in their composition. There are three or four manufacturing companies in Japan specially outfitted for the preparation of the crude mineral. There are many manufacturers of sulphuric acid, bleaching powder, soda, &c., the by-products of which are worked up into fertilizing material. People connected with these enterprises say they are prepared to increase facilities if they could be supplied with the raw materials.

GRADES IMPORTED.

The most largely imported rock phosphates are of the following grades:—

Florida hand pebble phosphates.—68.7 per cent bone phosphate of lime, 3 per cent moisture, and 4 per cent iron and aluminium.

Tennessee high-grade rock phosphates.—75 per cent bone phosphate of lime, 3 per cent moisture, and 3 per cent iron and aluminium.

Florida high-grade rock phosphate.—77 per cent bone phosphate of lime, 2 per cent moisture, and 3 per cent iron and aluminum.

So far as can be definitely ascertained, the first above specified quality is worth about \$15 gold per ton c.i.f. Japan ports—duty free.

Since the Canadian phosphate could not meet the Florida competition in Britain, there can be no object in following up inquiry here, unless there should be discoveries of the mineral on the Pacific coast.

DEMAND FOR BARLEY.

Returns from the Department of Agriculture and Commerce show that the importation of barley at Japan ports is increasing yearly, and the exportation decreasing. Ten years ago the export amounted to Yen 200,000 to Yen 300,000. More recent

years show a declining export, until last year the value was only Yen 3,000.

On the other hand the importation of barley is rapidly increasing. Within the same time the value imported advanced from about Yen 1,000,000 to a maximum of Yen 15,000,000 in 1903.

The explanation of this increase is that the Japanese people are inclined more to the use of barley for food. And it is probable that they are feeding more of it to domestic animals. The lesson for Canadian growers and exporters is that as soon as British Columbia and Alberta will have barley in quantity to export, a wide open market may be found in Japan.

THE GRAIN TRADE.

Looking to an increasing general interest in the grain trade, consequent upon the discrimination by the new tariff in favour of wheat as against flour, a number of Tokyo capitalists are reported to have matured a scheme to facilitate transactions between themselves, under the name of the Tokyo Cereals League, and the merchants both Japanese and foreign who are concerned in the importation of grain. Over two hundred and sixty Tokyo merchants, themselves interested in this grain trade, are supporting the scheme. The first general meeting for organization will take place on May 19.

THE PROPOSED INTERNATIONAL EXHIBITION.

An exhibition of this character, of course on an extensive scale, has been more or less talked of for some time. Recently the governor of Tokyo prefecture, the president of the Tokyo Chamber of Commerce, and the mayor of Tokyo, invited the principal members of the Tokio press to the Chamber of Commerce for the purpose of discussing matters relating to the proposed industrial exhibition. They submitted to the gentlemen of the press that a national industrial exhibition could not be opened earlier than five years hence. However, as it was thought desirable that the holding of an industrial exhibition should not be delayed so long, although one of international character would not be earlier practicable, the prefectural and municipal authorities had taken up the lesser enterprise. This would therefore be organized with special attention to the advantage of both Japanese and foreign business men. In connection with this movement the authorities, it is stated, were also considering the methods of attracting foreign visitors to Japan.

TEA AT YOKOHAMA.

According to the returns compiled by the Yokohama Tea Inspection Bureau, the arrivals of new tea on the Yokohama market, from the beginning of the season up to the end of April this year, compared with last year, are as follows:—

Arrivals, 1906, 150 cases; 1905, 32 cases. Sold, 1906, 3,333 lbs.; 1905, 1,200 lbs. Average price, 1906, Y54.56; 1905, Y55.00 (per 100 kin).

The Kobe tea market does not open so early—expected this season about the 7th instant.

Yokohama and Kobe share between them nine-tenths of the Japan tea export trade. And this quantity is divided between these two principal ports, as follows:—

Yokohama.....	Y6,692,941 53
Kobe.....	3,364,660 00
Other ports, aggregate.....	526,720 97

Y10,584,322 50

\$5,292,161 25

The quality this year continues to rate much higher than that of last year.

TRADE RETURNS FOR 1905.

The 'Annual Return of the Foreign Trade of the Empire of Japan,' usually issued about the third week of March, is the only detailed trade return published. Its grouping of related articles that are subject to the same rate of duty, together with some other peculiarities, make the getting of itemized information not always satisfactory. The finance department is, however, most accommodating, and the officers take great pains to afford information that may not appear clearly or at all in the annual return.

This volume is now issued for 1905, and from it the returns of trade between Canada and Japan are in part submitted, as follows:—

IMPORTS FROM CANADA.

	Value.
Butter, 28,737 lbs.	\$ 7,275
Cheese, 1,825 lbs.	447
Flour, wheaten, 2,453,352 lbs.	52,053
Salted salmon and trout, 5,563,954 lbs.	143,610
Salted salmon and trout roes, 142,930 lbs.	4,670
Whisky, 443 litre.	294
Comestibles, in cans.	2,264
Comestibles, all other not otherwise specified.	3,623
Leather, sole, 9,770 lbs.	2,575
Lead, pig, ingot and slab, 871, 761 lbs.	25,494
Paper, drawing, 20,609 lbs.	898
Paper, printing, 80,209 lbs.	3,019
Cotton duck, 12,338 yds.	4,592
Cattle, 21 head.	6,163
Dyes, colours, and paints.	1,157
Fish fertilizer, 646 tons.	16,980
Timber and lumber, 95,462 cu. ft.	25,782
Boards for decks, flooring, &c., 1,338,992 sq. ft.	31,864
Carriages, bicycles, &c., 80 (number).	1,810
Carriages, bicycles, parts thereof and accessories.	227
Soap, toilet, 5,549 lbs.	1,039
Soap, washing, 61,941 lbs.	2,288

EXPORTS FROM JAPAN TO CANADA.

Tea, green, 3,938,570 lbs.	\$449,334
Beans, peas and pulse, 192,349 lbs.	1,748
Rice, hulled, 2,802,133 lbs.	61,523
Rice, cleaned, 2,263,600 lbs.	58,886
Fish, dried and others, 52,679 lbs.	3,238
Salt, crude, 777,500 lbs.	3,499
Colle or isinglass vegetable, 4,609 lbs.	1,178
Paper, wall.	2,378
Paper, 'Japanese,' 12,234 lbs.	3,010
Paper, napkins, 10,870 lbs.	3,886
Silk, raw, 10,946 lbs.	40,373
Silk, 'habutae,' plain, 40,041 lbs.	216,357
Silk, 'kaiki,' cotton in part, 273,913 lbs.	28,719
Silk handkerchiefs, 107,708 doz.	220,450
All other silk manufactures.	9,490
Cotton crapes, 54,256 yds.	4,295
Rugs, 25,198 yds.	8,654
Table cloths, 13,013 pcs.	8,158

	Value.
All other tissues, raw materials, and manufactures thereof.	\$ 5,412
Bamboo.	1,078
Cement, 10,341,028 lbs.	47,266
Straw hats, 208 doz.	629
Silk neckties and scarfs, 1,806 doz.	2,158
Silk dressing gowns, 3,372 pcs.	10,300
All other clothing and accessories.	6,359
Camphor, 19,817 lbs.	10,243
Menthol, crystal, 360 lbs.	655
Peppermint oil, 1,274 lbs.	5,759
Potash, iodide of, 1,008 lbs.	2,512
Sulphur, 1,693,440 lbs.	10,462
All other drugs, medicines and chemicals.	9,475
Antimony, manufactures of.	6,292
Bronze, manufactures of.	1,911
All other metal manufactures.	5,113
Confectionery and sweetmeats.	314
Ground nuts, 412,177 lbs.	13,340
'Sake,' 125,584 litre.	13,511
Mineral water.	173
Mushrooms, dried, 16,478 lbs.	4,185
Pea-cheese (Soup, Japanese), 149,628 lbs.	2,449
Soy, 131,774 lbs.	6,513
Japanese oranges, 1,281,886 lbs.	19,906
Vermicelli, 20,180 lbs.	603
Comestibles in cans and bottles.	10,883
Furs, 1,389 pcs.	7,398
Lily bulbs, 103,360 pcs.	1,620
Baskets (bamboo).	3,244
Blinds (bamboo).	965
Baskets, trunks and bags, 9,483 pcs.	1,666
Other bamboo manufactures.	2,963
Books and journals.	1,957
Fans, paper and silk, 303,010 pcs.	8,252
Fishing nets, 32,770 lbs.	19,254
Furniture.	1,746
Ivory, manufactures of.	1,274
Lacquered ware.	10,110
Lanterns, Japanese, 55,054 pcs.	2,716
Mats and matting for floors, in piece, 18,539 rolls.	63,622
Porcelain and earthenware.	92,235
Screens, cotton tissues, 3,845 pcs.	4,295
Screens, silk tissues, 38 pcs.	510
Stove screens, 4,333 pcs.	1,454
Straw braids, 24,327 bundles.	3,461
Other manufactures of straw.	716
Toys.	6,826
Wood-shaving baskets and bags.	2,196
Wood-chip braids, 9,088 bundles.	2,211
Wood, manufactures of.	4,497

Total imports from Canada to Japan, 1904 and 1905, compared:—
 1904, \$418,721; 1905, \$366,011. A decrease of \$52,710.

Total exports from Japan to Canada, 1904 and 1905, compared:—
 1904, \$1,605,837; 1905, \$1,620,018. An increase of \$14,181.

ALEX. MACLEAN:

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(*Mr. W. A. MacKinnon.*)

SUN BUILDING, BRISTOL, ENG., May 31, 1906.

APPLES.

It will be noticed that early this month we had in the British markets, apples from all points of the globe; Canadian fruit was meeting at the same time the competition of Californian 'Newtowns,' and of apples from New Zealand, while a new feature of the market was the entrance of apples from Western Australia. The following quotations give a fair idea of the range of prices:—

Nonpareil Russets..	24s. to 30s. per barrel
Ben Davis..	28s. to 32s. "
Californian Newtowns..	12s. to 13s. per box
Tasmanian..	12s. to 14s. "
Australian..	12s. to 18s.

DIRECT IMPORTS OF CANADIAN CATTLE.

The ss. *Montfort*, arrived at Avonmouth on the 16th of May and discharged a consignment of 725 Canadian cattle in good condition. This was the first consignment direct to Avonmouth, and the arrival was the more interesting on that account. Previously, the vessels have discharged the larger number of cattle at Liverpool, and brought the remainder around to Bristol, but a short time ago it was decided to try the experiment of direct consignments. In the course of the afternoon sales were conducted, at which there was a good attendance of buyers, not only from Bristol and the district, but also from Newport and Cardiff. The prices realized averaged from £19 to £20 per head.

W. A. MACKINNON.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, June 2, 1906.

SHOULD STUDY NEWFOUNDLAND MARKET.

A perusal of the Customs Returns of Newfoundland for the year ended 30th June, 1905, reveals the fact that there are still several items on the list of imports, in which Canada does not figure as prominently as it should, and might do, if Canadian exporters gave a little more attention to the requirements of this market.

While it is quite true that the imports from Canada have doubled in volume during a period, in which those from Great Britain have remained about stationary and goods from the United States have fallen off 50 per cent, which is a very satisfactory position from the Canadian standpoint, there seems to be no good reason why it should not be still further improved upon, and in order to draw attention to the matter, I append a list which will show the relative position of Canada in the volume of these imports, and which seems to be worthy of some consideration.

PRICE AND QUALITY OF GOODS OFFERED.

I am given to understand that it is mainly a question of price and quality of goods offered, and that if Canadian exporters can do at least, as well as, their competitors abroad in these respects, they will have very little difficulty in still further increasing their sales in this colony.

In recent years there has been such an improvement in the means of transportation by railway and coastal steamers, as well as in direct communication with Canadian ports, that the reason why trade was so largely directed into other channels, has disappeared to a considerable extent, and at the present time every facility is given by the granting of through bills of lading by the Reid Newfoundland system to reach the most distant outposts of the colony.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., May 30, 1906.

ALUMINUM.

It may be of interest to Canadian users of aluminum if I give in a short report a few particulars which have come into my hands with regard to the manufacture of this metal.

Its manufacture by the electrolytic method was begun in America by Hall, at New Kensington in 1888, and in 1889 an identical process was in use at Neuhausen, in Switzerland, the details having been independently worked out by Heroult and Kiliani. Since 1889 the production of aluminum has increased enormously, and the annual output of the metal at the present time is estimated to be 8,000 tons as compared with 85 tons in 1889. From 10·6*d.* per pound, the price has fallen in the same period to 1·3*d.* per pound, and a still further reduction in price would be possible if a cheaper raw material than refined alumina could be used in the electrolytic baths.

NUMBER OF WORKS IN OPERATION.

Nine works are now operating either the Hall or the Heroult methods of aluminum production, and between 40,000 and 50,000 h.p. are employed in the industry. The nine works are situated as follows:—America, 3; France, 2; United Kingdom, 1; Germany, 1; Switzerland, 1; Austria, 1; and a works is in course of erection in the valley of Pescara, Italy.

The British Aluminium Co., with works at Foyers, in Scotland, and the Neuhausen Aluminium Co., which controls the production in Germany, Switzerland and Austria, have been increasing their capital and extending their plant, and a considerable increase in the output of the metal is anticipated in the near future.

INCREASING DEMAND FOR THE METAL.

The demand for the metal is growing in connection with motor-car and railway carriage work, the latest example of its use being for the inside of cars for one of the London underground tube lines. The cheaper brands are now being employed in the casting of iron and steel. The Goldschmidt 'Thermit' process for welding tramway rails, and for repairs of castings, &c., is a new use responsible for the annual consumption of many tons of aluminum in the form of powder.

PRICES OF ALUMINUM.

The price of aluminum in Europe during 1905, rose from 13·6*d.* to 22*d.* per pound, owing to a strike of the men at one of the works in France. Toward the end of the year, however, the price again declined, and the December list of the British Aluminium Co. gave 1*s.* 6*d.* (37 cents) per pound as the price of 98·96 per cent metal in small lots, and 1*s.* 4*d.* per pound for ton lots and over.

A PROBABLY IMPORTANT INVENTION.

Betts, an American inventor, during 1905, patented a process for refining aluminum by electrolysis. This depends upon the impure alloy of the light metal as anode, in a bath of molten cryolite, containing alumina in solution, while pure aluminum forms the cathode. All the materials in this bath are kept in the molten state, and the three components are maintained in their respective positions by their different specific gravities, the impure alloy being the heaviest and the pure aluminum the lightest of the constituents of the bath. Aluminum can be parted from iron, silicon, copper, and other impurities by this method, and it may possibly prove of great use in cheapening the production of the metal, since it will enable producers to use bauxite directly in the reducing baths in place of the much more costly refined alumina. By the present methods of production, using refined alumina in the reducing baths, it is improbable that any great reduction in price can occur, and, therefore, the advent of new methods of dealing with bauxite to enable it to be used in place of alumina are of considerable importance.

CONTROL OF SALES.

A matter that has also come before me is that an arrangement has been made between the British and American manufacturers whereby the United States supplies Canada with sheets, ingots, &c., but whether this applies to the manufactured article or not I cannot definitely say.

FACILITIES FOR MANUFACTURE IN CANADA.

It would strike one that with the vast water powers at the command of Canada, and the increasing demand for the metal, that she should be in a very favourable position to manufacture aluminum against any of the countries at present manufacturing.

SEWAGE DISPOSAL IN BIRMINGHAM.

On the 24th August, 1905, I forwarded a report to you on the work of the Tame and Rea Drainage Board (See Monthly Report for July, 1905, page 142) which contained a detailed statement of the disposal of sewage and the various methods adopted. The Board has since then decided to extend the bacteria beds to nearly double the present area, and it is this scientific method of sewage purification that is responsible for the gradual disappearance of the old sewage farm. My last report interested quite a number of the municipalities in Canada, and I shall be very glad should they care to follow up the matter, to give them a little more information.

VOLUME OF SEWAGE.

The Board has jurisdiction over an area of ninety square miles, the population of which approaches 900,000. The normal flow of sewage which has to be dealt with is no less than 25,000,000 gallons a day. To treat with such a large volume by the broad irrigation system, the 200,830 acres of land, which constitutes the Drainage Board's estate, would be quite inadequate, but during the past four years bacteria beds have been constructed, and at the present time one-fourth of the sewage is dealt with in this way. It has been found that the Birmingham sewage was rather deficient in bacteria, and that a larger number of organisms would accelerate the process of fermentation and liquefaction, and afterwards of oxidation and nitrification. In the sewage as it arrives at the out-fall works there are about 400,000 bacteria per cubic centimetre. It was also found that the acids from many of the city's industries were inimical to the life of the bacteria. This difficulty has been overcome, however, by increasing the capacity of the tanks at the outfall works, and now the organisms are cultivated to such an extent that the sewage at Cudworth, where the bacteria beds are situated, contains no fewer than 17,000,000 bacteria per cubic centimetre.

THE BACTERIOLOGICAL PROCESS.

In the liquifying or 'septic' tank, the main sewage undergoes a process which frees it from suspended matter, such as road grist, and of the organic and inorganic substances which go to form what is technically known as 'sludge.' This 'sludge' has been successfully converted into an inodorous composition. This transformation is almost entirely due to the work of micro-organisms, and though the process has not yet been carried to the full extent of its possibilities, yet the method is now fairly well understood. After the 'sludge' has been eliminated, the sewage is at present conveyed down the Tame valley in an eight feet diameter culvert, from which branch off numerous subsidiary carriers, and is evenly distributed over the land, where the process of disintegration is a natural one. But the land would only take a certain quantity of sewage, and a nuisance seemed imminent. Engineers and chemists, however, evolved the bacteria bed method, and one acre of bacteria beds is capable of doing as much work as from 50 to 70 acres of land, and it is this and similar striking facts which have induced the Drainage Board to pursue their present policy.

HOW A BACTERIA BED IS MADE.

The underlying principle of purifying sewage in bacteria beds is to provide, by means of stone, or other hard particles, a habitat for the aerobic (those that require free oxygen for their vitality) and nitrifying bacteria. The best method of constructing such a habitat has exercised the minds of experts for many years, and when Cameron first introduced the system, the medium was placed in a tank, and after a certain number of hours the sewage which had been passed in was allowed to flow out again into the river. Many large cities in England have that system, but it has been admitted latterly that the more scientific, as well as more economical method, where physical conditions will admit of it, is the adoption of what is called a percolating bed, or continuous filter. By this method the media which form the habitat for the bacteria are placed upon a false floor which rests on a concrete plane, and are built up to a height of about five feet. The bed is surmounted by distributing pipes, constructed in various ingenious ways, through which the sewage is sprayed over the surface of the beds. The drops percolate through the medium in about three or four minutes, and the sewage becomes changed into an innocuous liquid, which may be passed into the stream with no harmful effects.

BRITISH IRON AND STEEL OUTPUT IN 1905.

In their annual report, the Board of Management of the British Iron Trade Association state that the year 1905 has in some respects been one of the most pros-

perous that the iron industry of Great Britain has ever known. Record figures were reached in the production of both pig-iron and steel. The make of pig-iron considerably exceeded the largest output previously recorded for any one year. The output of Bessemer and open hearth steel exceeded by 855,459 tons the figures of the next greatest annual production. The output of finished iron in 1905 was somewhat under that of any previous year, 1904 excepted, so that the advance of steel has to some extent been purchased at the expense of wrought-iron. The ascertained production under the four principal heads compares as under for each of the last three years:—

	1903 Tons.	1904 Tons.	1905 Tons.
Pig-iron... ..	8,811,204	8,562,658	9,592,739
Bessemer steel... ..	1,910,018	1,781,533	2,009,712
Open hearth steel... ..	3,124,083	3,245,346	3,879,748
Totals	5,034,101	5,026,879	5,889,456
Puddled bars... ..	950,393	936,228	938,558

A RECORD ADVANCE.

So far as the British iron and steel trades were concerned, the year 1905, was better than 1904, continues the report, and it witnessed a large expansion in most other countries—so much so, that it probably shows the greatest quantitative advance of any one year in the history of the world's iron trade.

In four of the leading countries, Great Britain, the United States, Germany and Belgium, the increase of pig-iron output in 1905 over 1904 was nearly $8\frac{1}{2}$ million tons (exactly 8,436,556 tons). The United States alone added about $6\frac{1}{2}$ tons to its product, and Great Britain made the next greatest advance, so far as the figures already available show. It is expected that the total advance of output in all countries will be well over ten million tons, a figure which exceeds the make of pig-iron in any one year up to 1870. The same remark applies to the output of steel, which has in 1905 made even greater advances than the output of pig-iron. In the four principal countries referred to above the make of Bessemer and open-hearth steel in 1905 was about $37\frac{1}{2}$ million tons and this is an advance of nearly nine million tons on the output of the previous year. As nearly as can be at present estimated, in 1905 the world's make of pig-iron has been about 56,000,000 tons, and the world's make of steel about 46,000,000 tons.

IRON ORE RESOURCES.

In view of the output of iron and steel for 1905, it is natural that interest should be taken in the available supplies of the raw material. The report of the British Iron Trade Association points out that the increased output of pig-iron in 1905, would demand at least an additional 30,000,000 tons of iron ore, and a corresponding increase in the consumption of speigeleisen, ferro-manganese, &c. The United States has provided for considerably more than one-half of the total increase in ore consumption. In 1905 Great Britain had consumed fully two million tons of ore more than in the previous year, of which 1,250,000 tons were imported and the remainder was raised at home. Spain seems to be the principal source of supply, and Sweden appears to be the next.

CANADA'S RESOURCES.

In view of the enormous opening up of new territory in Canada, I think it might be well if the attention of the world was drawn to the iron ores of Canada. There is every indication that the demand will increase from year to year, and Canadians would do well to pay special attention to this matter.

P. B. BALL.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar Tripp.)

PORT OF SPAIN,

TRINIDAD, May 7, 1906.

MARKET FOR CANADIAN CEMENT.

I notice that there are several cement manufacturers in Canada, but I cannot find that the proprietors have tried this market. A large quantity is used here. The imports for 1904-05 were 74,765 barrels, value £29,163, of which 51,820 barrels came from the United Kingdom, 15,851 from Germany and 5,836 from the United States.

CONDENSED MILK.

Some time ago I drew attention to the absence of Canadian brands of condensed milk. This deficiency is being remedied quickly. Two years ago there was not a tin imported. Last year the value was £826, but as the total consumption is about £25,000 in value, there is still room for more Canadian.

FURNITURE.

In conversation with one of the largest dealers in furniture, I learned that the reason Canada fails to secure a larger share of this trade is, to put it in his own words, because the freight from the inland towns kills it. Quality and price at place of manufacture are all right, but the charges are excessive, being higher than say, from Chicago.

SHOULD QUOTE C.I.F.

Formerly quotations for furniture both English and American were f.o.b., but in both cases the custom of the trade now is to quote c.i.f. Thus the importer knows exactly what his goods will cost him landed. Canadian quotations remain f.o.b., and the trade is handicapped accordingly. There is an excellent market here for Canadian furniture if suitable arrangements for through freight can be made, and c.i.f. quotations are made.

JEWELRY.

Canadian jewelry is being introduced. The Souvenir jewelry is pronounced better than any other that comes here, the designs being chaste and the workmanship excellent. A larger trade in ordinary silver goods would be done, but the purchasers are not satisfied in the word 'Sterling.' The Hall Mark Lion is always looked for and people will not accept anything not so stamped as genuine.

EDGAR TRIPP.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA,
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, May 14, 1906.

TREATMENT OF IRON ORE—CONTINUOUS PROCESS.

Melbourne inventors have for some time been experimenting with an improved process for the treatment of iron ore, and results achieved are claimed to have been so successful from an economical and practical standpoint, as to influence capitalists to take hold of the enterprise and exploit it throughout the world. I recently attended a trial of this new process—which is called the Heskett-Moore patent—at the works of the inventors in Melbourne, where operations were in full force for the treatment of ferruginous ore for the manufacture of iron and steel by a direct and continuous method of manipulation. A number of experts present expressed the opinion that the trial was most satisfactory, and as a consequence were emphatic in predicting a revolution in the recognized methods of iron and steel manufacture throughout the world.

HESKETT-MOORE IRON ORE PROCESS.

The Heskett-Moore process is a method for directly converting iron ore into malleable iron or steel by a continuous system, and it is claimed, effects a saving of 25 per cent in the manufacture. The ore is simply concentrated by ordinary methods, or if it is magnetic it is separated electrically until the pure oxide of iron is obtained. The oxide of iron is passed through a revolving cylinder heated by waste gases from subsequent operations, and brought in that cylinder to a dull red heat. It drops from the cylinder to a second similar cylinder, and in the latter it is brought into contact with the deoxidising gas, which is forced through, and brought into contact with the heated ore. The heated ore is thus converted into a pure iron. Accompanied by, and protected by, the deoxidising gas, it is passed into a third chamber, or melting hearth, where it falls into a bath of molten iron, and is converted directly into steel, or balled up as malleable iron. Briefly, the savings claimed for the process are those of time, labour—the whole process being automatic—fuel and avoidance of flux. The inventors claim that they have discovered a direct method of producing steel from one operation, instead of using the blast furnace and converter.

COST OF HASKETT-MOORE PROCESS.

The inventors state that the cost of erecting a large smelting plant on the Heskett-Moore system would be less than one-fourth of the cost of a smelting plant on the existing methods to produce the same quantity of metal. Any iron ore can be treated by this process, but the immense deposits of iron sand in New Zealand—in consequence of its natural fineness—is particularly adapted for this new treatment.

PATENT RIGHTS—HASKETT-MOORE PROCESS.

Patent rights for this process have been applied for throughout the world, and in some instances have already been secured. The Department of Trade and Commerce, Ottawa, will have available after July 10th, a detailed description—and blue

print drawings—of the Heskett-Moore process, which I purpose forwarding by the next mail. A number of copies of these specifications will thus be made available to Canadian ironmasters who may be disposed to investigate the great advantages claimed for this new method of ore treatment. It is the intention of the inventors to dispose of their foreign and over-sea patent rights, retaining only Australia and New Zealand as a field for their own enterprise.

AUSTRALIAN DEMAND FOR GLACE KID.

Australian shoe manufacturers find it difficult to obtain reliable supplies of glazed kid suitable for their requirements. Some shipments of Canadian dressed skins sent to Melbourne proved unsatisfactory in value, although recent orders have been placed for other makes, the result of which can only be ascertained when the goods come forward. Melbourne is the chief manufacturing centre for shoes in Australia and the value of the market to be exploited will be apparent when it is estimated that the state of Victoria alone imports glaze kid to the value of about £140,000 per annum.

AUSTRALIAN TANNAGE OF GLACE KID.

With a net protective duty of 16½ per cent in their favour, a start has been made by Melbourne tanners in placing locally made glaze kid upon the market. That a fair measure of success has already been achieved is evidenced by the fact that the present output is in the vicinity of 300 dozen skins per week and the demand cannot be overtaken. Climatic conditions in Australia are of such a nature as to make glaze kid the most popular of leathers owing to its lightness, durability and appearance. The supplies of goat skins are obtained from India.

AUSTRALIAN SHIPPING FACILITIES FOR THE FAR EAST.

There are now four lines of steamers—giving a weekly service—from the principal Australian ports to China and Japan, and almost as regular departures for the Philippines. The rate of freight quoted by these steamers on flour is 16/6 (\$4.01) per ton, but the companies give a rebate of 1/6 (36 cents) per ton—making a net freight rate of 15/ (\$3.65) per ton—to all shippers making use of occasional tramp steamers, which take cargo at exceptionally low rates.

VICTORIAN COMMERCIAL AGENTS IN THE EAST.

The state government of Victoria recently decided not to appoint a commercial agent for South Africa. The government, however, appointed two commercial agents; one covering the Philippines, Japan, Hong Kong and northwards to Vladivostok, and the other for Singapore, Sumatra, Java, Borneo, Saigon, Malay Peninsula, Rangoon and Calcutta. The agents have sailed for the territories named taking samples of the principal lines of Victorian produce and goods suitable for the far East.

AUSTRALIAN TRADE AGENTS FOR BRITISH MANUFACTURERS.

For several months Mr. R. J. Jaffray, the special representative of the British Board of Trade, has been inquiring into matters affecting trade between the United Kingdom, the Commonwealth and New Zealand. Very early in his investigations he came to the conclusion that British manufacturers were not getting all the orders they ought to receive in Australia, because there were no special agents on the spot to look after their interests. Mr. Jaffray learnt that the consuls for foreign countries resident in Australian states practically act as trade agents for the manufacturers of these countries, because they write from time to time the fullest information about Australian requirements to manufacturers in their respective countries who apply for such particulars. In view of this, Mr. Jaffray suggested to the Board of Trade

that a trade agent, competent to advise British manufacturers, should be appointed in each of the six states, and also in New Zealand, to look after British interests. Advices which have reached the federal authorities indicate that Mr. Jaffray has been authorized to make these appointments, and it is anticipated that he will do so at an early date. It is Mr. Jaffray's intention to return to England via Vancouver.

EXTENSIVE SHIPMENTS OF GOLD TO VANCOUVER.

Shipments of Australian gold to the United States promise to be upon a much larger scale this year than usual. The last outward San Francisco steamer took £310,000—the first shipment of the kind for 18 months. The Vancouver steamer leaving Sydney to-day will take from one bank over £400,000, probably all of which is to meet a portion of the losses of British insurance offices at San Francisco. In this way Australian banks will be relieved of a large amount of bullion, which has been accumulating for a considerable time.

AUSTRALIAN MARKET FOR WIRE NAILS.

Australian importers have been interested in the result of the recent conference between United States and German makers of wire nails by which an advance has been made of 5/ (\$1.21) per ton on shipments to Australian ports. New York export quotations on March 24th last, were \$1.89 basis, less 2 per cent, per case or keg of 112 lbs. in carload lots and for New Zealand \$1.70 basis, less usual 2 per cent, with 6 cents extra per cwt. for cases. The New Zealand buyer has 19 cents, per 112 lbs. less to pay than the Australian buyer, which is explained by the fact that United States makers are thus meeting the New Zealand tariff preference in favour of Canadian nails, which, for a time, were being exported in large quantities to that colony. The Commonwealth customs duty on wire nails is \$14.60 per ton of 2,240 lbs. The Victorian local consumption is mainly supplied by Melbourne manufactured nails in which a fair export business to other states is also done.

AUSTRALIAN BUTTER EXPORTS.

The total shipments of Australian butter to England since July 1st, 1905 to date, compare with those of the corresponding period of the two previous seasons as follows:

1903-04.	19,019 tons.
1904-05.	22,221 "
1905-06.	24,912 "

Of the total exports this season Victoria has contributed 12,901 tons—more than half of the total—which proves the great development of the dairying industry in this state. The figures given do not include the shipments to South Africa, Philippines, Java and other over-sea destinations.

THE AUSTRALIAN CUSTOMS TARIFF.

The chairman of the Royal Commission, engaged for many months past in taking evidence with a view of rectifying anomalies in the Commonwealth customs tariff, has intimated that the reports will be ready for presentation at the opening of parliament early in June. It then remains with the ministry and with parliament to give effect to the recommendations of the commission. It is understood that the reports are unanimous and—so far as the work of the commission is concerned—there seems to be no reason why all tariff anomalies and grievances should not be dealt with during the approaching session—the last of the present parliament.

The result of the Federal elections, which must take place before the end of this year, will however, have a most important bearing upon any change in the present customs tariff.

AUSTRALIAN TRADE CONDITIONS.

During the last few days, splendid rains have fallen throughout Victoria, South Australia and in portions of the other states. It is now considered that a good supply of winter feed is assured and the agricultural outlook is most encouraging. In all the state the receipts from the customs revenue are expanding and the returns from the railways during 1905-06 promise to constitute a record. High prices are being realized for all produce and the mining industries are receiving substantial benefit from the rates ruling for zinc, lead and silver. The Commonwealth trade returns show that both the exports and imports—especially the latter—have considerably increased over the similar period of last year. Forward ordering is being maintained with a degree of freedom which reflects the confidence of importers in the future.

CANADIAN TRADE NOTES.

By recent Vancouver steamers quite a number of Melbourne business men have gone to Canada with a view of opening up business connections with manufacturers. The indenting season for special requirements of this market for the next summer's trade has practically closed—it is now between seasons—but fair orders are going forward from Melbourne, by this mail, for Canadian buggies, roll top desks, type-writer desks, secretaries, chairs, sanitary woodware, blacking, and—from other centres—pianos and organs. If capable Australian agents for Canadian manufacturers are well supported by their principals there should soon be a marked increase in the variety and value of the exports from the Dominion to this part of the world.

D. H. ROSS.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE EXCHANGE, SYDNEY, AUSTRALIA, May 8, 1906.

DIFFICULTIES IN DEVELOPING CANADIAN-AUSTRALIAN TRADE.

I have this day received a letter from one of the most active promoters in the introduction of Canadian goods into this market, of which the following sentences are the important parts:—

‘I beg to intimate to you that I have determined to relinquish importing Canadian goods.

There is no need for me to recapitulate reasons which have led to this course as some of them are as well known to you as to myself.’

The reasons which have led him to come to this conclusion may be summarized in five items which I give from his statements, as they illustrate some of the difficulties that lie in the development of the Canadian export trade with Australia. The gentleman went to Canada and made arrangements with a number of manufacturers to represent them, with the results as itemized below:—

(a) He took up a line of goods which were prejudiced in this market through the introduction of a quantity which were defective by a New York firm which had purchased them as defective. By persistence he succeeded in introducing them in all the states and in New Zealand, though hampered by the inability to get a full line

of the goods. The Canadian business is owned abroad and the foreign owners are represented here by a large house, which has now demanded that the whole of the production of the company, Canadian and otherwise, shall be put into its hands. It had sufficient influence to have this done and the agent of the Canadian factory has received notice that his agency will cease. This deprives him of a considerable revenue, the result of some seven or eight years application. The Canadian manager regrets the change and has treated the agent honourably by giving him some compensation.

(b) A line of goods which he introduced to some extent were defective in construction and in the methods of shipment. He suggested the changes and the changes were made, but unfortunately the Canadian house transferred the agency to another firm with the result that it has never received an order since for its goods from Australia.

(c) He has sold the goods of two manufacturers to a limited extent, but has never been able to secure a price for these goods delivered f.o.b. New York, though he has occasionally received the rates of freight prevailing from the Canadian factory to New York. This did not cover the requirements and he was never able to quote these goods satisfactorily to wholesale houses and thus get them to try them.

(d) He had arranged with several firms for whom he made inquiries, obtained information and the correspondence seemed to indicate that the Canadian manufacturers were going to use efforts to push their business here. In one case, after he had done this he received a reply that the home orders were increasing and the firm had concluded not to attempt an export business just yet. In a second case he received information that they were unable to go any further, as they had been negotiating for some time with another firm in Australia and could do nothing until a conclusion had been reached in such negotiations. In both of these cases the firms were branches in Canada, but owned abroad and the possibility is that the branches had been stopped in their proposition to do an export trade from Canada. In the case of two others the correspondence suddenly ceased without a word of explanation.

(e) These disappointments, together with slowness in filling orders and in replying to correspondence are the reasons which he has given for abandoning Canadian trade.

COMMENTS.

In the case of (a) it is possible that it might not affect the Canadian export trade. The fact of having a full line places the new agents in a better position to do business than before, provided that the manufacture of a portion of the lines is not removed from Canada, but in the case of (a) and (b) the disappointment of doing business with factories owned outside of Canada makes it additionally difficult to get agents here to take up Canadian business, for unfortunately this is not the only instance in which negotiations for such business has been suddenly frustrated, after the Australian house had made some sacrifice in order to take up the lines in lieu of others that they had handled.

In the other cases it would seem as if Canadian manufacturers had not seriously considered the question of export trade, but are ready for the moment to listen to a proposition which they forget immediately afterwards or, where they carry out an arrangement, it is done in such an imperfect way as to prevent the success of the effort, to the detriment of Canadian business reputation. No one can complain if Canadian manufacturers, pressed by home orders, should refuse to entertain a proposition to do a trade in this country, but when such a proposition is made they should give it careful consideration and determine whether they are willing to comply with the conditions in respecting to securing information and supplying it, as to freight, packing, shipment, as well as price of goods and to supply orders with reasonable promptness if secured, before they give agents to understand that they will take up the business. A commission agent obtains his living as the result of trade done. When a manufacturer gives him to understand that he will give him his agency the

commission man ceases any effort to secure similar lines from another manufacturer. The failure of the Canadian agreement therefor entails upon him the loss of months of time and perhaps has prevented him from securing the agency of another house that would have been financially successful. It is quite easy to understand, therefore, why the agent or firm in good standing in business circles here now hesitates to touch Canadian lines.

My recent visit to a number of manufacturing centres of Canada shows that there could be a considerable surplus of goods made for export, provided that there were economical arrangements made for selling them in this market. The factories as a rule either have not sufficient surplus to warrant them in doing a trade on their own account or else are not financially able to do so, but could supply goods direct to a company which would buy them and handle them in this market. There is a company which is doing something in this direction in New Zealand, comparatively less in southern Australia, but it has only made a feeble effort as yet in this state and in Queensland, where more than half of the Canadian goods are sold. Why this is so I am unable to state, but at all events the conditions which would extend the Canadian trade here, keep Canadian factories in fuller work and working men in steadier employment, have not as yet been fulfilled.

J. S. LARKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

MANCHESTER, ENG., June 2, 1906.

STOCK OF PROVISIONS AT LIVERPOOL.

Estimate of the stock of provisions, &c., in the port of Liverpool, on May 31, 1906, together with the figures at the corresponding date last year, and also of last month:—

	31st May, 1906.	30th April, 1906.	31st May, 1905.
Bacon Boxes	16,369	20,789	14,328
Hams "	3,164	4,747	8,228
Shoulders "	841	2,041	6,431

Lardine and compound . . . "	276	172	344

MEXICO.

REPORT OF COMMERCIAL AGENT.

(Mr. A. W. Donly.)

APARTADO, 2029,

MEXICO CITY, MEX., June 5, 1906.

MEXICO'S FOREIGN TRADE.

The bulletin of the bureau of statistics of the Department of Finance, just recently issued, shows the following result as to Mexico's foreign trade for the first half of the fiscal year 1905-06, ending December 31 last. The figures given are in Canadian currency. They are subject to revision by the federal statistical department.

IMPORTS.

Classification.	Comparison with same period.	
	1905-06.	1904-05.
Animal substances.	\$ 3,943,142	\$ *403,780
Vegetable substances.	7,081,876	*26,467
Mineral substances.	13,910,064	*1,072,180
Dry goods.	5,269,084	†1,024,202
Chemicals, drugs, &c.	1,747,495	*139,323
Beverages.	1,746,440	*117,900
Paper and its products.	1,345,095	†67,023
Machinery and apparatus.	4,696,155	†1,373,305
Vehicles.	857,252	†268,200
Arms and explosives.	1,002,380	†395,623
Miscellaneous.	1,799,074	*471,328
Total.	\$43,398,057	†\$1,794,750

The noted decrease in the importation of dry goods, paper, machinery, vehicles and arms and explosives is chiefly due to an increased tariff thereon for the protection of the product of the home market in this class of articles. Mexico is daily progressing as a manufacturing country and especially is this true in respect of cotton goods and certain lines of machinery. The decrease in the total of imports is in no way an indication of reduced purchasing power; on the contrary the country has never before been in such a flourishing condition as at present.

EXPORTS.

As proof of the closing words of the foregoing paragraph one has only to look at the statement of exports for the same period and the comparison with the same period of the year 1904-05.

Mineral products.	\$47,613,550	Increase	\$16,486,364
Vegetable products.	14,681,789	"	2,082,565
Animal products.	2,803,949	"	387,803
Manufactured products.	657,593	Decrease	742,735
Miscellaneous.	175,368	Increase	22,812
Total.	65,932,249	Increase	18,236,809

* Increase.

† Decrease.

The result of these statements shows Mexico's foreign trade, for the first half of the fiscal year 1905-06, to have reached the sum of \$109,330,306, or an increase of \$16,442,059 over the corresponding period of the previous year.

Of the articles exported by Mexico those of most interest to the Canadian importer are herewith given:—

Coffee.. . . .	\$1,368,089
Rubber.. . . .	248,167
Chicle gum.. . . .	222,270
Fresh fruits.. . . .	98,019
Henequen or Sisal.. . . .	7,733,718
Ixtle (Tampico fibre).. . . .	977,445
Woods.. . . .	489,018
Dye woods.. . . .	94,750
Zacaton (rice root).. . . .	506,378
Tobacco, in leaf.. . . .	253,628
Vanilla.. . . .	1,158,728
Raw hides.. . . .	1,753,083
Sugar.. . . .	130,196

EXPORTS OF SUGAR.

During the last three fiscal years, according to the Finance Department, the production and exportation of sugar has been greatly increased.

In the fiscal year 1904-05 about 137,500 tons of sugar were produced in the Republic. The exportations for the three years were:—

1902-03.. . . .	8,003 tons.
1903-04.. . . .	16,303 “
1904-05.. . . .	37,701 “

The greater part of the sugar exported goes to England, though the United States takes a small amount.

FREIGHT SHIPMENTS VIA THE BORDER.

To show the immense quantity of freight entering Mexico across the Rio Grande alone. I quote from a recently published statement which goes back five years:—

Years.	No. of Cars.	No. of Tons.
1900-01.. . . .	38,629	535,640
1901-02.. . . .	37,307	517,749
1902-03.. . . .	37,379	704,958
1903-04.. . . .	42,568	890,704
1904-05.. . . .	39,644	904,448
Total.. . . .	195,527	3,553,499

This, naturally, represents, almost entirely, importations of American merchandise though some shipments from Europe come via Galveston in bond. On the other hand very large quantities of both American and European goods come direct to the Gulf and Pacific ports and are not included in this statement.

RAILROAD EXTENSION.

The extending of the railway mileage is steadily going forward. The total kilometers built, up to December 31st, 1903, were 16,113. During 1904, there were constructed 408 kilometers and last year 411 kilometers. With the amount of construction work now going on and new concessions recently granted, the year 1906 promises to

surpass any previous year in the history of railroad construction in the Republic. The Mexican Central expects to finish its Pacific extension to Manzanillo within the next fourteen months and very soon to begin construction on their short line from this city to Tampico. The National will probably, in the near future, extend the Hidalgo and Northwestern, recently acquired, to reach the port of Tuxpam on the Gulf of Mexico and also will, in the very near future, begin the broadening of the gauge of the Interoceanic from this city to Vera Cruz.

The Southern Pacific is building a line from Guaymas, Sonora, the present terminus of the Sonora R. R., to Guadalajara in the state of Jalisco. The road will parallel the coast as far as Mazatlan, the principal Pacific port of Mexico, and then run in a south-easterly direction to its objective point, which is the largest city in the Republic with the exception of the capital. At present track is laid to a point south of the Yaqui river. A very large force is being employed in its construction and the magnitude of the undertaking considered, it will only be a short time until the whole road is completed.

TEHUANTEPEC NATIONAL R. R.

On January first next it is the intention to open this line to transcontinental traffic. By that date the port works at both Coatzacoalcos and Salina Cruz will be sufficiently advanced to handle freight expeditiously and at a very low rate and it is expected that large quantities, that at present are handled via Panama, will be diverted to this route which means a saving of about 2,000 miles in distance and a consequent considerable saving in time. No expense is being spared to make this, in every particular, a desirable route and several lines of steamers are already changing their sailings in order to have all their boats touch regularly at these ports. The road will be double tracked, which will greatly facilitate the quick handling of shipments.

A. W. DONLY.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, June 1, 1906.

GRUBBEGD No. 4.

CALCIUM CARBIDE FACTORY.

'Kragero' Fosse Company (a stock company) has in conjunction with the Timber Merchants Association, regulated the Kragero watercourse and has built a dam at Dalsfos. The company has now sold its property to Norsk Elektro-kemisk Company, Limited. This company, which has a share capital of about 160,000 dollars, partly Norwegian and partly German, will build an electric power station at Dalsfos for about 5,000 horse-power. This power will be transmitted to Kragero, where the town council has sold to the company very cheaply the necessary building site. The company shall sell to the town upwards of 400 horse-power. The balance will be used in a calcium carbide factory, which is to be built. Later on the company will probably build dams at the two other waterfalls, Treitereid and Solumfos, when it will dispose of altogether some 10,000 horse-power, and may there start a factory for the production of nitrate.

NEW NORWEGIAN INVENTION.

Mr. John Kuhr, an engineer, at Christiansand, Norway, is reported to have invented a material which is found in a mineral, that heretofore has been considered of no value. The material can easily be extracted from the mineral and a solution of it prevents all kinds of cloth, paper or similar material from burning with a flame; it only glows. The solution, which is clear as water, does not hurt the cloth or change its colour. Curtains for instance, that are impregnated with this solution keep their looks unchanged and may be ironed as usual. The mineral itself, which is of a reddish-brown colour, is found in quite large quantities. The stuff extracted therefrom is easily soluble in water and may be prepared for use by anybody. It comes cheap and does not contain poison.

TRADE OF ICELAND.

During the year 1904, there was imported to Iceland from—

	Goods to the value of
Denmark	\$1,937,000
Great Britain.. . . .	808,700
Norway and Sweden	282,100
Other countries.. . . .	99,600

Of this I mention the following articles as being of interest to Canadian manufacturers and exporters:—

	Value.
Rye.... .	\$ 72,000
Rye-flour.....	106,700
Barley.... .	53,300
Wheat-flour.... .	50,100
Other flour.... .	37,300
Bread and biscuits.....	43,200
Butter and margarine.... .	28,800
Tobacco and cigars.... .	116,200
Brandies, wine and beer.. . . .	132,000
Cotton and linen goods.... .	74,900
Woollen goods and cloth.... .	75,200
Other woven goods.. . . .	144,000
Ready-made clothing.. . . .	102,700
Hardware and machinery.. . . .	158,400
Timber, planks and boards.... .	193,900
Galvanized iron sheets.... .	45,300
Leather and hides.... .	21,600
Soap.... .	26,100

EXPORTS OF ICELAND.

The total exports of Iceland have during the years 1901-1904 amounted in value to:—

1901, \$2,246,300; 1902, \$2,453,300; 1903, \$3,011,200; 1904, \$2,823,400.

The reason of the smaller export in 1904, is to be found in the poor year, which the fisheries then had.

STEAMSHIP ROUTES TO ICELAND.

The transportation between Iceland and other countries is attended to by Det Forenede Dampskibsselskab and Thore Dampskibsselskab, both of Copenhagen. The

former company also have large direct steamers running between New York and Copenhagen, so goods may be sent from New York to Iceland with the same steamship route, without having to go through several companies.

HARVEST PROSPECTS IN NORWAY.

It is very exceptional to get so much rain during the spring weeks in the eastern parts of Norway as this year; the rain has actually hindered to a great extent the preparation of the land and the seeding. But the winter crops, hay fields and pasture lands have benefited greatly and give a splendid promise. With favourable weather hereafter an excellent crop is insured.

C. E. SONTUM.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(Mr. G. Eustace Burke.)

KINGSTON, JAMAICA, May 31, 1906.

BANANAS.

Notwithstanding the local high prices of bananas, namely £12.10.0 per 100 bunches, as a result of the lively spring demand in the United States markets, both the Canada-Jamaica service and the Pickford and Black steamers have been taking large quantities for Halifax, &c., and shipments could be considerably enhanced if the ten days voyage thence could be reduced.

THE STANDARDIZATION OF JAMAICA RUM.

In view of recent shipments of Jamaica rum to the Dominion, and the evident interest the Canadian press has been taking in the prosecution in England and Scotland at the instance of the Jamaica commissioner in *re* the fraudulent selling of rum as Jamaica rum, it will be of interest to learn that at a recent meeting of the Jamaica Privy Council, that body has refused to prescribe a standard quantity of ethers for rum manufactured in the colony. It is contended that any law to standardize Jamaica rum would be unfortunate, inasmuch as the percentage of ethers of really genuine rum manufactured in different producing centres of the island differs considerably, and what is true of Jamaica is also true in the case of Demerara rum, for a recent official gazette published in British Guiana variations in contents of ethers in that colony's rums range from 30.1 to 122.7. Of course even the lowest percentage of genuine manufactured Jamaica rums ranges much higher.

ENAMEL WARE.

A decided demand is now in evidence for the above species of hollow ware of all kinds appertaining to domestic usages, and it has occurred to me that Canadian manufacturers should make a bid for a share of the growing trade.

TRANSPORTATION TO ST. JOHN, N.B.

The Canada-Jamaica Company has put on a monthly service to St. John, and it is to be hoped that freight encouragement will be such as to warrant increased facilities.

THE STARCH INDUSTRY.

It will no doubt interest calico printers and those otherwise engaged in commercial pursuits needing the use of starches to learn, that the Longville factory is now turning out excellent starch products and at prices to compete with other economic producing centres.

BUTTER AND CHEESE.

In supplementing my remarks of the 19th April, on the above subject, I would add, that I have reasons to believe that a serious attempt is being made to successfully introduce the above products in large quantities from Montreal and New Brunswick too. Up to this, imports have been principally confined from Halifax, but with increased transportation facilities and a disposition on the part of exporters of Upper Canada to meet the requirements of the trade as to shipping package and degree of saltiness required, the outlook bids fair for a development of the trade from such quarters. Colour also is a point that should not be neglected to meet the wishes of traders.

In connection, however, with this development, exporters, I understand, claim that they suffer a decided drawback in not being able to ship in any one consignment less than 5,000 pounds of butter during the summer months, as there is no car transportation to afford the accommodation for refrigerating a less quantity.

This it must be admitted is a decided drawback, for no importer in risking the development is going to import (in first venture at least) any such quantities. The course of development as in all other cases must be gradual. If practicable, this difficulty in developing the trade during the periods referred to should be remedied.

HOG PRODUCTS.

I have to report that all lines in the above are ruling high both of United States and English manufacture. Of course in the case of the countries referred to, the 'raw' material must also have advanced in Canada. But at least in hams and bacon varieties I cannot again too strongly emphasize my convictions that the Canadian product ought to hold its own against all comers.

It would hardly be convenient to give names and addresses, but I am credibly informed that large quantities of hams and bacon find sale in this island as 'English' products from well known English exporting provision houses, when as a fact, the sources of origin are well known to be Montreal and Toronto packers, the respective goods being merely canvassed and re-labelled in England for shipment hence.

There is no doubt in my mind that even at a slightly enhanced price Canadian cured small sized hams, 7 to 12 pounds, and breakfast bacon slips, as also Wiltshire cut lean bacon (all bagged) could replace the United States article, of which the brand of Ferris & Co. enjoys an enviable demand.

G. EUSTACE BURKE.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, May 30, 1906.

EFFECTS OF NEW TARIFF UPON IMPORTS.

That the months of June, July, August and September are likely to show much activity in some lines of importation seems to be conceded, notwithstanding the common complaint that trade is dull almost to the extreme degree. Such organs of

public opinion as discuss trade matters intelligently, lean to the view that the increase of the tariff upon imports, that is to go into operation on the 1st of October, offers sufficient inducement to those who can command the means, to purchase largely. Those who are able to take their chance of this advantage are probably in the minority. The knowledge that the majority of miscellaneous traders will not be in a position, because of the dull prospect and restricted credit, to share this opportunity, doubtless forms to some extent the basis of their confidence. Stocks in many if not most lines are in excess of business demands, while the complaint of tightness in money is general. Under these circumstances those who further stock-up for the profit which the tariff increase will afford, will doubtless do so because, first they are in trade and must keep moving, and second, because they have the money and can safely use it in that way.

A commission merchant from Canada, who has been inquiring into the trade outlook in Japan and China ports for four months past, remarked before leaving for home that the present condition of the flour market, excepting at Yokohama, would almost offer a profitable adventure in shipping flour back from the Orient to American ports. This, however, was 'the result of overstocking,' and he thought would 'right itself should tariff increases cease to disturb the market.'

The tariff increase 'promulgated' at the beginning of last year to take effect six months thereafter, or on the 1st July a year ago, together with the prospective continuance of the war, led to heavy importation of flour amongst other things. The tariff taking effect and the war closing practically at the same time, left these heavy importations largely in stock, unduly cumbering the market for months thereafter.

Now, there is another tariff increase running its 'promulgated' term of six months, to come into effect on the 1st of October next. These recent tariff advances as affecting flour are as follows:—

Flour per 100 kin. (133 pounds).

Former tariff, gold....	22 $\frac{3}{4}$ cents.
New tariff, 1st July last, gold..	59 $\frac{3}{4}$ "
New tariff 1st October next, gold..	72 $\frac{1}{2}$ "

The law under which tariff changes are given six months' notice in advance is doubtless not without good cause, but when it is put into operation it becomes a powerful trade disturber.

The latest tariff enactment is variously criticised; but a protective intention is denied. That the protectionist spirit is abroad to some extent, and is encountered sometimes, is unmistakable; but the interpretation that attributes to the tariff a protectionist purpose would seem not to have given due weight to the incidental effect of high revenue duties upon imports.

JAPANESE BUSINESS ENTERPRISE.

The readiness with which the accruing wealth of Japan flows into industrial and commercial enterprises is remarkable, considering that by the distribution per capita the Japanese would appear to be poor people. According to returns, the total number of business companies or joint stock corporations on record at the end of 1904 was 8,913, with an aggregate capital of 1,262,000,000 yen, of which 86 per cent was paid up. The reserves totalled 199,000,000 yen, or 21 per cent of the paid up capital.

Compared with the statistics for 1897, the number of companies shows an increase of 2,800, the amount of subscribed capital an increase of 409,700,000 yen, the paid up capital an increase of 398,700,000 yen, and reserves increased by 136,700,000 yen. The most marked increase is that of paid up capital; but successful and safe investment is signified by the extraordinary enlargement actually and relatively of the reserves, having more than doubled during the eight years in question.

Classified according to the field of operation the returns are as follows:—

Agricultural.

	1904	1897
Number of companies	238	148
	Yen	Yen
Total capital.. . . .	210,500,000	165,300,000
Amount paid up.. . . .	3,220,000	2,220,000
Reserve.. . . .	170,000	80,000

Manufacturing.

	1904	1897
Number of companies.. . . .	2,384	1,881
	Yen	Yen
Total capital.. . . .	644,030,000	417,270,000
Amount paid up.. . . .	162,830,000	105,380,000
Reserve.. . . .	27,870,000	7,580,000

Commercial.

	1904	1897
Number of companies.. . . .	5,609	3,630
	Yen	Yen
Total capital.. . . .	644,030,000	417,270,000
Amount paid up.. . . .	454,800,000	60,220,000
Reserve.. . . .	143,070,000	48,280,000

Land and Marine Transportation.

	1904	1897
Number of companies.. . . .	682	454
	Yen	Yen
Total capital.. . . .	403,670,000	266,970,000
Amount paid up.. . . .	309,410,000	164,680,000
Reserve.. . . .	28,110,000	6,550,000

EXCEPTING BRITISH COLUMBIA SALTED SALMON.

The scope for Japanese fishermen, extensive before, has been vastly enlarged since the war, and they are reported to be losing no time entering upon the new areas of enterprise. The Department of Agriculture and Commerce is said to be formulating regulations, applicable to Korea through the residency general, and to Saghalien directly by the department. Excepting in the matter of British Columbia salted salmon, there is no reason to doubt that the Japanese fisheries will continue to supply the Japanese fish market completely.

THE NEW TARIFF AND IMPORTS.

The Japanese press draw attention to the importation of merchandise in a speculative way, upon the expectation of realizing profitably when the new tariff comes into force.

There are large stocks already on hand, in most lines. Flour especially is loaded up to the rafters in the warehouses of all interested in it, with a market dead to every appeal. The prospect thus presented is that of an accentuated depression, already severely enough felt. Times are becoming hard in Japan, with nothing apparent to prevent them growing harder but the favourable outlook for the silk and

tea crops; and that if realized, although a help, will not suffice to give the full measure of relief from the inevitable trade subsidence after the war.

CHINA TEAS.

The annual report for 1905 of the statistical secretary of the Chinese Imperial Maritime Customs, referring to the export of teas to Great Britain, says that 'China supplies only 2½ per cent of the English market demand.' The report further gives the opinion that, 'The hope of the future now seems to lie in the finest teas, attractive for the inimitable softness of flavour; and in the commonest teas, attractive for their cheapness.'

THE HERRING CATCH IN HOKKAIDO.

Dividing the herring season into three parts, from the beginning of the season up to May 10th, that is, during the first and second period, the total catch of herring in Hokkaido was, 2,580,000 bushels, a decrease of 420,000 bushels compared with the corresponding period of last year. Although the third period is now being entered upon, it is feared that the catch will be materially less than that of the normal year.

DEVELOPING MANCHURIA.

There is accumulating evidence of Japan's intention to enter upon the promotion of her industrial and commercial interests in Manchuria, without more than reasonable delay. The Prime Minister, Marquis Saionji, having returned from an official view of the situation there, the policy of the Japanese government is reported in the press to have been agreed upon. The chief points are the sovereignty of China, the granting of 'equal opportunity' to all the powers, and 'the encouragement of joint enterprises of Japanese and Chinese for the development of Manchuria.'

In connection with this, a scheme is indicated involving the 'formation of a company, by the government and private capitalists jointly, for working and developing the railways, mines and forests in Manchuria.' The government to contribute the railways, mines, &c., at an estimated value of about 70,000,000 yen. What the other parties are to contribute is not stated, but 100,000,000 yen is the capital estimated as necessary, besides a large loan on the security of the company's property. This policy is stated to be for the guidance of the Japanese operations in Manchuria, and based upon the result of the premier's tour.

JAPANESE IMPORT TRADE.

The monthly return of the foreign trade of Japan for April is generally regarded as showing satisfactory results. The principal lines of import for April, and for the four months ending with April, are here presented:—

	Value. Yen	Value. Yen	Value. Yen
Flour, wheat.. . . .	387,704	3,521,816	2,189,887
Butter.. . . .	17,454	53,711	40,492
Salted salmon		337,726	310,871
Condensed milk	129,394	509,691	533,590
Lumber.. . . .	3,283	22,481	35,765
Fertilizers.. . . .	821,507	3,101,347	1,373,068
Leather (sole).. . . .	111,022	396,962	3,524,422
Lead (pig).. . . .	239,468	729,954	297,458
Printing paper.. . . .	176,319	852,649	412,087
Cotton duck.. . . .	25,846	62,156	984,443
Cotton prints.. . . .	125,225	554,242	275,225
Cotton satins and Italians	143,421	736,834	603,604
White shirtings.. . . .	105,337	583,711	573,603
Gray shirtings.. . . .	387,169	1,895,902	1,352,600
Pulp wood.. . . .	134,580	722,814	209,419

TOTAL EXPORTS.

April, 1906. Value. Yen	April, 1905. Value. Yen	Four months ending April 30, 1906. Value. Yen	1905. Value. Yen
28,810,777	24,402,036	115,766,408	96,432,193

TOTAL IMPORTS.

April, 1906. Value. Yen	April, 1905. Value. Yen	Four months ending April 30, 1906. Value. Yen	1905. Value. Yen
42,727,797	50,453,063	151,772,404	181,094,497

TO DEVELOPE INDUSTRIES.

With the object of further improving and developing industries in Japan, the Department of Agriculture and Commerce will shortly dispatch agents to Europe and America to make purchases of up-to-date machinery. For example, dyeing and weaving machinery will be purchased, to be rented to those so circumstanced as to be able to use it to advantage under regulations. Mr. Morita, Chief of the Bureau of Commerce and Industry in the above department, is now making a tour of inspection in Gumma, Saitama, Fukui and other districts with the view to carrying out the plans of the department.

FORTHCOMING EXHIBITION IN TOKIO.

In September, October and November next, an industrial exhibition will be held in Tokio, to which the attention of foreign merchants is directed. It will be styled the 'Goni Fair,' and while mainly devoted to exhibiting the manufactures of Japan, a section will be reserved for the exhibition of foreign imported goods. It is considered this will be an excellent opportunity for foreign merchants to acquaint Japanese with the nature and character of their imports. At the expiration of the term the exhibition will be maintained as a permanent semi-international commercial museum. Those interested are invited to apply for further particulars to the secretary of the exhibition, Mr. Masatake Togo, Alasaka, Tokio.

WOOLUNG TEA.

The reports of the tea crop from Formosa, as from most other parts of Japan, are favourable. The report from Taipeh, dated 7th May, states that employment is active with both the Japanese and the natives in the preparation of tea for the market. Transactions in 'Woolung' brand were at the same time being effected at the following rates:—

First-class,	Yen 15.00	per 133 pounds.	Gold, \$7.50
Second-class,	" 13.00	" " "	6.50
Third-class,	" 11.00	" " "	5.50

The report adds that foreign tea merchants are opening offices at Taipeh this year. The expectation is said to be well founded that Formosa will shortly add largely to Japan's best brands of tea.

THE BAMBOO TRADE.

So continuously advancing is the foreign demand for Japanese bamboo and bamboo work that the leading bamboo exporters of Kobe (the chief centre for this trade) are said to have begun to cultivate plantations on their own account, so as to be independent of the usual sources of supply. They hope by this means to improve the quality, which has been declining, and regulate the market, as to supply and price, to some extent. The export demand has this year increased the price of the raw material about 5 per cent; and the increase has come to be regarded as annual.

A. MacLEAN.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., June 15, 1906.

BRITISH WHEAT IMPORTS.

A recent article in one of the leading newspapers of the Dominion made reference to the diminished imports of wheat by Great Britain in 1906, and ascribed the same to increased home production. It may be of interest to shippers to give the quantities and value imported by months for years 1904, 1905 and 1906, as obtained from the trade and navigation returns.

	1904.	1905.	1906.
January..cwt.s:	5,960,600	6,625,400	5,777,600
“value, £	2,023,669	2,393,544	2,153,196
February..cwt.s.	5,768,200	6,020,900	3,869,100
“value, £	1,990,747	2,170,318	1,434,020
March..cwt.s.	7,680,300	10,677,000	6,513,600
“value, £	2,723,523	3,900,805	2,353,321
April..cwt.s.	7,009,400	7,903,900	7,601,100
“value, £	2,432,106	2,835,148	2,711,197
May..cwt.s.	8,842,900	8,482,400	10,782,400
“value, £	3,040,231	3,055,481	3,864,467

From the above figures it will be seen that there was a falling off in the first three months, but the last two months show an average increase. The total value of wheat imports for the years 1903, 1904 and 1905 were £29,940,191, £34,266,416 and £35,279,928 respectively. The wheat dealers here are experiencing a much larger delivery from farmers than in recent previous years, and the following figures obtained from the most reliable source and based on government returns show deliveries from farmers as follows from August 10 to June 10, in each of the years:

1903-4..bush.	23,424,000
1904-5..“	26,656,000
1905-6..“	41,112,000

TINNED MEATS REVELATIONS.

The newspapers of Great Britain have taken up the matter of the meat packing scandals with great vigour, and their columns are devoted to a very full disclosure of the circumstances as revealed by the agents, by whom the inspection of the packing houses was made, and warnings given to the public that are very far-reaching in their effect. The inmates of some of the work-houses have refused to partake of any canned meat, and the volunteers now in camp have rejected their tinned meat rations. The falling off in the consumption is reckoned at from 40 to 50 per cent, and it will take a very long time before confidence is restored.

CANADA'S OPPORTUNITY.

Is this not an exceptional opportunity for Canadian packers to secure the market? Great Britain's share of American canned products (the figures include fruit

and fish) amount to £2,000,000 a year. Separate figures are not given for tinned meat, but the amount is evidently very large. That a most rigid system of inspection will be put in force towards all tinned goods imported, is promised by the president of the local government board, and it is suggested that it shall not be confined to imported goods only, but that home-made products will be included, as it is believed that Chicago has no monopoly of greed and grossness.

IRISH TOBACCO.

It is said that the Chancellor of the Exchequer has sent a communication to interested parties promising to extend by five years, until December, 1913, the arrangement entered into by his predecessor whereby a rebate of one-third of the customs duty is allowed upon tobacco produced experimentally in Ireland. He also wishes it understood that the object of the extension is merely to demonstrate the possibility of tobacco growing in Ireland as a commercial proposition, and not the establishment of a protected industry, and it will be necessary to continue the rules whereby tobacco cultivation is confined to certain approved areas. The tobacco grown in Ireland this year on some farms has been a great success, there being no waste in the curing, which was managed very skilfully and prices obtained showed a good profit.

RAW HIDES AND LEATHER.

The increased value of all kinds of leather in England in the last few months, and the prediction that all manufacturers of boots and shoes would be compelled to advance their prices, caused considerable attention to be turned towards the raw material, and inquiries to be made as to the causes of the scarcity. That there has been any falling off in the number of animals slaughtered is not suspected, and if the British tanners had been alive to the situation probably the scarcity would not prevail.

EXPORTS OF RAW HIDES TO UNITED STATES.

The customs exports show that 80,000 cwts of raw hides have been sent to the United States in the past year, the duty of 15 per cent is refunded upon proof that the manufactured articles exported were produced from the hides imported. The ocean freight on the hides and again upon the product does not deter the United States manufacturer, if he can only keep his factories running, and he thus competes for and obtains his raw material in the open market of Great Britain, and returns same to its people in the shape of boots and shoes, and other manufactures of leather.

CARRIAGE OF LIVE FISH.

The following, taken from a scientific journal, may be of interest to Canadian shippers of fish:—

‘After careful study and many experiments, German experts have at last discovered a method of keeping fish alive for a considerable period out of water, and the problem of the cheap transport of live fish is within sight of solution. Starting from the observation that most fish remain alive for some time after being taken from the water, the experts made a thorough investigation of the capabilities of their respiratory organs. They ascertained that the fish remains alive in the air so long as its gills are damp—that is to say, it obtains oxygen from the air through the medium of the water spread over the fine membrane of the gills.

‘The new invention merely exploits this circumstance. It consists of a wooden box, in which are a number of compartments corresponding with the size of the fish. On the floor of the compartment is a layer, half an inch deep, of cloths saturated with water, which by its evaporation, keeps the atmosphere moist. The fish gills are thus kept sufficiently damp, and the oxygen is supplied to them in a pure state from a holder outside the box. The oxygen does not enter the box directly, but first passes through

a series of water bottles, and thus also helps to maintain the moisture of the atmosphere in the box. A pipe at the opposite end of the box carries off the superfluous oxygen and the exhalations of its inmates.

'All kinds of fresh-water fish have in this manner been kept alive for three to four days. When replaced in water at the end of this period to feed, they swim about vigorously and take food with readiness.'

BRITISH TRADE STILL BOOMING.

According to the Board of Trade returns issued on Friday the imports last month were £51,430,457 and the exports £31,729,927, an increase compared with May last year of £4,597,490 in the former and of £4,477,234 in the latter. The five months ending May this year, as compared with the same period of 1905, show increases of £23,089,403 in imports and of £20,238,505 in exports.

P. B. MACNAMARA.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar Tripp.)

PORT OF SPAIN,

TRINIDAD, June 7, 1906.

TRINIDAD TRADE.

Owing to the absence from the colony through ill-health of the collector of customs (Hon. R. H. McCarthy), the publication of the trade statistics for the year ending March 31 has been somewhat delayed, and they are not accompanied by the exhaustive and valuable comments from his pen which have hitherto proved so interesting.

IMPORTS.

The returns of total trade indicate a considerable increase over preceding years, viz. :—

	1903-4.	1904-5.	1905-6.
United Kingdom	£ 944,804	£ 938,788	£ 957,594
British colonies	284,227	283,183	836,415
Foreign countries	1,297,419	1,407,080	1,509,602
Total value	2,526,450	2,629,051	3,303,611

but the increase is more apparent than real, being due to the unusual quantity of bullion and specie and goods transhipped in our harbour in consequence of the royal mail headquarters and transfer station having been at Trinidad during the period under review. These amounted to:—

	1903-4.	1904-5.	1905-6.
Bullion and specie	£ 68,021	£110,462	£402,774
Transhipments	158,924	202,270	729,319
	226,945	312,732	1,132,093

This transshipment trade is necessarily of some indirect advantage to the colony, affording a certain amount of employment to dock labour, lighters, &c., but if not spe-

cially referred to, would lead to an undue importance attaching to the total volume of trade on paper.

The legitimate imports for the past five years have been as follows:—

1901-2.	£2,038,609
1902-3.	2,375,068
1903-4.	2,299,505
1904-5	2,316,319
1905-6.	2,171,518

so that the continued flood tide in the colony's prosperity appears to have received a temporary check.

INCREASE FROM CANADA.

Excluding transhipment and constructive transhipment goods (such as cocoa from Venezuela, every pound of which is re-exported, but counts in the imports), Canada appears to be the only source whence imports increased. The figures for the last five years were:—

1901-2.	£ 98,958
1902-3.	132,962
1903-4.	119,186
1904-5	117,054
1905-6.	139,179

DECREASE WITH UNITED STATES.

Corresponding figures with United States are:—

1901-2.	£674,147
1902-3.	702,189
1903-4.	675,769
1904-5	677,421
1905-6.	651,070

and excluding transhipment goods, a steady falling off is shown as follows:—

1903-4	£662,534
1904-5.	633,582
1905-6.	601,350

COMPLAINT AGAINST BOOT AND SHOE EXPORTERS.

The increase under this head, although not equal to the falling off noted in the previous year, is encouraging. I am sorry not to be able to send an equally good report of other manufactures. Two of the leading dealers in foot wear state positively that they have received shipments 'not up to the sample' presented to them by the travellers who obtained the order. They are aware it is a serious statement to make, but they desire it to be known and say they are prepared to substantiate it and give names if necessary.

CARRIAGES.

The light Canadian buggies continue in favour and have fully justified their reputation for strength and durability. Rubber tired wheels are mostly required.

CORDAGE AND TWINE.

Good quality and value are gradually securing this trade for Canada. Of the total quantity received the Dominion heads the list with £3,874, the United Kingdom and United States being second and third with values of £3,669 and £1,537 respectively. I draw special attention to this fact, because, if I am not mistaken, it is the first time on record that a Canadian manufacture has been imported into this colony of greater value than a similar article either from Great Britain or the States. Is this not an indication of what may be done in other directions ?

FISH.

The difference in the quantity of fish imported is not, I think, due to any large increase in consumption. It was probably owing to the arrival of heavy shipments either just before or just after the commencement or termination of the fiscal year. The figures under review merely bring up the average to the normal rate of consumption over a period of some years.

MILK, CONDENSED.

The rise in price of European milk owing to the combination of the principal firms there engaged in the business, left an opening for Canadian brands which has been availed of to the extent indicated by the figures above : but in addition to this, the milk itself is good and is gradually making its way against the strong competition of the famous brands that have so long controlled the market. An interesting feature in this trade is the recent introduction of an article known as ' Machine Skimmed Milk ' which has met with a large sale at somewhat cheaper rates than the regular article, notwithstanding the hearty and public denunciation of its inferior quality by those interested in the sale of the unskimmed milk.

ONIONS.

Onions in a relatively increasing quantity were received from Canada. The quality appears to have been satisfactory, but it is stated that they sprout sooner than the Bermuda and Portuguese varieties which are thus more suitable when storage is necessary.

BREAD.

Canadian soda biscuits, classed under the heading of bread by the Customs Department, are meeting with much favour, and fill a want amongst a class of people who look for a choicer article than the ' cracker ' of local manufacture which is in general demand by the masses.

FLOUR.

Those who have handled the increased quantity of Canadian flour imported during the year speak well of it, and repeat once more that if the standard is maintained there is nothing to prevent an increase in the trade proportionate to its total volume in the colony. The want of keeping quality is not now complained of. This improvement is attributed to the fact that greater care is now given to condition at time of shipment.

In many cases matured flour, milled for a considerable time, probably old stock, has sought a market here, and gone wrong before finding one. New crop only should be sent to the tropics. If this is done, the last will soon be heard of the non-keeping quality of Canadian flour.

DECREASE IN IMPORTS FROM CANADA.

	1904-05.	1905-6.
Butter.. . . .	£ 1,180	629
Cheese.. . . .	1,033	516
Fruit.. . . .	79	27

BUTTER AND CHEESE.

I am unable to furnish any good reason why butter and cheese from Canada do not figure more largely on our list of imports except it be that a better demand exists elsewhere and that exporters are consequently indifferent to this market.

The quality of both is acknowledged to be good, and the difficulty about package seems to have been overcome. Out of a total of 638,481 pounds butter received last year, 342,027 pounds came from France. French butter is put up in firkins, 66 pounds net, and the value to-day is from \$15 to \$15.75 per firkin, duty (2c. per pound paid). This of course is ordinary salt butter for general purposes. There is no reason why this particular and remunerative branch of the trade should be monopolized by France.

TIMBER.

The decrease in quantity of timber imported was due to the unusual rise in prices, against which buyers held out as long as possible, but as the market is gradually becoming very short of supply, this will right itself in the ordinary course. An experiment was made to substitute North Carolina lumber, an inferior class of pitch pine, for the white pine hitherto obtained from Canada, but the success was doubtful.

PAPER.

I have been surprised to ascertain from personal inquiry that neither of the leading newspapers here obtain their paper from Canada. One purchases from New York, the other from Hamburg. This seems strange in view of what I heard when on tour through the Dominion with the delegates to the Commercial Congress in 1903. Whilst being conducted over a huge pulp factory in course of erection the managing director stated that the whole output of seven years had been engaged for Europe before a stone of the building was laid. Canada therefore would seem to be indicated as the place to obtain paper from rather than Europe, but I have not heard that the trade has been in any way pushed here.

GENERAL REMARKS.

The leading bookseller and stationer of Port-of-Spain being asked by the writer why he did not deal in Canadian goods, said he would be most pleased to, but that he had never been approached by a Canadian traveller, and had never been communicated with by, or received a circular or catalogue from a Canadian firm.

The fruit trade is worth cultivating. All kinds of northern fruits find ready sale if landed in good condition.

Machinery to the value of £33,502 was imported last year. Canada's contribution to this total was £5.

Specially in view of recent disclosures regarding Chicago packing, an opening offers to secure a far larger share than hitherto of the tinned meat trade.

Quantities of steel rails, from light cocoa to heavy locomotive rail, find a market here. Why don't some come from Canada ?

Sales of Canadian soap are improving. There is quite a large output here which some of the biggest manufacturers in the world are looking keenly after.

\$100,000 worth of hats are landed in Trinidad every year—straw hats principally, and light gray felts—about \$300 of this trade is all Canada secures.

Canadian paint is liked wherever tried, but for forty years painters have been using little else than one well known brand, and it is hard to induce them to take anything else. Continued effort will be necessary.

Bags are rapidly superseding barrels as packages for flour, &c., and goods so put up are equally saleable, besides saving something in cost of package.

Are the earthen and glassware makers of Canada aware that the Trinidad trade under this head amounted last year to £25,750 ?

The people of the Colony are not as a rule intemperate, but they drink whisky, beer and wine in moderation. Good and pure qualities of all these are produced in Canada, and would if properly introduced secure a fair share of the trade which now goes altogether elsewhere.

Trinidad produces sugar, but does not refine it. Some years ago Canada supplied most of the refined sugar sent here. The United States and Germany do so now. Why is this ? The imports last year were nearly 4,000,000 pounds.

More Canadian horses could be sold. Four only came last year, against 338 from Venezuela—and a total from all places of 558.

Canadian firms are advertising goods f.o.b. New York. Why not St. John or Halifax ?

EDGAR TRIPP.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., June 13, 1906.

THE TINNED MEAT SCARE.

Great Britain seems to have been very strongly moved by the expose of the methods of the packers of canned meat, and it will be many a long day before the American packer regains the confidence of this market.

CANADA'S OPPORTUNITY.

Although Canada is not a very large meat tinning country, this ought to be a very fine opportunity for Canadian packers to step in. I notice that Australia and New Zealand are making very determined efforts to capture at least a portion of the market. Australian and New Zealand tinned meats have always been more expensive than the American, and they give as one reason for this that the quality of the meat is superior, and also that such great care is exercised by the government in respecting all meat canneries. There are also one or two other laws which Canadians might very well

follow : (1) So far as New Zealand is concerned every tin containing meat must have the word 'New Zealand' printed on; (2) the name of the exporter or owner, together with his trade mark; and (3) the true name and description of the contents.

THE NECESSITY FOR BRANDING.

I have always contended that Canadians in exporting her products do not differentiate sufficiently. To the wholesaler or jobber it is well known that our products are Canadian, but the user, unless his particular attention is drawn to the fact, places all on one level and calls them American. We know that no country tins such salmon as Canada, but it is always sold as American. The Chairman of the Stratford-on-Avon Board of Guardians asked a question in committee yesterday as to whether the corned beef used was from America, and the reply was given that it might be Canadian. A tin was brought for inspection and it was found to be from Chicago. The Chairman instructed the contractor to supply Australian goods in future.

Why could not our tinnery of salmon and lobster, &c., have stamped on each tin 'Canadian'? The same thing may be said of apples. The wholesaler knows the difference between the Canadian and the American apples, but when these apples come to a retailer, as soon as the head is removed, it takes away all distinction, and they may be Canadian, American or anything else. Why not brand on the side staves 'Canadian'? Cheese might be dealt with in the same way. 'Canadian' could be stamped on every quarter. It seems to me that Canadian packers and shippers should follow the high ideal of the bacon and cheese shippers to this country. Occasionally, there are complaints; but take it all around, these two articles particularly have the very highest standing in this country.

FRUITS AND VEGETABLES.

I regret that our fruit and vegetable packers are not paying sufficient attention to this market. The Californian, French and German still rule. Among the better class of people a prejudice against tinned goods undoubtedly exists, but why cannot our packers pack in glass?

SHIPMENTS IN BOTTLES.

In speaking to Canadian packers about shipping their canned goods in glass the complaint is always made that they cannot buy bottles cheap enough to compete against other countries. At present the Canadian customs allows a rebate of 99 per cent of the duty, upon glass imported in the shape of bottles, when exported containing Canadian products, and this should certainly tend to give Canada's very choice goods a standing they have not at present.

Of course, the larger proportion of fruits packed in Canada are what are called 'canned' a smaller quantity of sugar being used, and England is particularly a country of jam eaters. Fruit is not profuse here as in Canada, and they use very much smaller quantities. Still, there is no reason why large quantities of jam as well as canned fruits and vegetables cannot be sent to this country. For instance, this year the plum crop in Great Britain will be an absolute failure, and from what I can hear there is likely to be a large crop in Canada. Why do not the Canadians make an attempt to use the tons of plums usually thrown away when Canada has an over crop?

P. B. BALL.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, June 16, 1906.

CANNED MEATS.

The present time seems to be an admirable opportunity for Canadian packers of canned meats to push their sales in this colony.

In consequence of the exposures that have been made, as to the manner in which the American packers at Chicago are reported to have handled their canned meat products, a very strong prejudice has already made itself manifest in the sale of these goods in this colony, and it is safe to say that meats packed in Canada, would speedily displace all American goods of the kind on the shelves of the retailers here.

The *Evening Telegram* of St. John's states that:—

‘Local dealers complain of the falling off of the sale of canned goods, especially meats. No doubt this is the result of the exposé of the methods of meat market packers of Chicago now going on in the public press.’

I would recommend therefore, that competent salesmen be sent here without delay by the Canadian packers to push the sale of their goods in the colony at this opportune time. A reference to the figures given in the Newfoundland Customs returns for 1905, shows imports during that year from the United States valued at \$25,265, while only \$245 worth was entered from Canada.

BACON AND HAMS.

It might be desirable also, to draw attention to the fact that the imports of bacon and ham into this colony are sixteen times greater from the United States than they are from Canada, and there seems to be no reason why this should be the case, bearing in mind the superior character of the Canadian product over that of the American stock-yards.

I think it would be very desirable that the word ‘Canadian’ should appear on every package of such goods, as may be sold in future in the colony, and would advise Canadian packers of the above to make a determined effort to capture this market without delay.

E. D. ARNAUD.

BRITISH CONSULS IN THE UNITED STATES.

RESULT OF A CIRCULAR LETTER ADDRESSED THESE OFFICIALS BY THE SUPERINTENDENT OF
COMMERCIAL AGENCIES IN THE INTERESTS OF CANADIAN TRADE.

In view of the somewhat general impression, especially among the manufacturers and exporters of Canada, that the Commercial Agency Service should be greatly extended, and further in view of the fact that Canada has not a single commercial agent in the United States, the Superintendent of Commercial Agencies recently addressed a circular letter to all British Consuls General and Consuls in that Republic seeking if possible to bring about some measure of harmony between these officials and the Canadian business community, and thereby if possible unofficially enroll their services more directly in the interests of Canadian trade.

As is well known, the impression has existed for many years among Canadians that British Consuls do not interest themselves in Canadian trade, and, therefore, could be of little or no use to them. On the other hand the statement was made to the

Superintendent of Commercial Agencies that Canadians as a rule seldom availed themselves of the advantages offered by British Consuls in the United States by calling upon them, or by writing to them, and that Canadians had no ground to hold such an opinion when they seldom or ever sought their assistance.

The circular letter, therefore, referred to was sent to all of the more important British Consulates in the United States. The existing condition of affairs was frankly stated, and under the assumption that the services of British Consuls were always available whenever the Empire's trade might demand, a full and frank opinion was requested. Incorporated therein were the following questions:—

(a) What suggestions can you offer seeking to bring about more intimate commercial relations with Canadian business men?

(b) Have you had much correspondence with Canadian firms? If so, has it resulted satisfactorily or otherwise?

(c) Do you think you can assist Canadians to extend their market in your district?

The system in vogue in Canada in the conduct of the Commercial Agency Service was also briefly referred to, and permission was requested to publish in the Weekly Report any replies which might be received.

The result has been a splendid testimony to the efficiency of the British Consular Service in the United States, many of whom replied at considerable length, offering excellent suggestions, and in general terms stating that the facilities of their respective offices were at the service of Canadian business men. It has been thought desirable that extracts be made herein at some length from the replies received.

In forwarding the circular, assurance was given to the various British Consular officials that should they so desire all official publications, especially upon trade matters, issued by the Canadian government, should be forwarded them regularly, and very general thanks was expressed in the replies therefor, which has led for the first time to all the more important of the British Consular offices in the United States being furnished with a large number of official Canadian publications.

CHICAGO.

It is due to Mr. Alexander Finn, the British Consul General at Chicago, that credit be given him for having first suggested that his office be considered as a commercial agency for the Dominion of Canada, and in subsequent correspondence the idea was conceived, of which the circular letter above referred to was the result.

Under date January 16, 1906, Mr. Finn stated, in reply to the circular referred to:—

‘I beg to remind you that soon after my arrival at this post I wrote you offering the services of the staff of the Consulate at Chicago, with its vice consuls at six large cities in other states, in any way that might be useful to you, as I have always considered myself as representing the whole Empire and at the service of any and every British subject from wheresoever he might come. I think that all parts of the British Empire and all departments of the government and its different parts should treat the British Consuls as their representative. . . . All merchants should be encouraged to write to me on all occasions.

‘I should like all portions of the Empire to supply the consulates with the fullest information as to the resources, manufactures, openings for capital, &c., so as to make them a place where information can be obtained immediately. Also I consider that all representatives of the departments of governments in the different parts of the Empire, on visiting a town, should make the consulate their headquarters, and if resident in the town should have their office with the consulate. In fact what I want to see done is the consular service to be on a proper footing, so that it may be the centre of representation in reality as well as in name, by everybody concerned as well as of our government work, and thus be of real service to everybody.

‘Most of the correspondence that we have had with Canadians on business has been with persons seeking agencies in Canada for American goods.’

BOSTON.

Mr. William Wyndham, British Consul at Boston, under date of January 15, 1906, stated:—

‘It is perfectly true that Canadians do not, so far as my own experience of nine years as a British Consul of the United States proves, avail themselves of the assistance of British Consuls. I note you say that one of the reasons advanced for this is that Canada does not contribute to the maintenance of the consular service. This, I think, is rather an exaggerated reason, as Canada, so far as I am aware, does not contribute to the expense of any Imperial services, whereas those services are always ready to assist the Dominion and its subjects.

‘I have never had, during my consular experience, any inquiries from a Canadian merchant; and on the other hand, from the other colonies, from Australia and India such inquiries are often received and are as promptly attended to as similar inquiries from Great Britain.

‘With reference to your request for suggestions regarding:—

‘(a) I think that the newspapers of Canada could best suggest to Canadian merchants that British Consular officers are as ready to serve their interests as that of any other part of the Empire.

‘(b) As I have stated, I have never had any correspondence from a Canadian firm.

‘(c) Such assistance as is in my power I will gladly give to any Canadian firm seeking markets for their goods in my consular district, that is, I will furnish them with names of dealers in their particular class of goods without, however, guaranteeing the financial standing of the firm, which dealers must inquire into themselves through their bankers; and would at any time be pleased to answer any questions on commercial matters so far as I can obtain the information.

‘I shall be pleased to receive from your office any official publication you may desire to send me, which will be filed here for the use of Canadians in this district. I believe there are resident in Boston and its vicinity about 150,000 Canadians.’

The correspondence opened with Mr. Wyndham had immediate effect, for Mr. Wyndham shortly after stated that he had certain inquiries which he could not answer as he had no data to fall back upon. Upon the same being furnished him, Mr. Wyndham was able to reply, expressing his thanks, stating that he had already received an inquiry which he was able to answer correctly.

NEW YORK.

Sir Percy Sanderson, K.C.M.G., British Consul General at New York, stated:—

‘I know of no valid reason why Canadians should not avail themselves of the services of British Consular officers and commercial agents, although in practice they do so less than residents in the British Isles. The services of this consulate general are and always have been at their disposal, and the same is true of the commercial agency formerly at Chicago, but since April, 1905, attached to this consulate general.

‘As regards (a), more intimate commercial relations between the consular officers and commercial agents and Canadian business men, the only suggestions I can offer are that the latter should correspond direct, stating their requirements.

‘As to (b), correspondence with Canadian firms and the result—the number of letters received has been very small considering the proximity of the Dominion and the extent of the trade between the two countries. When a letter has been received and an answer sent, it is seldom that anything further is heard, and it is consequently impossible to state the result.

‘As to (c), I have little doubt that assistance could be given to Canadians to extend their market in this country if they would state their requirements.’

GALVESTON.

Mr. Horace D. Nugent, British Consul at Galveston, under date of February 1, 1906, replied that:—

‘His Majesty’s Consular officers are the public servants not alone of Great Britain, but of the Empire at large, and further, it should be not only our duty but also our privilege and pleasure to do our part in aiding to build up and enlarge the trade and commerce of the Empire by holding ourselves ready at all times to assist in any way possible the commercial interests of our fellow Britons, whether in the United Kingdom or the colonies. Personally speaking, I have always taken this view, and nothing would give me greater pleasure and pride to feel that I had in my small way helped to extend the trade of the Dominion in any possible manner.

‘I would suggest (a) that it should be made known as widely as possible through official publications, chambers of commerce, &c., that British Consular officials in this country will take pleasure in answering Canadian commercial inquiries as fully and as speedily as may be, and that Canadian business men and firms should be encouraged to address such communications to the consular officers. (b) I have had very few inquiries from Canadian firms, but I do not think any business has resulted. I may add that our consulates only make an annual report, and for that reason it would be better in every case for the prospective Canadian buyer or seller to address a letter of inquiry to me. In case of the suggestions I have made being followed up I will endeavour to ascertain later more specifically in what articles of Canadian origin business might be done.’

PORTLAND.

Mr. James Laidlaw, the British Consul at Portland, Ore., under date of February 1, 1906, states:—

‘I do not know why Canadians should entertain the notion that the British Consular officers are not disposed to assist them in their trade or otherwise, and I am sure that no distinction is made between British subjects whether they belong to Canada or another colony of the United Kingdom. I am often called upon by Canadians for advice. It is true, however, that I am not so often consulted about commercial matters relating to Canada, but more often as to land and tariff questions. It is not, however, the province of a British Consul to encourage the trade of Americans to the detriment of British trade, but by British trade I mean the trade of the British Empire, and not solely that of the United Kingdom. I have never looked upon myself as merely the representative of a section of the Empire.

‘In answer to your questions I can only suggest that if Canadian business men would make their desires known they would assist in every way practicable. A consul cannot make business or work up business, but he can make suggestions and answer inquiries which might lead to this, and I am sure not only would be glad to do so, but it is also his duty.

‘I have had exceedingly little correspondence with Canadian firms, and of course you are aware much depends upon whether or not the United States tariff will admit of extension of business in Canadian products.

‘I am at all times pleased to increase my knowledge of Canada and its products, and only regret that none of the departments of the Canadian government have ever thought of sending their reports to this office for my information unless specially inquired for. Not even changes in tariff are notified, and I certainly value very highly your offer to send all official publications issued by your department.’

BALTIMORE.

Mr. G. Fraser, British Consul at Baltimore, under date of February 8, 1906, states:—

‘I would be glad to assist Canadian business men in every possible way. Inquiries are never received from Canadian merchants, but I would be glad to furnish them on application, with the names and addresses of firms in this district with whom they might wish to enter into business relations. Should any opportunity offer in this district of which Canadian merchants might avail themselves, I will gladly furnish full particulars of it to you for publication in your weekly report, so that it may be brought to the attention of those likely to be benefited in a business sense.’

SAN FRANCISCO.

Mr. C. W. Bennett, British Consul General at San Francisco, under date of January 18, 1906, states, in reply to the circular:—

‘It (the circular) interests me because all that tends to the consolidating of the component parts of the Empire must be the wish of every subject of the Empire. It surprises me because I gather that an impression seems to exist in some quarters that British Consular officers take no interest in colonial questions, and because Canadians hesitate to apply to British Consular officers on the ground that Canada does not contribute to the maintenance of the British Consular service.

‘Speaking generally, I may say that I never made any distinction whatever in giving such assistance as I properly gave to all subjects of the Empire, whether they hail from the old country or one of the British Dominions beyond the seas, and that to have acted otherwise would appear to me to have savoured of the policy described by the late Cecil Rhodes as “The policy of the parish pump.”

‘I feel convinced that all my colleagues are most willing to give *all* British subjects any aid and assistance which they properly can, and in the same full measure as they accord it to the people, mercantile or otherwise, of Great Britain.

‘As regards the special interests of Canada in this consular district, it is no doubt within your knowledge that a large trade between British Columbia and San Francisco already exists. It is presumably in the hands of business men to see the opportunity offered and seize it. Any assistance asked for I will be most happy to give whenever possible.

‘You will please look upon this letter as the expression of my own personal views, and not necessarily those of His Majesty’s government.’

PHILADELPHIA.

Mr. Wilfrid Powell, British Consul at Philadelphia, under date of April 28, 1906, states:—

‘I shall be glad to assist you in any way that I properly may in bringing the fact home to Canadians that a British Consul is not appointed to his post merely for the purpose of assisting and giving information to people in or from the mother country, but is appointed to assist and advise British subjects of any portion of the British Empire.

‘Firms in Canada should address their requirements to the consul, taking care that the inquiry is made in fullest detail in order that the consul may be able to obtain if possible equally full information. We have had a considerable amount of correspondence on commercial matters with Canadian firms and business men, in some cases evidently with satisfactory results, judging from the letters received. In others it is impossible to say with what results, owing to no replies being received. Canadians might receive some benefit from the assistance of consular officers provided that they do not expect them to act as representatives of their firm, or as is sometimes the case, as commercial travellers. Moreover, information must not be sought for of a nature that a consular officer cannot properly obtain or ask for.

‘The opinion expressed in this letter I must ask you to look upon as a purely personal one, and in no way pledging the British government in the matter.

'I think it would be of great benefit if certain departments of the Canadian government would supply this consulate with their official publications, especially the Immigration and Customs Departments, and I shall be pleased to receive any official documents issued by the Department of Trade and Commerce at Ottawa that you are good enough to transmit to me.'

NEW ORLEANS.

Mr. H. T. Carew-Hunt, British Consul at New Orleans, under date of May 1, 1906, states:—

'I am always ready to do anything in my power to assist Canadian commercial interests in my district. I would suggest that a list of the British Consular officers in the United States should be sent to the various boards of trade and chambers of commerce throughout the Dominion, with the information that the services of such officers are at the disposal of Canadian merchants to promote Canadian trade interests. Similar lists might with advantage be sent to other institutions.

'I have had little if any correspondence with Canadian firms, though I do not think that Canadians could at present extend their market to any appreciable extent in my district.'

SAVANNAH.

Mr. A. Harkness, Acting British Consul at Savannah, Ga., under date of May 29, 1906, states that:—

'For the last few years there have been very few trade inquiries received at this consulate from Canadian traders, owing no doubt to wrongful impressions apparently entertained by them on the subject. It affords me pleasure, however, to assure you that I should be glad to have it understood that no hesitation or reluctance should be felt by Canadian inquirers who are desirous of assistance from the consular officers in this district in obtaining information calculated to promote trade relations; and I also beg to say that all such inquiries will receive the best care and attention that it is in my power to render.

'With reference to the suggestions you ask for, with a view of extending trade, I would recommend as perhaps the best plan to pursue, that Canadians who wish to get in touch with desirable parties, should first write the nearest consular officer asking to be given the names and addresses of the leading and most reliable firms, or persons, in any particular line of business at the locality mentioned; and on receipt of this information direct correspondence could then be opened up by interested parties and full details entered into by them. This method has generally been followed by trade inquirers in the United Kingdom, and so far as I know, with results that have proved satisfactory, and I believe it would be advantageous to Canadian traders.

'At the present time there is some export trade, annually, from the ports of this district to Nova Scotia and New Brunswick, mostly in the way of shipments of yellow pine lumber, rosin, turpentine, &c., but comparatively little business is done in direct Canadian imports, as such goods of Canadian origin as are consumed here come, as a general rule, by way of New York and Boston. It appears to me quite possible that a reasonable improvement in the present trade conditions might be hoped for in the near future if a proper effort is made in the right direction.

'I have further to thank you for the copies of the "Commercial Hand Book" which you kindly sent, and have to state that the same are now placed on the consulate table, with other publications for the public use, where they are now available for persons who may be interested in the matter.

'Trusting that I may hear from you again if it is in my power to be of any further service in the case, &c., &c.'

CATALOGUES FOR COMMERCIAL AGENTS.

THE DEPARTMENT WILL FORWARD CATALOGUES ABROAD FOR THE INFORMATION OF FOREIGNERS INTERESTED IN CANADIAN TRADE.

The Department of Trade and Commerce will shortly forward gratuitously to the more important of the Canadian Commercial Agents abroad, a set of catalogues to be furnished by Canadian exporters. The Canadian Manufacturers' Association, Toronto, is also collecting catalogues in conjunction with this department and copies may be forwarded either to that association or to the undersigned; thirteen copies in all are requested.

It is of the first importance that these catalogues should be accompanied by full information as to prices and discounts, &c., and it must be clearly indicated whether the prices are f.o.b. Canadian port or New York, or c.i.f. at the foreign port. Commercial agents have frequently pointed out that quotations should be c.i.f. at the foreign port and that unless such quotations are furnished, Canadian exporters are placed at a serious disadvantage in comparison with their foreign competitors.

These catalogues are to be kept upon file in the offices of the various commercial agents abroad for reference to enable them to furnish buyers in their locality with immediate information in the absence of a resident representative of the Canadian exporter.

F. C. T. O'HARA,
Superintendent of Commercial Agencies.

Department of Trade and Commerce,
Ottawa, June 11, 1906.

IMPORTS OF ANIMALS, LIVING, INTO GREAT BRITAIN.

NOTE—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports 'Exports of Domestic Produce and Manufacture.'

α The figures for Mexico include coin and bullion.

* Figures are for the years 1903, 1904 and 1905.

NEW TARIFFS.

During the month under review there have been distributed from this Department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental annual report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

MAURITIUS.

TARIFF OF CUSTOMS AND HARBOUR DUES, ETC., 1906.

IN FORCE JANUARY 1, 1906.

Schedule B to Ordinance No. 29 of 1895.

(CONSOLIDATED CUSTOMS' TARIFF.)

As modified by Ordinances No. 19 of 1896 and 1 of 1904 in regard to spirits, plain or compounded (Item No. 135), Ordinance 25 of 1904 amending Ordinance 50 of 1899 in regard to alcohol in wine, and No. 50 of 1899 as regards wines (Item No. 159) champagnes and sparkling wines, tea and carcasses of all animals. Ordinance No. 5 of 1898 and proclamation No. 71 of 1905 regarding *ad valorem* rates. Ordinance No. 39 of 1898 as regards vinegar. Ordinance No. 51 of 1898 as regards petroleum (Item 112) and salt (Item 126). Ordinance No. 24 of 1900 repealing item 6 of Schedule C. Ordinance 16 of 1900 as regards bullion and all alcoholic preparations; duty on butted and stemmed and Rodrigues tobacco, No. 35 of 1900 ; and 2 of 1901 imposing additional tax of 2 cents per 100 kilos on sugar exported ; No. 17 of 1901 amending various items. Ordinance 13 of 1903 amending item 9 of Schedule C of Ordinance 29 of 1895 as regards exemption on wearing apparel and item 138 of Schedule B of Ordinance 29 of 1895 as regards duty on sugar imported ; Ordinance 31 of 1903 amending Ordinance 13 of 1903 as regards duty on sugar candy and sugar refined imported. Ordinance 14 of 1905 amending items 147 and 114 of Schedule B to Ordinance 29 of 1895, as regards duty on tobacco and paper cigarette. Ordinance 21 of 1904 imposing a surcharge of 20 per cent on all goods imported except rice, dholl, lentils, salt fish, wheat flour and Indian corn flour which are subjected to 4 per cent surcharge only.

VESSELS ABANDONED.

All vessels abandoned in the harbour and not broken up within three months, or sold and not broken up or fitted for sea within the same period from the date of sale, shall be subject to a harbour fee of two cents per ton of register per month ; provided that the said fee shall in no case be less than ten rupees per month.

VESSELS USED AS CARGO HULKS OR RECEIVING SHIP.

All vessels used as cargo hulks or receiving ships in the harbour shall be duly licensed as such and while so used shall pay a harbour fee of four cents per month per ton of register without prejudice to any harbour dues that may be claimable upon their leaving the harbour.

The Governor may from time to time, make regulations in regard to the control and management of such vessels, and by such regulations add to, alter or revoke any existing regulations.

The regulations so made shall be laid on the table of the Council of Government. Vessels in distress are charged pilotage and other harbour dues.

EXTRA SURCHARGE.

There shall be levied on all vessels entering the harbour an extra charge of fifteen cents per net register ton in order to cover the cost of working the dredger *Cerné*.

Provided that such extra charge shall only be levied once on vessels entering the harbour twice within the space of one month, and shall not be levied on vessels entering the harbour in distress.

(b) On vessel entering the harbour solely for the purpose of coaling or taking in provisions, water or ballast.

This extra charge to remain in force for such period not exceeding six years from the date of promulgation of Ordinance 12 of 1905 as may be necessary to defray the actual cost of the dredging and deepening work of the harbour.

EXEMPTIONS.

1. No Pilotage or Anchorage dues shall be charged on the following vessels :—
 - a. British or foreign men-of-war and transports, or vessels belonging to the government of Mauritius.
 - b. Vessels breaking bulk at the bell-buoy, and discharging cargo to the extent of not more than 25 tons ; or landing not more than five horses, mules, donkeys or twenty sheep, pigs or goats.
 - c. Vessels touching at Port Louis without entering the harbour.

2. No pilotage dues shall be charged on vessels under 100 tons unless the commander or master has requested to be supplied with a pilot.

TURKS AND CAICOS ISLANDS.

1905. No. 6.

An Ordinance of the Legislative Board of the Turks and Caicos Islands to repeal the Tariff Ordinance, 1884, and to make other provision in lieu thereof.

Whereas it is desirable to make provision for the payment of duties of customs on goods imported into the Turks and Caicos Islands, other than that now in force:—

Be it enacted by the Legislative Board of the Turks and Caicos Islands as follows:—

1. This ordinance may be cited as ‘The Customs Tariff Ordinance, 1905’.

2. So much of the Tariff Ordinance, 1884 (No. 8 of 1884) as has not already been repealed is hereby repealed:—

Provided that such repeal shall not affect any act or omission that has already taken place, or any right, liability or right of procedure, civil or criminal, or any proceedings commenced or to be taken in respect of any such act or omission.

3. On and after the coming into operation of this ordinance there shall be raised, levied, collected and paid unto His Majesty, his heirs and successors, for the use of the government of the Turks and Caicos Islands upon the several articles imported into the said dependency and enumerated in Schedule I to this ordinance, the several duties therein set forth.

The several articles enumerated in Schedule II to this Ordinance shall on importation into this dependency, be admitted free of duty.

All and every article or part thereof not enumerated in either Schedule I or Schedule II to this Ordinance as subject to any other rate of duty, or declared free from duty by this or by any other ordinance or regulation for the time being in force, and not being articles or goods, the importation of which is by any ordinance, regulation or government notice prohibited into this dependency, shall on importation, be subject to and pay a duty of ten pounds sterling (£10) on every one hundred pounds sterling (£100) in value, and after these rates for any greater or less quantity of such goods imported respectively.

4. Every package or covering, whether containing goods liable to customs duty or not, apparently designed for use other than in the importation of the goods contained therein, shall be subject to the same rate of duty as would thereon be levied if imported empty, or separate from the goods contained or imported therein.

5. Whenever it shall appear to the commissioner, that the interests of the dependency may be advanced thereby, he may, by regulation, published as a government notice, and with the consent of the Governor-in-Chief, exempt from the payment of duty, either in whole or in part, any article or articles which may be imported and required for exclusive use in connection with any local industry, or in the preparation of any native product or otherwise, subject nevertheless to such conditions and for such period as the commissioner may see fit.

SCHEDULE I.

	£	s.	d.
Ale, beer, stout and porter, cider and perry, per gallon. . . .	0	0	4
Bay rum and bay water, per gallon.	0	2	0
Biscuits of all kinds including pilot and navy bread, per			
100 lbs.	0	1	0
Butter and butter substitutes, per lb.	0	0	1
Cheese, per lb.	0	0	0½
Flour, wheat or rye, per brl. of 196 lbs.	0	3	9

	£	s.	d.
Lard and lard substitutes, per lb.	0	0	0½
Meats, wet, dried, salted, smoked or cured (including hams and bacon), per lb.	0	0	0½
Oils, mineral, petroleum or kerosene, per gallon.	0	0	1
“ all other, per gallon.	0	0	6
Rice, per 100 lbs.	0	1	0
Soap, all kinds and soap substitutes, per 100 lbs.	0	3	0
Spritis, brandy and whisky, per gallon.	0	6	0
Spirits, gin, cordials, liqueurs, bitters containing spirit, and spirituous beverages not otherwise provided for, per gallon.	0	5	6
Spirits, rum, spirits of wine and alcohol not otherwise pro- vided for, per gallon.	0	5	0
Sugar, per 100 lbs.	0	2	0
Tea, per lb.	0	0	6
Tobacco, cigarettes, per 1,000.	0	2	6
“ cigars, plus 20 per cent <i>ad valorem</i> , per 100.	0	2	0
“ manufactured, per lb.	0	0	6
“ ‘plugs’ or ‘cake’, leaf and unmanufactured to- bacco, per lb.	0	0	2
Wines, plus 10 per cent <i>ad valorem</i> , per gallon.	0	2	0
Wood, all kinds of lumber in rough or sawed, by super- ficial measurement of one inch thick, per 1,000 ft.	0	7	0
Wood, all kinds of lumber planed, smoothed, grooved or tongued, but not otherwise manufactured, by super- ficial measurement of one inch thick, per 1,000 ft.	0	10	0
Wood, shingles, all kinds, per 1,000.	0	1	6
Wrecks, hulls and materials of vessels wrecked, derelict, stranded or condemned, not otherwise exempted, 10 per cent <i>ad valorem</i> .			
and after these rates for any greater or lesser quantity of such goods respectively.			

SCHEDULE II.

Agricultural implements, viz., hoes, cutlasses, agricultural forks, axes, bill hooks, mattocks, pickaxes, spades and shovels.

Apparatus and appliances of all kinds for generating, storing, conducting, converting into power or light and measuring gas or electricity.

Articles the property of any foreign government imported into this dependency for the sole purpose of furnishing, decorating or equipping the consulate of such government, provided that the like concession is granted to British Consulates by such foreign government and is certified to by the consul or consular agent.

Bags and sacks for exporting salt or other produce of the dependency.

Beans and peas not preserved in tin or glass.

Boats and boat spars.

Books, printed, bound or unbound, pamphlets, magazines, newspapers, letters and cards.

Bran, pollard, oilmeal, oats and feed.

Bullion and coin.

Carts, carriages and all other wheeled vehicles, and parts thereof.

Cement.

Clocks and watches.

- Coal of all kinds.
- Coffee and cocoa.
- Copper rods.
- Cordage.
- Corn and all other grain, the meal and other preparations thereof: rice, wheat and rye flour excepted.
- Fertilizers of all kinds, including guano and other manure.
- Fire engines and appliances for extinguishing fire.
- Fish, fresh, dried, smoked, pickled or salted (other than preserved in tin or glass).
- Fruit and vegetables, fresh.
- Hay and other grass fodder.
- Ice.
- Iron, bar and sheet.
- Live animals of all kinds, including poultry and other birds.
- Locomotives, railway rolling stock and parts thereof, rails, ties and all materials and appliances to be used exclusively for construction, equipment and operation of railways and tramways.
- Lymph for vaccination.
- Machinery of all kinds, including sewing machines.
- Meat, fresh of all kinds.
- Metal sheathing.
- Molasses, honey and syrup.
- Musical instruments.
- Oars.
- Paper of all kinds, stationery and printing materials.
- Passengers' personal baggage.
- Salt.
- School slates and slate pencils.
- Stores imported by or for use of the imperial and colonial services.
- Telegraph and telephone instruments, lines, switch boards and fittings.
- Tombstones.
- Trees, plants, vines, seeds and grain of all kinds imported for propagation or cultivation.
- Typewriters.
- Uniform : articles of, naval, military or civil, imported by any member of those services, for their personal use.
- Waters, mineral or aerated.
- Weather service articles imported for the use of the weather service of the United States of America, being the property of the United States government.

DOUGLAS YOUNG,

Commissioner, President of the Legislative Board.

Passed the Legislative Board this 22nd day of December, 1905.

L. LEA SMITH,

Clerk of the Board.

I assent to this ordinance.

J. A. SWETTENHAM,

Governor of Jamaica.

December 28, 1905.

TARIFF CHANGES

TRINIDAD AND TOBAGO.

I.—RESOLUTION OF THE LEGISLATIVE COUNCIL, AMENDING ORDINANCE NO. 18 OF 1895.

The following resolution was adopted at a meeting of the Legislative Council on June 5, 1905 :—

‘That on and after this date the duty on rum the product of and imported direct from the British West Indies (inclusive of British Guiana) be 9s. per gallon not exceeding the strength of proof, and if exceeding the strength of proof 9s. per proof gallon ; that in the case of all other spirits chargeable at the rate of 10s. 6d. per gallon not exceeding the strength of proof the charge, if exceeding proof strength, shall be at the rate of 10s. 6d. per proof gallon.

‘And that in section 3 of ordinance No. 18 of 1895, under the heading ‘Opium’, the following words in brackets : (except tincture of opium admitted by the collectors of customs as being for medicinal purposes only which shall be charged at the rate of £5 for every £100 of value) be deleted’.

II.—AN ORDINANCE FOR RAISING FUNDS IN AID OF IMMIGRATION FOR THE YEAR 1906.

(No. 38, dated December 18, 1905.)

In virtue of this ordinance, there shall be raised, levied, collected and paid for the use of His Majesty, his heirs and successors in aid of immigration upon the several kinds of produce hereinafter mentioned which shall have been raised or manufactured in the Island of Trinidad and which shall be shipped for parts or places beyond the limits of the colony on any day between the 1st day of January and the 31st day of December, 1906, both inclusive, the several taxes, rates and charges hereinafter mentioned that is to say :—

		s.	d.
On sugar.	1,000 lbs.	3	6
On molasses.	100 gallons.	3	1
On rum.	“	9	4
On cocoa.	100 lbs.	0	3½
On coffee.	“	0	3½
On cocoanuts.	per 1,000	0	3½
On copra.	1,000 lbs.	1	0

And in each of the above cases on lesser quantities in proportion.

UNITED KINGDOM.

I.—ALTERATION OF THE RATES OF DUTY ON UNMANUFACTURED TOBACCO, STRIPPED OR STEMMED.

(General Customs Order No. 28, of April 28, 1906.)

In lieu of the customs duties now payable on unmanufactured tobacco, stripped or stemmed, the following duties are to be levied on and after Tuesday, the 1st proximo :—

Tobacco, unmanufactured, if stripped or stemmed :—	s. d.
Containing 10 lbs. or more of moisture in every 100 lbs. weight thereof	3 0½
Containing less than 10 lbs. of moisture in every 100 lbs. weight thereof	3 4½

The rebate of three halfpence per pound under Section (2) of the Finance Act, 1904, is to cease to be allowed on and after the date on which these reduced rates become operative, namely, the 1st proximo.

The several other rates of duty on tobacco, manufactured or unmanufactured, are to remain unaltered.

II.—REDUCTION OF TEA DUTY.

(General Customs Order No. 30, of May 4, 1906.)

There shall be charged, on and after the fourteenth day of May, nineteen hundred and six, until the fourteenth day of May, nineteen hundred and seven, in lieu of the duty now payable on tea, the following customs import duty on tea (that is to say) :—

Tea the pound. Fivepence.

III.—ALTERATION OF DUTY ON STRIPPED TOBACCO AND OF DRAWBACKS ON TOBACCO.

(General Customs Order No. 30, of May 4, 1906.)

For the increase of threepence per pound payable on stripped tobacco under section two of The Finance Act, 1904, there shall, as from the first day of May, nineteen hundred and six, be substituted an increase of one half penny per pound ; and the drawbacks allowed by the same Act on tobacco of the following description shall, as from the twenty-first day of May, nineteen hundred and six, be reduced by the substitution for the *ordinary* rate set out in the Table of Rates of Drawback in the schedule to the said Act of the rate following (that is to say) :—

	s. d.
In the case of cigars	3 1
“ cigarettes	3 0
“ cut, roll, cake, or other manufactured tobacco	2 11
In the case of snuff, not being offal snuff	2 10
The several rates of drawback on tobacco will be as follow ⁽¹⁾ :—	
Cigars	3 5
Cigarettes	3 4
Cut, roll, cake, or other manufactured tobacco	3 3
Snuff (not being offal snuff)	3 2
The following rate remains undisturbed :	
Stalks, shorts or other refuse of tobacco including offal snuff	3 1

⁽¹⁾ Including addition of 4d. per lb. allowed, while the additional duty of Customs on tobacco, under section 2 of the Finance Act, 1900, is in force.

COMMERCIAL AGENCIES

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, etc., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

*(Mr. J. B. Jackson.)*NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., June 18, 1906.

CANNED MEAT.

In view of the charges which are being made by the press in reference to the methods of the Chicago packers, especially with regard to canned meats, I have had an interesting interview with six of the leading provision firms in this district, and on making inquiry as to the prospects for Canada's export trade in canned goods, their collective opinion is as follows:—

‘We have no buyers at present for canned goods of any description; it makes no difference whether these goods are put up in the United States, Canada, or even in England. Everything that is put up inside a tin can, and offered on the market at the present time, is quite unsaleable. The public are prejudiced against one and all alike, and all instances of ptomain poisoning are ascribed to canned meats and fish; when, however, the press comments have ceased and public opinion has cooled down, say, in two or three months' time, things will change, and the market will revert to its old position and the public will buy their old fancies, giving preference to the goods from those countries having good government inspection.’

CANADIAN CANNED MEATS.

I also asked these gentlemen for a candid opinion on Canada's canned meats, and was told that they considered them equally as good, if not a little better than the average ‘American’ brand. They also suggested that Canadian packing-houses had a great opportunity to make special efforts to place their goods on the British market, having an asset of great value in the fact that these goods are put under the British flag.

Denmark offers an object lesson to Canada. Quite a number of private firms in Denmark commenced to ship fresh pork and cured bacon to the English market; it was found on inspection here that some 50 tons of the Denmark pork was diseased, and was destroyed. The pork-packing houses in Denmark thereupon unanimously asked the government to provide adequate and sufficient government inspection, so that the meats exported, whether cured or fresh from Denmark, should be right in every particular, and that the trade of the country should not be uselessly imperilled.

CORNED BEEF.

The largest dealer in canned goods in this district informs me that the huge industrial classes in the north of England do not want fancy dishes, such as canned tongue and canned chicken; their favourite dish being corned beef in two and six pound tins. Whole families are employed from early morning till late at night in the Yorkshire mills, and a very large quantity of American corned beef is consumed in the dinner-hour, as a ready substitute instead of a hot meal, and for this reason, corned beef is in great favour amongst retail shop-keepers in this district.

CHILLED MEAT.

Some two weeks ago, a side of Argentine chilled beef was used by the work-house people in Hull, and being diseased, caused five deaths. This also intensified the feeling against canned and chilled meats in this district, and the press are loud in their demands for adequate inspection, and that no beef, except English beef, should be purchased, unless the cattle or carcasses respectively are imported from a country giving the guarantee of government inspection.

CANADIAN DIRECT MEAT SUPPLY COMPANY.

A new company has been formed in Leeds called 'The Canadian Direct Meat Supply Company.' I called on them at one of their branch shops here, and had an interview with the manager. The company is entirely financed by English capital, and has been organized on account of the great demand for Canadian goods, as against American.

Two branch shops have been opened in the industrial part of the city, at Hunslet and Beeston Hill; they buy their meat direct from Liverpool, and place no meat on sale except Canadian, a guarantee being exhibited in the window, that no meat will be sold in that shop except 'Canadian.'

The company has gained great popularity in its already short existence, and although this is the only concern of its kind in the north of England, it is expected, owing to the demand for this class of meat at the present time, that branch shops will be opened in the surrounding cities and towns, as the business develops.

JNO. B. JACKSON.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(*Mr. Edgar E. Tripp.*)

PORT OF SPAIN,

TRINIDAD, June 21, 1906.

EXPORTS OF TRINIDAD.

The total exports for year ending 31st March were £3,168,706 against £2,479,274 to same date in 1905. The exports were less than the imports by £134,905, but this difference included £82,000 excess of imports of bullion and specie over exports.

The apparent substantial increase in exports of £689,432 is to be accounted for, as I pointed out with regard to imports in report dated 7th instant, (1) by the fact of the inter-colonial steamers of the Royal Mail Company having this for headquarters and transfer station, at which to meet and receive cargo from the regular ocean boats and from each other for distribution throughout the West Indies and British Guiana, instead of transferring cargo at Barbadoes as formerly.

Deducting transshipment goods, the trade has fallen off somewhat, thus:—

	1903-4.	1904-5.	1905-6.
Bullion and specie.	£ 33,651	£ 64,499	£320,640
Transshipment	158,924	202,270	729,319
	<u>£192,575</u>	<u>£266,769</u>	<u>£1,049,959</u>

(1) See Monthly Report for May, 1906, p. 1955.

a difference in favour of year under review of a value of £783,190 in goods, hardly any of which touched the shores of the colony.

The actual exports of produce of the colony from which a truer index of progress can be drawn for the past three years, amounted to:—

1903-4, £1,627,229; 1904-5, £1,857,278; 1905-6, £1,721,905.

It should be noted, however, that the falling off is due not so much to lesser quantities shipped as to decrease in value of sugar which in the previous year was stated at about £16 per ton, against £10 to £12 now.

DISTRIBUTION OF PRODUCE.

Exports of produce of the colony were distributed as follows:—

	1903-4.	1904-5.	1905-6.
To United Kingdom	£529,211	£665,397	£445,889
British Colonies	36,917	260,558	230,842
Foreign countries	1,061,101	931,323	1,045,174

Corresponding figures for Canada were: 1903-4, £31,829; 1904-5, £247,585; 1905-6, £219,029.

For the decrease sugar is responsible for, approximately, £14,000, molasses £4,500, and cocoa, £11,000.

SUGAR.

In consequence of the end of the fiscal year, March 31, occurring in the middle of the sugar season, the annual returns do not represent the quantities or values of each year's crop, but relate to the last half of the preceding crop and the first half of the current one. Thus statistics of present crop give 36,241 tons, against 47,578 tons the year before. As a matter of fact the 1906 crop, which has already been reaped, is the largest for many years. A very noteworthy circumstance is that for the first time on record, so far as I am aware, the colony's former best customer, the United States, did not take one pound of Trinidad sugar. Practically all went to the United Kingdom and British North America, which received respectively 195,917 bags and 127,866 bags. In view of some recent statements as to there being no advantage in the Canadian over the United States market, this is surely significant.

COCOA.

The exports was a record, viz.: 285,725 bags, value £1,196,450, being composed of 248,460 bags of produce of the colony, and 37,265 bags other than produce of the colony. This industry is the more important and valuable from the fact that the great majority of the owners of cocoa estates are resident proprietors, and the profits made are for the most part spent or invested in the island. For many years France has been the largest consumer, but the United States has now taken the lead with 137,826 bags. France is next with 105,000 bags, and Great Britain with 33,223. Canada figures for 1,200 bags only, against 3,722 in 1904-5.

Should there not be an opening for a thoroughly up-to-date chocolate manufactory in the Dominion? One is now being established here?

COCOANUTS.

The cocoanut industry has of late years been a remunerative one, and is to-day more than ever so. The exports last year were 11,037,932, value £29,228. The principal shipments were:—

	1904-5.	1905-6.
To United States..	8,571,495	9,054,355
United Kingdom..	1,033,150	906,250
British North America..	610,618	659,470

ASPHALT AND MANJAK.

Asphalt shipments fell off from 128,612 tons to 103,708 tons, due probably to the formidable opposition offered by the lake on the opposite coast lately the property of the New York and Bermudez Company, which had been seized and was working by the government of Venezuela.

Regular shipments of manjak continue to be made to Europe and the United States, but notwithstanding its high percentage of bitumen—about 95 per cent—the sales have been much slower than expected and the prices lower. Owing to the high melting point considerable difficulty is experienced in treating the article. When this has been overcome, an active and profitable business may be looked for.

The Trinidad deposits of manjak are said to be the largest known anywhere. One thousand five hundred tons of asphalt were included in the year's shipments to British North America, but no manjak.

FRUIT.

The British West India Fruit Company, Limited, with British capital, and under experienced management, has been established here. The company gives ready advice and instructions, and offers a fair price for produce on the spot or at their depôts. Thus encouraged, the industry bids fair to become an important one. It increased from £803 in 1904-5 to £4,259 in 1905-6, and areas of some extent are now being planted out in various districts. The principal fruits are oranges and bananas, but many other varieties go forward in smaller quantities.

RUBBER AND BALATA GUM.

Is there no demand for rubber or balata gum in Canada? A small lot of the former was shipped thence a year or two ago, but none since. In 1905-6 the exports were:—

	Pounds.	Value.
Balta..	1,460,521	£81,826
Rubber..	9,394	1,221

The United Kingdom, France and Holland are the largest consumers, but the United States take a fair quantity.

CEDAR.

Quite a trade has sprung up in the export of cedar logs, said to be principally for cigar boxes. France, Holland and Germany are the principal purchasers.

EDGAR TRIPP.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

BRISTOL, ENG., June 30, 1906.

NEW MATERIAL FOR ROAD MAKING.

Owing to the fact that roads made of the ordinary limestone macadam are liable to be cut up by horses and vehicles, and to be affected by weather conditions—being either dusty or muddy, according as the weather is wet or dry—efforts have been made to produce a traffic and weather-resisting substance. As a result of experiments it has been proved that a material called ‘tarred slag macadam,’ if properly applied, produces a surface capable of withstanding the weight of vehicles and the jar of horses’ hoofs.

It is claimed that this material would reduce the dust nuisance to a minimum; it is clean after a shower, often cleaner than the path; it is economical from the cleaning point of view, as there is practically no slop; it is less affected by frost and snow, as being non-absorbent, there is nothing to freeze, and snow can be quickly swept or scraped off its smooth surface.

Should any municipal bodies or others be interested in this material, I shall be glad to obtain full particulars, and to forward the same to any correspondents.

ENGLISH APPLE CROP.

From all accounts to date, we may look for a very fair crop of apples in England. Rain at this time is greatly benefiting the orchards in the south-west of England, though in other parts it would appear that there has been considerable damage from blight and otherwise.

On the whole, unless exporters, have reliable advice to the contrary, they should be very sparing of their shipments of early apples, as I am inclined to think this market will be reasonably well supplied with the common sorts of apples until Christmas.

COAL TRADE.

My remarks on this subject, in Monthly Report for December, 1905, p. 1044, to the effect that Canadian importers ought to establish a permanent connection with Welsh exporters if they hope to receive due consideration in times of scarcity, are recalled, and perhaps emphasized, by the following communication just come to hand from a firm of Welsh exporters:—

‘There is great difficulty in obtaining anthracite just now as colliery people are busy, and they cater for their old and regular customers, and we doubt very much if colliery people here would put themselves out of the way to cultivate the Canadian trade, as it is very irregular, and they prefer shipping to French and Italian ports.’

BARRY DOCKS.

I have now obtained the figures for the trade of Barry docks for the year 1905.
1905—Imports, 399,966 tons; exports, 8,671,868 tons; total trade, 9,071,864 tons.

CARDIFF NEW DOCK.

During the past few weeks considerable progress has been made in the equipment of the new Bute South dock, Cardiff, and it is understood in local shipping circles that the Cardiff Railway Company hope to open the dock for traffic during September or

October next. Two new cranes and four tips have been practically completed, and four other cranes have been ordered. The embankments just outside the entrance have been cleared away, and the excavation of the channel leading to the lock, upon which the Cardiff Railway Company's new dredger has been so long employed, is now almost ready for use.

CLOTHES PEGS.

There is a demand, now being supplied by the United States, for about 10 car-loads per annum of clothes pegs, and it is suggested that Canadian firms might profitably compete for this trade. The pegs now come packed five gross in a box, and the price would approximate 1s. 9d. per box c.i.f. Bristol. It is also stated that these pegs are made out of 'waste,' so that lumbermen could manufacture them from what would otherwise be profitless material, the cost of production and transportation only having to be taken into consideration in estimating the selling price.

MONTREAL-BRISTOL DIRECT SAILINGS.

The Canadian Pacific Railway Company have just issued a circular-letter advising the trade that up to the end of August their sailings will continue from Montreal to Bristol (Avonmouth) direct. They urge that all concerned should do everything possible to support this service in order that it may be continued to the end of the summer. I have pleasure in supporting this appeal, since it must be manifest how great an advantage, to shipper and receiver alike, is this direct service, and how highly desirable it is that the trade should warrant its becoming eventually a weekly service.

W. A. MacKINNON.

AUSTRALIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING, MELBOURNE, June 11, 1906.

CANADIAN TRADE WITH AUSTRALIA.

The Acting Commonwealth Statist has favoured me—in advance of the returns being published—with the figures relating to Canadian trade with Australia during the calendar year of 1905. A comparison for the last two years is as follows:—

	1904.	1905.	Increase 1905.
Australian imports from Canada.. . .	£222,064	£226,976	£ 4,912
Australian exports to Canada.. . . .	29,352	43,288	13,936

That the returns are incomplete and misleading is self-evident to anyone conversant with the trade between the two countries. This condition of affairs will likely continue while the bulk of Canadian goods for Australia is shipped at a foreign port. Many Australian buyers of Canadian goods place their indents through New York export houses and, as a consequence, shipments from both countries are made upon one bill of lading, one insurance policy, and payment for same is covered by one bankers' draft.

Thus the values of many shipments of Canadian goods are credited to the United States in the Commonwealth customs returns, as was most conclusively proved by the Superintendent of Commercial Agencies, Ottawa, in Monthly Report for July, 1905, p. 123, in which he reviewed my report upon Canadian exports to Australia in 1904.

INACCURACIES IN AUSTRALIAN TRADE RETURNS.

I have only been in possession of the Commonwealth returns of the 1905 trade with Canada for a few days, yet I know, from personal knowledge and from hurried investigation, that there are many serious discrepancies in the figures presented. On one or two lines quite £86,000 should have been credited to imports from Canada in 1905 in excess of the values stated in the trade returns. There is no reference to the imports of furniture, tobacco or oils, and taking the latter item alone, I know of shipments of Canadian machinery oil to the value of nearly £3,000 which was imported by a Melbourne firm last year. The 1905 import values relating to Canadian printing paper, drugs and chemicals, medicines, spirits, rubber goods, vehicles and bicycles are so manifestly absurd as to scarcely require any refutation.

AUSTRALIAN EXPORTS TO CANADA, 1905.

As Australian shipments to Canada are not made at a foreign port, the export trade returns for 1905 may be taken as being approximately correct. It is gratifying to find even a modest increase of £13,936 in the exports from the Commonwealth to the Dominion last year, though the total figures of £43,288 are capable of expansion owing to climatic conditions and the reverse seasons experienced in both countries. The most noticeable increases are in fruits, meats, hides, tin and wool.

THE QUEENSLAND FRUIT FLY.

The Victorian government's entomologist's department is making rigid examination of all fruit received from Queensland and parts of New South Wales in order to prevent the fruit fly which is a native of Queensland, from obtaining a foothold in this state. Victorian orchardists, familiar with the ravages of the Mediterranean fruit fly, are alarmed at the danger of its introduction, and are always aware of the great difficulty in suppressing the pest. This fly (*Tephritis Tryoni*) is not quite as large as the common house fly. With a sharp ovipositor, the female deposits its eggs first under the skin of the fruit, and the larvæ soon burrow into the flesh, and make the fruit so offensive as to be unfit for human consumption. Apricots, peaches, plums, cherries, oranges, bananas and tomatoes are attacked by this orchard scourge.

The fly is even able to drive its ovipositor through the thick skin of the pineapple and deposit its eggs beneath. This destructive pest has been known for many years, but it is only during the last decade that it has become a menace to fruit growers. Spraying is of little value, as the eggs are safely buried under the skin of the fruit. All that can be done in the way of suppression when the fruit fly gets established in an orchard is to pick off and destroy infected fruit and treat the soil under the trees (where the grubs bury themselves) with a solution of sulphate of iron.

WARNING TO BRITISH COLUMBIA FRUIT-GROWERS.

The inspection of all Australian fruit landed at British Columbia ports should be subjected to most careful scrutiny by the authorities so that the Queensland fruit fly will not be introduced to Canada.

PRODUCTION OF AUSTRALIAN WINES.

The soil and climate of many parts of Australia have proved to be well adapted for the growth of the vine, and the wine-producing industry is expanding at a greater rate than the demand for the product. Inferior wines are sold in Great Britain as Australian, and determined efforts are being made to remove such unfair competition by prosecuting the vendors. Although several efforts have been made to obtain a market in Canada, the results obtained have been very discouraging to Australian exporters. The following return shows the wine production in the several states for 1905:—

CANADIAN 'NEWS' PAPER IN AUSTRALIA.

Large shipments of Canadian news paper have been coming forward this year to Australian ports, and, upon making inquiries, I find that the quality is giving satisfaction to the proprietors of the principal daily and weekly papers in Melbourne. I have seen specifications of some 3,800 tons of Canadian paper which was shipped at New York for Australian and New Zealand ports since January last. Of that total nearly 400 tons was recently lost in the wreck of the SS. *Oakburn*, on the South African coast. When large paper mills are established in British Columbia they should be in a position to supply the requirements of Australasia, as the distance is approximately about half of that to New York, besides which the long inland railway transportation charges would be avoided.

THE AUSTRALIAN COMMERCE ACT.

The Commonwealth Commerce Act came into operation on June 8, after which date any trade description applied to imports or exports must be a true one. The regulations, which make the application of trade descriptions compulsory in the case of imports or exports of apparel, manures, jewellery, articles of food or drink for man, medicines, seeds and plants, have not yet been finally approved by the Australian Customs Department. It is not at the present time compulsory to mark the trade description on the goods or packages, but if the goods or packages are marked with a trade description it must be correct, otherwise the penalties of the Act will be enforced. The complete regulations will have to be gazetted for three months before they come into effect. I hope to forward copies of the regulations by the next mail to the Department of Trade and Commerce, Ottawa, where they will be available to those interested.*

CANADIAN TRADE NOTES.

Indents for the usual lines of Canadian manufactures are going forward by this mail, amongst which are orders for agricultural implements including drills new to Australia, furniture, aluminum goods, ice skates, I.R. hose, rubber and lacrosse shoes, &c. Indents are also going forward for Newfoundland cod oil, which should be of interest to producers of this commodity in the maritime provinces.

YIELD OF TASMANIAN APPLE ORCHARDS.

In Tasmania apple orchards are invariably kept under a high state of cultivation. The land is all turned over in the winter and kept in as friable a condition through-

* The copies referred to have been received at the department..

out the year as possible. Natural and artificial manures are used, and both winter and summer pruning done. During 1905, when very fair crops were harvested, the average return per acre was about 400 bushels of marketable fruit from trees in full bearing. There were many instances of orchards in Tasmania producing from 800 to 1,300 bushels per acre, but these figures are for favourably situated gardens that are kept in the highest state of cultivation and receive the closest attendance. Young orchards have been planted out in every direction during the last six years, and planting is still being continued.

The estimated production of marketable apples in 1905 was 1,250,000 bushels, but it is considered that within three years from date—say 1909—this quantity will be more than doubled by the young orchards now coming into full bearing. Apple production in Tasmania is increasing at a considerably higher rate than the local Australian demand, which means that the big surplus that will shortly be available must be exported, as it would be impossible for local markets to absorb such additional quantities.

VALUE OF TASMANIAN APPLE ORCHARD LANDS.

The value of apple orchard land in Tasmania varies considerably, but as much as £245 (\$1,192.33) per acre has been paid for orchards in full bearing—for land 20 miles from Hobart. At the present time the fair average value for orchard land in full bearing is estimated from £100 (\$488.66) to £150 (\$730) per acre. By competent judges of the situation, it is thought, with the big increase in production—and a probable reduction in prices obtainable for fruit—that the values of orchard land must depreciate, unless other markets can be successfully exploited. It is estimated that in an orchard of not less than from 30 to 40 acres that best fruit can be produced which would give a fair return at from 2s. (48 cents) to 2s. 3d. (54 cents) per bushel on the trees. The returns for some recent years have been considerably higher, and a large profit upon cost of production has been obtained by growers.

METHOD OF PLANTING APPLE TREES IN TASMANIA.

The great majority of Tasmanian orchards are planted with trees 16 feet by 6 inches apart from each other. This runs out exactly 160 trees to the acre, and almost all the more recently planted trees are put out in this way. In a few places some growers have planted their trees 12 feet by 18 feet and 18 feet by 18 feet apart. If many Canadian orchards were planted in a similar way they would contain about double the number of trees.

FAVOURITE APPLES GROWN IN TASMANIA.

The big bulk of apples grown and exported to England from Tasmania are of the following species: Scarlet Pearmain, Adams Pearmain or King Pippins, Cox's Orange Pippins, New York Pippins or Cleopatra, Sturmer Pippins, Jonathans, Stone Pippins, French Crabs, Ribston Pippins, and occasionally the following softer varieties, but not to the same extent as those first named—Crow Eggs, Alexanders, Prince Alfreds, Blue Pearmain, Blenheim Oranges, Alfristons.

SIZE OF TASMANIA APPLE CASES.

The standard case used in Tasmania for exporting apples is of the following dimensions: 8½ inches by 14 inches by 18 inches inside measurement. The outside measurement of the case for freight purposes is 10 inches by 15 inches by 20 inches. The cases are made of Tasmanian hardwood (Stringy Bark, Blue Gum or Swamp Gum) having inch ends with ¾-inch sawn palings for sides, tops and bottoms. The bottom comprises two palings each 5 inches by 20 inches, the sides each two pieces 7½ inches by 20 inches, and the lid one piece 10 inches by 20 inches, the outside measurement equalling 1 foot 9 inches cubic. The cubical contents of each case is 2,237 inches. Approximately, 23 cases run to a ton measurement.

METHOD OF PACKING APPLES IN TASMANIA.

The universal method of packing apples in Tasmania for export in cool chambers to England is by wrapping each apple separately in a sheet of white sulphite wrapping paper, either 10 inches by 7½ inches for medium sized fruit, or 10 inches by 10 inches for large fruit. Paper weighing 7 lbs. per ream and 9 lbs. per ream is used, the heavier paper, however, being the better and more general, although naturally the 7-lb. paper comes 3d. (6 cents) or 4d. (8 cents) per ream cheaper than the 9-lb. A ream comprises 3,840 sheets 7½ inches by 10, or 2,880 sheets 10 x 10 inches, the paper in the first place being 20 by 30 inches, but cut to the sizes mentioned. After wrapping the apples, they are then placed in the case in rows until the case is full, when the lid is nailed on and the case is ready for export. During the last two years, however, in addition to wrapping each apple and packing as stated, many growers are now placing a small pad of wood wool at the bottoms and tops of cases to prevent bruising, and a small pad of this wood wool is of the very greatest benefit, fruit arriving at its destination in almost perfect condition, whereas without the pad, fruit often arrives at its destination in a more or less bruised condition.

FURTHER IMPROVEMENTS IN PACKING APPLES.

The leading Hobart shippers of apples are impressing upon growers the advantage to be derived in the British markets by having the number of apples contained in each case branded on the ends of the case, or the net weight of the fruit itself, but so far neither of these suggestions have been carried out to any great extent. It is, however, gradually being done, and in the near future it may be the universal practice in Tasmania.

EXPORTS OF TASMANIAN APPLES TO GREAT BRITAIN.

The exports of apples from Tasmania to Great Britain in the years 1903 to 1906, inclusive, were as follows:—

Year.	Cases.	Estimated Value for Fruit and Case on the Hobart Wharf.	
1903.	298,000	5s.	=\$1 21
1904.	574,000	3s.	= 0 73
1905.	366,644	5s. 6d.	= 1 33
1906.	261,664	6s. to 7s.	= 1 46 to \$1 70

The average values indicated include the fruit and the case already packed and delivered on the Hobart wharf for shipment. The value of the cases would be 6d.—12 cents—each, so that to arrive at the annual net value of the fruit contents, the cost of casing would have to be deducted from the rates mentioned above.

TOTAL EXPORTS OF TASMANIAN APPLES.

The 1904 trade returns are the latest available for Tasmania, from which I find that the total exports of apples in that year were 560,163 centals, valued at £298,033. To the other Australian states were exported apples to the value of £136,199, leaving for export to overseas countries—chiefly Great Britain—£161,834.

PROBABLE EXPORTS OF TASMANIAN APPLES TO GREAT BRITAIN, 1907.

The probable exports of Tasmanian apples to Great Britain in 1907 will be from 600,000 to 750,000 cases, but, of course, it is impossible to estimate what net return will be received for the fruit on the Hobart wharf. Had it not been for the unprecedented failure in the crops this year, the shipments to England during the present season would have reached about 650,000 cases at least, tonnage arrangements having been actually made to forward that quantity of fruit, but freight contracts were afterwards cancelled, owing to the failure of the season's crop.

APPLES INVARIABLY EXPORTED IN COLD STORAGE.

All shipments of Tasmanian apples to England, and other distant oversea countries, are invariably made in cold storage. Apples are supposed to be carried at a temperature as near 34 degrees Fahrenheit as possible, but a variation is allowed from 32 to 40 degrees.

HOW MARINE FREIGHTS ON APPLES ARE CALCULATED.

Until this season, the freights on Tasmanian apples were calculated upon a measurement basis only, but recently some of the steamer companies carried the fruit at per case. The freight contracts, however, are all based upon a rate of per ton measurement, it simply being a matter of convenience if a rate per case is charged. Had the shipments this year been up to expectations, the rates would likely have been slightly lower, for the average freight paid—from Hobart to London—per case of 1 foot 9 inches, during the 1906 season, was 2s. 9d. (66 cents) per case. The distance from Hobart to London is over 11,000 miles.

WHY TASMANIAN APPLES REALIZE HIGH PRICES.

It is contended that Tasmanian apples realize higher prices than Canadian or United States apples in Great Britain, which contention is doubtless correct, and, further, is capable of explanation. Large shipments of Canadian apples reach the United Kingdom from October of each year, and during the few following months the British market is liberally supplied, thus causing more competition and a consequent reduction in prices. Tasmanian apples are grown in the reverse season, for the Hobart export season commences about the middle of February in each year, and weekly shipments are regularly continued until about the last week in April. The voyage occupies from six to seven weeks, and the Tasmanian fruit arrives in London when apples grown in the northern hemisphere are practically consumed, hence the proportionately higher prices realized for the quantity sold. The arrangement made by Hobart shippers in forwarding limited quantities of apples each week throughout their export season—causing no glut in the London and provincial markets—has beyond question an appreciable bearing upon the results attained.

CONTROL OF EXPORTS OF TASMANIAN APPLES.

The exports of Tasmanian apples to London are practically controlled by two shipping firms—directly interested in the industry, who, conjointly, charter steamers at the lowest freight rates, and co-operate with growers in regulating weekly shipments throughout the season. The distribution and reserve price for the sale of fruit in England is under careful management, in addition to which cold storage is available should the market be glutted upon arrival of shipments. Tasmanian apple growers look to the success of their co-operative scheme in greatly reducing charges and incidental expenses which will enable them to meet the competition from other countries in the British markets.

D. H. ROSS.

P. B. MACNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, July 10, 1906.

DEMAND FOR GOODS LIMITED.

In any consideration that the manufacturers and exporters of Canada may bestow upon the market here, it should always be borne in mind that while the Island of Newfoundland is the twelfth largest in the world, and the oldest colony of Great Britain, the total population is only some 220,000, and that therefore the demand is a limited one.

FOREIGN TRADE CONSIDERABLY CURTAILED.

Foreign trade has been considerably curtailed in recent years through the establishment of local industries, all of which seem to be in a flourishing condition. In fact the general trade of the whole colony may be said to be in a very prosperous state, and while the fishing industry which is the mainstay of the people continues as remunerative as it has been for the past few years, this satisfactory condition of affairs is likely to continue.

POPULATION PRINCIPALLY IN SMALL SETTLEMENTS.

The population outside the city of St. John's, which contains about 30,000, and the town of Harbour Grace, numbering some 10,000 people, consists of small settlements spread around the coast line in a narrow fringe, the interior being to a great extent uninhabited, although in recent years considerable progress has been made in lumbering operations giving employment to a number of men who in former times had to depend entirely upon the fishing.

Only a small proportion of the land appears to be adapted to cultivation, and farming is therefore carried on only to a very limited extent. This, of course, necessitates the importation of nearly the whole of the food supplies for the people, with the exception of fish.

EXPORTS AND IMPORTS.

The following comparative statement of exports and imports at the port of St. John's for the period from January 1, to July 4, may prove of some interest to the readers of the Weekly Report. The customs returns for the whole of the colony up to June 30 last, will not be available to the public for some weeks yet.

TABLE OF EXPORTS.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B, YOKAHAMA, June 27, 1906.

A PROFITABLE INTEREST IN JAPAN.

The tourist traffic forms an important item in the trade of this country. Besides the hotel and transportation interests, there are thousands inclusive of the artisan class, the interpreters, the guides, the tea houses, the jinrikisha coolies, and others in a variety of ways, who depend largely upon the receipts from that source. There was a falling off in 1904 because of the war; but last year, notwithstanding the war effect, showed an increase, that has been continuing for some years past, but with a peculiar difference. Tourists, apart from primarily business visitors, usually showed a large majority of Occidentals. But during the war two years, the Asiatic travel, with a better understanding of the situation, continued its increase, while the European and American fell off, attributed by the native press to the deterrent effect of the risks incidental to war time.

This year, however, to the end of April, according to the Japanese press after investigations, the previous ratio of increase has been resumed, and if it continues proportionately for the remaining eight months, will exceed that of last year by 80 per cent.

The Oriental visitors are 90 per cent from China. The Occidental visitors of this year are classified as follows: Americans, 1,700; Russians, 1,150; British, 1,094; Germans, 318; French, 93; other nationalities, 161.

The amount of money spent in Japan by tourists and those who may be classed under that head, is estimated by the Department of Finance at 18,708,000 yen in 1903; at 15,603,000 in 1904; at 18,085,000 in 1905, and at 10,354,000 in 1906 to the end of April. The estimate of comparative Oriental and Occidental expenditure is 736 yen for each of the former, and 1,823 yen for the latter. This estimate is given as approximately correct, and doubtless it is so, since the hotel registers have a nationality column, and the police all necessary facilities for supplying the information.

That foreign interest in Japan and the Japanese is taken to be deep-seated and lively enough to continue for some years, is accepted as the basis for a good deal of investment. Hotel accommodation admitted to be quite insufficient for this year's business, is much talked about, especially for Tokyo. The providing of foreign food and conveniences more certainly, at interior points, is also a realized necessity. These and other and incidental needs, when being supplied, will call for foreign importations more or less of all kinds, to the benefit of foreign trade. It should follow, therefore, that the world's interest in Japan will prove to be profitable not alone to the Japanese.

ESTIMATES FOR 1907.

The Finance Department of the Imperial government are engaged in preparation of estimates for the next fiscal year, and the draft is expected to be delivered early

next month. It is generally believed, says a vernacular journal, that the national expenditure for next year will be enormously increased, owing to each department pursuing the policy of developing what are called the post-bellum works. Under these circumstances each department has been prompted to undertake new works without reserve, with the natural result of an enormous expansion of state expenditure.

CONSTANT MANURE MARKET.

The demand for fertilizing products is becoming lively. This trade has its seasons; although, being of staple importance, it is open to take advantage of opportunity whenever it may offer.

Phosphate is the most actively inquired for. It is brought here in cargo quantities mainly from Christmas island, and I believe other islands of the East Indian Archipelago. From these islands guano is also imported. United States phosphate from the Southern Atlantic states, is known here, but because of the distance the importation so far as can be ascertained is not large. Although phosphate is perhaps the most desirable plant-growth agency, there is a limit in respect to price at which the demand sheers off to other products.

The market price for phosphate c.i.f. Japan ports, good quality, is about \$15 (gold) per ton of 2,240 lbs. The additional cost of chemically treating per ton is put at \$3.75. The dealers here prefer to import the raw material for the reason that both bulk and weight, they say, increase as the result of the addition and the solvent action of the acid.

If this is correct, the possibility that I have heretofore suggested, of Canadian phosphates from Eastern Canada being available after treatment, must be discarded.

Any known fertilizer will be acceptable to this market, the value depending upon the high or higher percentage of either phosphate or ammonia. And there is nothing to be done in the way of actual business transactions unless samples have first been received here. Any sample sent to one dealer should be in double cotton bag, not less than the greatest in weight that can be sent by parcel post.

The importance of the fertilizer trade will be indicated by the sources and values following:—

	Value in Yen.
British India.. . . .	322,167
China.. . . .	457,220
Dutch India.. . . .	11,842,787
Corea.. . . .	480,124
Strait Settlements.. . . .	16,138
Asiatic Russia.. . . .	37,392
Great Britain.. . . .	4,717,736
Germany.. . . .	624,836
United States.. . . .	919,178
Canada.. . . .	34,574
Australia.. . . .	257,425
Other countries not indicated.. . . .	2,967,473

(1 yen = 50 cents).

Of the imports from Great Britain, the principal are sulphate of ammonia and phosphates, the remainder being bone, oil cake, phosphorites, and nitrate of soda.

The use of artificial fertilizers is said by the *Japan Times* to have taken a decided impetus since industrial effort has settled down to business after the war. The Artificial Fertilizer Company of Tokyo have increased their facilities by installing additional boilers and engines bought from England, and pulverizing machinery from the Krupp Works, capable of increasing their output of phosphatic fertilizer at the rate of 5 to 6 tons per hour. The Copper, Sulphuric Acid and Manure Company, at Okayama on the Inland Sea, southward of Kobe, is preparing for a monthly output of 80,000 pounds of copper, 4,000,000 pounds of sulphuric acid, and 100,000 bales of manure.

GREAT FOREST IN FORMOSA.

According to the *Japan Times*, a vast forest of Japanese cypress exists in Arizan, Kagi district, Formosa. The tree generally measures 5 feet in diameter, but some are so big that the diameter reaches 24 feet. The amount of timber to be obtained from the forest is almost beyond estimation. The Governor General of Formosa has decided to grant the forest to a private concern. Mr. Goto, expert of the Aomori Forestry Office, and Mr. Maruyama, of the Tokyo Forestry Office, have resigned in order to join the concern. The latter will be shortly organized in a definite form.

TECHNICAL COLLEGES.

The Department of Agriculture and Commerce has decided to grant subsidies this year to the Kyoto Weaving and Porcelain Experimental Colleges, the Saitama Dyeing School, the Gumma Industrial Experimental School, similar institutions at Osaka, Yamanashi, Fukushima, Yamaguchi, Kukui, and Ehime, and the Iwate Weaving School.

SAVINGS BANKS GOOD SHOWING.

According to the investigations for the month of May, the amount of deposits in the postal savings banks throughout Japan is 54,501,431.47 yen, and the number of depositors 6,033,851. This shows an increase of over 1,189,336 in the amount of deposits, and an increase of 114,362 in the number of depositors, as compared with the end of April.

SEVERAL EXHIBITIONS.

Information from the Tokyo Chamber of Commerce is to the effect that the exhibition projected to be held at Mukden is still under consideration. Japanese population and interests are rapidly on the increase in the new China-Russian territory, and the project of an exhibition is much supported by the more energetic exploiters. Later newspaper reports are to the effect that arrangements have been concluded, although there is yet no official notice, as promised, to that effect.

Information, given by the Governor of Tokyo-fu, confirms reports to the effect that the Tokyo Industrial Exhibition will be opened at Ueno Park in Tokyo, on the 20th March, next year, and will remain open until June 20. The exhibition list includes agricultural and forestry products, machinery, paper, pulp, beverages, chemicals, &c.

The National or International Exhibition is a certainly coming event. The Minister of Agriculture and Commerce, speaking on a public occasion recently, said (*Japan Times* report, June 20):—

‘The National Exposition was under ordinary circumstances to be held once in four years, and accordingly the sixth should be opened next year. During the two years past, however, the country was too much occupied with the war to consider the exhibition. On the other hand it was incumbent upon the nation to make the next exhibition as great an event as possible, worthy of Japan and its people after the most memorable war the country had ever engaged in, and its successful issue. In view of these facts the government had decided to postpone the exhibition, which was due next year, to some future time, so as to give exhibitors an opportunity of making ample preparation. The investigation committee was the outcome of this decision, and he bespoke earnest effort to make the event, to come in the near future, one of the grandest yet held in the country.’

RAW SILK TRADE OF JAPAN.

The rise and fall of this trade, observes the *Oriental Economist*, appears to be mainly influenced by the economic condition of the purchasing countries and the crops in Japan. A glance at the following table will reveal the fact that the fall in prices

stimulates the demand, and this is, as a rule, followed by a rise in price and the consequent falling off in demand.

The export of raw silk for last year, compared with 1904, was very unsatisfactory. The trade in 1904 proved prosperous, the amount exported reaching 165,000 bales, whereas in 1905 it decreased to 122,000 bales. The export statistics for the last ten years are as follows:—

	Quantity. Bales.	Value. Yen.	Price per 100 Kin. Yen.
1896.	69,010	28,830,000	736
1897.	124,742	55,631,000	804
1898.	81,994	42,047,000	869
1899.	102,310	62,681,000	1,053
1900.	75,545	44,626,000	964
1901.	146,917	74,007,000	851
1902.	137,230	76,769,000	952
1903.	117,935	74,277,000	1,017
1904.	165,379	88,741,000	919
1905.	122,778	71,741,000	992
Average for ten years	114,385	61,939,000	921

1 yen = 50 cents. 100 kin = 133 lbs.

As shown above, though the export of raw silk has been subject to fluctuations, it has, on the whole, been making steady progress.

With regard to the prospects of the silk crop this year nothing definite is known.

ALEXANDER MACLEAN.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, July 4, 1906.

TRADE OF NORWAY IN 1905.

The total weight of the imports to Norway was in 1905, 4,551,193 tons, and the value, 312,336,300 kroner (\$83,289,680). The total weight of the exports was in the same year 4,491,908 tons, valued at 217,960,000 kroner (\$58,122,690). Herein is included 1,493,513 tons iron ore, &c., imported from Sweden and again exported from Norway. The import value of this ore is figured to be 12,701,500 kroner (\$3,387,070), and its export value at 14,195,100 kroner (\$3,784,270).

The trade of Norway during 1905 shows an increase as compared with the previous four years, both as regards imports and exports. A detailed statement is not yet available, but shall be included in one of my later reports.

EXPORT OF WOOD-FLOUR FROM NORWAY.

A product, for which there has been a steadily increasing demand abroad, is wood-flour. While this product as late as in 1900 was not the subject of special mention in the official Norwegian statistics, the figures for the following years show a very large increase. The export has been:—

Year.	Weight. Lbs.	Price per 220½ lbs.
1901..	245,927	\$1 07
1902..	345,136	1 07
1903..	782,870	1 07
1904..	2,888,226	1 20
1905..	5,292,980	1 20

The principal part of this has been exported to Germany and England, where it is used by the oil cloth factories, partly also by dynamite factories. The wood-flour is, as a rule, shipped in sacks of 220½ lbs. net each. There have been built in Norway during the last few years several factories for the production of wood-flour; but many of them have been burnt down, very likely by self-igniting, so particular care is required in the manufacturing of this article.

CHANGE IN THE NORWEGIAN CUSTOMS TARIFF.

The Department of Finance and Customs has recently resolved, that until further notice mowers may be imported into Norway free of duty.

IMPORT OF MOWERS INTO NORWAY.

It may be added in connection with the above, that a considerable number of mowers is being imported from the United States, McCormick, Walter A. Wood and Deering Manufacturing Co. being best represented. Of Canadian makes I have only noticed the Massey-Harris Co's., which, as far as I have learned, are giving entire satisfaction.

CONTINUOUS INDUCTION FURNACE FOR ELECTRIC SMELTING.

Having in my previous reports mentioned different new Norwegian and Swedish patents for electric smelting, and as these reports seem to have been of interest, judging from the correspondence I have received after each such report, I inclose a circular* describing a new patent 'Continuous Induction Furnace' constructed by Mr. Albert Hionth, C.E., of Christiania, and have obtained his permission to send its description to your department to make use of it in any way you may see fit.

THE BREWING INDUSTRY IN DENMARK.

In the year 1905 there were in Denmark 42 breweries making so-called 'taxable' beer, that is beer containing 2½ per cent alcohol and thereover. The production of such beer in 1905 was, according to the reports of the Statistical Bureau, 674,149 barrels. Of the 42 breweries 5 are situated in Copenhagen, and the remaining 37 in the smaller cities. The average production of these 42 breweries in 1905 was about 16,100 barrels, as compared with 17,000 barrels in 43 breweries in 1904.

While the use of taxable (strong) beer since 1892 was increasing steadily until the year 1901, when the increase had reached 42 per cent, the year 1902 showed a sudden decrease of 52,266 barrels, and during 1903 and 1904 the production showed no change, while in 1905 there was a further decrease of about 13,000 barrels, so one has to go way back to 1896 to find a lower production.

Also the use of brandies and wines in Denmark shows a decrease during the later years, but on the contrary the use of the weaker sorts of beer (for which no taxes are paid) shows a considerable increase. While in the finance year 1899-1900 the production of untaxable beer was about 50,000 barrels, it was, in the year 1904-1905, 101,000 barrels.

In Denmark in 1905 there were 379 breweries making untaxable beer, of which 8 were in Copenhagen, 164 in the smaller cities, and 207 in the country districts. In all there was produced of such beer 182,501 barrels.

* The circular referred to may be seen at the department.

WAGES FOR FARM LABOURERS IN DENMARK.

The Danish Statistical Bureau has recently issued statistics over the wages paid on Danish farms during the year 1905. A hired man is, on the average, paid 281 kroner (\$74.93) per year, with board and lodging, and a hired girl 180 kroner (\$48). On the continental Denmark (Jylland) the wages are somewhat higher for men, viz.: 297 kroner (\$79.20). The average daily wages for a farm hand on his own board is 2 kroner (53 cents) during the spring and summer, 2½ kroner (67 cents) during harvest, and 1½ kroner (40 cents) during winter. For occasional working men there is paid, according to the season, respectively kroner 2.30 (61 cents), 2.82 (75 cents) and 1.72 (46 cents).

The statistics also contain information about the working hours, which are 10½ hours during spring and summer, 10½ to 11 hours during fall, and 8½ to 9 hours during winter.

C. E. SONTUM.

CITY TRADE BRANCH.

REPORT BY CANADIAN REPRESENTATIVE.

(*Mr. Harrison Watson.*)

78 BASINGHALL STREET,

LONDON E.C., ENG., July 6, 1906.

PROSPECTS OF ENGLISH FRUIT TRADE.

Upon making further inquiries we are informed that there is every prospect of the English apple crop being a good one.

Our informant, all the same, thinks that there will be a considerable demand for Canadian apples, as they are held in good favour by the trade.

At the same time we have inquired as to the prospects of fruit pulps being wanted.

At the present moment it is somewhat too early to arrive at an opinion, but the yield of raspberries and similar fruit is likely to be pretty good.

As you are probably aware, several prosecutions which have taken place in cases where fruit pulps of an inferior quality have been seized by the sanitary authorities, have created a certain amount of prejudice against fruit pulps generally, and it will, therefore, be necessary that any shipments made to this country shall be of the highest quality.

HARRISON WATSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE EXCHANGE, SYDNEY, AUSTRALIA, June 12, 1906.

TRADE OF AUSTRALIA.

In my last report there was some apprehension owing to the low rainfall, but, as stated, there were prospects of rain shortly. These prospects have been realized, and the rainfall for the month of May was beyond the average. It was very widespread, and while not covering the whole of Queensland and New South Wales to the extent desirable, yet it has been sufficient to supply water where it promised to be short and to keep the grain crops growing. The prospects of trade are therefore rather better than in my last report.

The Commonwealth customs reports show that for the first three months of the year the imports were £1,250,214 greater than for the similar three months of 1905. The exports show an increase of £5,961,083 for the same period. This is a remarkable increase, but as the busy season is over it is not likely to show a proportionate expansion throughout the year. The inter-state trade also shows very proportionately large increases over those of the over-sea trade. New South Wales trade for the first four months showed an increase in imports of £804,679, with an increase in exports of £3,416,245.

BANKING STATISTICS.

The banking statistics support the trade view as to the rapid improvement in the financial condition of the country, and are abnormal. The following figures may be of interest, being the averages for the March quarters of the years specified:—

	1904.	1905.	1906.
Total deposits	£33,524,165	£35,546,582	£38,903,011
Coin and bullion	6,726,310	7,057,510	8,828,126
Advances	33,774,909	31,916,172	31,537,452

In the two years, deposits have increased by £5,378,886, coin and bullion by £2,101,816, while the advances have decreased by £2,237,457. The advances made during the drought time are evidently being rapidly liquidated. The bank averages for the other states are in proportion. In Victoria in the two years, the deposits have increased by £5,708,701, coin and bullion by £2,060,112, while the advances are £434,847 less. Besides making advances to the governments, a very considerable quantity of money from Australia has been sent to London for investment. These increases in deposits have been in spite of the effect of the reduction of the rate of interest allowed upon them a year ago, therefore reductions have since been made.

TRADE OF NEW ZEALAND.

The trade of New Zealand is very much of the character of that of Australia. For the first three months of the year the increase of imports has been £367,295, and the increase of exports £611,382. In the case of New Zealand, the increase is almost wholly due to the advanced prices of wool, though the exports of frozen meat during March and April has very largely increased, while there has been a falling off in the

exportation of butter, with some little increase in that of cheese. The money market in New Zealand has not been affected by the increase of exports over imports to the same extent that it has in Australia, but one bank as yet has reduced its rate on deposits there, as the government maintains a firm rate for deposits in the post office savings bank.

TRADE OF FIJI.

A newspaper statement of the trade of Fiji for 1905 is as follows:—

	1904.	1905.
Exports.	£586,237	£702,362
Imports.	436,241	438,112

This shows a trifling increase in imports, but the very considerable increase in exports of 20 per cent. The islands are developing their resources through the extension of areas devoted to the cultivation of cane and other products.

THE ENCOURAGEMENT OF THRIFT.

The premier of New Zealand has announced his intention of introducing a Bill for the purpose of stimulating economy and the encouragement of thrift. It is proposed that the people shall be encouraged to make deposits in the post office to a fund, out of which annuities shall be paid. The government will supplement the deposits by liberal grants, varying with the condition of the depositor. The supplementary grants will be larger to a married man than to a single, and larger to one with children than to a married man with none, and, further, it will be increased in proportion to the number of children. The colony has adopted a system of old age pensions, and the premier has hopes that in time his scheme will do away with these pensions. He proposes also to assist the friendly societies in doing a similar work, and if the contributor to the fund is a member of a friendly society the grant will be larger than if he is not.

INSURANCE.

The steamer *Oakburn*, which left New York on the 18th April, was wrecked some distance from Capt Town, South Africa. She carried Canadian goods, as is generally the case with ships of this line. One Canadian shipment of considerable amount, I am advised, was uninsured and the loss is likely to be heavy. Whether this failure to insure was due to the failure of instruction or the neglect on the part of the New York shipping house, I am not informed. I do know that there have been cases in which it has been due to the neglect of the New York shippers. It is, therefore, of the utmost necessity that the Canadian exporting firm shall promptly scrutinize the documents which it receives to see whether an insurance has been effected or not.

ADVISE NAME OF SHIP.

Canadian exporters do not see the importance of notifying the consignees of the name of the ship which carries the goods and the date of its sailing. When shipped via Vancouver this is not of much importance, but when shipped via New York, or still more so when via England, it is of the highest importance. In March some goods were shipped via London, England, the drafts and railway shipping receipt reached New Zealand in April, but up to the time of my information, no one there knew where the goods were. The consignee refused to accept the documents and the bank is concerned as to whether it should not return them to Canada. The goods may have arrived and may be in bond. If so it will involve expense, for which a claim will undoubtedly be made upon the exporter. All this annoyance would have been obviated if the exporter had insisted upon receiving information of the ship which carried the

goods and the route which it would take to New Zealand from London, and thus enable his customer to have known when they arrived at his nearest port. One firm, in advertising the arrival of one of their steamers, inserts in the newspapers the names of the ships which carried the goods from Canada to Liverpool or London. The others do not do so.

FREIGHTS.

My attention has been called to some curious anomalies in the freights charged upon Canadian shipments both by the way of England and New York. In one case I was shown that goods could have been carried by the way of Vancouver at 10 per cent less than the rate charged. The shipment via Vancouver would have involved a lower rate of insurance and nearly half the time in the carriage of the goods. The number of routes now open require more than ever great care in ascertaining the best and cheapest route for transferring Canadian goods to Australia and New Zealand.

POTATOES.

Owing to disease the potato crop of New Zealand is largely a failure, so much so that I am informed that there will be no surplus of wheat or oats to export from the colony this year, owing to the increased demand for home consumption in lieu of potatoes. Dry weather and other causes have also affected the Australian-Tasmanian crop. Prices are now high, quotations being in Sydney £8 per ton for best varieties, and in New Zealand, £10. Prices are likely to go higher in September next, and if British Columbia has a surplus, in all probability a good demand would be found for it in New Zealand, Queensland and New South Wales.

APPLES.

Notwithstanding the failure of some of the shipments last year, there is likely to be inquiries for good Canadian apples in October next. The prosperous condition of Australia has increased the number of purchasers of high class fruit, hence there will be a demand for an increased quantity, for which good prices will be paid. The best dessert fruit is now commanding 15s. per bushel here wholesale, and the prices will be higher in October. The *Moana* is undergoing improvements, amongst which is the installation of cool chambers. The three ships of the line will then be equipped with these chambers and be enabled to carry fruit under excellent conditions.

OATS.

If New Zealand is unable to supply any oats to Australia there should be a market for Canadian oats in October, November and December. The prices in Sydney are quoted at from 3s. to 3s. 2d for heavy feed oats. The prices may not go much higher. Canada appears to have no surplus of oats, peas or beans to ship here at present.

FLOUR.

A Sydney miller who has visited the east in the interests of his firm, reports that there is a great future for flour in the Malay States and China. At Hong Kong a mill was in the course of erection by a United States firm, which would import wheat to meet its requirements. The boycott was still seriously affecting United States exports to the advantage of Australian products.

PREFERENTIAL TARIFF.

The premier of New Zealand has been in Australia for the past month. A part of his mission was an effort to secure a reciprocal trade agreement with Australia.

The newspapers report that some agreement has been arrived at, which the parliaments of the two countries will be asked to accept. The last session of the present Commonwealth Parliament was opened on Thursday last. The Speech from the Throne contains this paragraph:—

‘Negotiations initiated by my advisers for preferential trade with South Africa, with New Zealand and with other parts of the empire have now been far advanced, tentatively as is desirable in view of the present position of the Tariff Commission inquiry. It is hoped that a Bill will be introduced during the session providing for the expansion of our commercial relations under the flag by means of which we may reciprocally share their advantages with other peoples of British birth to whom we desire to be more closely united.’

OTHER LEGISLATION.

The speech announces the introduction of Bills for the granting of bounties for the encouragement of Australian industries and for the protection of Australian policy-holders in foreign life insurance companies. In all probability a Bill will early be introduced dealing with combination and trusts, the intention being to penalize the introduction or the home production of goods by any corporation creating a restraint of trade to the detriment of the public.

WOOL.

The wool year closes at the end of this month, but the bulk of the business for the twelve months has been done. The net production of the state can now be fairly estimated and it is given as 805,189 bales, as compared with 655,125 last year. This is an increase of 150,364 bales. The prices are gratifying to the pastoralists, and the prospects for the coming year are excellent. Shearing will begin in July, and it is estimated that there will be at least forty-five millions of sheep to be shorn. In 1902 the drought had reduced the flocks to about twenty-six and a half millions. It is probable that at the end of this year the number will be doubled.

EXPORTS OF NEW SOUTH WALES.

The exports for the first five months of New South Wales show some remarkable increases. Taking a similar period for 1905 and some of the figures are:—

	Five months, 1906.	Five months, 1905.
Wool.	£4,193,015	£2,860,495
Butter	386,042	350,917
Copper	486,483	414,420
Silver lead.	298,406	228,773
Tin	275,628	135,772
Tallow.	191,740	111,645
Leather	104,722	89,241
Sheep-skins.	182,225	116,354
Fur-skins.	124,645	54,899
Frozen mutton.	162,113	79,902
Ores, exclusive of gold.	277,689	165,534
Gold, coined and uncoined	2,403,109	919,727

There are one or two items showing slight decreases, but all told they are trifling. The imports show increases during each month, but small as compared with the increases of exports. This is a striking illustration of the prospects for the whole year. The revenue of the state is showing a like expansion, and it is claimed that the close of the financial year will show a surplus of one million pounds sterling.

PRICES.

Sheep-skins.—An excited market ruled at late sales, desirable lines of short to medium growth showing an advance of $\frac{1}{4}$ d. per lb. on the week. Quotations: Merino, three-quarters to full wools, $7\frac{1}{2}$ d. to $9\frac{3}{4}$ d.; exceptional lines to 10d.; half wools, $7\frac{1}{4}$ d. to $9\frac{1}{4}$ d.; short wools, 6d. to $8\frac{1}{4}$ d. Crossbred: Half to three-quarters wools, fine $8\frac{3}{4}$ d. to $9\frac{3}{4}$ d., exceptional lines to 10d.; half-bred to coarse, 8d. to $8\frac{1}{2}$ d.; shortwools, 8d. to $8\frac{1}{2}$ d.; lambs, to $9\frac{1}{4}$ d. pelts to $7\frac{3}{4}$ d.

Hides.—At late sales good conditioned hides were dearer, while sloppy sorts were unchanged, and at times rather difficult to quit.

Fur-skins.—At this week's auctions kangaroos, wallaroo and wallaby were unchanged. Bear ruled firmer. Best well-furred rabbit skins realized rather higher prices, while damp and inferior lines were irregular and easier. Opossum skins: A strong market prevailed and while ordinary descriptions sold at full rates, well-furred large skins showed a decided advance.

J. S. LARKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., July 15, 1906.

RAW WOOL.

At no time in recent years has the price of raw wool reached a high level as it commands to-day in England, and every indication points to a maintenance of high prices. Three years ago the price ranged from $6\frac{1}{2}$ d. to $8\frac{3}{4}$ d., but at a sale recently held at the Salisbury wool fair 105,000 down fleeces were offered, and there was a brisk demand. The prices realized averaged $1\frac{1}{2}$ d. per lb. above last year's quotations. Washed lots sold at $14\frac{3}{4}$ d. and $15\frac{1}{2}$ d. Unwashed lots realized $11\frac{1}{2}$ d. Local wool, however, commands higher prices than the imported, and the price of latter is governed by its grading and the demand existing. The wool market reports point somewhat to the fact that buying is circumscribed to the most actual needs, the high prices deterring buying for storage. The European markets showed a decline, but most of the wool offering was withdrawn when prices fell off. Spinners and manufacturers claim that the present prices are more than the trade can carry. Lancashire manufacturers being mainly devoted to cotton, Manchester does not boast of a wool exchange, nor are there any brokers operating in it here.

PRICES FOR COLONIAL RAW WOOL.

The nearest sales market is Liverpool, and I gave the prices for Colonial raw wool quoted on the Liverpool exchange, 30th June last.

New South Wales scoured super..	1s. 10d.—2s. 3 d.
“ greasy..	1s. 1 d.—1s. 4 d.
Queensland scoured super..	1s. 10d.—2s. $3\frac{1}{2}$ d.
“ greasy..	1s. 0d.—1s. 3 d.
New Zealand greasy super..	1s. $1\frac{1}{2}$ d.—1s. 3 d.
Cape snow white..	1s. 10d.—2s. 1 d.
“ greasy super..	0s. 11d.—1s. $0\frac{1}{2}$ d.

The quantity imported is very large, Australia being the chief contributor with New Zealand and British South Africa next.

IMPORTS OF RAW WOOL INTO GREAT BRITAIN.

From the Trade and Navigation Returns, I have obtained the following figures showing the quantity and value for periods stated.

	1903.	1904.	1905.
Pounds.....	599,500,932	561,677,833	615,708,727
Value.. . . .	£20,622,523	£20,366,030	£23,821,350
Imports for month of May—			
	1903.	1904.	1905.
Pounds.....	54,751,530	33,080,001	64,389,266
Value.. . . .	£1,602,273	£1,254,058	£2,797,821
Imports for 5 months ending May 31, 1906—			
Pounds.....			398,393,916
Value.. . . .			£16,967,542

VARNISH.

The British Trade and Navigation Returns do not classify varnish, hence I am not able to furnish the quantity imported and its value, but I am informed by a dealer that the quantity is quite large, and that Germany contributes somewhat to the amount for inside purposes only. Oil varnish is chiefly used, but there is a demand for spirit varnish also. There are many varnish manufacturers in England, but the dealer is always glad to supplement his source of supply provided he can effect a saving thereby. There is a difference in the nature of the varnish used in the North and South of England, owing to climatic conditions, and that which is chiefly used in the former would not be used in the latter part of England, it being said that it cracks when exposed for a not very long time, hence it would be necessary that the Canadian manufacturer wishing to establish a connection here, would make a varnish to suit the conditions of the country. A connection could not be made by correspondence only as samples would be required.

BRITISH TRADE RETURNS.

The Board of Trade returns for June were issued recently.

The total value of the imports for the month was £47,892,709, being an increase of £4,335,302 as compared with the imports for June, 1905.

The exports totalled £30,639,187, an increase of £4,653,790 in comparison with the figures for the same month of last year.

P. B. MACNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDINGS, ST. JOHN'S, July 25, 1906.

AREA AND POPULATION.

Newfoundland covers an area of some 42,000 square miles, about one-third of which consists of lakes and rivers. The population is estimated at 220,000 inclusive of the Labrador coast. Of these about 30,000 are to be found at St. John's, the capital,

and 10,000 at Harbor Grace the only two large centres in the colony. The rest of the people are to be found in scattered settlements, and small towns and villages along the coast line mainly engaged in the fishing industry. The larger number of these are settled upon the east coast.

AGRICULTURAL PROGRESS SLOW.

The interior of the country is to a very great extent unoccupied, the land not being cultivated more than a few miles from the coast line, very little progress has hitherto been made in agricultural operations, and consequently the amount of farm produce raised in the colony has not been at all sufficient to supply the needs of even the limited number of people to be found in the colony. It may be generally stated that the inhabitants have to be fed and clothed by importations from abroad.

CANADIAN TRADE INCREASING.

For many years these have mainly been brought from Great Britain and the United States for reasons which are well understood, but which at the present time have not the same force that they once had. The rapid progress of Canada as a manufacturing and exporting country, together with the greatly improved facilities of communication with this ancient colony, is sufficient to account for the fact that the imports from Canada have been largely augmented in recent years, naturally at the expense of our competitors in Great Britain, and more particularly those in the United States.

CANADIAN GOODS PREFERRED.

Other things being equal, there is, I am satisfied, a decided preference in favour of Canada, and it only remains for the traders of the Dominion to cultivate in a careful way the requirements and good-will of their kinsmen in this colony, not only to retain the large share they now have, but to extend it very materially in the years to come.

QUALITY OF GOODS IMPORTANT.

The day has gone by when any product not considered good enough to send elsewhere, can be sold here to advantage. In recent years there has been a considerable increase in lumbering and mining operations, and the establishment of several local factories, made possible by the Customs tariff in force, has of course had some effect in the volume of certain imports.

COLONY IN PROSPEROUS CONDITION.

The colony is in a very prosperous condition at present, and the time seems to be an opportune one for the promotion of an increased trade from the Dominion.

TRANSPORTATION FACILITIES.

The transportation facilities for freight are good, as nearly all the small ports around the coast can be reached by steamer at frequent intervals, while the interior has been opened up in recent years by the Reid Newfoundland railway system, connecting the capital city of St. John's on the east with Port-au-Basques on the west coast, whence a fast steamer runs to North Sydney in Cape Breton, Nova Scotia, thus completing the link between Canada and Newfoundland.

E. D. ARNAUD.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, July 5, 1906.

CANADIAN FLOUR IN JAPAN.

It continues to be a matter of surprise to many people in Canada that Canadian flour does not figure more largely in the Japanese market. This surprise finds expression in public speeches, in newspaper references to the matter, and in not a few other ways. Having given some attention to this subject for two years past, I think I may appropriately submit the result of my observations.

There is no prejudice against Canadian flour, and certainly no discrimination operating. I have found, without a single exception, a readily expressed desire by both Japanese and Foreign dealers to take into consideration all that could be said, and all the quotations that could be given them, with the view of placing Canadian flour in a favourable light before them. The business aspect of the case is what appeals to them, and they have a keen appreciation of trade, without preference or prejudice as to the source whence it offers.

In the first place, it may be said of Canadian flour, as of other productions and of merchandise and manufactures generally, that there is no direct agency representing it. Whereas for the flour of Canada's competitors there are direct agencies, besides the impetus of momentum of long-time and widely established trade connections. But that is not all, nor the chief drawback. Those already mentioned as being surprised at the smallness of the flour trade of Canada with Japan, will doubtless be further surprised to learn that Canada is not yet in a position to appear here as a formidable contributor to this country's flour supply.

EXPORTS OF FLOUR FROM VANCOUVER.

The total export of flour at Vancouver for 1905 amounted in value to \$76,486, of which \$62,000 came to Japan. This is the total export via the Pacific. The conclusion from that statement must be that that represents the surplus flour, available for export from Canadian territory tributary to the Pacific.

That this is the amount in value of flour apparently available for one year, for exportation to Japan, I think, must be at least approximately correct. If I am mistaken in that respect, and if it should be made to appear that the value in flour available for export this way is double that amount, then I would answer that if it were ten times that amount it would be yet insufficient to give Canadian flour a strong commercial standing in the Japanese market.

CORRESPONDENCE INDICATIVE OF IMPATIENCE.

I have had correspondence indicative of impatience, and I have not been blind to current comment and report in the Canadian press, expressive of impatience, at the slowness with which Canadian flour as a leading article was taken hold of in this market. This critical attitude is consequent upon the failure to realize, first, the peculiar conditions of the market, and, second, the measure of the present capacity of the Canadian farther-west as a source of supply.

FLOUR CONTRACTS INVOLVE CONTINUOUS SUPPLY.

I will not occupy time and space with illustration; but I must state one case as an example. A commission merchant from the Canadian West arrived out here in February last, and spent over three months in 'sizing up' the Oriental market. About two months of that time was given to Japan. When he arrived here he was primed to overflowing with what Canada was prepared to do, and he could not understand why this market did not seem to appreciate Canadian trade. He investigated, I think, quite thoroughly, with the result of very much changing his preconceived views. He found that flour importers, for example, could not be interested unless he was prepared to offer a great deal more than he could venture to undertake; that importers of standing would scarcely concern themselves with proposals that did not mean barrels by the thousand; and more serious still, that contracts upon this basis would involve the obligation of continuous supply when ordered. He surrendered unreservedly to advices which, upon his arrival here, he had rejected. And he returned to Canada relying rather upon the future promise of Alberta wheat, than upon the present sufficiency of Canada's western supply, for business in the Orient. This I think is putting his impressions in moderate form.

PECULIARITIES OF MARKET MUST BE CONSIDERED.

This market is doubtless peculiar, and its peculiarities must be considered and scrupulously observed. Flour is sold largely, I might say exclusively, by brands. A certain brand is taken up by an importing firm. They interest their clients in it and make sales; having done this, they order, probably by cable; they must rely upon that order being filled according to directions, since they must keep faith with their clients or customers. Heretofore such engagements could not be contracted in Canada; or, if contracted, were too often subject to failure, and not repeated.

These references to the sufficiency of the Canadian source of supply are applicable to that source from a point where Canadian transcontinental traffic divides to the eastward and westward, which point for the present purpose I place at the eastern boundary of Alberta. Heretofore the offerings of flour from this source have been too much of the casual job lot or surplus that some miller may have had over after local demand had been supplied. These casual quantities are commonly put into the hands of a commission merchant, who often finds that they are not taken, and he cannot understand why.

BRAND OF FLOUR MAY NOT BE KNOWN.

There are reasons why, some which may be stated: the brand may not be known; or it may be that the brand, if known, and the flour represented by it do not correspond. Again, both brand and flour may be satisfactory, but the quantity too small to be interesting. Should all these objections be absent, there yet remains the radical difficulty, that the importer will not go to the trouble and expense of making market for an article the supply of which, in such quantities as he may require, he cannot be assured of in a business way. Of course, these remarks apply in no sense to the source of supply eastward from the Alberta line. Manitoba milling firms have quantity and quality for any market; but the price by the time it gets out here may be regarded as prohibitory. To take it to Japan would be to take it away from the grip of the eastern market, where it is in demand, against transportation facilities, to compete in this market with Washington and Oregon flour that is grown and milled practically on the Pacific coast. It is not reasonable to expect results, unless of an exceptional kind, under these circumstances.

MARKET IN ORIENT FOR ALBERTA'S WHEAT.

After last harvest, the expectation was prompted that at least half of Alberta's two-million bushels of fall wheat would be available for this market; but doubtless that quantity was more profitably absorbed by the home demand created by the great influx of population. Enough came out here, only in samples and sample orders with quotations, to show that there could be effective competition if quantity could be assured. This market was investigated last winter and spring by parties interested in the future wheat yield of Alberta. They said in effect that they were not here for present business, but to inform themselves so that they could prepare for the future. They estimated that last year's yield of fall wheat in Alberta would be doubled this year, and that a market for it must be found in the Orient. I gather from newspaper reports, and from correspondence, that elevator and mill building is going on now, as they assured would be the case. On the essential point of transportation, they were satisfied that the Canadian Pacific Company were now as desirous as they themselves were to promote the Canadian flour trade with Japan, and that a fair, enabling transportation rate would be granted.

This is the present and prospective aspect of the flour trade as it appears, looking at the conditions centreing at the Pacific outlet, from this point of view.

The Alberta wheat crop this season had an unfavourable spring start, which by the latest information had improved; but there is not yet any idea here of what the harvest result may be. If it were practicable, by transportation facilities, as it is by geographical incidence, to place the dividing point of Canadian transcontinental traffic Atlantic and Pacific-wards at Winnipeg, the situation would in some measure support the expectation of a large trade in flour between Canada and Japan. But, as things have been and are now, that expectation should be under restraint until the wheat-growing capabilities of Alberta and British Columbia have had time to take effect.

THE COTTON TRADE OF JAPAN.

Not long ago American interests in Japan were felicitating the United States that Japan was not and could not be a cotton growing country; and although the Japanese might do their own spinning and weaving exclusively, the United States would have the supplying of the raw cotton. Now the *Japan Advertiser*, the organ of American interests here, fears that 'even that hope must be dismissed, for the Japanese are turning their attention to the subject of cotton growing in Korea and have reached the conclusion that that country can produce a supply adequate to the wants of the manufacturers of Japan. It is quite evident now that they will not go to America for anything they can produce at home, and that they will work untiringly to accomplish the fact of becoming as nearly self-dependent as possible.'

There is much speculative discussion of what Japan is going to do in Korea and Manchuria; but there is certainly no evidence as yet that the Japanese are aiming at anything but legitimate trade, after having brought order out of chaos, for which service they must be entitled to some consideration.

THE SILK TRADE.

On this, the threshold of a new raw-silk year, a few comparisons may be of interest.

The export figures for raw silk for the closing twelve months (1905-6) show a shortage of 20,173 bales, when compared with shipments for 1904-05. Prices for new crop silk are $3\frac{1}{2}$ to 4 per cent higher than the rates established in July last year.

The new season starts with absolutely no 'old stock,'—an exceptionally strong demand for native use having absorbed large quantities of thread which would otherwise have been available for export. In this connection, it is of interest to observe

that in recognition of the call from the Japanese government for the observance of strict economy during the recent war, the Japanese people to a great extent abjured the wearing of silk apparel. The ban having been removed, an extraordinary demand for silk fabrics for 'home consumption' arose,—resulting in a revival in the native weaving industry, and a depletion of the stocks of raw silk.

Although prices have opened upon a comparatively high level, rates are more likely to advance than decline. The satisfactory condition of the trade at home, places the Japanese producer in a position of greater independence than usual, and although he is of course still turning to Europe and America for the bulk of his trade, he can wait until those markets are prepared to pay his price, instead of resorting to the method of inviting their custom by lowering his quotations. As far as can be seen therefore, we are now entering a season of fairly high prices, with the prospect of advancing rates should the anticipated demand from Europe develop during the next three months.

As regards the 'visible supply' of the coming season,—the Japanese crop promises to be well up to the average. More seed than usual was laid down, and although late frosts and other less powerful factors have lowered the original estimate, there is at present the general opinion that the season's supply will exceed that of 1905-06,—and may even approach the figures for 1904-05. Glancing at the supply and demand of the leading markets of the world, there is noticeable, serious shortages in the first and second Canton crops,—which deficiencies are but partially off-set by a fairly good crop in Europe, and a slight increase in the Shanghai output. Taken as a whole therefore, the world's supply of raw silk for the opening season will not far exceed that of last year. Stocks on the other hand are low in the leading centres, and at there are fairly reliable indications that silk fabrics will be fashionable during the next few months, a brisk demand and high prices may be expected,—provided the trade is not affected by those unforeseen events which too frequently disturb the current of this industry.

CANADIAN MANUFACTURES IN JAPAN.

What impresses the observer and the inquirer at first sight is that Canadian manufactures are not here either on view or in prospectus. There is nothing to suggest the name of Canada,—perhaps I should not say nothing, since being refreshed a day or two ago by the sight of two dray loads of Enderby, B.C., flour so heavy that the attached horse-power was unable to take them up grade to a little Japanese bakery where, from personal knowledge I can say bread is made of a uniform excellence quite up to the Canadian standard.

This flour would be evidence of the samples and sample orders mentioned in my review of 'Canadian flour in Japan' as showing ability to compete if supply could be assured. However, I have to repeat that there is nothing to suggest the name of Canada, either in the warehouses and shops, or in the advertising columns of the newspapers. The scenic beauties of hillside and plain along the routes of travel are blemished conspicuously by reminders of the brands and blends of Scotch whisky, various foods for infants, &c., and many other foreign and domestic necessities; but of this blemishing there is none done, possibly because of aesthetic scruples, on Canadian account.

These remarks will apply to practically all lines of Canadian manufacture and production. I have stated often in these reports, in substance, that with a few exceptions everything that Canada grows and makes is represented here in the course of every-day trade, but not of Canadian production. The inference is that Canada does not yet feel the urgency of looking to the far east for a market, because her present markets, home and foreign, are absorbing her output. That there are exceptional examples, in the form of correspondence with this office, of a desire to learn the conditions in the Japanese market and to take the advantages offered, if any, shows that there is a somewhat lively interest felt and operating, which augurs well: but that interest has not yet taken much of a tangible trade form.

ACTIVITY OF JAPANESE MARKETS.

I notice in the current news that a large cargo, stated at 6,000 tons, of steel rails has been despatched from Sydney on the Atlantic coast of Canada, *via* Cape Horn, to British Columbia on the Pacific coast. That may be regarded as a notable event; but it is only an expression of the activity of the home market. I know the Canadian situation too well to infer from that event that Canadian steel rail manufacturers are prepared to export their product to Japan, although the transportation distance *via* the Suez route must be shorter. There will be early future railway extension in Japan, and in Corea and Manchuria under Japanese influence. This, in any event, and without reference to the talked-of change of gauge and the consequent re-equipment of the present 5,000 miles of railway in Japan. With this prospect in view, and prompted by the advertisement of a Canadian Locomotive Company in an East Indian engineering journal, I wrote to the company in question to the effect that I had assumed that manufacturers of railway plant in Canada would be too much occupied by the home requirements to be concerned with export, but that I had seen their advertisement and would infer from it that they were looking for business, and that I would be glad to place the facilities of this office at their service. In due time their answer was received, to the effect that I was correct in my assumption that locomotive builders in Canada were not in a position at present to take up the question of export work, because of the large volume of business at home. Their foreign advertising was simply for the purpose of keeping their name before the public in the event of their being able to handle export work at some future time.

DIRECT REPRESENTATIVES A NECESSITY.

Directly representing Canadian manufacture, I have knowledge of two agents only sent out within the two years of my experience here, prepared to arrange for business in their respective lines. The first called at this office on his arrival and stated the determination to get business here if it could be done. He spent within a few days of a year, partly in China ports, but mostly in Japan; and upon leaving for home was evidently satisfied with the result. The second has been here three days at this time of writing. He has come after nearly two years of correspondence that will not be fruitless since it has resulted in his coming, with the probability already that he will succeed in establishing his speciality in this market. Let it be understood from this, and much that I have said in former reports, that it does not follow that because Japan is not a hungry fish ready to jump at the first or any fly, she will not take bait that is expertly and temptingly placed before her.

Every large manufacturing concern in Canada, to whose management it may appear that there should be business available in this country, should regard the cost of sending a special and highly capable agent out here as too small a matter to be considered. The two I have mentioned represented each only one line of manufacture. But I do not see any reason why one capable agent should not represent several lines of manufacture, thus distributing the cost.

WASHING AND TOILET SOAP.

Inquiries from Canada for information about the soap market, answered directly, may claim some further reference.

Owing to the fact that the Japanese now manufacture soap to a large extent, both for home consumption and export, demand for the foreign made article is gradually falling off. The home-made is cheaper and satisfies the requirements. Washing soap is an article very much used in this country. Japanese families do their own washing; and, as to person and premises, washing is an open characteristic of the whole people.

IMPORTS MAINLY FROM FRANCE, GERMANY AND UNITED STATES.

Importation of soap is mainly from Germany, France, and the United States. These countries have been enjoying the Conventional Tariff, while Canada heretofore has not. On and after October 1, the General Tariff will be increased. The following scale will show the advantage to Canada of having become a party to the Anglo-Japanese commercial treaty:—

Tariff on and after October 1, 1906.

	Unit.	General Tariff.	Conven- tional Tariff.
	Lbs.	\$ cts.	\$ cts.
Soap—			
1. Toilet ...	113	12 35	3 50
2. Washing:			
a. Marseilles soap	133	1 96	
b. Other kinds.	"	1 77	
Soaps, common.	"		0 486
3. All other kinds.	<i>ad val.</i>	30 %	

It will be also seen by the following tables, which give the quantities imported and exported during the past four years, with the values, how the importation of washing soap is decreasing, and the exportation increasing:—

Imports.

	Quantity.	Value.
1902.	1,166,999 lbs.	\$54,469
1903.	933,728 "	42,525
1904.	779,418 "	34,898
1905.	1,423,565 "	67,135

Exports.

	Quantity.	Value.
1902.	831,531 lbs.	\$14,628
1903.	1,016,804 "	18,589
1904.	1,418,433 "	26,051
1905.	2,018,595 "	40,034

The sudden increase of import in 1905 was due to the government giving out large orders for foreign made washing soap, for Army and Navy use. To ascertain the home consumption figures for that year, about \$30,000 should be deducted. The idea amongst importers is that importation of soap has nearly run its course. The import decrease will probably accelerate; and home manufacture will be stimulated by the duty,—the conventional tariff being thought high enough to have that effect.

Toilet Soap.

The importation of this article to Japan is not large, but regarded as fairly profitable. It comes in greater part from Great Britain, France, Germany, and the United States, for use by well-to-do Japanese and the foreign people. In Japan a good deal of this soap is made, and exported to China and India, besides being largely consumed by all classes here. The foreign brands that are chiefly known here are

Pear's, Colgate's, Ed. Pinaud's and others. The following tables of quantities exported and imported may be of interest:—

Exports.

	Quantity.	Value.
1903..	554,265 doz.	\$ 97,092
1904..	808,477 “	158,445
1905..	1,459,678 “	298,030

Imports.

1903..	624,332 lbs.	\$118,161
1904..	645,893 “	119,757
1905..	847,003 “	171,688

The quantities imported from each country for 1905 are as follows:—

Great Britain..	129,211 lbs.	\$22,105
France..	150,712 “	36,964
Germany..	200,168 “	63,889
U. S. A..	103,028 “	23,641

The foreign firms are the leading importers of both washing and toilet soaps, and they appreciate the reduction of the duty from \$12.35 to \$3.50 per 133 lbs., by the operation of the treaty just ratified between the Japanese and the Canadian governments.

SPECIAL REPORT RESPECTING SOAP.

A firm versed in the importation of soap say:—

‘It is not more than ten or twelve years ago that all toilet and washing soaps used in this country had to be imported from abroad, but gradually the manufacture has been taken up in Japan, first as home industry, and later in poorly equipped factories, which are, however, gradually improved. The influence on the import of washing soap made itself very shortly felt, as may be seen from reference to the figures for the last five years.

The soap from France was principally imported by Oppenheimer Frères, Gysin & Shoening, Bretschneider & Co.

From Germany Oestmann & Co. and several other German firms.

EXPORT.

About six years ago trials were made with the export of cheap laundry soaps to Korea and China, and as the Japanese industry develops the amount exported yearly increases. To Manilla, Straits Settlements and British India regular shipments are at present made. In view of this condition of affairs, we do not think there is much prospect for an unknown maker competing in this market successfully. There is always keen competition between the introduced brands, and profits are said to be very small.

One of the leading American soaps in this market is ‘Royal Savon’ made by the Pioneer Soap Company of San Francisco. The following are the actual selling prices for the different styles of packing of this brand.

Cases containing four dozen tablets of about half a pound, 90 cents per case.

Cases containing 25 pieces of about 1½ lbs., width 1½ inches, thickness 1½ inches, length 13 inches, \$1.25 per case.

Cases containing 24 pieces, about 1 8-10 lbs., width 2 inches, thickness 1½ inches, length 12 inches, \$1.43 per case.

These prices include duty and landing charges, and seller's commission of 5 per cent.

A new competitor entering the Japanese market ought to lay a better quality down here at slightly lower prices; he should further be willing to spend, say \$500, for advertising (newspaper advertisements, samples, show cards and travelling expenses) and agree to ship on consignment basis during at least a year.'

This may be a rather cloudy view of the soap situation in this country; but it does not follow that, with the increasing use of the article, the market should not be exploited. The Japanese are remarkable for getting along with cheap expedients. But it will follow here, as elsewhere, that the general use of a cheap line of goods opens the way for the better, although more costly.

WISH TO SUBJECT LUXURIES TO REVENUE.

It is current in the native press that the Conventional Tariff does not expire till 1911, but the Finance Department of the Government of Japan has already entered upon inquiry with the view of determining the plan and details of amendment upon renewal. The projected plan is said to involve the principle of reciprocity. At present to a considerable extent luxuries, or what are regarded as such here, are protected from liability to increased contributions to the revenue, by inclusion within the terms of the treaty. This is highly unsatisfactory under circumstances, not anticipated when the treaty or treaties were ratified, that demand revenue from everything that can reasonably be called upon to yield it. This feature of the Conventional Tariff has been plainly apparent to most people who have acquaintance with fiscal matters; and the press referred to say in effect that it has been the cause of no small measure of embarrassment to the Japanese Government.

THE JAPAN-CANADIAN CONVENTION.

The leading Japanese press give voice to gratified sentiment upon the conclusion of the tariff agreement.

The *Tokyo Asahi* feels happy at the conclusion of a convention with that vast British colony of great future promise across the Pacific. By this, the tradal inconveniences as well as the unfriendly treatment shown and then to our compatriots have ceased to exist to our mutual benefit. The paper appreciates the candour and generosity of the Canadian Government and prays for lasting and close friendship between the British colony and between her mother nation and ourselves. The *Jiji* is satisfied and says the Canadian tariff view has been prone to take the protective form, in exclusion of our articles. But now by the application in this colony of the same principles embodied in the Anglo-Japanese treaty, the tradal relations of the two countries will be on a happier footing. In the *Jiji's* opinion, Canada has nothing to fear of our agricultural products, on the contrary, she would be the profiting party in the bargain by giving us her wheat and food-stuffs in exchange for our silk and tea.

ALEX. MACLEAN.

Canadian failures for six months of 1906 number 652, with liabilities of \$5,298,482 and assets of \$2,298,894, a decrease of 3·2 per cent in the number and 26 per cent in the liabilities from a year ago.

CONVENTION BETWEEN GREAT BRITAIN AND JAPAN.

A convention was signed January 31, 1906, and ratified July 12, 1906, between Great Britain and Japan having for its object the application to Canada of the provisions of the treaty between the two countries signed on the 16th day of July, 1894, and of the supplementary convention of the 16th day of July, 1895. Canada is therefore from July 12, 1906, entitled to the benefit of the Japanese Conventional Tariff, and it follows that whatever may be the general tariff of Japan, the duties on the articles named in the treaties cannot be altered during their continuance, that is to say, not before July, 1911.

The text of the convention and of the treaty and supplementary convention therein referred to is as follows:—

(Signed also in Japanese Text).

His Majesty the King of the United Kingdom of Great Britain and Ireland, and of the British dominions beyond the seas, Emperor of India, and His Majesty the Emperor of Japan, being equally desirous of facilitating the commercial relations between Japan and Canada, have resolved to conclude a convention to that effect, and have named as their respective plenipotentiaries:

His Majesty the King of the United Kingdom of Great Britain and Ireland, and of the British dominions beyond the seas, Emperor of India, Sir Claude Maxwell MacDonald, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Knight Commander of the Most Honourable Order of the Bath, His Britannic Majesty's ambassador to Japan; and

His Majesty the Emperor of Japan, Takaaki Kato, Shoshii, First Class of the Imperial Order of the Sacred Treasure, His Imperial Majesty's Minister of State for Foreign Affairs;

Who, having reciprocally communicated their full powers, found in good and due form, have agreed as follows:—

ARTICLE I.

The two high contracting parties agree that the stipulations of the Treaty of Commerce and Navigation between Great Britain and Japan, signed at London, on the 16th day of July, 1894 (corresponding to the 16th day of the 7th month of the 27th year of Meiji), and of the supplementary convention between Great Britain and Japan, signed at Tokio, on the 16th day of July, 1895 (corresponding to the 16th day of the 7th month of the 28th year of Miji), shall be applied to the intercourse, commerce and navigation between the Empire of Japan and the British Dominion of Canada.

ARTICLE II.

The present convention shall be ratified, and the ratifications thereof shall be exchanged at Tokio as soon as possible. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of six months from the day on which one of the high contracting parties shall have announced the intention of terminating it.

In witness whereof the above named plenipotentiaries have signed the present convention and have affixed thereto their seals.

Done in duplicate at Tokio, in the Japanese and English languages, this 31st day of January, of year one thousand nine hundred and six, corresponding to the 31st day of the 1st month of the 39th year of Meiji.

(L.S.) CLAUDE M. MACDONALD,

(L.S.) KATO TAKAOKI.

TREATY OF COMMERCE AND NAVIGATION BETWEEN GREAT BRITAIN AND JAPAN.

SIGNED AT LONDON, JULY 16, 1894.

(Ratifications exchanged at Tokio, August 25, 1894.)

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, and His Majesty the Emperor of Japan, being equally desirous of maintaining the relations of good understanding which happily exist between them by extending and increasing the intercourse between their respective States, and being convinced that this object cannot better be accomplished than by revising the treaties hereto existing between the two countries, have resolved to complete such a revision, based upon principles of equity and mutual benefit, and for that purpose have named as their plenipotentiaries, that is to say,

Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, the Right Honourable John, Earl of Kimberley, Knight of the Most Noble Order of the Garter, &c., &c., Her Britannic Majesty's Secretary of State for Foreign Affairs;

And His Majesty the Emperor of Japan, Viscount Ooki Siuzo, Junii, first class of the Imperial Order of the Sacred Treasure, His Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of St. James';

Who, after having communicated to each other their Full Powers, found to be in good and due form, have agreed upon and concluded the following articles:—

ARTICLE I.

The subjects of each of the two high contracting parties shall have full liberty to enter, travel, or reside in any part of the Dominions and possessions of the other

contracting party, and shall enjoy full and perfect protection for their persons and property.

They shall have free and easy access to the courts of justice in pursuit and defence of their rights ; they shall be at liberty equally with native subjects to choose and employ lawyers, advocates and representatives to pursue and defend their rights before such courts, and in all other matters connected with the administration of justice they shall enjoy all the rights and privileges enjoyed by native subjects.

In whatever relates to right of residence and travel ; to the possession of goods and effects of any kind ; to the succession to personal estate, by will or otherwise, and the disposal of property of any sort, in any manner whatsoever which they may lawfully acquire, the subjects of each contracting party shall enjoy in the dominions and possessions of the other the same privileges, liberties and rights, and shall be subject to no higher imports or charges in these respects than native subjects, or subjects or citizens of the most favoured nation. The subjects of each of the contracting parties shall enjoy in the dominions and possessions of the other entire liberty of conscience, and subject to the laws, ordinances and regulations, shall enjoy the right of private or public exercise of their worship, and also the right of burying their respective countrymen according to their religious customs, in such suitable and convenient places as may be established and maintained for that purpose.

They shall not be compelled, under any pretext whatsoever, to pay any charges or taxes other or higher than those that are, or may be, paid by native subjects, or subjects or citizens of the most favoured nation.

ARTICLE II.

The subjects of either of the contracting parties residing in the dominions and possessions of the other shall be exempted from all compulsory military service whatsoever, whether in the army, navy, national guard, or militia ; from all contributions imposed in lieu of personal service ; and from all forced loans or military exactions or contributions.

ARTICLE III.

There shall be reciprocal freedom of commerce and navigation between the dominions and possessions of the two high contracting parties.

The subjects of each of the high contracting parties may trade in any part of the dominions and possessions of the other by wholesale or retail in all kinds of produce, manufactures and merchandise of lawful commerce, either by person or by agents, singly, or in partnerships with foreigners or native subjects ; and they may there own or hire and occupy the houses, manufactories, warehouses, shops and premises which may be necessary for them, and lease land for residential and commercial purposes, conforming themselves to the laws, police and customs regulations of the country like native subjects.

They shall have liberty freely to come with their ships and cargoes to all places, ports and rivers in the dominions and possessions of the other which are or may be opened to foreign commerce, and shall enjoy, respectively, the same treatment in matters of commerce and navigation as native subjects, or subjects or citizens of the most favoured nation, without having to pay taxes, imposts, or duties of whatever nature or under what denomination, levied in the name or for the profit of the government, public functionaries, private individuals, corporations, or establishments of any kind, other or greater than those paid by native subject or subjects or citizens of the most favoured nation, subject always to the laws, ordinances and regulations of each country.

ARTICLE IV.

The dwellings, manufactories, warehouses and shops of the subjects of each of the high contracting parties in the dominions and possessions of the other, and all premises appertaining thereto destined for purposes of residence or commerce, shall be respected.

It shall not be allowable to proceed to make a search of, or a domiciliary visit to such dwellings and premises, or to examine or inspect books, papers, or accounts, except under the conditions and with the forms prescribed by the laws, ordinances, and regulations for subjects of the country.

ARTICLE V.

No other or higher duties shall be imposed on the importation into the dominions and possessions of Her Britannic Majesty of any article, the produce or manufacture of the dominions and possessions of His Majesty the Emperor of Japan, from whatever place arriving; and no other or higher duties shall be imposed on the importation into the dominions and possessions of His Majesty the Emperor of Japan of any article, the produce or manufacture of the dominions and possessions of Her Britannic Majesty from whatever place arriving, than on the like article produced or manufactured in any other foreign country; nor shall any prohibitions be maintained or imposed on the importation of any article, the produce or manufacture of the dominions and possessions of either of the high contracting parties, into the dominions and possessions of the other, of whatever place arriving, which shall not equally extend to the importation of the like article, being the produce or manufacture of any other country. This last provision is not applicable to the sanitary and other prohibitions occasioned by the necessity of protecting the safety of persons, or of cattle, or of plants useful to agriculture.

ARTICLE VI.

No other or higher duties or charges shall be imposed in the dominions and possessions of either of the high contracting parties on the exportation of any article to the dominions and possessions of the other than such as are, or may be payable on the exportation of the like article to any other foreign country; nor shall any prohibition be imposed on the exportation of any article from the dominions and possessions of either of the two contracting parties to the dominions and possessions of the other which shall not equally extend to the exportation of the like article to any other country.

ARTICLE VII.

The subjects of each of the high contracting parties shall enjoy in the dominions and possessions of the other exemption from all transit duties, and a perfect equality of treatment with native subjects in all that relates to warehousing, bounties, facilities, and drawbacks.

ARTICLE VIII.

All articles which are or may be legally imported into the ports of the dominions and possessions of His Majesty the Emperor of Japan in Japanese vessels may likewise be imported into those ports in British vessels, without being liable to any other or higher duties or charges of whatever denomination than if such articles were imported in Japanese vessels; and reciprocally, all articles which are or may be legally imported into the ports of the dominions and possessions of Her Britannic Majesty in British vessels may likewise be imported into these ports in Japanese vessels, without being liable to any other or higher duties or charges of whatever denomination than if such articles were imported in British vessels. Such reciprocal equality of treatment shall take effect without distinction, whether such articles come directly from the place of origin or from any other place.

In the same manner there shall be perfect equality of treatment in regard to exportation, so that the same export duties shall be paid and the same bounties and drawbacks allowed in the dominions and possessions of either of the high contracting parties on the exportation of any article which is or may be legally exported therefrom, whether such exportation shall take place in Japanese or in British vessels, and what-

ever may be the place of destination, whether a port of either of the contracting parties or of any third power.

ARTICLE IX.

No duties of tonnage, harbour, pilotage, lighthouse, quarantine, or other similar or corresponding duties of whatever nature or under whatever denomination, levied in the name or for the profit of the government, public functionaries, private individuals, corporations, or establishment of any kind, shall be imposed in the ports of the dominions and possessions of either country upon the vessels of the other country which shall not equally and under the same conditions be imposed in the like cases on national vessels in general or in vessels of the most favoured nation, such equality of treatment shall apply reciprocally to the respective vessels, from whatever port or place they may arrive, and whatever may be their place of destination.

ARTICLE X.

In all that regards the stationing, loading and unloading of vessels in the ports, basins, docks, roadsteads, harbours, or rivers of the dominion and possessions of the two countries, no privilege shall be granted to national vessels which shall not be equally granted to vessels of the other country; the intention of the high contracting parties being that in this respect also the respective vessels shall be treated on the footing of perfect equality.

ARTICLE XI.

The coasting trade of both of the high contracting parties is excepted from the provisions of the present treaty, and shall be regulated according to the laws, ordinances and regulations of Japan and of Great Britain respectively. It is, however, understood that Japanese subjects in the dominions and possessions of Her Britannic Majesty, and British subjects in the dominions and possessions of His Majesty the Emperor of Japan, shall enjoy in this respect the rights which are or may be granted under such laws, ordinances and regulations to the subjects or citizens of any other country.

A Japanese vessel laden in a foreign country with cargo destined for two or more ports in the dominions and possessions of Her Britannic Majesty, and a British vessel laden in a foreign country with cargo destined for two or more ports in the dominions and possessions of His Majesty the Emperor of Japan, may discharge a portion of her cargo at one port, and continue her voyage to the other port or ports of destination where foreign trade is permitted, for the purpose of landing the remainder of her original cargo there, subject always to the laws and custom-house regulations of the two countries.

The Japanese Government, however, agrees to allow British vessels to continue, as heretofore, for the period of the duration of the present treaty, to carry cargo between the existing open ports of the Empire, excepting to or from the ports of Osaka, Niigata and Ebisu-minato.

ARTICLE XII.

Any ship of war or merchant vessel of either of the high contracting parties which may be compelled by stress of weather, or by reason of any other distress, to take shelter in the port of the other, shall be at liberty to refit therein, to procure all necessary supplies, and to put to sea again without paying any dues other than such as would be payable by national vessels. In case, however, the master of a merchant vessel should be under the necessity of disposing of a part of his cargo in order to defray the expenses, he shall be bound to conform to the regulations and tariffs of the place to which he may have come.

If any ship of war or merchant vessel of one of the contracting parties should run aground or be wrecked upon the coasts of the other, the local authorities shall inform the consul general, consul, vice-consul, or consular agent of the district of the occurrence, or if there be no such consular officer, they shall inform the consul-general, consul, vice-consul, or consular agent of the nearest district.

All proceedings relative to the salvage of Japanese vessels wrecked or cast on shore in the territorial waters of Her Britannic Majesty shall take place in accordance with the laws, ordinances and regulations of Great Britain, and reciprocally, all measures of salvage relative to British vessels wrecked or cast on shore in the territorial waters of His Majesty the Emperor of Japan shall take place in accordance with the laws, ordinances and regulations of Japan.

Such stranded or wrecked ship or vessel, and all parts thereof, and all furnitures and appurtenances belonging thereunto, and all goods and merchandise saved therefrom including those which may have been cast into the sea, or the proceeds thereof, if sold, as well as all papers found on board such stranded or wrecked ship or vessel, shall be given up to the owners or their agents, when claimed by them. If such owners or agents are not on the spot, the same shall be delivered to the respective consul-general, consuls, vice-consuls, or consular agents upon being claimed by them within the period fixed by the laws of the country, and such consular officers, owners, or agents shall pay only the expenses incurred in the preservation of the property, together with the salvage or other expenses which would have been payable in the case of a wreck of a national vessel.

The goods and merchandise saved from the wreck shall be exempt from all the duties of the customs unless cleared for consumption, in which case they shall pay the ordinary duties.

When a ship or vessel belonging to the subjects of one of the contracting parties is stranded or wrecked in the territories of the other, the respective consuls-general, consuls, vice-consuls, and consular agents shall be authorized, in case the owner or master or other agent of the owner, is not present, to lend their official assistance in order to afford the necessary assistance to the subjects of the respective States. The same rule shall apply in case the owner, master, or other agent is present, but requires such assistance to be given.

ARTICLE XIII.

All vessels which according to Japanese law, are to be deemed Japanese vessels, and all vessels which according to British law are to be deemed British vessels, shall, for the purposes of this treaty, be deemed Japanese and British vessels respectively.

ARTICLE XIV.

The consuls-general, consuls, vice-consuls, and consular agents of each of the contracting parties, residing in the dominions or possessions of the other, shall receive from the local authorities such assistance as can by law, be given to them for the recovery of deserters from the vessels of their respective countries.

It is understood that this stipulation shall not apply to the subjects of the country where the desertion takes place.

ARTICLE XV.

The high contracting parties agree that, in all that concerns commerce and navigation, any privilege, favour, or immunity which either contracting party has actually granted, or may hereafter grant, to the government, ships, subjects or citizens of any other State, shall be extended immediately and unconditionally to the government, ships, subjects, or citizens of the other contracting party, it being their intention that the trade and navigation of each country shall be placed, in all respects, by the other on the footing of the most favoured nation.

ARTICLE XVI.

Each of the high contracting parties may appoint consuls-generals, consuls, vice-consuls, pro-consuls, and consular agents in all the ports, cities and places of the other, except in those where it may not be convenient to recognize such officers.

This exception, however, shall not be made in regard to one of the contracting parties without being made likewise in regard to every other power.

The consuls-generals, consuls, vice-consuls, pro-consuls, and consular agents may exercise all functions, and shall enjoy all privileges, exemptions and immunities which are, or may hereafter be, granted to consular officers of the most favoured nation.

ARTICLE XVII.

The subjects of each of the high contracting parties shall enjoy in the dominions and possessions of the other the same protection as native subjects in regard to patents, trade marks, and designs, upon fulfilment of the formalities prescribed by law.

ARTICLE XVIII.

Her Britannic Majesty's Government, so far as they are concerned, give their consent to the following arrangement:—

The several foreign settlements in Japan shall be incorporated with the respective Japanese Communes, and shall henceforth form part of the general municipal system of Japan.

The competent Japanese authorities shall thereupon assume all municipal obligations and duties in respect thereof, and the common funds and property, if any, belonging to such settlements, shall at the same time be transferred to the said Japanese authorities.

When such incorporation takes place the existing leases in perpetuity under which property is now held in the said settlements shall be confirmed, and no condition whatsoever other than those contained in such existing leases shall be imposed in respect of such property. It is, however, understood that the consular authorities mentioned in the same are in all cases to be replaced by the Japanese authorities.

All lands which may previously have been granted by the Japanese government free of rent for the public purposes of the said settlements shall, subject to the right of eminent domain, be permanently reserved free of all taxes and charges for the public purposes for which they were originally set apart.

ARTICLE XIX.

The stipulations of the present treaty shall be applicable so far as the laws permit, to all the colonies and foreign possessions of Her Britannic Majesty, excepting to those hereinafter named, that is to say, except to:—

India,	The Dominion of Canada,
Newfoundland,	The Cape,
Natal,	New South Wales,
Victoria,	Queensland,
Tasmania,	South Australia,
Western Australia,	New Zealand.

Provided always that the stipulations of the present treaty shall be made applicable to any of the above-named colonies or foreign possessions on whose behalf notice to that effect shall have been given to the Japanese government by Her Britannic Majesty's representative at Tokio within two years from the date of the exchange of ratifications of the present treaty.

ARTICLE XX.

The present treaty shall from the date it comes into force, be substituted in place of the conventions respectively of the 23rd day of the 8th month of the 7th year of Kayei, corresponding to the 14th day of October, 1854, and of the 13th day of the 5th month of the 2nd year of Keiou, corresponding to the 25th day of June, 1866, the treaty of the 18th day of the 7th month of the 5th year of Ansei, corresponding to the 26th day of August, 1858, and all arrangements and agreements subsidiary thereto concluded and existing between the high contracting parties; and from the same date such convention, treaty arrangements and agreements shall cease to be binding, and, in consequence, the jurisdiction then exercised by British courts in Japan, and all the exceptional privileges, exemptions and immunities then enjoyed by British subjects as a part of or appurtenant to such jurisdiction, shall absolutely and without notice cease and determine, and thereafter all such jurisdiction shall be assumed and exercised by Japanese courts.

ARTICLE XXI.

The present treaty shall not take effect until at least five years after its signature. It shall come into force one year after His Imperial Japanese Majesty's Government shall have given notice to Her Britannic Majesty's Government of its wish to have the same brought into operation. Such notice may be given at any time after the expiration of four years from the date hereof. The treaty shall remain in force for the period of twelve years from the date it goes into operation.

Either high contracting party shall have the right at any time after eleven years shall have elapsed from the date this treaty takes effect, to give notice to the other of its intention to terminate the same, and at the expiration of twelve months after such notice is given this treaty shall wholly cease and determine.

ARTICLE XXII.

The present treaty shall be ratified, and the ratification thereof shall be exchanged at Tokio, as soon as possible and not later than six months from the present date.

In witness whereof the respective plenipotentiaries have signed the same and have affixed thereto the seal of their arms.

Done at London, in duplicate, this sixteenth day of July, in the year of our Lord one thousand eight hundred and ninety-four.

[L.S.]	KIMBERLEY,
[L.S.]	AOKI.

PROTOCOL SIGNED AT LONDON, JULY 16th, 1894.

The Government of Her Majesty the Queen of Great Britain and Ireland and Empress of India, and the Government of His Majesty the Emperor of Japan, deeming it advisable in the interests of both countries to regulate certain special matters of mutual concern, apart from the Treaty of Commerce and Navigation signed this day, have through their respective plenipotentiaries, agreed upon the following stipulations:—

1. It is agreed by the contracting parties that one month after the exchange of the ratifications of the Treaty of Commerce and Navigation signed this day, the import tariff hereunto annexed shall, subject to the provisions of Article XXIII of the Treaty of 1858, at present subsisting between the contracting parties, as long as the said treaty

remains in force and thereafter, subject to the provisions of Articles V. and XV., of the treaty signed this day, be applicable to the articles therein enumerated, being the growth, produce or manufacture of the dominions and possessions of Her Britannic Majesty, upon importation into Japan. But nothing contained in this Protocol or the tariff hereunto annexed, shall be held to limit or qualify the right of the Japanese Government to restrict or to prohibit the importation of adulterated drugs, medicines, food or beverages, indecent or obscene prints, paintings, books, cards, lithographic or other engravings, photographs, or other indecent or obscene articles; articles in violation of patent, trade-mark, or copyright laws of Japan; or any other article which for sanitary reasons, or in view of public security or morals, might offer any danger.

The ad valorem duties established by the said tariff shall, so far as may be deemed practicable, be converted into specific duties by a supplementary convention, which shall be concluded between the two governments within six months from the date of this Protocol; the medium prices, as shown by the Japanese Customs Returns during the six calendar months preceding the date of the present Protocol, with the addition of the cost of insurance and transportation from the place of purchase, production, or fabrication, to the port of discharge, as well as commission, if any, shall be taken as the basis for such conversation. In the event of the Supplementary Convention not having come into force before the expiration of the period fixed for the said tariff to take effect, ad valorem duties, in conformity with the rule recited at the end of the said tariff shall, in the meantime, be levied.

In respect of articles not enumerated in the said tariff, the General Statutory Tariff of Japan for the time being in force shall, from the same time, apply, subject, as aforesaid, to the provisions of Article XXIII. of the Treaty of 1858 and Articles V and XV. of the treaty signed this day respectively.

From the date the tariffs aforesaid take effect, the import tariff now in operation in Japan in respect of goods and merchandise imported into Japan by British subjects shall cease to be binding.

In all other respects the stipulations of the existing Treaties and Conventions shall be maintained unconditionally until the time when the Treaty of Commerce and Navigation signed this day comes into force.

2. The Japanese Government, pending the opening of the country to British subjects, agrees to extend the existing passport system in such a manner as to allow British subjects, on the production of a certificate of recommendation from the British Representative in Tokio, or from any of Her Majesty's consuls at the open ports in Japan, to obtain upon application passports available for any part of the country, and for any period not exceeding twelve months, from the Imperial Japanese Foreign Office in Tokio, or from the chief authorities in the Prefecture in which an open port is situated; it being understood that the existing Rules and Regulations governing British subjects who visit the interior of the Empire are to be maintained.

3. The Japanese Government undertakes, before the cessation of British Consular jurisdiction in Japan, to join the International Conventions for the Protection of Industrial Property and Copyright.

4. It is understood between the two high contracting parties that, if Japan think it necessary at any time to levy an additional duty on the production or manufacture of refined sugar in Japan, an increased customs duty equivalent in amount may be levied on British refined sugar when imported into Japan, so long as such additional excise tax or inland duty continues to be raised.

Provided always that British refined sugar shall in this respect be entitled to the treatment accorded to refined sugar being the produce or manufacture of the most favoured nation.

5. The undersigned Plenipotentiaries have agreed that this Protocol shall be submitted to the two high contracting parties at the same time as the Treaty of Commerce and Navigation signed this day, and that when the said Treaty is ratified the agreements contained in the Protocol shall also equally be considered as approved, without the necessity of a further formal ratification.

It is also agreed that this Protocol shall terminate at the same time the said Treaty ceases to be binding.

In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at London, in duplicate, this sixteenth day of July, in the year of our Lord one thousand eight hundred and ninety-four.

[L.S.] KIMBERLEY,
[L.S.] AOKI.

NOTE.—The tariff annexed to the foregoing is not herein reproduced, it having been superseded by that annexed to the following supplementary convention.

EXCHANGE OF NOTES.

The Earl of Kimberley to Viscount Aoki.

FOREIGN OFFICE, 16th July, 1894.

SIR,—With reference to Article XIX, of the treaty between Great Britain and Japan signed this day, in view of the fact that some of the British Colonies and foreign possessions enumerated in that Article might be prevented from acceding to the present treaty by reason of their inability to accept the stipulations relating to military service contained in Article II. of the said treaty, and in order to avoid further misunderstanding, Her Majesty's government request from the government of Japan an assurance that any of the said British colonies and possessions may accede to the present treaty under the condition that, notwithstanding such accession they shall not be bound by the stipulations of Article II.

I have, &c.,

KIMBERLEY.

Viscount Aoki to Earl of Kimberley.

JAPANESE LEGATION, LONDON, 16th July, 1894.

M. LE COMTE,—In reply to the note of Her Majesty's government, referring to Article XIX. of the treaty between Great Britain and Japan signed this day, and requesting for the reasons given in the said note, an assurance that any of the British colonies and foreign possessions enumerated in that article may accede to the present treaty under the condition, that, notwithstanding such accession, they shall not be bound by the stipulations of Article II. the Government of Japan hereby give the assurance desired.

I have, &c.,

AOKI.

Viscount Aoki to the Earl of Kimberley.

The undersigned, Envoy Extraordinary and Minister Plenipotentiary of His Majesty the Emperor of Japan, in virtue of special authorization from His Imperial Japanese Majesty's government has the honour to announce to Her Britannic Majesty's Principal Secretary of State for Foreign Affairs, that the Imperial Japanese government, recognizing the advantage of having the codes of the Empire which have already been promulgated in actual operation when the treaty stipulations at present subsisting between the Government of Japan and that of Great Britain cease to be binding, engage not to give notice provided for by the first paragraph of Article XXI. of the Treaty of Commerce and Navigation, signed this day, until those portions of said codes which are now in abeyance are brought into actual force.

The undersigned avails, &c.,

AOKI.

Japanese Legation, London, 16th July, 1894.

SUPPLEMENTARY CONVENTION BETWEEN GREAT BRITAIN AND
JAPAN RESPECTING THE DUTIES TO BE CHARGED
ON BRITISH GOODS IMPORTED INTO JAPAN.
SIGNED AT TOKIO, JULY 16, 1895.

(Ratifications exchanged at Tokio, November 21, 1895.)

WHEREAS, by the Protocol signed at London on the 16th day of July, 1894, it was agreed between the Government of Her Britannic Majesty and the Government of His Majesty the Emperor of Japan that the ad valorem duties of the tariff annexed to the aforesaid Protocol should, so far as might be deemed practicable, be converted into specific duties by means of a supplementary convention, to be concluded between the two governments within six months from the date of the Protocol, and;

Whereas this period was extended by subsequent arrangement:

- The high contracting parties have appointed as the plenipotentiaries to conclude a convention for this purpose, that is to say: Her Britannic Majesty the Queen of the United Kingdom of Great Britain and Ireland, Empress of India, Gerard Augustus Lowther, Her Britannic Majesty's Chargé d'Affaires;

And His Majesty the Emperor of Japan, Marquis Satonzi Kimmochi, Junii, first-class of the Order of the Sacred Treasure, His Imperial Majesty's Minister of State for Education, and Acting Minister of State for Foreign Affairs;

Who have communicated to each other their respective full powers found in due and good form, have agreed upon and concluded the following articles.—

1. The tariff annexed to this convention shall be substituted for the ad valorem tariff annexed to the aforesaid Protocol of the 16th of July, 1894; it shall be subject to all the stipulations contained in article 1 of that Protocol, in so far as these are applicable, and it shall come into force one month after the exchange of the ratifications of this convention.

2. The specific duties established by this convention shall be subject to triennial readjustment. Such readjustment shall be based on the difference between the average of the two quarterly rates of exchange adjusted by the Japanese Customs during the six months ending June 30th, 1894, and the average of the rates of exchange adopted by the Japanese Customs for the four quarters preceding that in which each successive period of three years expires.

The schedule of readjusted duties shall be published by the Japanese government three months in advance, and shall take effect immediately upon the expiration of the said period.

It is understood between the high contracting parties that the operation of this stipulation shall be subject to the acceptance of a similar arrangement by the other powers with whom conventional tariffs are now being negotiated by Japan.

3. The quarterly rates of exchange mentioned in the preceding article are the rates determining the comparative values, as entered in the quarterly tables published by the Japanese Department of Finance, of the present Japanese silver yen on the one hand, and of the English pound sterling on the other.

4. The present convention shall have the same duration as the treaty and Protocol concluded on the 16th of July, 1894, of which it is a complement.

5. The present convention shall be ratified, and the ratifications shall be exchanged at Tokio as soon as possible, and not later than six months from the present date.

Done at Tokio, in duplicate, this 16th day of July, 1895.

	(b.) All other kinds.....ad valorem.	10 per cent.
61	All other sorts, pure or mixed with other material, the wool, however, predominating in weight, not specially provided for in this tariff.....	10 "
	NOTE.—It is expressly understood that ready-made clothing and other made-up articles are not included under the heading of woollen and worsted tissues.	
62	Yarns, all sorts, not specially provided for in this tariff.....	10 "
	Zinc—	
63	Block, pig and slab.....100 catties..	0·400
64	Sheet (No. 2 sheet being excluded).....	0·830

WEIGHTS, MEASURES AND COINS.

The catty or kin mentioned in this tariff is the Japanese weight. It is equal to 600 grammes of the metric system of weights, or 1·32277 lbs. English avoirdupois weight.

The pound is the English avoirdupois weight.

The square yard and square foot are the English Imperial surface measures.

The yen=49·8 cts.

RULE FOR CALCULATING AD VALOREM DUTIES.

Import duties payable ad valorem under this tariff shall be calculated on the actual cost of the articles at the place of purchase, production or fabrication, with the addition of the cost of insurance and transportation from the place of purchase, production or fabrication to the port of discharge, as well as commission, if any exists.

RULE FOR THE MEASUREMENT OF TISSUES.

In determining the dutiable width of any tissue the Customs shall discard all fractions of an inch not exceeding half an inch, and shall count as a full inch all fractions exceeding half an inch.

NOTE.—It is understood that selvages shall not be included in the measurement of tissues.

Under Article XV. of the Treaty of 1894 it may be noted each of the contracting parties is to receive the same treatment as may be accorded under any conventional treaty with any other nation.

Since that date conventional treaties have been entered into between Japan and France and between Japan and Germany. In the schedules attached to them are some items not included in the schedule as above—to the benefits of which Great Britain and now Canada become intitled. Such principal items and rates are as follows:—

Articles.	Duty.
ARMS, AMMUNITION, CLOCKS, WATCHES, INSTRUMENTS, APPARATUS TOOLS AND MACHINERY.	
Binocular glasses—	Yen.
Spy glasses, opera glasses, monocular and binocular field and marine glasses—	(Per piece)
(a) Constructed with or mounted in shell, mother of pearl, ivory, gold, silver, platinum, nielles (inlaid) enamelled or otherwise, or other precious materials of fancy and luxury; or garnished with precious stones or pearls.....	0·750
(b) All other kinds.....	0·250
Clocks, standing and hanging, and parts thereof.....	10 per cent.
Instruments, scientific, for drawing.....	10 "
Locomotive engines and parts thereof.....	5 "
Machines, printing.....	5 "
BEVERAGES AND COMESTIBLES.	
Milk, sterilized.....	5 "
DRUGS, CHEMICALS AND MEDICINES.	
Acid, salicylic.....	10 "
Bismuth, subnitrate of..... per 1 kin	0·206
Hops.....	0·029
Potash, bromide of..... "	0·093
" iodide of.....	10 per cent.
Quinine, hydrochlorate or sulphate of.....	8 "
Bromide, N. O. P.....	10 "
Quinine, N. O. P.....	8 "
DYES, COLOURS AND PAINTS.	
Alizarine dyes.....	10 "
Aniline dyes.....	10 "
Logwood extract..... per 100 kins	* 2·150
	*10 per cent
METALS AND METAL MANUFACTURES.	
Iron and mild steel—	
Bolts and nuts for rail.....	10 per cent.
Steel other than mild steel—	
Pig, ingot and slab.....	5 per cent.
Pipes and tubes.....	10 "
Wire, telegraph, other than galvanized wire of iron and mild steel.....	5 "
Steel rails.....	5 "
Steel sheet, galvanized, both plain and corrugated.....	10 "
Tin plate of steel, other than mild steel.....	10 "
OILS AND WAXES.	
Candles of all kinds..... per 100 kins.	2·146
PAPER AND STATIONERY.	
Paper, wall.....	10 per cent.
Paper, printing—	
(a) Weighing not more than 24 lbs. per ream of 500 sheets and measuring not less than 1,086 sq. inches per sheet.....	0·800
(b) All other kinds of printing paper.....	1·163
Paper, all other kinds, including pasteboard.....	10 per cent.

* The lowest rate, either specific or ad valorem duty, shall be applied.

SCHEDULES—Continued.

Articles.	Duty.
	Yen.
TISSUES, YARNS, THREAD, &C.	
Cotton, damasks	10 per cent.
Ginghams	10 "
Taffachelass	10 "
Cotton, mosquito netting	10 "
" flannels	10 "
Plushes and velvets of cotton and silk mixed, the cotton however predominating in weight ..	10 "
Woollen and worsted yarns, plain or dyed—	
(a) For weaving purposes	per 100 kins. 8·000
(b) For other purposes	" 9·169
Balzarine	10 per cent.
Camlets, lastings and crape lastings	10 per cent.
Camlet cords	10 "
China figures	10 "
Flannels—	
(a) Of wool	square yard. 0·044
(b) Of wool and cotton	" 0·030
Mousseline de laine, wholly of wool—	
(a) Gray and white	" 0·015
(b) Dyed and printed	" 0·021
Mousseline de laine, of wool and cotton mixed—	
(a) Gray and white	" 0·018
(b) Other kinds	" 0·021
Orleans and lustres	10 per cent.
Spanish stripes	10 "
Woollen and worsted damasks	10 per cent.
Yarns, jute or hemp for weaving purposes	8 "
" of all sorts not specially provided for	10 "
WINES, LIQUORS AND SPIRITS.	
Champagne and other similar sparkling wines in case of 24 bottles, each bottle containing not more than $\frac{1}{2}$ litre or 12 bottles each bottle containing more than $\frac{1}{2}$ litre and not more than 1 litre	per case. 1·550
Wine—	
Not exceeding 16 degrees of pure alcohol—	
(a) In cask or barrels per 100 litres	1·242
(b) In case containing 24 bottles not exceeding $\frac{1}{2}$ litre each or 12 bottles exceeding $\frac{1}{2}$ litre, and not exceeding 1 litre each	per case. 0·760
Exceeding 16 degrees and not exceeding 24 degrees of pure alcohol—	
(a) In cask or barrels per 100 litres	7·925
(b) In case containing 24 bottles not exceeding $\frac{1}{2}$ litre each or 12 bottles exceeding $\frac{1}{2}$ litre and not exceeding 1 litre each	the case. 0·680
MISCELLANEOUS.	
Cars or carriages, railway, passengers' or parts thereof	5 per cent.
Dynamite	per 1 kin. 0·056
Jewellery, imitation, such as small articles of luxury used for personal adornment made principally of common metals such as aluminium, aluminium bronze, nickel, german silver, argentine, copper, zinc, lead, tin, iron, etc., or also of jet, hardened wood, beads, sheets, horn, celluloid, bones and other similar common materials	10 per cent.
Soap—	
(a) Toilet	per 1 kin. 0·070
(b) Common for washing	per 100 kins. 0·972
Perfumery—	
(a) Toilet soap	per 1 kin. 0·070
(b) Liquid perfumery, essences or extracts of scents, oils, vinegars, waters and alcohols of toilet or scent and other liquids of the same kind	per 1 kin. 0·092
(c) Dry perfumery; salts, powder cosmetics, pomades, pastes and other non-liquid perfumeries for toilet	10 per cent.
NOTE:—The following articles are excepted from perfumery: Natural and artificial musk, civet and ambergris.	

The following countries, although not having conventional treaties with Japan, are however under 'most favoured nation' clauses entitled to the same reduced tariff rates:—

Argentine Republic.

Austria-Hungary, including her customs union.

Belgium.

Brazil.

Denmark, including Faroe Islands and Iceland, but excluding the Danish West Indian Islands.

France, including Algeria, Reunion Island, St. Pierre and Miquelon, Martinique, Guadeloupe, French Guiana and French India.

Germany, including her customs union.

Greece.

Great Britain, including her colonies and foreign possessions, excepting India, the Cape, New South Wales, Victoria, Tasmania, South Australia, West Australia, New Zealand.

Italy.

Mexico.

The Netherlands.

Peru.

Russia.

Siam.

Spain, including Balearic Isles and Canary Islands.

Sweden and Norway.

Switzerland.

The United States of America, including Hawaii and Philippine Islands.

RUSSIAN CUSTOMS REGULATIONS AND FINES.

Cases not unfrequently arise of fines being imposed on vessels by the Russian Customs authorities on account of clerical errors in bills of lading or other ships' papers.

His Majesty's Ambassador at St. Petersburg has expressed the opinion that the proper mode of proceeding in such cases appears to be insufficiently known to British ship-owners, who usually address themselves to the Secretary of State for Foreign Affairs or to the British Embassy at St. Petersburg.

It is essential, therefore, both with a view to avoid delay and in order to secure proper attention to the facts of the case, for the owners or the agents of the vessel or goods on which a fine is imposed to follow the prescribed form of procedure, which is to send a petition, drawn up in the Russian language and furnished with the requisite Russian stamps, to the Imperial Minister of Finance, setting forth all the facts of the case, and praying for a remission or reduction of the fine imposed.

Should the applicants fail by this means to obtain redress, or in some urgent cases, even before a reply is received to their petition, they may apply direct to His Majesty's Ambassador at St. Petersburg, asking him to support their request; and when this course is adopted, a copy of the petition to the Russian Minister of Finance should invariably accompany such communication, but in no case should the complaint be brought to the notice of the Imperial Government, in the first instance, by the channel of His Majesty's Embassy or Consulate.

It should be borne in mind that fines for infractions, however trifling, of the Russian Customs Regulations are not imposed in a vexatious spirit, but rather in order to insure the strict observance of those regulations, a tendency to disregard which has at times been evinced. It is therefore of great importance, in order to avoid the imposition of these fines, that ship-owners and ship-masters should make themselves familiar with the requirements of the Russian Customs Regulations of the 15th May, 1901, a translation of which appeared in No. 569 of the Miscellaneous Series of Diplomatic and Consular Reports, published in October, 1901.

Foreign Office, March, 1906.

TRADE OF CHINA.

No. 1.—STATEMENT showing the Customs Revenue, Imports, Exports and Number and Tonnage of Vessels entered and cleared for China during the Calendar Years 1887 to 1905, together with the Number and Tonnage of British Vessels entered and cleared.

* The imports from Hong Kong come originally from, and the exports to that colony are further carried on to, Great Britain, America, Australia, India, &c., and coast ports of China. In addition to the imports, to which the values given in the above table are confined, the South of China is supplied with opium and other articles imported from Singapore, Siam and other foreign places in native vessels.
